This course examines African American history and culture from its inception with the Transatlantic Slave Trade to its transformation during the Civil War. Topics discussed include the transition from indentured servitude and Native American slavery to African chattel slavery; the origins and rationale behind

the creation of the social category of ¿race;¿ physical and reproductive labor in northern domestic settings and southern plantation settings; methods of resistance; and the multifaceted ways in which African Americans played a part in emancipating themselves.

From panic over the recent West African Ebola outbreak to tensions in post-genocide Rwanda to concerns about religious extremism in the Sahel, high-profile African stories regularly make their way into the American media. Alarming news is layered upon centuries-old negative perceptions of Africa in the U.S. and Europe, offering a picture of a continent and a people in distress, suffering from violence, poverty, corruption, and squandered resources. On the other hand, we see images of serene, expansive landscapes with hardly a human in sight, where concerns over conservation and biodiversity dominate. Less frequently told are stories of everyday life ¿ of love and marriage, school and work, travel and home, ports and highways, or factories and farms. Even

more seldom is an accurate, objective historical perspective a part of the conversation.
How do we understand instances of legitimate and acute crisis alongside the reality that, for many, life goes on as it did the day before? How do we reconcile persistent ¿Afro-pessimism¿ with a new narrative that hails the continent as the economic frontier of the 21st century? What information do we need to take Africa out of the realm of the exotic and approach both its past and present circumstances with a sense of balance and objectivity?
A comprehensive understanding of African history provides a good starting point. This course addresses the diverse and complex history of selected

Modern archeology draws much of its theory and goals from anthropology. This course will show how archaeologists use the fragmentary traces left by past peoples to develop an anthropological understanding of their cultures. We will explore the variety of ways archaeologists investigate such things as prehistoric diet, social life, politics, technology, and religion. Topics to be covered include: the nature of archaeological information, dating techniques, interpretation of material objects, and archaeological ethics. Studies from around the world will be used to illustrate major shifts in human history (the origin of agriculture, the origin of cities, etc.), the range of human adaptation in the past, and the general sequence of social evolution. The course will provide an understanding of how and why we study past societies, as well as the unique contribution archaeology can make to understanding ourselves.

This introduction to biocultural anthropology explores the interactions between human biology and behavior cross-culturally and throughout evolutionary history. After an overview of basic theories and concepts, the course is divided into themes (human evolution, the life course, social organization, and health and disease) that address both classic and cutting-edge topics in anthropological research. This broad foundation will equip students to better understand relevant current events and to pursue additional anthropology courses. This course fulfills the general education requirement for social science.

No prerequisites.
Students must select a recitation. The recitation sections will facilitate small group discussions on lecture topics, assigned readings, and case studies.

This is an introduction to the various disciplines that have been brought to bear in the study of humans and other primates. The course will have an evolutionary perspective as we review living primates (distribution, features of behavior and morphology) and their fossil histories. Particular attention will be paid to how humans have come to look the way we do.

Human beings like to explore the limits of experience and push against a boundary that separates what is known to be possible from what is commonly regarded as impossible. Can we live forever? Can we cure all diseases? Can we levitate? Can we talk to animals? Can we touch fire and not get burned? Can we be in two or more places at the same time? Can we travel through time? Can we turn lead into gold? Can we expand our consciousness in order to experience transcendence? Can the strength of the body be enhanced by focusing the power of the mind? In the history of human experience, Asia has been a cultural crucible for these and related questions that broadly encompass the magical possibility of embodied experience. Taking a broad, comparative perspective on magic, but focusing on concrete examples of the supernatural body in India, Tibet and China, we will study these questions, looking at the way they have been asked, and at the social and cultural consequences of the answers people have given to these questions in different contexts.

THIS COURSE WILL NOT SATISFY A WRITING REQUIREMENT. Undergraduate Seminar. The past is pervasive. We all encounter archaeology in pop culture movies (Kingdom of the Crystal Skull), reality shows (American Unearthed), and on eBay. The past is also powerful. For some people, archaeological materials are museum pieces. Or treasure. But for others, archaeological materials may represent identity, be relics of faith, or useful in justifying modern social inequality. This seminar will explore the differences between professional and cult or fantastic archaeology in terms of investigating and knowing the past, and the goals in doing so. We will critically evaluate concepts of scientific evidence, fieldwork, and interpretation inside and outside of contemporary archaeology. Key themes will include (1) the purposes to which people put the past; (2) controversies over cultural heritage and ancestral claims; (3) alternatives to academic archaeology; and (4) current ethical issues surrounding archaeological remains. These themes will be illuminated through such topics as: ancient astronauts, Atlantis, the Piltdown Man (and more recent frauds) fringe and racial archaeology, looting and museums, and Saddam Hussein using Iraq's archaeological past to justify military aggression.

Combined Section ID: 0026(ANTH/1543/2533) - ANTH 2533(#24438)

Many complex forms of political organization developed in the Ancient Americans (New World). In this lecture course, we will use archaeological and ethnohistoric evidence to examine a variety of prehispanic states in Mesoamerica and Andean South America, including the Maya, Aztec, and Inca. By understanding non-western ideas and strategies of statecraft and rulership, we will challenge preconceived notions and anthropological theories of state.

Make no bones about it--the human skeleton provides a range of information about the individual, such as their biological sex, lifestyle, activity level and health. The extraction of this information rests on the correct identification of each skeletal element. In this course participants will learn how to: identify complete adult bones and teeth, as well as their distinguishing features; complete an inventory of a human skeleton; apply basic analytical methods to estimate age-at-death, biological sex and stature; and complete a basic skeletal report. This course is foundational for students considering anthropological careers in forensic anthropology, bioarchaeology, paleontology and paleopathology, as well as students pursuing careers in health sciences, biomechanics and biology.

Room Characteristics: PeopleSoft - Scheduled (PS)(1)

Undergraduate Seminar. Gender is a key structuring principle of difference and inequality in society, while globalization is a condition characterized by time-space compression and ever-expanding connections across national boundaries. Globalization emerged out of such (and often violent) practices of contact as capitalism, colonialism, socialism, the Cold War, and neoliberalism. This course will explore the intersection of gender and globalization asking how gender shapes processes of globalization and how the role of gender is shifting as national/cultural regulatory systems are no longer able to maintain control over what is recognized as ¿normative¿ in the context of gender roles and gendered practices. Adopting an interdisciplinary approach, this course will draw on a range of materials including scholarly texts, fiction, and film to examine various facets of the interface between gender and globalization in such contexts as labor migration, gendered labor in transnational factories, maritime trade, and the high-tech industries, marriage and family, sex and colonialism, sex work and state violence, new reproductive technologies, as well as queer identities and activism. The particular historical contexts in which we will discuss these themes include colonialism, the Cold War Era, post-socialism, and neoliberalism.

THIS COURSE WILL NOT BE FULFILLING A WRITING REQUIREMENT FOR THIS SEMESTER. This course will examine the social ecology of human nutrition using an evolutionary perspective. It will apply the concepts and principles of anthropology to the study of human nutrition and diet. It asks the questions: Where do cuisines come from? Discussions will focus on the origins of the human diet; human dietary adaptation to diverse ecological and technological situations; Social, cultural, behavioral and ecological factors that influence diet in technologically simple, modernizing and contemporary societies; the globalization of food supply and food security; and methodological issues in studying food habits and assessing nutritional status.

Working in consultation with faculty, advanced students wishing to pursue careers in anthropology have the opportunity to extend academic training to a practical work experience in a particular subfield of anthropology. Students will be required to submit a preliminary proposal to a faculty sponsor preferably sometime during the prior term, or should respond to faculty listings of specific internship projects that will be posted. Examples of projects are physical anthropology research at the Pittsburgh Zoo; analysis of archeological artifacts; local ethnographic or folklore research.

Bldg: TO BE ARRANGED **Room:** TBA **Days:** TBA **Time:** 00:00 - 00:00 **Instructor:** Cabot,Heath

Class Enrl Cap: 35 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0

An honors course offered to undergraduate anthropology majors and minors for more extensive study in the student's area of specialization in anthropology. Should be taken only after student has exhausted all courses offered in the Anthropology Department dealing with the extensive study subject. Then a student consults with a faculty member (in the Anthropology Department) who specializes in the study subject. When the student obtains this faculty member's permission to take a "readings" course under his/her direction, the student may register for the course. Interested students should consult the Anthropology Departmental office for specific registration procedures.

This course provides an overview of the key prehistoric and early historic developments that occurred in the territories of the former Soviet Union. This investigation will include: early evidence of animal and plant domestication in the Neolithic, the emergence of Indo-European languages, innovations in metallurgy and the rise of complex societies in the Bronze and Iron Age periods, and the impact of early `nomadic¿ societies and empires. The course will cover a vast time period, stretching from the earliest occupation evidence in the Paleolithic period to the Mongol Empire of the 13th century AD. The primary focus of the course will be on evaluating the main lines of archaeological evidence in order to interpret and understand the key cultural, economic, technological and ideological developments noted above. However, the course will also investigate the substantial role that the discipline of archaeology and interpretations of the past have played in the larger socio-political dynamics of the Soviet and Post-Soviet periods. Therefore, this course will appeal to a broad range of students interested in comparative studies of Old World archaeology as well as cultural and historical studies of the Soviet and Post-Soviet Union.

ANTH 2533 1100 24438 ANCNT STATES IN THE NEW WORLD Seminar 3

Bldg: TBA **Room:** TBA **Days:** TuTh **Time:** 16:00 - 17:15 **Instructor:** MacLellan,Jessica Anne

Class Enrl Cap: 5 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: Latin American Studies
Room Characteristics: PeopleSoft - Scheduled (PS)(1)
Combined Section ID: 0026(ANTH/1543/2533) - ANTH 1543(#24437)

Many complex forms of political organization developed in the Ancient Americans (New World). In this lecture course, we will use archaeological and ethnohistoric evidence to examine a variety of prehispanic states in Mesoamerica and Andean South America, including the Maya, Aztec, and Inca. By understanding non-western ideas and strategies of statecraft and rulership, we will challenge preconceived notions and anthropological theories of state.

ANTH 2537 1030 17329 SPEC TOPCS COMP ARCHLGY PART 2 Seminar 2

Bldg: Wesley W Posvar Hall **Room:** 01102 **Days:** F **Time:** 12:00 - 13:30 **Instructor:** Arkush,Elizabeth N

Class Enrl Cap: 12 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0

This seminar will explore the formative role that enslavement, captivity, and unfreedom have played in the long-term development of human societies from prehistory to the modern era. Utilizing a comparative approach that draws on numerous case-studies from various global slave trades, we will examine both theoretical and practical approaches to the study of unfree groups in the archaeological and historical records. The topics covered in each session are intended to be broad, allowing participants to pursue and develop avenues of investigation and discussion that are of most interest to them. The seminar will meet on selected Fridays approximately once a month, with sessions divided between those dedicated to the discussion of broad but nevertheless significant theoretical questions and those in which we will present and examine a wide-range of case studies. Given the difficulties associated with the archaeological study of unfree groups, participants are encouraged to engage not only with material culture but also historical, literary, and ethnographic data. ANTH 2537 is the second half of a two-term course; nevertheless, prior enrollment in the fall term is not required for enrollment in the spring term.

ANTH 2541 1020 28846 REGIONAL SETTLEMENT PATTERNS Lecture 3

Bldg: TBA **Room:** TBA **Days:** W **Time:** 11:00 - 14:00 **Instructor:** Drennan,Robert D

Class Enrl Cap: 12 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: Latin American Studies
Room Characteristics: PeopleSoft - Scheduled (PS)(1)

Regional settlement patterns are the cumulative result of decisions people make abut where to live in a landscape whose features are natural, social, and cultural. The rationale behind those decisions is thus embedded in patterns of human distribution across the landscape. The seminar will begin by considering how settlement analysis can tell us about resource use and control, the production and distribution of goods, belief systems and ritual activities, the exercise of political power, and more. Since settlement analysis is about people and their distributions across a landscape, it is inescapably a form of demographic analysis. This exploration of the array of things that settlement analysis can potentially tell us about what happened in prehistory is an essential precursor to a consideration of best practices in regional survey. That is, only after careful consideration of what we want to find out can we think productively about what we need in the way of archaeological datasets and about field methods that will collect data that can sustain the analysis we need to perform.
Prerequisites: Archaeological Data Analysis I and II; Archaeological applications of GIS helpful. Will not be offered again.

ANTH	2782	1020	27836	SPECIAL TOPICS IN CULTRL ANTH	Seminar	3	

Bldg: TBA **Room:** TBA **Days:** M **Time:** 16:00 - 18:30 POWER & GOVERNANCE **Instructor:** Cabot,Heath

Class Enrl Cap: 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: Class Materials on Reserve at Hillman Library, Asian Studies, European Union Studies, Global Studies, West European Studies
Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This seminar will explore the relationship between governance, institutionalized power, and human social life. We will consider explicit ways in which power over self and other is enacted. We will also ask how power is instituted tacitly in everyday routines and practices, in how we carry our bodies, move through space, and undertake our work. Finally, we will examine how diverse modes of power and governance include or exclude, enabling or prohibiting access to social and political communities; to speech and representation; and to rights and livable livelihood. The course will entail a significant engagement with key theoretical approaches, as well as close reading of both classic and more recent ethnographic studies that explore these questions from a diversity of geographical and historical perspectives. Specific topics explored may include the role of states, institutions, and bureaucracies; the rule of law; the built environment, landscapes, and objects; border regimes, policing, and regulatory practices; and the governance of care, ethics, and morality.

The subject of this course is the traditional stories¿the myths, legends, and folktales¿of the ancient Greeks and Romans. Such stories represent the collective experience, attitudes, and aspirations of the Greeks and Italian people who created them and kept them alive over many centuries without the benefit of literacy. It is this survivability which points to the meaning and ultimate value of the stories. They survived because they possessed some compelling attraction, whether entertainment value, explanatory power, or social function, which encouraged their transmission from generation to generation. Part of the purpose of the course will be to discover what that ¿compelling attraction¿ was.

Helen of Troy, Achilles, Sappho, Pericles' lover Aspasia and Pericles himself, Plato, Alexander the Great. These are names familiar to many of us, but to what extent was these individuals' gender an element of their achievement and fame? Our course attempts to answer this question by examining the ancient Greek and Roman civilizations from the perspective of male and female. We shall proceed by topic, focusing on legal status and citizenship, marriage, the family, the citizen life course, public roles, education, sexuality, religion, popular attitudes, and the views and conceptualizations of ancient social and political theory. Throughout we shall isolate and discuss factors determining or conditioning the peculiar features of the gender roles before us and especially those that seemed to have prompted departures from the prevailing norms. Readings will include a textbook of modern historical narratives, and selections of Athenian comedies by Aristophanes and tragedies by Euripides. Throughout, course subject-matter will be illustrated by films.

How can we understand our world? In western culture, science dominates all our answers to this question. But there are other ways. They can be found in the mythologies of ancient and modern peoples. This course will compare the scientific and mythological ways of seeing the world and their more subtle connections. In particular, we will turn to the remarkable events in Ancient Greece of 800-400 B.C. and discover how the scientific approach actually grew slowly out of mythological thought itself.

This undergraduate survey introduces students to current themes and approaches in the archaeology of the ancient Mediterranean world. The class begins with an overview of the history and methods of archaeology. The focus then shifts to thematic treatments of key subjects in Mediterranean archaeology, such as

the disparities between rural and urban landscapes (e.g., the fertile agricultural lands of Sicily vs. the built environment of Ephesus in Turkey), the material remains of ritual and cultic activity, domestic assemblages, and the ways in which politics, expressions of identity, and cultural exchange have shaped the material culture of the ancient Mediterranean region. The course concludes with a discussion of the reception of antiquity in our own society, and special emphasis is placed on the ways in which modern biases impact interpretations of the past.

In this course students will undertake an in¿depth investigation into the political, cultural and literary life of Rome during what is generally regarded as the period of greatest efflorescence in Roman art, architecture and literature, and of physical transformation in the image of the city itself, i.e., the Augustan Age, from roughly 27 BCE ¿14 CE. This was a critical period in Roman history and in the history of Europe, when Rome consolidated its power as the political and administrative nerve¿center of a Mediterranean Empire and Augustus, as sole ruler of that empire, created the enduring model of what an emperor is and does. Universally recognized as the savior of Rome and its empire after ending protracted and bloody civil wars, Augustus was seen as bringing in a new age and a rebirth of the city and launching a cultural program that promoted literary and artistic production and the renovation of the city. Urbs Roma and Italy will be the site of our investigation. A primary focus will be on the dynamic forces that sustained the powerful energies of creative renewal.

This course is a survey of Roman history from the founding of the city of Rome in the 8th Century BCE to her zenith when her reign stretched from Britain in the West to the Tigris and Euphrates in the East and, finally, to her gradual overexpansion, mismanagement, and decline. This class will investigate Rome¿s transition from monarchy to republic and how Julius Caesar and a bloody civil war pushed control of the state into the hands of an emperor. As we read a modern narrative history of Rome along with the works of ancient historians, we will examine how she acquired and governed her empire; under what forms of government and under whose leadership the affairs of the Roman People were administered; and what causes led to the breakup of the Roman Empire.

Simultaneously, we shall discuss how the idea of Rome still exists today and how Roman influences continue to pervade and influence our modern culture. Class time will be devoted to lecture, visual presentations (slides, videos, Power Points), as well as possibly student reports.

CLASS 1240 1000 29336 EVIL FROM ANTIQUITY TO PRESENT Lecture 3

The course presents an overview of the legal systems of ancient Greece (especially classical Athens) and Rome (especially the late Republic and early Principate), with particular attention to the interconnections of law with the societies in which those legal systems were embedded. Within this general framework, the instructor will emphasize the following themes: (1) legal interventions in private life (for example, marriage, sexual conduct, the definition of legitimacy, and voluntary associations); (2) the differential design and enforcement of the law according to social class, gender, age, and so on; and (3) survivals of classical law in modern--and especially our own--legal systems.

Combined Section ID: 0093(RELGST 1130/CLASS 1432/HIST 17)- RELGST 1130(#10485), HIST 1776(#10491)

This course will examine the many different and often competing forms of Christianity that existed during the first five centuries of our Common Era. We

will include an historical survey of Mediterranean culture and society in the historical Roman Empire to help us understand the ways in which Christianity developed in relation to the philosophical, sociological, theological, and political environment of this period. We will also focus on the contribution of the early varieties of Christianity to modern western views of the relationship between the individual body and society. Specifically, we will begin with an examination of Greco-Roman "religiousness" and attitudes toward the body as part of the natural order comprising one's duty as a "citizen." Such views will then be compared to the emerging Christian view that denied civic duty to an inferior, material world, by emphasizing individual identification with "a commonwealth in heaven."

CLASS 1524 1030 16541 ROMAN ARCHITECTURE Lecture 3

Bldg: TBA **Room:** TBA **Days:** MW **Time:** 16:30 - 17:45 **Instructor:** Weis,H Anne

Class Enrl Cap: 10 **Class Enrl Tot:** 0 **Class Wait Cap:** 10 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req., European and Eurasian Studies, West European Studies

Combined Section ID: 0907(ARC 1152/ARC 2152/CLASS 1524) - ARC 1152(#16540), ARC 2152(#29378)

The course will examine the development of Roman architecture from its origins in Etruria and Central Italy to the Middle Empire (ca. 150 AD). Special attention will be given to the relationship of architectural forms, types and functions to changes in Roman politics and society and the significance of materials and outside influences on the development of local Italian traditions and forms. The interaction between Roman architectural forms and local traditions in the provinces to create a Roman imperial "Koine" will be treated only in passing.

CLASS 1650 1010 27173 WARFARE: ANCIENT MEDITERRANEAN Seminar 3

Studies, West European Studies
Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

Since the dawn of civilization, warfare has been a constant threat to society. Although the material remains of ancient warfare survive in the archaeological record, the literary accounts of Greco-Roman authors provide us with additional evidence to reconstruct developments in, and attitudes toward, armed conflict in the ancient Mediterranean region. This undergraduate course surveys the literary and material evidence of Greek and Roman warfare. Significant battles, developments, strategies, and attitudes are presented chronologically, and special attention is paid to issues of biological and chemical warfare, votive dedications and war trophies, casualties and commemoration, civilian impact, and the effects of post-traumatic stress disorder. This class is a designated W-course, so considerable attention will be paid to developing critical reading, writing, and oral presentation skills.

CLASS 1720 1030 10959 SANSKRIT 2 Lecture 3

Room Characteristics: (1), PeopleSoft - Scheduled (PS)(1)

Rhetorical Process is an introduction to the study of rhetoric as persuasive communication and to its function in society. The objective of this course is to give students a sense of the significant role that rhetoric plays socially, politically, and culturally, and to introduce students to a variety of traditional and contemporary approaches to the analysis of rhetorical action. Rhetoric as persuasive communication is used in political speeches, public arguments, news reporting, public relations, editorials, advertising, music, resistance movements and other forms of oral, visual, and textual appeals to the public. In this course, we will learn the origins of the study of rhetoric, how to recognize it in action, how to apply it to create persuasive arguments, and how to use it in interpreting the messages we receive in everyday life. Evaluation by objective midterm and final exams, recitation performance, and reading response paper.

Class Enrl Cap: 22 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: Writing Intensive Course (WRIT), Class Materials on Reserve at Hillman Library
Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

The purpose of this course is to explore rhetoric and culture through the lens of memory. Collective memory, as the phrase suggests, is the discursive group activity of interpreting the past. It is a misconception that we â¿¿haveâ¿ memory; memory is something that we â¿¿do.â¿ Just as all the memories of my life make me who I am, the collective memories of a culture enact a shared purpose, continuity, and identity. The course is divided into units, all combining readings on theory and practice, surveying the functions of memory, public memory, memory in popular culture and media, epideictic rhetoricâ¿¿s role in memory, etc. In addition to exams, students write a detailed analysis of an artifact or specific ceremony/ritual/tradition of their choosing illustrating the memory of a community.

COMMRC	1103	1020	27223	RHETORIC AND CULTURE	Lecture	3	

Bldg: TBA **Room:** TBA **Days:** TuTh **Time:** 11:00 - 12:15 RHET OF SPACE & PLACE IN W PA **Instructor:** Bruce,Caitlin F

Class Enrl Cap: 22 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: Writing Intensive Course (WRIT), Urban Studies
Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

In communication studies scholars have been increasingly interested in the role of places and spaces in impacting public memory, national and local identity, and urban processes asking questions like: How does a city develop a sense of identity? What does it mean to feel a connection to place versus an abstract sense passing through spaces? What was it like working in Pittsburgh's steel mills; to live in the Hill District before and after urban renewal?

How did the University of Pittsburgh's Cathedral of Learning and nationality rooms come into being in the wake of world wars and a great depression? In this writing course, we draw on scholarship about space and place to explore these questions with a focus on Pittsburgh and its regions. Students will have the opportunity to consult local archives (Teeny Harris CMOA; Rivers of Steel; University of Pittsburgh Nationality Room Archives), visit resonant Pittsburgh spaces (Carrie Furnaces, The Vanka Murals, Randyland), to develop papers that explore questions of space, place, and regional identity. Students will learn how to do research with primary materials, and to develop their writing skills.

COMMRC 1105 1050 26425 TELEVISION AND SOCIETY Lecture 3

Bldg: TBA **Room:** TBA **Days:** MWF **Time:** 13:00 - 13:50 **Instructor:** Blackledge,Olga

Class Enrl Cap: 35 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: Children's Literature
Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

In this course, students will learn to critically engage, interpret, and evaluate a variety of media and cultural artifacts produced by the television industry, uncovering their multiple meanings and understanding the circumstances surrounding their production. In surveying contemporary television as the ¿content industry,¿ we will explore a wide range of popular texts, including commercials, music videos, news reports, web videos, and television programs from Mad Men to Mister Rogers¿ Neighborhood, and examine topics such as narrative structure, character development, filming and editing techniques, sound design, and mise en scène. In emphasizing the close relationship between technology, aesthetics, and meaning, we will pay special attention to the ways in which television content is made possible and constrained by economic systems, production conventions, and cultural politics. We will also examine historical and contemporary theories of television studies (e.g. auteur theory, audience studies), placing academic perspectives in conversation with the media they aim to describe.

COMMRC 1105 1100 24684 TELEVISION AND SOCIETY Lecture 3

Bldg: TBA **Room:** TBA **Days:** MWF **Time:** 11:00 - 11:50 **Instructor:** Blackledge,Olga

Class Enrl Cap: 35 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: Children's Literature
Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This class examines the social, political, and economic impact of television on U.S. society. Topics covered typically include the history and industrial structure of U.S. television, methods for analyzing television texts, audience analysis, news media, and media reform movements and activism.

COMMRC 1106 1050 10435 SMALL GROUP COMMUNICATION Lecture 3

Bldg: TBA **Room:** TBA **Days:** MW **Time:** 16:30 - 17:45 **Instructor:** Dutcher,James Arthur

Class Enrl Cap: 30 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Room Characteristics: PeopleSoft - Scheduled (PS)(1)

The purpose of this class is to examine the theories and principles of small group communication. Topics covered will include group formation and decay, group satisfaction, group cohesiveness, verbal and nonverbal communication in the group, leadership, and problem solving in the group. Although various types of groups will be discussed, the primary focus will be on communication in task groups.

COMMRC 1109 1040 10284 NONVERBAL COMMUNICATION Lecture 3

Bldg: TBA **Room:** TBA **Days:** MW **Time:** 15:00 - 16:15 **Instructor:** Blackledge,Olga

Class Enrl Cap: 35 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: Gender, Sexuality & Women's St
Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

Nonverbal communication focuses on how people communicate nonverbally¿without words. It includes topics such as vital signs, body size and shape (and the impact that has on your effectiveness), cosmetics, dress, touch, body movement, facial expressions, the power of an individual¿s eyes, voice, time, the impact of space on communication and more. Nonverbal topics are applied to important areas of life and business, such as how to present yourself, lying,

politics, law, health care, culture, on the job, in social media and in marketing/branding.

COMMRC 1120 1010 27225 RHETORIC OF COLD WAR Lecture 3

Bldg: TBA **Room:** TBA **Days:** TuTh **Time:** 13:00 - 14:15 **Instructor:** Johnson,Paul Elliott

Class Enrl Cap: 22 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: Writing Intensive Course (WRIT), Global Studies, Russian & East European Studies
Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

The Cold War is a key event in understanding the history¿and present¿of American politics. The specter of atomic destruction, a world-historical ideological class between capitalism and communism, two `hot¿ wars (Korea and Vietnam) each with outcomes ranging from ambiguous to disastrous, domestic struggles for civil rights, the birth of the modern American conservative movement and the central conflict between the Soviet Union and the United States: these are the contexts for the class, which surveys films, speeches, propaganda, and media of the era to make sense of how the Cold War is fought, and its legacies today. The class is organized around several topics, including the Cold War¿s Origins, Atomic Threat, the Red Scare, Civil Rights, and the Origins of Modern Conservatism. Over the semester, students will be expected to make one presentation, take a midterm examination, actively participate in class discussions, and write a paper organized around Cold War cinema.

COMMRC 1122 1060 25955 MEDIA CRITICISM Lecture 3

Bldg: TBA **Room:** TBA **Days:** MW **Time:** 15:00 - 16:15 **Instructor:** Fursich,Elfriede Maria

Class Enrl Cap: 22 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: DSAS Diversity General Ed. Requirement, Writing Intensive Course (WRIT), Children's Literature, SCI Diversity General Ed. Requirements
Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course introduces students to a variety of critical approaches to media analysis. Students will learn how to examine the ways in which meanings are created in the content, structure, and context of mediated communication. The main focus of the class is on media representations of others and the role of media in enabling cultural diversity. Specific sessions will highlight media portrayals of ethnicity, race, gender, class and representations of people across borders. The course places current forms of media content in social and historical perspective and considers how we can respond with constructive criticism. This class also fulfills the Diversity General Education requirement.

COMMRC 1123 1000 28833 RHETORICAL CRITICISM Lecture 3

Bldg: TBA **Room:** TBA **Days:** TuTh **Time:** 13:00 - 14:15 **Instructor:** Clarke,Lynn Evette

Class Enrl Cap: 22 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: Writing Intensive Course (WRIT)
Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course takes students on a journey through the history, methods, and practice of modern rhetorical criticism. By journey¿s end, you¿ll be able to (1) describe contemporary rhetorical methods for analyzing and evaluating communication that tries to influence and persuade; (2) apply these methods to images, music, tweets, advertising, buildings, speeches, and other visual, aural, and tactile artifacts you encounter in everyday life; (3) and produce clear, compelling essays that showcase your newly honed criticism skills. Not only will you come away with greater appreciation for the subtle ways everyday artifacts try to influence thinking and behavior; you¿ll also learn tools to explain these subtleties and be better prepared to critically accept or resist. Students write and revise essays, contribute to guided peer reviews and discussions, and design a proposal for an original research project on one or more artifacts of interest to them. There are no exams.

Gender, sexuality, and women are focal points in human rights controversies today. This upper-level, writing-intensive course, introduces undergraduate students to public advocacy about human rights both the affirmation and the denial of human rights. Because the subject is broad, the class will only be able to touch on a series of significant instances of such public address, concentrating primarily on advocacy concerning bias crimes in the United States. In addition, the class familiarizes students with the practice of message analysis and evaluation through an emphasis on useful communication concepts and classroom exercises, readings, and writings. Students demonstrate their ability to perform message analysis and evaluation by conducting a sustained study of a series of related public statements addressing an aspect of human rights. Finally, students will develop their skills for speaking and listening across significant differences in backgrounds and points of view in dealing with controversial topics. The course has been designed to help the student to improve their writing abilities. Students will write three papers demonstrating their ability to analyze and interpret statements concerning human rights. The method of instruction includes lecture, discussion, film and practice workshops. Considerations of gender, sex, race, sexuality, and class are interwoven throughout the course materials and discussions. This course counts toward the major and minor in Gender, Sexuality, and Women's Studies as well as the

This course helps us investigate questions that will be crucial for tomorrow's communities of inquiry. How should we understand creativity, imagination, and invention? What are the conditions most conducive to innovation? What can histories of creative individuals and creative groups tell us about the origins of, to use the TED lingo, ideas worth spreading? This course examines creativity in a variety of contexts, both scientific and artistic. It draws on the best work in a number of disciplines, principally rhetoric but also philosophy of science, literary theory, economics, and intellectual history. And students will have the opportunity to develop projects on case studies of their choosing.

What and how we communicate to each other often depends on material technologies that mediate our communication. The course focuses on changes in private or public communication when it is mediated by information and communication technologies ¿ today¿s ¿new media.¿ What is the difference between ¿new media¿ and other media? How have new media technologies transformed our society, communities, personal identities and daily lives? Has the character and the quality of interpersonal communication changed? Do new media technologies make it easier to foster democratic participation and social engagement? Or do they, instead, diminish the quality of discussion and make us vulnerable to unprecedented levels of surveillance? We will learn more about the history of various new media technologies and then consider some of the key debates about the role of new media in the contexts of interpersonal, organizational, and political communication.

One of the primary objectives of the course is to provide students with the opportunity to integrate the theory and concepts of their communication and related courses with their on-site experience in a professional environment. To register for the course the students must be preapproved for an internship by one of the communication department advisors. The internship itself must meet certain department requirements. The purpose of the seminar is to allow students to compare/contrast their experience with their peers. It is also an opportunity for students to discuss any issues or concerns relevant to their experience on-site with the instructor and receive any necessary guidance. Class/internship requirements: 12 to 15 hours on-site; provide a weekly email progress report; develop a professional resume¿ and portfolio; complete a written evaluation of the experience. Grading is S/N. Students whose schedules prevent attendance at seminars are required to meet with the instructor regularly.

This course is the continuation of first-year Chinese I. It is designed to enhance the Chinese proficiency in all the four skills (listening, speaking, reading and writing) of those who have finished one semester of CHIN class at the University of Pittsburgh or its equivalent. Students continue to develop the ability to communicate in Chinese through the consideration of essential culture themes, language functions, and authentic situation as they acquire the structures and lexicon to work with written language, conversation, and composition. By the end of the semester, students should be able to conduct simple, practical conversation, and to read and write short passages on a variety of everyday topics such as transportation, dinning, asking directions, lodging, travel, etc.

Prerequisite(s): CHIN0001 (MIN GRADE `C-¿)

This course is offered in every Spring term.

This course is continuation of Second Year Chinese 1. It is designed to enhance the Chinese proficiency of those who have successfully completed three semesters of CHIN class at the University of Pittsburgh or its equivalent. In addition to bringing the students¿ proficiency in the four skills (listening, speaking, reading and writing) to a higher level, the course also aims to broaden the students¿ knowledge about various aspects of culture in modern China. By the end of the semester, students should be able to carry out coherent conversations in various social contexts, read authentic materials on common topics pertaining to personal and social life, and write short essays using structures and discourse devices on those topics.

Prerequisite(s): CHIN0003 (MIN GRADE `C-¿)

This course is offered in every Spring term.

Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)
Combined Section ID: 0772(JPNSE/CHIN/0081) - JPNSE 0081(#24872)

The purpose of this course is to encourage a greater understanding of East Asian peoples and cultures and the nature of mutual perceptions between the peoples of East Asia and the West, particularly America and particularly during pre-modern and modern times (late 19th Century to the present). Material used for our exploration of this topic will include three main texts and a variety of short additional readings, movie clips, and online materials. Focus will be on the images and feeling-based perceptions generated by the interaction of East Asian and Euro-American culture, politics, art, literature and religion during this period.

CHIN 0085: Revolution, Involution, and Identity in Modern Chinese Culture

This course provides an interdisciplinary introduction to Chinese society and culture from the turn of the 20th century to the present. Specifically, it focuses on the notions of revolution, involution, and identity that are important in understanding modern Chinese culture and society. Exploring the dynamic between change and continuity in modern Chinese history, it seeks to examine concepts such as empire, nation, modernity, and revolution, and investigate identity formations in national, ethnic, gender, and individual levels. It will cover such topics as social changes, historical consciousness, urban life, popular culture, and the values and ideas that captivate contemporary people¿s imagination. Cultural orientations of Hong Kong, Taiwan, and Tibet will also be explored.

CHIN 1010 1010 29621 THIRD-YEAR CHINESE 2 Lecture 3

Class Enrl Cap: 11 **Class Enrl Tot:** 0 **Class Wait Cap:** 10 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Room Characteristics: Media - Data Projector/Monitor(1), Seating - Moveable(1), PeopleSoft - Scheduled (PS)(1)

CHIN1033 is designed for students who have achieved advanced level proficiency in Chinese language. It aims to consolidate and encourage students to optimally use their language skills and knowledge that they have acquired over the past five or more semesters. Students will continue to improve their oral proficiency, especially in speeches and argument at a discourse level. Further, the course emphasizes on the development of reading, writing and analytical skills, including reading strategies such as skimming and scanning, and rhetorical strategies in composition. Students will read and critically comprehend a variety of texts from Chinese newspaper/magazine articles, TV/films, literary works, and practice writing functional, narrative and argumentative texts. At the end of the course, students will become familiar with various forms of Chinese texts across multiple genres and improve skills in interpretative reading and presentational writing and speaking.

Prerequisite: Completion of CHIN1009 with at least a grade of B-.

CHIN1089: The World of Chin: Literature and Culture of Middle-Period China (Tang through Song Dynasties)

This course examines the literature and culture of middle-period China (ca. the early 7th century to the late 13th century), which encompasses the great Tang (618-906) and Song (960-1276) dynasties. During this period, China was the world¿s most powerful, wealthy, and culturally sophisticated society. It was also a time of profound social, political, intellectual, and cultural transformations. This course introduces the major literary texts, genres, and authors within their historical contexts during the Chinese middle period. It covers important forms such as the shi poetry and ci lyrics as well as classical tales and allegorical prose; analyzes literary conventions, stylistic developments, and traditions of literary criticism and movements that are significant to this time period. Discussions will also touch upon intersections between literature, history, memory, everyday life, and popular beliefs and religion. Readings, lectures and course work all in English. No foreign language prerequisite.

The purpose of this course is to encourage a greater understanding of East Asian peoples and cultures and the nature of mutual perceptions between the peoples of East Asia and the West, particularly America and particularly during pre-modern and modern times (late 19th Century to the present). Material used for our exploration of this topic will include three main texts and a variety of short additional readings, movie clips, and online materials. Focus will be on the images and feeling-based perceptions generated by the interaction of East Asian and Euro-American culture, politics, art, literature and religion during this period.

Combined Section ID: 0054(JPNSE 1035/2035) - JPNSE 2035(#29380)

This course will provide an introduction to how native speakers of Japanese use the language in context, with particular attention given to how this usage differs from that of American English. The course is divided into three major sections, covering speech acts (e.g., apologizing, refusing, complimenting, etc.), language forms (e.g., chotto, mono, gendered speech styles, etc.), and honorifics. Students will read articles on pragmatic aspects of Japanese. The instructor will lecture and lead discussion on specific issues and the appropriate use of the language.

Room Characteristics: Media - Data Projector/Monitor(1), Seating - Moveable(1)
Combined Section ID: 0007(JPNSE 1040/JPNSE 2040) - JPNSE 2040(#29563)

This course presents an introduction to the language of Japan's classical literary texts such as Tale of Genji and Tale of the Heike. The readings include both prose and poetry. The class begins with the complete text of Hojoki (An Account of my Hut, 1212), and moves on to other selections from the classical period as time permits. Literary and linguistic techniques are discussed, and the relationship to expressions in the modern language is analyzed. Reference materials dealing with classical Japanese language and literature are introduced. No recitations.

Attributes: DSAS The Arts General Ed. Requirement, DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Geographic Region General Ed. Requirement, Class on Reserve at Hillman Library, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req., Asian Studies
Room Characteristics: Media - Data Projector/Monitor(1), Seating - Moveable(1), PeopleSoft - Scheduled (PS)(1)
Combined Section ID: 0059(JPNSE 1058/2058) - JPNSE 2058(#29381)

This course focuses on the century-long transnational exchange in two genres that make up the rich cinematic heritage of the U.S and Japan: the Western and the samurai film. Watching American and Japanese films in alternation, we will consider such topics as: what position do these two genres have in their respective film traditions? How do these films explore social and political conflict in their respective countries? What is the attraction of foreign genres in American and Japanese markets? How do films from different cultural traditions share similarities in narrative, character types and worldview? How do the ¿grammar of the western¿ and the ¿grammar of the samurai film¿ translate to different cultural contexts? Students will be introduced to representative critical analysis of the two genres and have the opportunity to develop their own analysis of films.

Combined Section ID: 0044(JPNSE/1070/2070) - JPNSE 2070(#27152)

Japan may be popularly known for things like sushi, anime, and Nintendo games, but what about its music? Like language and food, Japan offers a wealth of unique music styles that reflect people¿s emotions, thoughts, and aesthetics. Using music as a window, this course is designed for you to learn about the history and culture of Japan. We will approach Japanese music from political, religious, sociological, and economic perspectives to see how music is formed and how it influences society in each specific time period. Through the historical survey of Japanese music, we can learn the universality of human creative expressions and processes. This course introduces basic musical concepts and terminologies necessary to analyze music in both English and Japanese. We will also talk about issues of preservation and modernization often discussed in the field of Ethnomusicology. We will examine a variety of musical genres ¿ Gagaku, N¿h, Bunraku, Kabuki, Miny¿, Kouta, Enka, and J-Pop ¿ from the 8th century to the present.updated: 1/62020

Combined Section ID: 0830(JPNSE/2080/1080) - JPNSE 2080(#29201)

A critical study of three major dramatic genres of Japan¿NOH, Bunraku and kabuki¿in cultural origins. Areas to be explored are the use of masks in the world of the NOH theatre, the kabuki with its female impersonators and the near-life-size puppets of the Bunraku. Also discussed is the impact that NOH and Kabuki have had on modern Japanese and non-Japanese theatrical and film genres.

JPNSE 1908 1060 14754 DIRECTED WRITING FOR MAJORS Lecture 1

Bldg: TO BE ARRANGED **Room:** TBA **Days:** TBA **Time:** 00:00 - 00:00 **Instructor:** Staff

Class Enrl Cap: 35 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: Writing Intensive Course (WRIT), Asian Studies

This 1-credit course combines with another JPNSE non-language course to make the course writing-intensive. This course is only available to Japanese majors. Students who enroll in Directed Writing will go through a more intensive and directed writing process as they complete writing assignments related to the course that is taken in conjunction with Directed Writing.

CHIN 1999 Capstone Senior Project

As a culminating phase of all Japanese Majors before graduation, this course is designed to enable the graduating seniors to undertake a project that reflects the continuity and coherence of all Japan-related knowledge and skills acquired thus far. The objective of the course is to provide students with skills and a set of guidelines on how to complete the Senior Project through integrating all the courses that seniors have completed thus far both at Pitt and in Japan focusing on the integration between culture and language, traditional Japan and modern Japan, as well as learning experiences gained both at Pitt and abroad

JPNSE	2035	1010	29380	PRAGMATICS OF JAPANESE	Lecture	3	

Bldg: TBA **Room:** TBA **Days:** TBA **Time:** TBA **Instructor:** Staff

Class Enrl Cap: 5 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Room Characteristics: PeopleSoft - Scheduled (PS)(1)
Combined Section ID: 0054(JPNSE 1035/2035) - JPNSE 1035(#29197)

This course will provide an introduction to how native speakers of Japanese use the language in
context, with particular attention given to how this usage differs from that of American English. The course is divided into three major sections, covering speech acts (e.g., apologizing, refusing, complimenting, etc.), language forms (e.g., chotto, mono, gendered speech styles, etc.), and honorifics. Students will read articles on pragmatic aspects of Japanese. The instructor will lecture and lead discussion on specific issues and the appropriate use of the language.

Bldg: TBA **Room:** TBA **Days:** TBA **Time:** TBA **Instructor:** Staff

Class Enrl Cap: 3 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Room Characteristics: Media - Data Projector/Monitor(1), Seating - Moveable(1)
Combined Section ID: 0007(JPNSE 1040/JPNSE 2040) - JPNSE 1040(#26332)

This course presents an introduction to the language of Japan's classical literary texts such as Tale of Genji and Tale of the Heike. The readings include both prose and poetry. The class begins with the complete text of Hojoki (An Account of my Hut, 1212), and moves on to other selections from the classical period as time permits. Literary and linguistic techniques are discussed, and the relationship to expressions in the modern language is analyzed. Reference materials dealing with classical Japanese language and literature are introduced. No recitations.

JPNSE 2058 1010 29381 WESTERNS AND SAMURAI FILMS Lecture 3

Bldg: TBA **Room:** TBA **Days:** TBA **Time:** TBA **Instructor:** Staff

Class Enrl Cap: 5 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Room Characteristics: PeopleSoft - Scheduled (PS)(1)
Combined Section ID: 0059(JPNSE 1058/2058) - JPNSE 1058(#29198)

This course focuses on the century-long transnational exchange in two genres that make up the rich cinematic heritage of the U.S and Japan: the Western and the samurai film. Watching American and Japanese films in alternation, we will consider such topics as: what position do these two genres have in their respective film traditions? How do these films explore social and political conflict in their respective countries? What is the attraction of foreign genres in American and Japanese markets? How do films from different cultural traditions share similarities in narrative, character types and worldview? How do the ¿grammar of the western¿ and the ¿grammar of the samurai film¿ translate to different cultural contexts? Students will be introduced to representative critical analysis of the two genres and have the opportunity to develop their own analysis of films.

Japan may be popularly known for things like sushi, anime, and Nintendo games, but what about its music? Like language and food, Japan offers a wealth of unique music styles that reflect people¿s emotions, thoughts, and aesthetics. This course offers a survey of various Japanese musical genres from the 8th century to the present. Students will learn the historical and cultural contexts through musical sounds and visual forms and be able to critically analyze their aesthetic components by using proper musical idioms in both English and Japanese.

Combined Section ID: 0830(JPNSE/2080/1080) - JPNSE 1080(#29200)

A critical study of three major dramatic genres of Japan¿NOH, Bunraku and kabuki¿in cultural origins. Areas to be explored are the use of masks in the world of the NOH theatre, the kabuki with its female impersonators and the near-life-size puppets of the Bunraku. Also discussed is the impact that NOH and Kabuki have had on modern Japanese and non-Japanese theatrical and film genres.

This course explores the evolution of Korean civilization from antiquity to the present. The main goal of this course is gaining foundational knowledge of the origin and dynamic developments of Korean civilization. Yet, the students will also be guided to situate Korean history within a larger context such as East Asian civilization and world history. Through such a comparative approach, this course will help students not only identify key political, economic and cultural developments in Korea but also engage in critical intervention into established views on Korean society.

KOREAN 0075: Intro to Korea Through Films
Marked by a strong tendency to confront a variety of historical traumas from the last century, the recent film renaissance in South Korea offers a valuable platform to inquire into the evolution of modern Korean society. In exploring films of major Korean filmmakers such as Im Kown-taek, Hong Sang-soo, Lee Chang-dong, Park Chan-wook, and Bong Joon-ho, this course will help the students learn major issues in Korean history (colonial modernity, national division, authoritarian rule, democracy struggles, and globalization) and also gain the skills of identifying and critically assessing important research topics in Korean culture and cinema.

The course will provide you with the basic tools necessary to describe the structure of the economy and to analyze how policies and events might impact it. These tools include the fundamentals of consumer and producer behavior, market equilibrium, and market organization. With these tools we will be able to discuss how the economy responds to government policies (such as tariffs and rent control) and market power (such as monopoly control) and who are the winners and losers in each situation. We will also be able to consider when markets are efficient (such as providing private goods) and when they fail to produce the efficient outcome (such as providing public goods or addressing externalities like pollution).

This course is about the economics of the every day. You make a hundred choices every day, beginning from choosing a time to get up until you choose when to go to bed. In this class we will think about how people make these choices and how everyone¿s choices interact with each other to form a market economy. This class will help you organize your thinking about market economies and might even help you make better decisions. I believe this is one of the most important classes you can take at the university and I hope by the end of the semester you will agree.
The class will begin by building a model of production and how people might cooperate for mutual advantage. We will next spend the remainder of the first half of the semester looking at one way how people cooperate for mutual advantage: the market. We will look at the

An introduction to the principles and problems of economics, with an emphasis on analyzing the systems of the full US economy. The course is divided into three major sections. In the first section we will develop tools for economic analysis and discusses topics relevant to both Micro and Macro such as supply and demand, elasticity, marginal costs, opportunity costs, price controls and taxation. In the second section we will focus on macroeconomic-specific concepts and principles, and define terms including GDP, inflation, growth, unemployment, interest rates, and the money supply. Finally, we apply the tools we have developed to examine more deeply specific situations and models in macroeconomics. Ultimately, students should be able to make predictions about the economic impact of monetary and fiscal policy.

ECON 0110 is an introductory course in macroeconomic theory for students with little or no economics background. The course commences with an introduction to economics and the fundamental tools of economic analysis. The course then introduces students to the study of macroeconomics before moving on to an analysis of theories of output, inflation and employment, as well as the fundamentals of monetary and fiscal policy. Competency in high school algebra is expected.

As most decisions are made under uncertainty, the increasing availability of data has led to a greater role of statistics and econometrics in decision making. This course presents a framework for thinking about problems involving uncertainty, and develops tools for tackling these problems. We will consider applications of these tools and framework to a variety of areas, including economics, finance, and marketing. The goal of this course is to sharpen your quantitative and analytical skills, and to provide a foundation in probability, statistics, and econometrics for subsequent courses and for your career.
Although technical expertise and computation are essential to understanding statistics and analyzing information, our focus will be on understanding statistical concepts and being able to interpret analyses; we¿ll focus on understanding, and not on plugging numbers into formulas. In

The aim of this course is to introduce the basic principles of game theory to you. Game theory has two parts. First, it is a language to describe a strategic interaction. It formalizes problems such as: Firm A rst sets its price, then Firm B sets its price, then consumers decide where to buy. Game theory, however, is rich enough to describe much more interesting environments, starting from arms races to the problem of nding out which physicians are good. Second, game theory proposes solution concepts. It tries to predict what rational plays would do if they were faced with the situation. In the example above: Which price should Firm A set? You will see that the basic idea how economists think about the solution to a game-theoretic situation is always the same, with some adjustments to a speci c context. The speci c context is whether all players act at the same

time or subsequently, and whether there are aspects that are known to some players but not to others.

This course is designed to illustrate how economists analyze the production of health and the delivery of health care services. Substantial attention is given to socio-economic determinants of health and to behavioral health economics. The course will emphasize the link between economic theory and health policy introducing students to topical issues such as the obesity epidemic, economic health disparities, the economics of risky behaviors, and the potential impact of US health care reform

This course concerns low and middle-income economies, with over 80% of the world¿s population, who live in Latin America, Africa, and Asia. Topics covered include: how population growth, employment, agriculture, industry, health, education, income distribution, capital accumulation, migration, and government role in the economy, among others, contribute to economic growth. The focus of the course is on how economic theories and analysis explain why some nations are poor while others are rich, and the role played by governments and institutions in shaping these economies.

The objective of this course is to provide the student with a strong foundation in financial market analysis and the roles of nonbank financial institutions in the modern economy. This course will commence with the necessary background for financial market analysis, including methods of valuation and the role of interest rates and monetary policy. The course will then cover three broad types of financial markets: debt markets, equity markets and derivatives markets. Each section will focus on the types of instruments and the markets in which they are traded, as well as methods of valuation of these asset classes. The course then investigates nonbank financial institutions, including mutual funds: pension funds, securities firms and insurance companies, paying close attention to their role in the previously-discussed markets.

Microeconomics is the study of how small economic units, such as individual consumers and firms, engage in trade and set prices through their interaction in a world characterized by scarcity. We will examine models of consumer and firm behavior that allow for a rich analysis of the markets and the effects of government policy. This course will help students expand and refine their understanding of the theoretical tools utilized by microeconomists and provide an introduction to game theory and its applications. Students who complete this course will be prepared for more advanced economics courses including Game Theory, Public Finance, Industrial Organization, International Trade, and Labor Economics.

PREQ: ECON 0100 and ECON 0110; [MATH 0120 (with a B or higher) or 0220 or (0125 and 0126) or 0230 or 235]; MIN GRADE: 'C' For All Listed Courses

This is an intermediate level course where we will use basic calculus to learn several different models (in detail) for different macroeconomic questions. The primary objective of this course is to help you to understand and explain (in economic terms) macroeconomic events and policy debates discussed in the media. A second objective is to prepare you for upper level macroeconomic courses. You are expected to know some basic economic principles and basic calculus from courses you took. The following questions will be answered in this course: Why do we experience recessions, and are recessions avoidable? What can a government do to prevent recessions or to aid in the recovery from a recession? What are the determinants of macroeconomic variables such as national output, economic growth, unemployment, and inflation? How are aggregate demand and aggregate supply influenced by the public and private sectors? How does the economy operate in the short-run and in the long-run? How are economic relationships determined and influenced by outside forces? The ultimate aim is that after completing this course, you should be able to think critically about macroeconomic problems and questions.

How are aggregate demand and aggregate supply influenced by the public and private sectors? How does the economy operate in the short-run and in the long-run? How are economic relationships determined and influenced by outside forces? The ultimate aim is that after completing this course, you should be able to think critically about macroeconomic problems and questions.

ECON 1110 1040 22693 INTERMEDIATE MACROECONOMICS Lecture 3

Bldg: TBA **Room:** TBA **Days:** TuTh **Time:** 09:30 - 10:45 **Instructor:** Maloy,James R

PREQ: ECON 0100 and ECON 0110; [MATH 0120 (with a B or higher) or 0220 or (0125 and 0126) or 0230 or 235]; MIN GRADE: 'C' For All Listed Courses

ECON 1110 is an intermediate-level course in macroeconomic theory and policy. The course aims to provide the student with a solid understanding of macroeconomics at the intermediate level and to ensure that students can apply macroeconomic analysis to the study of economic problems. This course is designed for students who are serious in their study of economics. Students should expect the pace and content of this course to be significantly more challenging than introductory macroeconomics. This course will require considerable independent study outside of class. Successful completion of introductory microeconomics, macroeconomics and calculus are prerequisites.
The course covers the development of modern macroeconomic models. Classical, Keynesian, Austrian, New Classical and New Keynesian views of the macroeconomy will be analysed and compared in detail. Key areas to be covered include the various theories of business cycles, money and prices, and unemployment, with a particular emphasis on the role of financial and monetary issues. Considerable emphasis will be placed on analysing both the strengths and weaknesses of the

This course is an introduction to game theory: strategic reasoning and behavior when decision makers are affected by not only their own actions, but also the actions of others. We will learn how to formally represent strategic situations and analyze them rigorously. Concepts such as dominance, Nash equilibrium, backward induction, incomplete information, commitment, signaling, moral hazard, adverse selection, and repeated games will be discussed. Illustrations will be drawn from and applications given to problems in economics, media and communications, politics, interpersonal situations, and other areas.

Room Characteristics: PeopleSoft - Scheduled (PS)(1)

The first third of this course contains an institutional background for understanding the extraordinarily rapid development of the Chinese economy during the past four decades. We will then survey current research topics including governance (political selection, corruption, censorship), firms (state owned enterprises versus private companies, foreign direct investment), financial markets, education and social mobility. Students will learn to evaluate modern research design methods including linear regression, differences in differences, instrumental variables and regression discontinuity.

This section will introduce students to key structural, rhetorical, and stylistic conventions of narrative, argumentative, researched, and reported forms of writing. Readings will center on cultural identity in a transnational world. Our intellectual exploration will be framed by readings spanning the globe, often drawing in current affairs, from the Syrian refugee crisis to the anti-extradition-bill protests in Hong Kong. Students are encouraged and expected to interrogate their personal experiences within this global context, to equip them to read, think, and write beyond the literal and figurative borders of the United States and navigate the inextricably globalized complexities of everyday life.

This composition course will engage you in formal and informal writing that fosters critical thinking on the topic of disability. Drawing on theoretical writing in disability studies as well as creative and critical literature by writers with disabilities, the course will introduce students to ways of identifying and questioning certain sociocultural assumptions about ability, sensory experiences of the world, and mental as well as physical health. The nature of the writing assignments and writing processes will vary in a way that recognizes the diversity of abilities and ways of thinking.

Another section of this course is offered under the number HAA 0425.

This course prepares students to critically examine the intersections between digital devices and human life. Covering topics such as the relationship between computers and humans, surveillance, big data, and interactivity and games, we question what it means to be human in a space of pervasive digitality.

What does it mean to center Blackness in nations that historically marginalize it? What does time as a construct mean in relation to Blackness?

In this course we survey a range of Black public writing to consider what publicness does to Blackness and learn more about how Black people communicate in various contexts. We will simultaneously think about how temporalities shape experiences of Blackness and the importance of history, context, and culture in fighting antiBlackness. Our treatment of Black time samples from North America, Africa, and the Caribbean broadly construed. Students will do short reflective responses, an autoethnographic activity, and a larger "mixing project," drawing on Black rhetorical tradition.

This course investigates ways in which language influences experiences, understandings, and outcomes in health and medical contexts using concepts and tools from the emerging field of medical rhetoric. Course texts include readings from The Birth of the Clinic by Michel Foucault, Being Mortal by Atul Gawande, On Immunity by Eula Biss, The Cancer Journals by Audre Lorde, Stitches by David Small, and Illness as Metaphor by Susan Sontag. Students will write weekly one-to-two-page reading responses in preparation for class discussions as well as two four-to-five-page reflective/analytical essays and a ten-to-twelve-page final paper synthesizing work on a specific medical rhetoric topic.

Business proposals are used in advertising, communications, media, technology, real estate, government, and even non-profits. Proposal writing may appear to be complex, but once you know the process, you can apply it to almost any field or industry. This is a student-centered course that breaks down the universal elements of proposal writing into manageable sections through interactive discussions, exercises, and workshops. This course will get you from "What is a proposal?" to authoring your very own business proposal with the collaborative support of your instructor and peers.

Trauma studies now stands at the forefront of contemporary cultural theory, straddling such disciplines as history, psychology, sociology, philosophy, and literary criticism. This seminar invites students to examine and contribute to the research surrounding the provocative intersection of cinema/media studies and trauma studies. We will focus on the two mid-twentieth century events that continue to anchor many accounts of historical trauma: the Holocaust and Hiroshima. What do films that address these events teach us about the politics and ethics of representing experiences often referred to as "unrepresentable"? How does cinema force us to refigure debates about the "limits of representation" and the nature of "the event" itself? Is cinema an agent of memory or memory's eraser? A broad range of films will inform our discussion of such questions -- documentary and fiction, tragedy and comedy, mass cultural successes and lesser-known art films, 1940s films and contemporary films. Films from France, Germany, Italy, Japan, the US and other countries will be juxtaposed to raise questions regarding historical trauma's national or transnational character. The seminar will also touch on more recent events that have entered the purview of trauma studies, such as climate change, as important new coordinates for mapping the ways cinema and trauma can shape and challenge each other's definitions. Students will have the opportunity in their own essays to extend the seminar's concerns to their own

Room Characteristics: PeopleSoft - Scheduled (PS)(1)

The class focuses on short stories in two contexts. First, that of the lives of major writers and filmmakers from different cultures including Argentina, Canada, France, Russia, and the US. We use the events of their lives and especially their thinking on sexuality to shape our reading of a) the stories they write and b) a film on translation and c) a movie based on three of Alice Munro's tales. Second, we read the stories by Maupassant, Borges, and Chekhov as world literature, that is, the creation of not only the original author writing for French, Argentinian, and Russian culture, but also of the translator, rendering that culture into the English-speaking world.

Credits: General Education Requirement in Writing, English Minor, English Literature, English Writing, and the Certificates in Gender, Sexuality, and Women's Studies as well as Latin America, Global, and Russian and East European Studies.

THE LAW IN LITERATURE explores the way in which story tellers such as Dickens, Melville, Susan Glaspell, Shakespeare, Richard Wright, and others (including film-makers) have depicted law, lawyers, and trials, in their works. Students will be asked to write a final paper on a relevant theme of their choice (as approved by the instructor) and to participate actively in class. There is no final but may be additional short writing assignments.

This course is an exploration of literature by and about women in the context of Julia Kristeva's theory of feminine genius. Through our reading of novels, a novella, a hybrid text, and film we will explore the aspirations and realities of women's lives. We will consider how institutions and social factors including religion, race, and class affect those lives. The class will read world literature focusing on the nature of the human in the context of different national identities, including in reverse chronological order, Border (Chicana), African, English, French, and Italian examples. We will also examine two films dealing, broadly speaking, with human rights for women, Westmoreland's Colette and Stephen Daldrey's The Hours.

Credits: General Education Requirement in Writing, English Minor, English Literature, Certificates in Gender, Sexuality, and Women's Studies as well as Latin America, African, and Global Studies.

Starting with J.R.R. Tolkien's The Lord of the Rings, this course will identify the major tropes of modern fantasy and its subgenres, tracing their evolution from the 1950s into the twenty-first century. We will focus on the figure of the hero -- both the traditional male archetype and the still largely undefined female hero. In readings such as Garth Nix's Lirael, Neil Gaiman's The Ocean at the End of the Lane, V.E. Schwab's The Darker Shade of Magic, and J.K. Rowling's Harry Potter, we will highlight the forces of evil that the hero confronts and how they correspond to our own "real-world" hero journeys. Work for the course includes a Pinterest board midterm project in which students will consider how fantasy engages vexing political and social conditions in our own society relating to gender, race, ethics, and the duality of human nature.

This course will examine the intersections between literature and the environment by considering the textual representations of weather and climate. We will read drama, poetry, fiction, and nonfiction works from the Renaissance to the present, with a focus on literature from the romantics to the twentieth century; readings will include a Shakespeare play, lyric poetry, a canonical novel, and speculative fiction. We will examine these texts in conjunction with works in the meteorological humanities, which brings together such disciplines as literary criticism, art history, environmental studies, climatology, history, and philosophy. Throughout, we will be attentive both to the literary qualities of writings about weather and climate and to the historical and political contexts of those writings.

This special section of Secret Pittsburgh has a unique community learning opportunity. Students will spend part of the semester collaboratively learning with local school students the technologies and methodologies of oral history in order to collect and preserve stories from Hill District residents. These

stories will form an archive for the August Wilson House Organization. This project, undertaken with Pitt's Hill District Community Engagement Center, promises to engage any student interests in public humanities, digital narratives, archive building, community engagement, history, education, drama, and urban studies. (Never fear: we will still spend most of the semester exploring secret sites and cultural texts around the city!)

Many writers in the environmental humanities now understand us to be living in a new geological epoch, called the Anthropocene, characterized by the ability of humans permanently to impact the earth and its atmosphere at all scales, including planetary ones. This course will examine how literary works record or are marked by our entry into the Anthropocene; readings will include a Shakespeare play, lyric poetry, canonical short fictions, and speculative fiction, studied in conjunction with literary criticism and works in the fields of history, environmental studies, and philosophy. The course will enable students to develop individual research projects in which each student will gain deep knowledge of the historical and critical contexts of one work of literature in its relation to the Anthropocene.

This course aims to explore the possibilities inherent in nonfiction as a genre. We will read a variety of nonfiction pieces that engage in the art of seeing and meaning-making, including more `traditional' forms such as personal essays and literary journalism as well as more experimental forms that dance on the border between prose and poetry, fact and invention. Class meetings will give you the opportunity to examine published works, experiment with writing exercises, and discuss student writing--all of which will help you work towards telling the stories that are important to you, as artfully as you can.

This spring's "Autobiography and the Creative Impulse" will be held inside prison--SCI Somerset--where Pitt students and incarcerated students will learn together following the Inside-Out model https://www.insideoutcenter.org/about-inside-out.html This is a remarkable opportunity to study alongside incarcerated people, to share perspectives and words, and to learn from one another.

"We tell stories in order to live," writes Joan Didion. Writing about our lives is a way of making sense, of figuring things out. It's also to approach a great mystery: the riddle of who we are, of where we come from. The mystery of our family and neighborhood and history. Of what our past has to do with who we are now. In "Autobiography and the Creative Impulse," we'll read memoir by people who have lived all manner of lives--thick, joyous, difficult, often surprising--and who take their experiences as creative inspiration. We'll read autobiography that weaves together nonfiction, fiction, and poetry, that travels across borders and connects us to one another. We'll talk about what makes us want to write, to create. This is a class for students who want to tell true stories, to make something beautiful and meaningful out of this difficult thing we call being human.

Combined Section ID: 0812(FMST/1860/ENGWRT/1132) - FMST 1860(#28726)

This course will explore developing narrative character-based stories in the screenplay form. Students will be exposed to a variety of texts including original screenplays, films, peer scripts, and readings to reinforce basic tenets of good storytelling for the screen. Students should expect to apply what they learn through a series of scriptwriting exercises focused on both feature and short script formats. Each week, students will advance through the writing process from conceptualization of a short script idea to "breaking the story," conducting research, drafting, and revising, culminating in a completed short script of 8-12 pages.

Room Characteristics: PeopleSoft - Scheduled (PS)(1)

In this course, students will read a variety of contemporary nonfiction--personal and lyric essay, memoir, literary journalism, and criticism. We'll pay attention to how writers gather and organize their material, to sentences and structure, the interesting things done with form. We'll consider the proposition that how you write, your style, has something to do with what you are able to say. This is a course for writers--you'll figure out how the essays and books work by writing a series of flash nonfiction pieces inspired by them as well as one full essay. By the end of the semester, you should have a good sense of the nonfiction being written now, of where it comes from and its place in the genre, as well as a more expansive view of what's possible in your own work.

Room Characteristics: PeopleSoft - Scheduled (PS)(1)

This creative writing course considers ways in which storytelling can engage with contemporary social and political issues. Through class discussions, writing assignments, field work and civic engagement, as well as readings in nonfiction and some fiction and poetry, students will consider strategies of craft and explore modes of being a political and social writer and artist. Students will work toward a final writing project of their choosing.

With the rise of podcasting, audio has emerged as a vibrant platform for storytelling across genres--from narrative journalism, to personal essay and memoir, to serial (non)fiction. What can we as writers learn from born-audio narratives? How might they help us reimagine the possibilities of our writing, whether for the ear or for the page? This class will explore the contemporary terrain of narrative podcasting against the backdrop of twentieth-century radio greats. You'll produce focused responses to weekly listening assignments, engage in rigorous discussions on craft, and generate your own creative work in response. Writers from all genres are welcome.

This course will explore developing narrative character-based stories in the screenplay form. Students will be exposed to a variety of texts including original screenplays, films, peer scripts, and readings to reinforce basic tenets of good storytelling for the screen. Students should expect to apply what they learn through a series of scriptwriting exercises focused on both feature and short script formats. Each week, students will advance through the writing process from conceptualization of a short script idea to ¿breaking the story,¿ conducting research, drafting, and revising, culminating in a completed short script of 8-12 pages.

From kissing to romantic escapades, from Paris to the Riviera, from Tahiti to Marrakesh, France and the Francophone world have a highly recognizable profile in matters of sex and love. Sexual behavior is always culturally inflected, and it evolves through time in its creation of emotions, attachments, families and institutions. In this class, we will adopt a historical lens to retrace the cultural transformations of sex and love in the French cultural and social landscape. We will study contemporary visual and textual materials, and a variety of historical documents from the Middle Ages to the present day. We will address controversial issues such as virginity, adultery, same-sex relationships, women¿s sexual agency, gender definitions through sexuality, the shifting boundaries of pornography and other related matters. This is a first-year course and is open both to incoming and more advanced students. It will count toward the French major and minor. Taught in English.

The so-called "city of light," Paris represents both a geopolitical entity and a abstract source of cultural values. This course will explore both aspects of Paris' identity over time and at the present moment. The first half of the course retraces the history of this urban center from its beginnings as a small Gaulish settlement on two islands in the Seine to the sprawling center of the French state and polyglot world city. The second half of the course focuses on contemporary and near-future Paris as both a great international metropolis and idea that represents ever-evolving beliefs, attitudes and values in France and around the world. This is a first-year course taught in English and open to all students. It will count toward the French minor and toward the French major as the one permitted course in English

Attributes: Hybrid
Room Characteristics: Media - Data Projector/Monitor(1), Seating - Moveable(1), PeopleSoft - Scheduled (PS)(1)

This three-hour-per-week course introduces students to the French language, and is designed to develop both linguistic and sociolinguistic competence in both spoken and written French. Because the focus is on task-centered communication, the class is conducted entirely in the target language. Course objectives for Elementary French 0001 are: a) to speak French well enough to describe, narrate and ask simple questions in the present about a variety of everyday topics such as family, work, eating and traveling; b) to understand French well enough to grasp main ideas in short conversations about everyday topics; c) to understand simple written French well enough to grasp main ideas; d) to write sentences and short paragraphs on everyday topics; f) to develop an awareness of French-speaking cultures; f) to understand, at a very basic level, how French functions as a language. This course is for students with little or no previous exposure to the language and its cultures.

This three-hour-per-week course introduces students to the French language, and is designed to develop both linguistic and sociolinguistic competence in both spoken and written French. Because the focus is on task-centered communication, the class is conducted entirely in the target language. Course objectives for Elementary French 0001 are: a) to speak French well enough to describe, narrate and ask simple questions in the present about a variety of everyday topics such as family, work, eating and traveling; b) to understand French well enough to grasp main ideas in short conversations about everyday topics; c) to understand simple written French well enough to grasp main ideas; d) to write sentences and short paragraphs on everyday topics; f) to develop an awareness of French-speaking cultures; f) to understand, at a very basic level, how French functions as a language. This course is for students with little or no previous exposure to the language and its cultures.

As a continuation of French 0101 this 3-hour-per-week course introduces students to the French language, building on skills gained in French 0101. Culturally-contextualized comprehension and production abilities in both written and spoken form are stressed. Because the focus is on communication, French 0102 is taught in the target language. Objectives are similar to those in French 1, but expanded for this more advanced level.

How do French-speakers today experience video games, graphic novels, literature, film, Youtube, medieval manuscripts, books printed in the 1600s, and other forms of media in the digital age? This course examines how stories get told in French across different kinds of media¿in illuminated manuscripts and graphic novels, in novels and films, in videos games and fan fiction. You¿ll encounter some of the ¿classics¿ of French literature¿and you¿ll explore how these classics have been rethought, remediated, and revitalized for new media and new audiences. This course practices a supportive, structured approach to language acquisition, with a focus on boosting and enhancing your reading skills in French. Taught in French.

As an oral skills course, French 0055 approaches speaking French in real life contexts. Focus is on speech acts. Students will learn how to present, narrate, describe, and speak French in various registers (from very informal to very formal) and with tact. We will continue to work on vocabulary building and grammatical mastery so that students are able to use French as needed to carry out various daily, professional and personal functions. Some examples of the speech acts we will learn to execute include: how to present oneself and one's peers, how to describe in detail people, places and things, how to narrate in the present, past and future, how to express and support points of views. These various speech acts will serve a larger framework of real life scenarios students may encounter later on in their studies or careers, for example when interviewing for a job, when interviewing others for a job, when speaking in front of a group, when speaking with colleagues, when running a meeting, when providing consulting services. The study and practicre of spoken French thus is concentrated on the social turn and use in context. This course is taught entirely in French.
cultural implications of written and visual texts is enhanced through exposure to current news stories and films. The course will be conducted in French.

Global French is a designated W-Course and fulfills a writing-intensive course requirement. This course frames questions about French and francophone literature, culture and film in a global context to ask: how can one be French and global? We will investigate spaces, objects, environments, and texts that allow us to think about connections between France and the world in different transcultural, literary, and historical contexts. Course materials cover the Middles Ages to the contemporary period and include literary texts, historical documents, film, visual culture, critical readings, and online sources. As a Writing-Intensive course, this seminar gives you the opportunity to define and explore questions about global French, engage in original research, and test and revise your ideas through different kinds of writing activities. You will produce approximately 25 pages of written French, including informal writing, short essays, and a longer research project. TAUGHT IN FRENCH Prerequisite(s): at least nine credits above FR 0104 or permission of instructor; completion of FR 0027 (French Atlantic) is recommended but not required.

Some of the most important thinkers about gender and sexuality are French (Foucault and Beauvoir to name only two). In this course, you will study French thought about both gender and sexuality. We will discuss and evaluate key French thinkers, including their takes on relations between men and women that they posit or critique. Simone de Beauvoir gets things started for the 20th century, but many have responded to The Second Sex. And let¿s not forget that there were feminist thinkers in the middle ages and Renaissance. What did they have to say? Are there French transgender theories? And what of the theories of sexuality from Michel Foucault, whose work helped found the field of LGBTQ studies? Can someone explain what sexuality is in his hugely influential History of Sexuality in three volumes? And what do the French have to say about masculinity? About intersex?

Gender and sexuality will be taken in the broad sense, and we will consider thought on women, equality, and feminism as well as queerness, homosexuality, intersex, masculinity, trans*, and race/gender intersections. We will

Literature to screen (but how about screen to literature?). Book to bande dessinée. Oral tradition to elite literary practice to children¿s lit to video game. Fan fiction. Revivals. Vulgarization. TV series. Podcasts. Adaptation is everywhere in our hypermediated media worlds. And as Thomas Leitch writes in the inaugural issue of the journal Adaptation (2008), ¿Adaptation studies are on the move.¿ This seminar takes a transmedial, diachronic approach to study the cultural production and media of early modern France as the processes and products of adaptation (Hutcheon). How did early modern writers, artists, artisans, and audiences adapt the stories and material of Antiquity¿culturally prestigious, yes, but also tasteless, outdated, obscene, and shocking to early modern publics? How did early modern cultural productions adapt media forms and protocols to incorporate popular traditions, new technologies, and expanding global contacts? And what can we learn from the processes of adapting ¿the early modern¿¿stories, figures, images, texts¿in contemporary cultural production from Versailles (the TV series) to La Princesse de Clèves (the graphic novel)? What does it mean to study early modern (as) adaptations? Do we

always have to read the book to study the film? This course draws on critical readings in adaptation studies, media theory, media archeology, film studies and literary studies; our seminar corpus includes texts, images, gaming, films, fan fiction, graphic narratives, television, theater, radio/audio, and

This one-credit course is a faculty-led dissertation writing workshop in which students share and discuss in-progress pieces of writing related to their doctoral dissertations, including prospectuses, parts of chapters, chapters, and revised journal articles that draw on material from individual chapters. The workshop format of this course is intended to practice the sharing of early writing and also the skills of responding constructively to peers¿ written work.

This course seeks to support the person writing just as much as the product written. What is challenging about writing a doctoral dissertation is that it is unlike the forms of writing students have done previously in their graduate studies. Whereas seminar papers, conference presentations, and comprehensive written exam feel like sprints; the dissertation is a multi-year marathon. The length and intensity of a dissertation project requires fine-tuning your process as much it needs discussions of your written words. To that end, we will also read and talk about writing habits, task management, the psychology and emotional issues of writing, and accountability structures.

This seminar explores the urban environmental imaginaries of writers and filmmakers of the Global South. What do their depictions reveal about contemporary and historical forms of the urban? How do they make sense of globalizing ideologies of urbanization, especially neoliberalism and its consequences for social and environmental justice? More broadly, how do literary representations intervene in and contribute to wider debates at the intersection of urban studies, postcolonial theory, and the environmental humanities? These questions serve as a critical backdrop for the study of the ways in which these imaginaries generate new and unexpected geographies of urban experience, shaped by intertwining political and ecological phenomena, including inequality, poverty, migration, pollution, and climate change.

The course will be conducted in French or English, depending on enrollments. We will read a variety of fiction (Chamoiseau, Begag, Lahens, Mabanckou, Charles) and theory (Lefebvre, Harvey, Westphal, Mbembe, Sarr, Roy, Brenner). We will also view films by Sembène, Farès, Benyamina, and Peck.

In recent years, we have come to realize that our destiny as humans is closely linked with that of the bee, the earthworm, or other animals. How should we consider gender and sexuality in this new paradigm, when cloning appears as a possible option for the preservation of species? This graduate seminar focuses on recent theoretical, literary, and cinematic texts that put animality into relation with gender and sexuality. Queer studies, gender studies, feminist studies, and trans studies have been radically rethought through the category of animality. How, for instance, is the category of woman linked with animals as a tentative gesture to redefine the ¿female¿ seventy years after Simone de Beauvoir¿s seminal work The Second Sex? The critical apparatus will allow us to open the word ¿female¿ to a plurality of meanings, freeing it from the constraints of a female body often characterized by the violence it is subjected to (Catherine Malabou). Thinking of oneself as an animal also means changing one¿s perception of the world and finding new ways to care for it. Students will be introduced to foundational thought in ecocriticism (Rachel Carson, Stéphanie Posthumus), in which ¿ecology is composed through histories of interaction, relationality, interconnection, and materiality¿ (Eva Hayward). Starting with Deleuze¿s notion of ¿becoming-animal,¿ we will study animals as

beings of language, but also as ontological beings larger than the metaphors and allegories with which they are associated, in order to approach animal

This mini-course in Italian represents a supplemental hour of language instruction and practice for students who have successfully completed two semesters (or the equivalent) of Italian. It is particularly recommended for students taking Italian 0103 or a fourth-semester course, but also for students planning to study abroad or returning from study abroad in Italy, as a way to ensure that they continue to practice their Italian. Students will discuss a wide variety of topics and will receive some extra grammar practice, with the aim of further developing their proficiency in the target language.
Prerequisite(s): ITAL 0102 or the equivalent

What is Italy and why does it hold such strong appeal? Whether we imagine it or visit it; claim its heritage or possess it through food or fashion, few other cultures have commanded the attention and affection that Italy does. This class explores the complexity of Italian culture through its history of innovation, ingenuity, and singularity through the ages. Through the study of five interrelated thematic modules¿travel; science and technology; beauty and fashion; humanity and power; and performance¿students in this course will come to understand the unique contributions Italian culture has made to the world, will learn about the iconic figures who made those contributions, and will better appreciate the complexity of Italian identity, Italian style, and Italian genius. This course satisfies the Global Awareness & Cultural Understanding GER (REG), and counts for the Italian minor & majors. No prerequisites. Taught in English.

Class Enrl Cap: 22 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: Hybrid, European and Eurasian Studies, Transatlantic Studies, West European Studies
Room Characteristics: (1), Seating - Moveable(1), PeopleSoft - Scheduled (PS)(1)

This is the first of a three-term sequence that is an introduction to the Italian language and culture. The primary goal is to achieve competency in the spoken language, along with basic skills in reading and writing. Instructors incorporate a variety of texts, videos, and multimedia to present contemporary Italian culture. This class (like ITAL 0102) meets three days per week. The fourth credit hour is completed at home and through online homework. The course has no prerequisites, but students with some knowledge of Italian should take a placement exam (visit www.frit.pitt.edu for more information).

This course aims to continue students' development in all aspects of the Italian language, with particular emphasis on those skills and tools necessary for advanced literacy in written Italian. Students in this course will encounter, discuss, interpret, and analyze articles, songs, video, films, literary excerpts, and other authentic texts, leading to both a greater understanding of contemporary Italian culture and a greater mastery of Italian forms, vocabulary, and expressions. Special attention will be paid to vocabulary-building exercises, strategies for the focused and efficient reading of texts, and carrying out different kinds of reading for different purposes. At the same time, students will continue to develop their oral proficiency in Italian by discussing and analyzing broad contemporary topics, as they emerge from the course's assigned readings. This class is conducted entirely in Italian. Prerequisite(s): ITAL 0103 or the equivalent.

Special Topic: La fantascienza italiana

Through the analysis of short stories, comic books, novels, and films, we will explore the main aspects and the most relevant themes of Italian Science Fiction. We will see how the Italian contribution to the genre is neither new nor marginal, and we will contextualize it within its global and transnational

framework. Students will discover how some popular imagery of Sci-Fi dates back to the classics of Italian literature (Ariosto, Bruno), and how major Italian authors of the 20th Century have chosen to use science fiction in their work, preferring it for its great lyricism or for its allegoric potential. We will read works from prominent authors (Buzzati, Levi, Calvino) and appreciate wonderful pages of less known authors (Horrakh, Lorenzini). We will get acquainted with Italian comics and graphic novels (Recchioni, Serra) and we will analyze film sequences from Italian Sci-Fi movies. We will travel the entire history of Italian science-fiction, taking into consideration its sources and models, and pondering why, to this day, we are inclined to think of Rosewell, New Mexico as a more likely landing site for extraterrestrials than Rome, Italy.Taught in Italian. Prerequisites consist in two of the following

Fulbright Seminar: Gender and Migration Untangled

For a long time, women have been ignored by migration studies and debates: only in the last three decades a growing number of sociologists, social historians and demographers have highlighted the importance of a gendered interpretation of spatial mobility, able to pay women migrants their dues. In this course, we will apply such gendered interpretation to Europe¿s migration history and contemporary reality. More specifically, we will see how such gendered interpretation may be useful to understand the experience of the late countries of immigration, such as Italy. No prerequisites. Taught in English. Italian majors who have completed two of the middle-range courses (ITAL 0110, 0113, 0115, 0117, 0119) are encouraged to register for one extra credit of work (ITAL 1902 Directed Study) to be conducted in Italian, under the supervision of Prof. Cvajner. Ask the Italian adviser about it.

The Art of Writing Letters

Freed from the more rigid rhetorical parameters of the past, the `letter¿ begins to satisfy ¿ in 18th century Europe ¿ an extraordinary variety of functions: besides continuing to allow remote communication between people, and to be a fundamental vehicle of information and cultural exchange, it becomes the preferred form to give to one¿s travel accounts, literary criticism, socio-political commentary and moral or philosophical musing. It is used to celebrate great, historical events as well as to chronicle daily domestic ones; it is employed as a narrative, fictional device, as well as a basic exercise to boost students¿ linguistic and compositional skills. The course wants to address 18th-century letter-writing trends from an Italian perspective. Authors whose letters we will study include: Pietro Metastasio, Carlo Goldoni, Giuseppe Baretti, Pietro e Alessandro Verri, Vittorio Alfieri e Ugo Foscolo. This course is conducted in Italian. Prerequisites: graduate standing. Graduating seniors majoring in Italian may apply to the instructor¿s permission to register for this class.

Italian Apocalyptic Cinema: After the End

The course provides a historical introduction to the past forty-five years of Italian cinema, focusing on films that portray the end of the world. They deal with zombies, nuclear wastelands, post-industrial landscapes, but also with the crisis of language, the breaking up of society, the uncertainty of modern humanity. The apocalypse in cinema can be explicit (Ferreri, Lenzi, Bava) or implicit (Moretti, Crialese, Antonioni): some films may feature atomic

explosions and deadly plagues, others are concerned just with the emotional consequences, with the more intimate drama of a collapsing universe. We will situate the films in the historical and cultural contexts that have shaped the past several decades of Italian social life, in the attempt to understand why the apocalypse is a necessary post-modern metaphor and how it is not limited to a sub-genre of science fiction. We will watch many films strictly belonging to the Italian post-apocalyptic kind, and some others that show no (apparent) connection with the genre. Taught in English. Prerequisites: graduate standing or permission of the instructor.

This is an advanced language course that aims to familiarize students with specialized vocabulary, practices and the culture of German-speaking countries with respect to professional areas, specifically the business world.As the second part of Professional German, this course concentrates on the following areas: Industry (locations, branches, importance), Economy (trade within Germany, the EU, and non-EU countries), Environment (role, policy, importance), as well as Alternative and Renewable Energies (in Germany, in the EU, technology, policy & importance). The course focuses on oral and aural proficiency, appropriate written discourse, and reading. Students will have the opportunity to evaluate and compare German, EU and US practices with respect to industry, trade, technology, energy, and the environment. The course integrates the economic geography and business culture of all German-speaking countries in Europe: Germany, Austria, and Switzerland.

In this overview course we will explore German literature through some of its most important epochs and genres. Beginning with the Classical Period of the 18th century and ending with the postwar period in the 20th century, we will read poetry, drama, and novellas. As we move through these different literature types, we will develop a technical vocabulary and learn different methodological and theoretical approaches that will lend us guidance. Most of the assigned readings will be in German. Occasionally, more complex theoretical readings and articles will be assigned in English. Students will be evaluated on the basis of class participation, two in-class tests, and occasional writing assignments, including a final paper written in German. (Course will be conducted in German.) Updated 10/03/2018.

In this course, we will explore the role of nature and the concept of sustainability in German culture. We will look at literary and non-literary texts, films, and images from the Romantic period to the present, and analyze how the concept of `nature¿ has been defined and instrumentalized at different points in time, e.g. by political movements, but also in advertising, for economical gain, or in the name of progress. In this context, we will also study the history of the environmental movement in Germany from the early 19th century to now, and investigate current environmental projects in the German-speaking world. The course will be held in German, although some texts will be made available in English.

This is the second of a two-course sequence for students who prepare to study at the university level in the humanities or social sciences in a German-speaking country. The course is taught entirely in German and has three interconnected and equal objectives: 1) Strengthening students¿ German language skills by working on content specific to the socials sciences by rehearsing important aspects of German grammar and developing German social science vocabulary. 2) Exploration of the historical development, the current institutional structure and the challenges the European Union as a supranational entity is facing. 3) Introduction to the conceptual framework and methodological approaches practiced by social scientists studying the EU. To this effect the course uses the perception of the EU in public discourse by taking a snap shot of the economic problems the EU has been facing¿the ¿Eurokrise.¿ The ¿Eurokrise¿ has reinvigorated old national stereotypes which seem to contradict the EU¿s own rhetoric of unitythrough diversity. The ¿Eurokrise¿ thus serves as a good segue into the broader questions which this course aims to explore: Can a supranational entity like the EU whose integration was a slow institutional process offer a unifying identity for its citizens? With which policies does the EU try to generate identity within its citizenry? How has migration to the EU affected the constitution of a unifying identity? In order to answer these questions, it is important to carefully

Analyze, adapt, and perform Professor Bernhardi! In this drama by the Austrian playwright Arthur Schnitzler, racism becomes socially acceptable and corrupts politics with the help of scandal-mongering media. Colleagues turn on each other, while opportunists take advantage of a misunderstanding in order to sow chaos in this modern-day witch hunt. All readings and discussions will be in German.

We remember their gods in the names of days (Wodan's-day, Thor's-day, and Frigga's-day); we celebrate, with an altered purpose, their great festivals at winter solstice and onset of spring; we use such disparate terms from their language as "law," "ransack," and "berserk"; and we name athletic teams after their intrepid pirates the Vikings; but still we know relatively little about the complex culture of ancient northern Europeans. This course will present a cultural survey from about 500 BC to about 1500 AD of this folk. Our sources will be the people's own cultural artificats: archaeological and anthropological findings, written sagas, oral ballads, traditional legends, customs, superstitions, place names, and language expressions. The course's aim is to show how these artifacts reflect the cultural and personal values of the people who created and used them. Topics covered will include social organization, distribution of labor and wealth, the position of women and children in family and society, and the uses of supernatural beliefs to achieve worldly goals. Where appropriate, parallels will be drawn between modern northern European values and their formative myths from the distant past.
Prerequisites: none. All readings are in English.
Recitations: none.

This course introduces students to both a wide selection of Indo-European folktales as well as numerous perspectives from which to understand these folktales. We will examine the aesthetic, social, historical, and psychological values that these tales reflect. In addition, we will discuss significant theoretical and methodological paradigms in the field of folklore studies, including structural, socio-historical, psychoanalytic, and feminist perspectives. Finally, we will analyze the continuing influence of this folk tradition on popular and high culture of our time. Upon completion of this course, the students should be familiar with a wide variety of Indo-European folktales, be able to discuss several approaches to studying them, be able to identify the most important motifs of these tales, be familiar with some of the most influential folklorists, writers, and editors of the tales, and be able to assess the significance of folktales for contemporary western culture. This course satisfies General Education requirements for Literature and Specific Geographic Region in the School of Arts and Sciences. Updated 10/31/2018.

This course is explores the state of the European union today with respect to the issue of collective identity formation by integrating the historical development of the EU with studying its evolving institutional structure. The course examines how culture which was originally only an afterthought of European integration has gained in importance since the overarching permissive consensus with which European populations passively supported the integration process began to crumble with the Maastricht treaty of 1992. Through a variety of sources from across the social sciences, political theory and social philosophy, the course elucidates how EU cultural policy aims to engender a transnational European identity. Updated 10/10/2019.

Viennese culture in the age of modernism anticipates crucial issues, concerns, and debates of our time. The present lecture series introduces students to the multifaceted Viennese developments in art, literature, music, philosophy, and science from the late nineteenth century to World War II. Among the major figures discussed in this course are: Mach, Wittgenstein, Freud, Schnitzler, Kraus, Klimt, Schiele, Loos, Schonberg, Alban Berg. Readings are in English. Updated 10/10/2019.

Werther, Woyzeck, Gregor ¿ outsiders in German literature. These characters belong to different centuries and different genres but share the same social status. In this course, we¿ll read major works from German Literature of the 18th, 19th and 20th centuries in order to trace how individuals become marginalized in their communities. All readings and discussions will be in English. This course fulfills the university intensive writing requirement. Updated 10/10/2019.

Course Description for Spring 2020:
Approaches to the Built Environment is a foundational course designed for Architectural Studies and Urban Studies majors interested in the design of the built space. Students in other majors are certainly encouraged to enroll as well. This course seeks to acquaint students with contemporary ideas that affect our understanding of the built environment. Through a series of discussions dealing with different architectural issues and building types (e.g. Landscape, Dwelling, Public Institutions, Representation, and Commerce), students will be introduced to ideas and problems that affect the way in which the built environment has been and continues to be shaped in a variety of historical and cultural contexts. We will think broadly about how the spaces that people navigate and inhabit in their daily lives shape and are shaped by human behavior, cultural identity, political experience, and the currents of historical circumstances. Contemporary buildings and projects will figure prominently as examples of how designers approach architectural, structural, and urban problems.

ARC	0114	1085	27321	ART AND ARCH OF MUSLIM WORLD	Lecture	3

Room Characteristics: PeopleSoft - Scheduled (PS)(1)

Course Description for Spring 2020:
This course examines the art and architecture of the Muslim world as it developed through centuries of adoption, adaptation, and innovation which emerged as Islam spread throughout Eurasia, and Muslim communities came into contact with other Muslim and non-Muslim societies. Focusing on a number of prominent sites, buildings, and art objects, this course introduces students to the plurality of traditions and artistic practices labeled as Islamic Art and Architecture. Furthermore, students will learn about various sources of influence that came from the center and peripheries of the Muslim world. Exploring these concepts will take the class on a journey through time and space: starting in the 7th-century from the birthplace of Islam in the Arabian Desert, we will move through a vast territory that expands from southern Spain to China, with a final stop in 21st-century Dubai. All along the way, buildings and art objects will serve as snapshots that open a window into the social, cultural, economic, and political life of these Muslim societies.

Course Description for Spring 2020:
From the late eighteenth century, new processes and cultural phenomena, which may be globally described as effects of modernization, have impacted architectural design and urban planning throughout the world. The development of new technologies and materials, the expansion of colonial states and empires, and the emergence of multi-national corporations and sprawling urban centers reshaped societies and environments. This course will investigate the consequences of these trends and others on architectural design and thought from about 1800 to the present day.

Course Description for Spring 2020:
This course introduces students to the history of architectural thought, composition, materials and construction technology in Europe and the Americas from the ancient world until today. The course works both chronologically ¿ as a history of phases and styles ¿ and methodologically, examining the contextual issues that gave each period its distinctive architecture. Students who take this course will understand fundamental developments in western architecture and be ready to make critical judgments on buildings. ARC 0150 is a requirement for Architectural Studies majors and for the Minor in Architecture - Design and prepares students to take more specialized courses in the history of architecture or in any other branch of art history.

Course Description for Spring 2020:
In this interdisciplinary course, architecture and engineering students will collaborate on the design and construction of a temporary installation using non-conventional building materials. Students will conduct material research, design an installation, produce working drawings, and construct the project(s) as a team. Students will apply their diverse set of design and research skills to the project and explore the unique challenges posed by the use of non-conventional building materials in the Pittsburgh context. This course is an opportunity to foster cross-disciplinary research and to engage with members of the campus and local communities in a creative, meaningful, hands-on project.

Course Description for Spring 2020:
Architecture lends itself to a broad audience because its issues cut across a number of different disciplines. Students who elect this course typically come from a variety of backgrounds-- Classics, History, Art History, Architectural Studies, Engineering, Urban Studies, and/or those with a general interest in Roman Culture. The course examines the development of Roman architecture from its origins in Central Italy to the High Empire (ca. 150 AD) but as an evolving tradition of building rather than as a series of loosely connected monuments. Special attention is given to the issues and problems involved in the reconstruction of that building tradition: 1) the relationship of architectural forms, types and functions to changes in Italian society, 2) the significance of materials and of outside influences on the development of local traditions and forms, and 3) the interaction between Roman architectural forms and local traditions in the provinces to create a Roman imperial "koine".

Course Description for Spring 2020:
This introductory course, designed for students with no previous background in art or art history, undertakes a broad investigation of how art objects function in human culture. The course demonstrates some of the basic tools of analysis with which to approach works of art as material and aesthetic objects, while also examining them as productions that operate in diverse historical and social contexts. The course also focuses on cultural difference and the ways in which art has been employed to define communities as radically particular while also answering basic human needs that connect people living in different times and places.

Course Description for Spring 2020:
¿The Silk Road¿
First coined by a nineteenth century German to describe medieval trading routes connecting Europe to China, the term ¿silk road¿ has evoked romantic images of cultural melting pots and lost oasis kingdoms. Today it has become a talisman for a new era of global capitalism and the dominant framework for understanding all manner of transcultural exchange before globalization, including, for example, Southeast Asian and East African maritime trade. In this class, we will work toward a critical understanding of cultural exchange as a concept by taking up key silk road case studies, such as devotional icons, the book, porcelain, and indeed silk, ending with a unit on constructions of the silk road image in the modern era. We take an object-oriented, experiential approach, emphasizing the relationship between making and knowing and incorporating a range of technologies such as 3D printing and virtual reality.

Course Description for Spring 2020:
This course explores the art of Western Europe from the conversion of Constantine in the fourth century to the invention of printing in the fifteenth century. By examining manuscripts, metalwork, and sculpture, we will consider the political, theological, and social changes that informed the production of medieval art. Changes in style and iconography will be connected to the artists, patrons, and other audiences who lived in this period, and special attention will be paid to the kings, queens, monks, and crusaders whose ideas and actions shaped the history of the Middle Ages.

Course Description for Spring 2020:
This course will explore the diversity of contemporary art practices throughout the world from the 1980s to the present in a variety of mediums, including painting, sculpture, architecture, graphic arts, film, video, performance, installation, and on digital platforms, as well as through social practice and infrastructural activism. It will examine the role of art museums, biennials, private galleries, and alternative art spaces within the global contemporary visual arts exhibitionary complex. Guidelines for the understanding, interpretation and appreciation of works of contemporary art will be provided, based on direct experience of the collections and exhibitions at the Carnegie Museum of Art, the Warhol Museum, the Mattress Factory, and other local art galleries.

Course Description for Spring 2020:
¿Curiosity and Critical Practice¿
What does it mean to be curious? How is your daily life actually structured around curiosity? This course will help you reflect on your identity as a learner and thinker, and give you tools to ask better questions, enabling you to become a more agile and creative thinker in the world.

This course is designed to be very different from your traditional college course. We will reflect on our identities as thinkers by recording, charting, sketching, organizing, and mapping ideas in a physical notebook. Some of the diverse perspectives you will encounter as case studies through readings and other activities:
-Robin Wall Kimmerer, an Indigenous scientist who shares the story of her childhood dream to be a botanist and poet and was told these are incompatible.

-Lynda Barry, an artist who loves the lines made by people who are not trained in drawing.

Course Description for Spring 2020:
How have computational devices affected the way we think about our own humanity? Our relationship to digitality has changed from the mainframe to the smartphone, but throughout, computers have processed huge amounts of data, kept track of our (or our enemies¿) activities, made our lives more fun or at least more complicated, allowed us to communicate with each other, and archive knowledge on a broad scale. What roles do computers play in our lives, and what role do we play in theirs? What are the borders between humans and computers, or can they be drawn at all?

This course prepares students to critically examine the intersections between digital devices and human life. Covering topics such as the relationship between computers and humans, surveillance, big data, and interactivity and games, we question what it means to be human in a space of pervasive digitality. Students will read philosophy, fiction, essays, book excerpts, and watch movies and play games. Assessment will be based on regular online posts to WordPress, a take-home midterm examination, a reflective synthesis of online posts, and class participation. The course fills the Philosophy General

Course Description for Spring 2020:
¿Bodies Broken, Bodies Redeemed: Art and Violence in Early Modern Europe¿
Life in pre-modern Europe was frequently marked by violence, and this often registered in artistic production in unexpected ways. This writing-intensive seminar will examine how art and violence were entangled in early modern European societies (roughly 1300-1700). We will begin by thinking about how violence is defined in modern discourse versus how it was described in earlier periods. This will include an examination of societal traumas, such as the Black Death. The course will then pivot to consider how art and violence interacted across three realms. First, we will investigate how the redemptive role that violence plays in Christian theology helped shape early modern understandings of violence and how this fed into artistic production of the period. Second, we will consider how the visual arts helped perpetuate dangerous stereotypes and were often used explicitly to foment violence against marginalized communities. Third, we will examine how the discovery of gunpowder and the development of firearms shifted society¿s understanding of violence and how artworks helped drive that shift. Students will develop a sustained research project over the course of the semester that directly engages with one (or

Combined Section ID: 0973(HAA 1019/HAA 2019) - HAA 2019(#27320)

Course Description for Spring 2020:
This museum studies course draws on the University Library System (ULS) collection to develop an exhibition that will be realized in the Fall by students in the Exhibition Presentation Seminar. This seminar will focus primarily on medieval books, especially the rich collection of manuscript facsimiles in ULS Special Collections. We will consider these books as both reflections of medieval European culture and products of modern advances in methods of mechanical reproduction of artworks. Themes of the exhibition will include, but are not limited to, the revival of ancient Mediterranean artistic style in medieval Europe, the intertwining of secular and sacred themes in manuscript illumination, and the intersection of Christian and Jewish culture in major city centers. Students will study books from the ULS collection and use them as the point of departure for in-depth research geared toward developing an exhibition and producing an exhibition catalog. Students will also explore key texts related to the subject of the exhibition, identify potential loans, and recommend potential library acquisitions to complement its storyline.

Combined Section ID: 0995(HAA 2025/1025) - HAA 2025(#28864)

Course Description for Spring 2020:

What is worth collecting? What motivates collectors? Spanning art, archeology and material culture from the ancient world to the present day, this course explores the tensions between private property and public heritage that shape the history of collecting. Subjects will include the 'universal museum,' booty and looting in times of war, cabinets of curiosity, private and corporate collectors, deaccessioning, conservation, and repatriation. Particular attention will be paid to the antiquities market, the upheavals of World War II, colonialism and its aftermath, the Native American Graves Protection and Repatriation Act (NAGPRA), and international bodies like UNESCO. Students will encounter historical, anthropological, and art historical approaches to these issues and investigate local collections as primary sources. This is a core course for the minor in Museum Studies.

Course Description for Spring 2020:
Chinese Contemporary Art will introduce the history of modern and contemporary Chinese art, with a particular focus on art produced since the 1970s. It will begin with a brief discussion of the origins of modern art in China in the early 20th century and an introduction of Mao¿s Socialist Realist Art from the 1940s to the late 1970s. Most of the course, however, will focus on the avant-garde movements of the 1970s to the 1980s, the response to urbanization in the 1990s, and the influence of globalization since the turn of the century. The course will be structured around primary source material from the Gao Minglu archive, one of the most comprehensive archives of contemporary Chinese art in the world.

Course Description for Spring 2020:
Museum Studies Minors are required to complete a 3-credit academic internship under the course number HAA 1905. This is both an academic course and an internship placement. Students receive substantive mentoring from a site supervisor at a local museum, collection or historic site, and engage in projects with learning outcomes, whether in curatorial, educational, communications or development departments. Students also participate in monthly cohort meetings with the other interns enrolled in the course, under the guidance of an HAA faculty member, and are required to produce a final product. Note: Academic internships through HAA 1905 are also available to HAA majors as an optional elective. The student must apply for the internship through the HAA Department.

Course Description for Spring 2020:
This course is intended for students involved in the production of an honor¿s thesis (or an alternative honor¿s project) in the Department of History of Art and Architecture. It will function as a lab and complement the individual work you are doing with your advisor on your thesis or project by immersing you in a collaborative work environment. You and your peers will tackle common problems, review each other¿s efforts, and give constructive criticism and suggestions. The primary goal of the course centers on the thesis project itself. The idea is to create an intellectual community that will help you produce a better project than you would in isolation. A second goal of our intellectual community is to help you present your work effectively in a public showcase event. Class meetings will be working sessions structured around homework exercises, oral presentations, and reviews of student work.

Course Description for Spring 2020:
This museum studies course draws on the University Library System (ULS) collection to develop an exhibition that will be realized in the Fall by students in the Exhibition Presentation Seminar. This seminar will focus primarily on medieval books, especially the rich collection of manuscript facsimiles in ULS Special Collections. We will consider these books as both reflections of medieval European culture and products of modern advances in methods of mechanical reproduction of artworks. Themes of the exhibition will include, but are not limited to, the revival of ancient Mediterranean artistic style in medieval Europe, the intertwining of secular and sacred themes in manuscript illumination, and the intersection of Christian and Jewish culture in major city centers. Students will study books from the ULS collection and use them as the point of departure for in-depth research geared toward developing an exhibition and producing an exhibition catalog. Students will also explore key texts related to the subject of the exhibition, identify potential loans, and recommend potential library acquisitions to complement its storyline.

Course Description for Spring 2020:
What is worth collecting? What motivates collectors? Spanning art, archeology and material culture from the ancient world to the present day, this course explores the tensions between private property and public heritage that shape the history of collecting. Subjects will include the 'universal museum,' booty and looting in times of war, cabinets of curiosity, private and corporate collectors, deaccessioning, conservation, and repatriation. Particular attention will be paid to the antiquities market, the upheavals of World War II, colonialism and its aftermath, the Native American Graves Protection and Repatriation Act (NAGPRA), and international bodies like UNESCO. Students will encounter historical, anthropological, and art historical approaches to these issues and investigate local collections as primary sources. This is a core course for the minor in Museum Studies.

Course Description for Spring 2020:
This advanced graduate course unites students from widely varying disciplines to share the work of learning new disciplines. It explores humanities, social and natural sciences. Specific course objectives are: (1) to introduce students to a wide range of disciplines, theories, and methods; (2) to enable individual students to develop substantial strength in a new discipline and method of their choice; (3) to emphasize the historical discipline and the factor of time; and (4) to compare and contrast the various disciplines in topic, framework, data, method, analysis, and philosophy.

Course Description for Spring 2020:
¿Considering African American Art in the International Arena¿
From the post war period to the present day, `American¿ and `African American¿ art have played key but often different roles in the international arena. Major international touring exhibitions of American art and subsequent seminal international exhibitions characteristically bypassed many key African American artists. These exhibitions included `Modern Art in the United States: A selection from the Museum of Modern Art, New York¿, 1956, and `The New American Painting¿ 1959. At the height of the American civil rights movement, `Ten Negro Artists from the United States¿ was staged at First World Festival of Negro Arts, Dakar, Senegal, in 1966. This exhibition was the first to present African American art as a distinct group, although they already had an enduring presence within the international arena, dating back to the early nineteenth century.

This course examines the role and significance of African American art in international arena and is of particular relevance to those interested in visual

HAA 2612 1010 29796 SPECIAL TOPICS-ASIAN Lecture 3

Class Enrl Cap: 10 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0

Course Description for Spring 2020:
¿Art and the Earth¿
In our current condition of ever-escalating climate crisis, it is increasingly urgent to reassess art¿s relationship to nature. What might it mean to de-center the human in art, and has such a thing ever been possible, let alone done? Does art, as a rule, abet or prefigure anthropocentric destruction, and if so how? In this seminar, we will address art¿s relationship to our shared planetary home primarily by engaging premodern and nonwestern perspectives, with special emphasis on those originating in medieval Asia, broadly construed. Themes and topics include, but are not limited to: rock and cave art, comparative cosmology, cultivated and entextualized landscapes, debates about sentience, miraculous images, deep ecology, land art and earthworks, materialisms, colonialisms, and the emergent field of eco-art history. Field trips may be required.

This is a condensed version of the first two courses of the Spanish language program, and it has been designed for students who have taken at least two years of high school Spanish or its equivalent. Spanish 0115 follows a communicative approach: from the first day of class you will interact in Spanish in a meaningful context with your instructor and classmates. This course satisfies the foreign language requirement. Offered every fall and spring. Updated 10/10/2019.

Room Characteristics: Media - Data Projector/Monitor(1), Seating - Moveable(1), PeopleSoft - Scheduled (PS)(1)

The goal of this fifth-semester course is to enhance fluency and the development of oral proficiency in Spanish. Although the emphasis is on speaking and listening skills, reading and writing assignments are an important part of the syllabus. Certain grammar points are reviews (ser/estar, preterite/imperfect, etc.), but communicative competence is not measured by grammatical competence alone. This course helps students to improve their fluency, pronunciation, and strategic competence such as paraphrasing skills, and increase their vocabulary through readings, films, digital recordings and other authentic materials. Offered every term.

This course is specially designed for Spanish Heritage students who already understand and speak Spanish but they communicate almost exclusively in English and for students who speak Spanish mostly in informal settings and would like to improve their writing and spelling skills. This course aims to identify the skills that the heritage students already bring with them and develop them further. Through readings and film screenings, class presentations, discussions and debates, writing workshops and peer editing, this course seeks to strengthen the studentÂ´s confidence in the language. Students will review basic grammar structures and spelling, expand vocabulary and develop writing skills. The goal of this course is also to expose students to different products, practices, and perspectives from the Hispanic cultures in the US and abroad. Updated 10/10/2019.

What is literature? What does the literary do? This course, conducted in Spanish, is designed to introduce students to the study of Hispanic literature, while the same time dealing with concepts which can be applied to all literature. We will analyze Hispanic literature understood in its broadest sense, touching upon significant works, genres, movements, and authors from Spain and Latin America. In addition, we will read several examples of literary theory, or writing about literature, in order to investigate the role or function of the literary within the Hispanic world. This course fulfills the Writing-Intensive requirement. Updated 10/11/2018.

The primary goal of this course is to introduce students to the cultural histories of the Hispanic world, with a particular emphasis on Latin America. Through a multidisciplinary approach, we will study the interaction of social, political, ethnic, racial, and gender dynamics, and the resulting transformations in Latin America, past and present. After a study of pre-contact Iberian and Amerindian societies, we will critically examine the ensuing conflicts that characterized the three centuries of contested colonial rule in Latin America. We will then focus on the different national projects and revolutions that shaped the current geopolitical landscape through both cultural manifestations as well as discourses of national identity and calls for patriotic behavior. We will close with an overview of some of the challenges actors across Latin America face at the turn of the millennium. Throughout the semester, the goal will be both to learn about Latin America and about how it has been imagined by its most influential past and present thinkers, tracing differences and continuities. Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course provides a panoramic view of Latin American Literature from the pre-colonial period to the present. It is designed to (1) introduce Spanish majors to Latin American literary traditions in a variety of literary genres, and (2) develop students' reading, analytical and critical writing skills through a series of assignments. Organized as both a chronological and thematic survey, the class emphasizes cultural, social and political aspects of literary production. It will begin with the Pre-hispanic period and will read excerpts from the Colonial, Baroque, Modernism, Realism, Naturalism, Vanguardism, The Boom and Post Boom authors. Updated 10/01/2019.

This course is designed to cover some basics on second language acquisition and provide a thorough analysis of the linguistic specifics in L2 Spanish to L1 English learners or heritage speakers. This course introduces students to concepts, practices and research overview of three of the main areas of Spanish linguistics, such as phonetics, morph-syntax and pragmatics. It is meant to address student needs for improving their language communication skills in Spanish, in areas of their interest, such as academic research and/or other work environment.

This course will be an introductory presentation of Linguistics as a field of study. The central focus of the course will be the Spanish Language. Through their participation in the class, students are expected to achieve an understanding of Linguistics in general terms and to become familiar with fields as Phonetics, Morphology, and Sociolinguistics. In addition, it is expected that students will come to appreciate essential aspects of Linguistics that are closely linked to other fields of study related to human experience in its most diverse representations.

This course will explore the role of violence in contemporary Latin American cinema by examining both film media's representational capacity and its aesthetic composition or form. Departing from the contention that films not only create narratives, but also produce thought, we will focus on an analysis of Latin American films produced in the last twenty years, to interrogate whether violence can function as an aesthetic, theoretical and/or affective device to rethink the social, the political, and the economic. Are Latin American films merely faithful representations of the sociopolitical and economic violence that characterizes the Latin American ¿reality¿ of today? Do manifestations of violence in Latin American cinema offer new ways of thinking about and processing sociopolitical and economic conflicts? Or is violence being commodified and reified as Latin American cultural difference in order to promote and brand Latin American cinema in the global market and circuit of international film festivals? We will address these questions by exploring the ways in which Latin America cinema is placed in a constitutive and disruptive relationship to the violent forces of the neoliberal state and globalization. These inquiries will be made in three inter-related ways. First, we will study several Latin American films from various nations and productions. Second, we will look at specific events and cases of violence with which these films engage, such as gender, racial and class oppression, military dictatorships and the

This course reviews the last hundred years of Mexican cultural history, from the 1910 Revolution to the present. Taking into consideration the meta concepts

that define national culture: "the cosmic race," "the post-Mexican condition," and "the labyrinth of solitude," and under the lens of indigenous, nationalist, feminist and postmodernist theories, this course examines several milestones of national culture. In particular, this analysis focus on the cultural programs of the post-revolutionary period (muralism), the rise of the Mexican cultural industry (radio, cinema, comics, telenovela), the transcendental moments of conflict (the 1968 Olympic Games, the implementation of the Free Trade Agreement and the rebellion of the Zapatistas in 1994) and transnational tendencies (the pachuco, the narcoculture). The objective of the course is not, however, to define Mexican national culture, but to analyze, problematize and unsettle the ideological conflicts and cultural struggles that contextualize the production and diffusion of the great works of the last century through critical approaches guided by such concepts as those of ideology, race, gender, nationalism, the border, and post-nationalism. Through a variety of literary and cultural texts, this course is designed with the intent to a) trace the representation of a national ethos in Mexican literature and culture; b) problematize the representation of the national in Mexican literary and cultural production; and c) to provide learning opportunities for

The literatures of Latin America and Spain have been in dialogue, whether intentional or otherwise, since the first points of contact and subsequent colonization and independence. Reading cultural products side-by-side illuminates these dialogues and allows students to place these works of Latin America and Spain in their global context. In this course, we will engage with transatlantic intertextuality to analyze significant Spanish and Latin American cultural and literary texts, broadly defined to include visual art, performances, and music, to explore space, society, and culture through the perspectives of various authors and artists. Updated 10/01/2019.

This course attempts to examine writing and art produced by women. A writer from the Colony, as poet Juana Inés de la Cruz, or a character as Teresa in the film Retrato de Teresa, or painters as Frida Kahlo (Mexico) or Myrna Báez (Puerto Rico) are all important characters within a timeline, a context, and the struggle for voice and visibility. Ours is an intersectional approach to patriarchy, violence, sexuality, race, and art, which are the five topics of this course. Each will be preceded by a theoretical or sociological essay with its corresponding examples (writing, performance, music or film). Under Jean Franco¿s concept concerning the ¿struggle for interpretive power¿, and the vision of women as ¿double agents¿ (Massiello), art becomes a creative way of imagining a different world where women are no longer underestimated nor subjected to the patriarchal order. As art is inquiry, these texts open a rich dialogue concerning language (Juana Inés de la Cruz), violence (Enríquez, Allende, Bolaño, Segato, Galindo), love (Lispector, Dávila, Agustini, Molloy), race (Burgos, Dávila, black feminists), fear (Berman, Llosa), geography and urbanism (Santa Cruz) and performative art (Galindo). Each topic will be examined from a multiplicity of perspectives in order to render an intersectional approach to a a sociological, economic, racial and political situation such as Juarez¿ maquiladoras, the ¿guerra sucia¿ and the disappeared, las `Madres de Mayo¿ movement, geography, women artists as cultural icons, murder and

A survey of the principal avant garde movements in Latin America, in relation to avant garde movements in Europe and elsewhere, with focus on the 1920s. Readings in depth of major authors including Borges, Huidobro, Mário de Andrade, Martín Adán, Girondo and Vallejo. Comparative examination of Spanish American and Brazilian avant gardes. The period will embrace Mexican muralism and a whole variety of other movements in the visual arts (including indigenismo, Arte Madí and Latin American surrealism), the literary groups around Proa, Martín Fierro, Revista de Antropofagia, Contemporáneos and Amauta (to mention just a few of the major magazines of the avant garde), and intellectual developments that worked across various media. Brazilian readings will be available in Portuguese but also in Spanish (and English in the case of Macunaíma).

Materials (starred items will be ordered from the University Store)
*Jorge Schwartz, Las vanguardias latinoamericanas, 2nd ed. (Fondo de Cultura Económica)
*Mihai Grünfeld, Antología de la poesía latinoamericana de vanguardia (Hiperión)

From a queer theoretical perspective, incorporating feminist research methodologies, this graduate course offers a panoramic view of queer cultural production in Mexico from 1901 to the present. As a point of departure, several milestones are presented in the sociocultural constructions of masculinity, femininity and sexuality and their respective transformations throughout the 20th- and 21st-century. Through an interdisciplinary approach, this course examines the themes, dynamics, trends and common sites of sexual diversity in contemporary Mexico. Incorporating a diversity of cultural texts and theoretical approaches, this course centers thematically on the gender models that circulated before, during and after the 1910 Revolution, the debates about homosexuality during the decade of the 40s, 50s and 60s, the emergence of an activist movement in favor of sexual diversity in the 70s, the cultural production centered on sexual dissidence, nightlife culture, sexual manifestations in the borderlands, as well as in lesbianism, travestismo, paying particular attention to the epistemological debates on queerness, and on the cultural symbols and practices of the LGBT community in Mexico. This course aims to develop research skills through the rigorous examination of a variety of cultural texts and theoretical works, as well as to problematize practices of knowledge production within the area of sexualities studies from/in Mexico. Updated 10/01/2019.

"The failure of Latin America" is the title John Beverley gave to his last public intervention at the University of Pittsburgh (2018). With the advent of cultural globalization and Latin America losing momentum by entering the end of an era of groundbreaking achievements, Beverley's provoking title has proved to be quite prophetic. This seminar invites students to interrogate Latin America's "literary failures" to fulfill both the promises of cultural modernity and the promises of revolutionary insurgences. By discussing some of the most significant literary projects along these lines, we'll see to what extent global cultural reconfigurations have historically pushed Latin America and Latin Americanism into global designs whose ultimate product is the globalized culture in which we now live. Crucial to the understanding of this operation will be: 1) to address the strategies, uncertainties, self-criticism and historical burden that led cultural Latin Americanism toward this global-future of the world, and 2) to debate pressing issues of Latin American critical thinking about the viability or non-viability of the literary utopias and cultural sovereignties still disputed in the region. Sources include canonical works by José María Arguedas, Andrés Bello, José Carlos Mariátegui, José Martí, Alfonso Reyes, Domingo Faustino Sarmiento and César Vallejo, but also non-canonical and/or contemporary authors such as Daniel Alarcón, César Calvo, Gamaliel Churata, Jaime Saenz, Jorge Luis Volpi and Blanca Wiethüchter. John

This seminar focuses on the formulation of individual research problems in preparation for thesis research. Course requirements center around the development of a dissertation prospectus, and will include research design, review of area and theoretical literature, and significance of the proposed project. Additionally, the preparation of conference papers and articles for publication, as well as how to prepare grant proposals for funding agencies will be explored. Updated 10/03/2019.

Beginning with an examination of the militant Latin American films of the 1960's and 70's, this course explores the ways in which the various film industries of Latin America have established and negotiated their position(s) in the global arena. Combining political radicalism with artistic innovation, the concept of Third Cinema -- in conjunction with other Marxist-inspired film theories of the late 60's and 70's -- immediately gained international recognition and became the vanguard revolutionary cinematic movement of that time. The influence of Third Cinema continues to the present where individual filmmakers and alternative film industries question and challenge dominant Western cinematic practices. The focus of this course is two-fold: first, how do Latin American films connect and relate to Third Cinemas from other Global South locations, such as those from Africa and Asia? Second, how do the Latin American cinemas of today position themselves vis-à-vis Third Cinema as they negotiate with the current conditions of economic and cultural globalization? Is this political and cultural idea still relevant for Latin American film industries that target the global market? Looking also at Latin American films produced in the last two decades, this course will examine the ways in which recent Latin American cinemas deploy and re-fashion certain thematic, aesthetic and stylistic aspects of Third Cinema not only as a mode of critique, but also with the effect of creating a marketable "global" cinema. As such, we will

This graduate seminar will offer an overview of Lusophone literatures and cinema spanning the long twentieth century with a focus on the presence (or lack) of food in selected works from Portugal, Brazil, Angola, Cape Verde and Mozambique, and its intersections with issues including, but not limited to, race, gender, sexuality and class. Throughout the course, students will engage in critical discussions of the visceral politics of hunger and lack; cannibalism and Lusophone histories; as well as the ways food and eating practices are used as literary and filmic tropes of resistance and/or inspiration for social change or the demarcation of (deviant) identities. The seminar will also seek to uncover the intersections of digestive politics and power/hegemony. Discussions, presentations and individual research will aim to demonstrate that representations of food and eating in literatures and film embody meanings beyond superficiality and corporeal survival and instead speak to larger political issues both within the Lusophone world/the Lusosphere and beyond.

Are you still up in the air about future plans? Well, do we have something for you! Yes. That handy little pick me up that can turn even a 98-pound struggling history major into a strong candidate for the job market. Yes. I am talking about the new, the improved "Professional Development Class for History Majors and Minors". Yes. You know what I am talking about. History 0010! This is a 1 credit, S/NC - 11-week course that will cover such topics as: 1. Resume writing 2. Cover letters 3. Networking 4. Interviewing 5. Working a job fair 6. Preparing for a job fair. So, hurry on down to your local PeopleSoft at the beginning registration and get your "Professional Development for History Majors and Minors." Note: Offer good only for History majors and minors and subject to space. Side effects: increased confidence, better resume, interview and networking skills and job possibilities. These claims have not been checked by the FDA. (Note: last line is a joke!)
STRONGLY RECOMMENDED FOR ALL HISTORY MAJORS AND MINORS.
Prerequisites Declared history majors or minors or with permission of instructor.

In this course, we will survey the causes, conduct and conclusion of World War II in Europe. We will emphasize such topics as nationalism, racism, and propaganda and their roots in the nineteenth century. We will talk about the development of the modern armaments industry and arms races as they played out

in the era before the Second World War. We will explore models of conflict and peace that have defined debates about international relations for the past two hundred years, and we will see how these ideas influenced international competition, alliance systems, the establishment of the League of Nations, interwar appeasement, and the foundation of the United Nations. We will think about wartime dynamics, spending time examining the changing ideals of war and relating these trends to technological development and growing industrial capacity on the one hand, and changing social and political attitudes on the other hand. We will seriously engage the topic of the relationship between culture and war by reading many types of sources, by examining images and films and even architecture, and by listening to radio addresses and viewing newsreel footage. In addition to discussing battles in the European theater and exploring the experiences of the soldiers in battle, we will think about the impact of war on civilians and the role of civilians during war, in resistance and in collaboration. We will talk about the origins and experience of the Holocaust, and about guilt, responsibility and memory. Throughout the

In October 1917 a radical party of Russian Marxists launched one of the greatest experiments of the twentieth century: building the first socialist state in human history on the vast territory that was once the Russian Empire. They hoped to build a society where everyone would give "according to his ability" and get "according to his need." For over seventy years people all over the world watched the Soviet experiment, some with fear, and some with admiration. This unprecedented challenge to capitalism and liberalism defined the twentieth century in many ways, and even though the Soviet experiment failed, its repercussions are still felt today.

Over the course of the semester, we will reconstruct the Soviet experiment. We will see its finest moments, from the creation of the world¿s largest industry to the victory over Nazi Germany to the launching the first man in space. But we will also witness the most tragic episodes: the Civil War, the labor camps and the show trials. A variety of reading, video and audio material will guide you from the revolutionary days of 1917 to the collapse of the Soviet system in 1991 and help you develop understanding of historical processes. You will learn to analyze historical debates and formulate your own

Spring term 2020: Latin America is a region of great cultural, ethnic, geographic, and economic diversity sharing a common history of colonialism that continues to matter today. This course explores the unfolding and collapse of a new social order under Spanish rule, from the sixteenth-century Conquest through the independence wars of the early nineteenth century. Topics include the impact of Spanish conquest and colonialism on native societies; religion and the Catholic Church; race relations and mestizaje (race mixture); gender and power; resistance and rebellion; the crisis and collapse of the Spanish colonial order; and the legacies of colonialism. Documents from the period will form the core of our discussions and provide the basis for critical thinking and imaginative exploration.

This course examines African American history and culture from its inception with the Transatlantic Slave Trade to its transformation during the Civil War. Topics discussed include the transition from indentured servitude and Native American slavery to African chattel slavery; the origins and rationale behind the creation of the social category of "race;" physical and reproductive labor in northern domestic settings and southern plantation settings; methods of resistance; and the multifaceted ways in which African Americans played a part in emancipating themselves.

This course is an introductory survey of world history, by which is meant an overview of major processes and interactions in the development of human society since the development of agriculture some 10,000 years ago. It is a selective overview, emphasizing large-scale patterns and connections in political, social, cultural, technological, and environmental history, yet it also provides balance among regions of the world. It encourages students to apply historical techniques to issues of their own interest.

This course will explore the history of the modern world through the lens of gender and sexuality. It will cover historical developments across the globe from late eighteenth to the twenty-first century focusing on topics that are often invisible in to "big" histories: sexuality and reproduction, same-sex desire, sex and the body, and biopolitics. This course will help students navigate contemporary debates about sex and gender by giving them a historical perspective on the issues of human sexuality.

Controversies related to human health have dominated the news in recent years, whether the Ebola epidemic in West Africa, Zika virus in Latin America, or measles outbreaks in California, but a sense of context and causation is often lacking in the public discourse. This introductory course explores the historical roots of selected, current controversies in public health and medicine through the examination of specific case studies from a diverse geographical and chronological range. We will identify and explore the broad historical antecedents of current issues and offers points of comparison from times and places distant from our own.

In the 2019-20 academic year, Health Controversies in History will be oriented around three four-week sections focused on: quarantine; population health, race, and heredity; and vaccination. Understanding both the antiquity of ethical and moral quandaries embedded in clinical and public health interventions, while also considering what has led to particular forms and policies at different moments, allows students to engage critically about local issues, domestic policy, global health, and their place in the world.

The History of Now
This course will teach students to use a historian's perspective to understand the great issues affecting us in the present. Each week will focus on a different topic, including climate change; gun violence; mass incarceration; neoliberalism; political polarization; and more. Students will work with primary sources, think critically about secondary sources, craft analytical questions to guide their own research, identify the appropriate scholarly literature, and then write an argument-driven, evidence-based research paper in clear, compelling prose. Assignments include weekly readings, a research project proposal, a primary source analysis, an introduction and outline of the final paper, an in-class research presentation, and a final paper of approximately 15 pages.

This seminar has two principal purposes. The first and broader goal is to assess your ability to identify, analyze, and employ historical sources culminating in the preparation of a research-based capstone project. The second (and related) goal for this course is to develop students¿ understanding of what uses for history constitute public dialogue, especially focused on this moment in the United States. Toward this end, we will consider historical controversies and public discussions that have, at their root, historical components. As students craft their own research projects, we will discuss potential venues for their scholarship to make public history contributions. Students should leave this class with both an original research project and a concrete idea of why that project matters to this moment in historical time.

One of the most familiar, but least understood, groups in American history are the Puritans who settled New England in the 17th century. This course introduces students to the ways historians work by allowing them to address key questions regarding the unique identity of the New England Puritans. Students will be encouraged to develop their own assessment of the Puritan social, political, economic and religious legacy. Due to their intellectual sophistication and commitment to creating a godly society in the North American wilderness, New England's Puritans were almost constantly engaged in theological, social, political and economic controversies. These controversies, their commitment to scripture, and their high level of literacy, created a substantial paper trail. Due to both their stature in American history, and this wealth of documentation, the Puritan legacy has been hotly contested since the earliest generation of American historians. Through primary documents and secondary literature students will analyze not only the nature of Puritan New England, but also how it has been perceived by various generations of historians. Students will become part of this historical debate by writing several short analytical papers using primary and secondary documents and discussing their findings in class discussions and debates.

HIST	1001	1340	27774	INTRODUCTORY SEMINAR	Seminar	3

Room Characteristics: PeopleSoft - Scheduled (PS)(1)

This course introduces History majors to the historian's craft. Students will learn how to analyse primary and secondary sources (identify key arguments, evaluate use of evidence), assess historiographical debates, and develop their writing skills. To that end, the course will focus on the European Enlightenment as an intellectual and cultural movement, in and above national contexts. Assignments include the writing of several shorter essays on enlightenment topics (such as natural law, government reform, religious tolerance, political economy, race and gender, colonialism) and on historical interpretations (high Enlightenment, low Enlightenment, Enlightenment/s, the counter-Enlightenment). A longer research paper is due at the end of term.

In-class revision and discussion of students' written work form an important part of the course.

This course examines the history of nationalism, the making of ethnicity, and the nation-state. The course provides an overview of theoretical approaches, applicable both to historical and to more recent nationalist challenges in Europe. We will place particular emphasis on changing national and regional identities in Europe, comparing the development of nationalism in Western European countries such as France or Germany with Eastern European developments in the Russian and Habsburg Empires and its successor states. The course examines the wave of ethnic nationalism in Eastern Europe after the dissolution of Yugoslavia and the Soviet Union. Finally, we will explore new trends of populist nationalism and the rise of right-wing nationalist extremism in the wake of the refugee crisis and Brexit.
"Pre-knowledge in European history is advantageous but not required. This class can be taken by students of all levels, including First-Year students."

Europe experienced unprecedented levels of destruction and violence during the Second World War and its immediate aftermath. So dramatic were these experiences - with the Holocaust standing out as the most disturbing case of mass murder in modern times - that many people lost their faith in modern civilization as such. Against this backdrop, few would have predicted that Europe would not only recover but also reach an unprecedented level of political stability, prosperity, and civility after the Second World War.

This course examines postwar Europe's striking transformation by exploring the strategies European societies - with significant involvement of the United States and the Soviet Union - pursued to overcome the traumas of war and rebuild a shattered continent. Course topics include the legal persecution of war crimes, the building of societies and political orders that are based on the rule of law and international integration, the reconstruction of Europe's bombed cities, and a process of reconciliation between nations once hostile to each other.

Is Serena Williams the greatest tennis player of all time? Is the US Soccer Team the best in the world? Do your answers require gender qualifiers? Often, within the world of sport, women athletes are considered inherently inferior, and thus incomparable to their male counterparts. In this course, we will examine the roots of this perceived inequality and focus on women's efforts to change public attitudes towards their athletic achievements through primary and secondary sources, documentaries, film, and oral history. We will also pay close attention to the ways that inequality functions among women athletes-why Venus and Serena are treated differently than Maria Sharapova. Though at the professional level, women are far from total equality in sport, and this course will document the progress made, struggles along the way, and the obstacles that remain. Finally, we analyze the relationship among gender, sexuality, and sport, and consider the ways that sport has the potential to reinforce or undermine heteronormality, as well as conventional concepts of masculinity and femininity.

HIST 1084 1010 27775 FOOD AND HISTORY Lecture 3

History of Food:
Food in History will examine food culture and the intersections between gender, race, class, and food. In this course, we will take a close look at different foodways, and examine the emergence of global food markets in the 19thand 20thcenturies. Lectures, discussions, and media will focus on diverse interpretations of the role that food plays in the global economy as well as in a variety of global cultures, and the connections between food and identity in the modern world. Opportunities for tasting will be announced in class.

This course considers the history of sport as a social, political, and economic force around the world. We will examine the influences of westernization, industrialization, capitalism, and democratization have had on some of the most popular sports, such as soccer, football, baseball, rugby, running, and cycling to explain how they are universally recognized in nearly every country. We will also consider how the dimensions of race, class, and gender, as well as national origin, have impacted sport. History of sport and global capitalism is framed as an expression of social capital, explained in more detail in the course. This course is designed for students seeking to make their way as professionals, as well as for those interested in global sport as a social and political force both in the U.S. and around the world. Focusing on the evolution of sport as a global industry, this course equips students to

understand and navigate the sports industry, scholastic sport, or sport for development.

Combined Section ID: 0616(SOC/1386/HIST/1126) - SOC 1386(#29258)

The course will examine the French Revolution in its various geographical locations: from Paris and Versailles, to the provinces in France, to Europe and the wider world. It will explore how the reception and the impact of the French Revolution depended on the particular traditions, social constitutions, and economic developments of the places through which it travelled. Based on a cross-regional and cross-national approach, the course will also assess the values and problems of existing interpretations of the French Revolution (Marxist, social, political, cultural, and global interpretations). The reading list combines both primary and secondary sources (in English translation).

HIST 1132 1020 25956 GERMANY IN THE COLD WAR Lecture 3

Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

30 years ago, the communist regime of the German Democratic Republic (DDR/GDR) crumbled. Despite a whole generation of Germans having grown up in a reunified country, the memory of forty years of dictatorship is still very vivid and its legacy haunts contemporary political, and socio-economic everyday life.
At first, we will review the general history of the Cold War, focusing on the end of the Second World War and the policies of the Soviet Union. We will look at how the (former) Allies fought over Berlin and the formal political division of Germany.
Second, we will focus on divided Germany and on how the two nations and their ruling elites dealt with the division. This "Wall" did not simply cut a country in two, it severed family ties, long-standing economic connections, and communication routes. Third, we will look at the various ways that the modern German nation deals with its communist past. For example, the Federal Commission for the Records of the State Security (Stasi-Unterlagenbehörde) administers the legacy of the hated East German secret police. While serving historians as a research institution, the Commission also functions as a

government tool to impose a certain vision of the past - often resulting in controversy over memory cultures.

This course will explore the discourse of capitalism from 1750 to 2000 in the context of political, technological and economic change. Its main questions will center on the relationship between these material developments and thought: the reinforcement of free market ideals on the one hand, arguments for change on the other. Course work will include close reading and analysis, both oral and written, of Adam Smith, Karl Marx, J.S. Mill, Peter Kropotkin, Friedrich Hayek, Milton Friedman and others.

After World War II East European communist leaders wanted to use film to support their political, economic, and social campaigns. Filmmakers became privileged allies of the communist regimes that came to power in the new countries of the "Soviet Bloc" in the 1940s. Yet not all filmmakers and actors in the Soviet satellite states toed the Party line fully. Some of them crafted complex films with subtle messages portraying controversial historical episodes, or aspects of daily life as actually experienced by ordinary people under the new regimes. Movies that we will watch and analyze, released in Hungary, Romania, Yugoslavia, Poland, and Czechoslovakia in the decades before the fall of communism in 1989 managed to depict and criticize "really existing communism." This course will trace the history of East European communism and film-making from 1944 to 1990, acquainting students with examples from an exceptional body of cinematographic work, together with the broad outlines of East European history. Students will learn to "read" these films in their cultural, political, and historical context. (Can fulfil B/C/H, Polish, and Hungarian minor requirement).

The course examines Chinese history from the early nineteenth century to the present. Major topics include change and continuity in Chinese culture, economy, politics, and society over the past two centuries, as well as ordinary people's life experience under wars, revolution, and reform. Lectures will be structured in a chronological order, beginning from Imperial China, through the Nationalist Revolution, the Sino-Japanese war, and the Communist Revolution, and ending in Deng Xiaoping's reform and China's economic globalization in the early 21st century.

This course examines the origins, course, and consequences of Latin America's three major social revolutions of the twentieth century. It begins with the Mexican Revolution (1910-40), focusing on the key role peasants played in promoting revolutionary change. The course then considers the socialist project of the Cuban Revolution (1959-). It concludes with Nicaragua's Sandinista Revolution (1979-90), the first revolution to freely give up power at the polls, in order to consider the complicated relationship between revolution and democracy.

HIST	1610	1010	29166	UNITED STATES COLONIAL	Lecture	3	

Bldg: TBA **Room:** TBA **Days:** MW **Time:** 11:00 - 12:15 **Instructor:** Frykman,Niklas E

Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course will survey approximately 250 years of American history, from the fateful first attempts to establish a permanent European presence in the late fifteenth century Caribbean to the early rumblings of North American independence in the mid-seventeen-hundreds. While the focus will most often return to those geographic regions that eventually would be claimed by the United States, our perspective throughout will be much broader. Most importantly, we will place the history of colonial North America in both Atlantic and continental contexts, seeking to understand how its development was critically shaped through the complex interactions of many different peoples, Native American, European, and African.

HIST	1611	1200	15615	AMERICAN REVOLUTION 1763-1791	Lecture	3

Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course examines the conditions leading up to the American Revolution, the war years, the framing of the Constitution and establishment of the federal government. The course will place special emphasis on how the individual colonial political cultures that responded to British imperial policy from 1763-1776 were shaped by the political turmoil in Britain from 1603-1688. Throughout the course we will trace how American colonists and British policy makers developed differing perceptions of the British Empire and the "rights of freeborn Englishmen" in the empire. The course concludes with an analysis of how the various and contentious groups of newly minted "Americans" worked out the revolutionary settlement in framing and ratification of the United States Constitution.

This course examines the history of the American South from European contact to the era of Reconstruction. We will consider how to define the South as a distinct region in terms of geography, culture, economy, and politics. What sets ¿the South¿ apart from other regions? Can we truly identify one distinct South? What are the U.S. South¿s connections to the Global South? To further explore these questions, we will study and analyze multiple regional cultures within the southern United States to emphasize the diversity of experiences within. The course also emphasizes the diversity of the Southern population, focusing on the history of those often overlooked in romanticized narratives of the former Confederacy, including enslaved men and women, city dwellers, immigrants, working women, free African Americans, and Appalachians, among others. Finally, we will consider the ways in which slavery shaped the southern United States economically, legally, and culturally and how these legacies of slavery lasted beyond emancipation.

This course explores the development of the frontier as both a physical space and an ideological construct. Therefore we will follow the concept and reality of the frontier from the 17th century to the 21st century, with a focus on its rapid development during the 19th century. Not only did diverse and

distinctive frontier societies emerged from the processes associated with settling the frontier, but concepts related to race, religion, property rights, war, ethnicity, governance, finance and speculation emerged and were contested on the frontier. Since different and conflicting interpretations of the frontier experience have emerged over time and raise important questions and perspectives about the character of American society, we will read and analyze a wide range of historical approaches to this critical concept and period in American history.

HIST 1661 1010 29189 US GENDER/SEXUALITY SINCE 1865 Lecture 3

In this course, we will consider the diverse experiences and social roles of women from the late nineteenth century to the present day. We will emphasize changes in women's political action, social roles, cultural expression, and personal identity. Issues of migration, race and multiculturalism, class and economic opportunity as well as sexuality and feminism will inform our chronological survey of women's history. This course will ask students to read a variety of primary source materials and to synthesize and critique secondary sources.

From panic over the recent West African Ebola outbreak to tensions in post-genocide Rwanda to concerns about religious extremism in the Sahel, high-profile African stories regularly make their way into the American media. Alarming news is layered upon centuries-old negative perceptions of Africa in the U.S. and Europe, offering a picture of a continent and a people in distress, suffering from violence, poverty, corruption, and squandered resources. On the other hand, we see images of serene, expansive landscapes with hardly a human in sight, where concerns over conservation and biodiversity dominate. Less frequently told are stories of everyday life - of love and marriage, school and work, travel and home, ports and highways, or factories and farms. Even more seldom is an accurate, objective historical perspective a part of the conversation.

How do we understand instances of legitimate and acute crisis alongside the reality that, for many, life goes on as it did the day before? How do we reconcile persistent "Afro-pessimism" with a new narrative that hails the continent as the economic frontier of the 21st century? What information do we need to take Africa out of the realm of the exotic and approach both its past and present circumstances with a sense of balance and objectivity?

A comprehensive understanding of African history provides a good starting point. This course addresses the diverse and complex history of selected

International Communism and Anti-Colonialism

When the Communist International (Comintern) was founded in the Soviet Union in 1919, its support for national liberation was a main draw for colonial peoples to join communist movements. This research seminar will examine the history of international communism from the formation of the Comintern in 1919 to decolonization in the 1960s to understand how communist movements addressed questions of imperialism, race and racism, national liberation movements and revolution in Asia, Africa, the Middle East and Latin America. Emphasis will be on the relationship between the Soviet Union, indigenous communist movements in the so-called Third World, and the ways issues of race, class, and nationalism shaped those movements. This course is an undergraduate research seminar. However, instead of writing a research paper, students will be required to produce a short audio documentary (5-10 minutes) on a topic related to the course. Therefore, in addition to interrogating the history of international communism, students will learn the basics of audio documentary making, scriptwriting, narration, interviewing, audio editing, Adobe Audition and digital recording equipment. No prior experience in audio production or equipment

Attributes: Undergraduate Internship

The Digital Atlas Design Internship supports student research by teaching interns how to use digital tools and methods to explore the global past. Students manage a semester-long independent research project using an interactive, public-facing platform that utilizes GIS and web design skills gained during the internship. Students engage with both world history and digital humanities while developing a spatial database about a topic of their choosing. Experience with digital methods or GIS is not necessary, and students can receive publication credit for their work. To learn more about the Digital Atlas Design Internship, please visit https://www.worldhistory.pitt.edu/digital-atlas-design-internship. You can also view past internship projects by visiting our project gallery at https://www.worldhistory.pitt.edu/projects.

HIST 2009 1010 26778 GRADUATE TEACHING PRACTICUM Seminar 1

The History Department's Program for Graduate Training in Pedagogy aims to prepare graduate students for the job market by assuring that they have the most complete qualifications possible, including a rich teaching portfolio, the badge in pedagogy offered by the University, and specialty training provided by the History Department. This program capitalizes upon the expertise of our Department's most experienced classroom instructors as well as the offerings of

the Center for Teaching and Learning. It integrates these resources in a way that is tailored to the changing obligations and dynamics of the graduate students' first three years in the program. It expects students to integrate pedagogical skills and effectiveness throughout their graduate education, recognizing that the study and practice of pedagogy is best done over an extended period of time and through a variety of methods. In order to reflect this sustained effort in skill-building, students will earn one hour of independent-study credit per year for three years.

In order to reflect this sustained effort in skill-building, students will earn one hour of independent-study credit per year for three years.

Bldg: TBA **Room:** TBA **Days:** Tu **Time:** 14:00 - 16:50 **Instructor:** Langmead,Alison Diane

Class Enrl Cap: 7 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Room Characteristics: PeopleSoft - Scheduled (PS)(1)
Combined Section ID: 0042(HIST 2020/HAA2040) - HAA 2040(#29293)

This collaboratively taught seminar exposes students to interdisciplinary and evolving methods for discovery and knowledge construction in the humanities and social sciences. In particular, it focuses on how information flows in and out of sociotechnical systems, the ways that researchers access, arrange, organize and describe information for use in their disciplinary context and how that shapes critical inquiry. Students will do hands-on work with data and methods and interrogate their affordances and limitations. Mini units in this course will be led by faculty from History, Political Science, Economics, English, Sociology, Information Science, History and Philosophy of Science, and History of Art and Architecture who are involved in the Mellon grant-funded Sawyer Seminar, "Information Ecosystems: Creating Data (and Absence) From the Quantitative to the Digital Age," which will feature invited speakers and support several post-docs and grads in AY 2019-2020.

The purpose of this course is twofold: First, it offers a broad introduction to the diverse sources and research methods used by historians, and to the range of spatial and temporal scales that shape historical work. Second, with an eye to both the M.A. essay and the eventual dissertation, the course provides students with tools to craft a project, conduct research, and analyze various types of historical sources. Students should be given the opportunity to conduct hands-on work with primary sources. The skills developed in this course will prepare students to do research in archives and other repositories.

International Social Movements
This course explores a range of international social movements from the early nineteenth century to the end of the Cold War in order to highlight the role of non-state actors in international affairs. It begins with the trans-Atlantic movement against slavery and then considers international movements struggling for a variety of causes, including women's rights, peace, anti-colonialism/anti-imperialism, human rights, anti-racism, the environment, and global social justice. The course seeks to illuminate how social activists in different parts of the world overcame grave challenges to forge a common movement-and the impact their movements had on international politics and local societies. Course readings will consider case studies from Africa, Asia, Europe (East and West), Latin America, and the US.

"History from Below" - also called Peoples' History and Radical History - has been an important part of the appearance and spectacular growth of social history over the past half century and one of the most important developments in the discipline and profession of history. This course is designed to introduce graduate students in a broad variety of disciplines, departments, and programs to the key theories, methods, and issues in history from below, from its origin in the 1930s, through the New Left of the 1960s and 1970s, to the present. The course will concentrate on four major themes: race, class, gender, and capitalism. We will read classic and newer works to demonstrate how historical practice has changed over time. Special emphasis will also be given to sources, especially archival research, and to writing.

Some of the oldest written texts reveal that humans have always told stories to explain the world around them. When those stories are ancient, we call them myths; when they are recent, we call them science. This course will examine primary source texts from ancient Assyrian and Babylonian civilizations through the Greeks to about the 4th century BC. Authors studied will include the Pre-Socratics, Plato, Aristotle, as well as several authors in astronomy, mathematics, and medicine, including Euclid, Archimedes, and the Hippocratic texts. Key questions addressed: How have concepts of the cosmos changed through the period studied? What is the difference between myth and science? What is the place of divinity in past and present thinking? What roles do history and culture play in conceptions of the natural world?

This course teaches rational and mythological thinking, the stories of early humanity, the mysterious emergence of philosophy in Greek civilization, and the transformation of myth into science. We will venture to reawaken the deep mythological structure of the human mind, the powers of the imagination as opposed to the powers of logic and reason. We will engulf ourselves in the pleasure of fantastic stories involving early humans, gods, heroes, impossible animals, as figures of thought that are always alive in in the world around us, and help live a better life. There are no prerequisites, no exams, and no quizzes.

This course will consider some of the most important lines of thought in Western intellectual history, from the Ancient Greeks to the Scientific Revolution. We will begin briefly with ancient Greek speculations in cosmology, natural philosophy, and medicine. Then we will examine how they develop through the Middle Ages and into the Renaissance. These include, among other topics, the magical, alchemical, and astrological traditions that flourished from Antiquity through the 17th century. In the second half of the course will focus on the exciting intellectual transformations in 17th-century Britain and Europe, which constitute the beginnings of modern science. The great scientific achievements of figures such as Galileo, Kepler, Copernicus, Descartes, Boyle, and Newton will be discussed. In this course, students will gain a clear understanding of the multi-dimensional origins of modern science.

Room Characteristics: PeopleSoft - Scheduled (PS)(1)

This is a philosophy class about scientific reasoning. What makes scientific reasoning distinctive (or not) from other instances of reasoning? To answer this question, students will first practice using tools from deductive and inductive logic. This part of the class will seem more like a math class: there will be abstract symbols much like algebraic variables, rules for manipulating them, and regular homework problems. However, the heart of the class is in the process of each student using their understanding of these formal methods of deductive and inductive logic to develop their own views on the nature of scientific reasoning. To do this, students will read and discuss articles in philosophy of science. Topics will include the relationship between theoretical and experimental science, the aims of science, and the intellectual virtues fitting to scientific practice.

HPS 0612 1010 11294 MIND AND MEDICINE Lecture 3

Bldg: TBA **Room:** TBA **Days:** MW **Time:** 13:00 - 13:50 **Instructor:** Barker,Gillian A

This course is an introduction to philosophical issues at the intersection of psychology and medicine. We consider questions in three broad areas: (I) Minds Do Medicine - Medical knowledge is the product of human minds. What implications follow from this? Can we improve medical science by a better understanding of human cognitive and social psychology? (II) Medicine Looks at Minds ¿ Some medicine aims to understand and treat ¿mental illnesses,¿ i.e. illnesses of the mind. What problems arise when we try to apply medical concepts and methods to the mind as well as the body? How do recent developments in brain science help or complicate these efforts? (III) Mind and Medicine in the Clinic ¿ In clinical settings, the psychology of clinicians and patients interact. What challenges arise in those interactions? How can thinking about the psychology of clinical practice help us improve clinical outcomes?
Specific questions we¿ll explore will include: Are concepts like health and disease objective? What biases in medical research and practice result from human cognitive limitations? Does the profit motive distort medical research? Should we replace the concept of ¿mental illness¿ with ¿neurodiversity¿? Do minds have gender? How do assumptions about gender affect psychological research? Can new brain-imaging technologies help us rethink psychology? How can patients¿ ¿inside¿ knowledge of their conditions contribute to medical understanding? What is the role of empathy in clinical practice? Can artificial

This course is designed as an introduction to the philosophical issues that exist at the intersection of biology, psychiatry, and medicine. Some of the questions we will grapple with include: What is mental illness? Are mental illnesses like physical illnesses? What is a disease? Should certain functionalities be considered "normal" or "natural" for an organism? How do researchers study diseases? What is the relation between the causes of disease and their symptoms? We will discuss these questions both from a scientific / empirical point of view and a philosophical / conceptual one. Students need not have prior knowledge of biology, psychiatry, or medicine.

HPS 0613 1050 26750 MORALITY AND MEDICINE Lecture 3

Bldg: TBA **Room:** TBA **Days:** MW **Time:** 14:00 - 14:50 **Instructor:** Fuller,Jonathan Patrick James

Class Enrl Cap: 60 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., Undergraduate Global Health
Room Characteristics: PeopleSoft - Scheduled (PS)(1)

In this course, we will examine bioethical issues that arise in contemporary medical research and practice through a philosophical lens. We will analyze traditional bioethical dilemmas around: informed consent and medical decision-making, mental health, reproduction, empathy and the physician-patient relationship, death, and clinical research, among other topics. However, we will go beyond bioethics in exploring the ethical problems (concerning the good), metaphysical problems (concerning reality) and epistemic problems (concerning knowledge) raised by bioethical dilemmas, including: rationality and reasoning, medicalization, the nature of pregnancy, the phenomenology of illness, the nature and badness of death, and the methodology of clinical research. Students will come away with an approach to analyzing bioethical dilemmas and an appreciation for the philosophical problems underlying them. This course is part of a core sequence leading to certification in the Conceptual Foundations of Medicine Certificate Program and is a companion course to HPS 0612 (Mind and Medicine) but may be taken independently. The course will be of particular interest to pre-medical and pre-health care students.
Recitation: One hour per week

The media caricature regarding the debate between science and religion is predictable: the two sides are polar opposites angrily vying for alternative worldviews, the scientist representing secularism and rationality with the religionist representing superstition and ignorance. Such stereotypes are unhelpful and misleading, both historically and practically. This course examines both historical and contemporary articulations regarding the potential complementarity of religion and science, particularly within the Western monotheist faiths. Special attention will be given to a comparative analysis of ancient creation narratives, contributions to science by people of faith, religious responses to evolutionary biology, and the potential problems scientific discovery raises for religious devotion and interpreting religious texts. We will also consider practical, contemporary debates including what neuroscience can tell us about religious practices, how religion might respond to climate change, and how racism and misogyny have historically shaped scientific

research.

HPS 0621 1020 25902 PROB SOLVING: HOW SCI WORKS Lecture 3

Bldg: TBA **Room:** TBA **Days:** MW **Time:** 16:30 - 17:45 **Instructor:** Whyte,Jennifer Lesley

Class Enrl Cap: 30 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: DSAS Quant.-Formal Reason General Ed. Requirement
Room Characteristics: PeopleSoft - Scheduled (PS)(1)

A scientist announces that the sun contains a new, so far unknown chemical element, even though there is no hope of getting a sample. Another is sure that a famous predecessor has faked his data, even though he has seen nothing but the perfect, published results. Astonishingly, both claims prove to be sober and sound. We will explore the approaches and methods that make such miracles part of the routine of everyday science. This course is intended for students with little or no background in science.

HPS 1702 1040 10920 JR/SR SEMINAR FOR HPS MAJORS Seminar 3

Bldg: TBA **Room:** TBA **Days:** W **Time:** 13:00 - 15:25 **Instructor:** Allen,Colin Frederick

Class Enrl Cap: 20 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: Capstone Course, Medieval & Renaissance Studies
Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This seminar is intended to be a "capstone" experience for majors in history and philosophy of science. So far, each of you have taken an array of courses that specialize in one of other aspect of HPS. The purpose of this seminar is to give you a more advanced understanding of both history of science and philosophy of science than you may have had in your introductory classes. It will also give you direct experience of how someone with a background in HPS synthesizes their history of science and their philosophy of science. The early parts of the seminar will present you with case studies of how historical and philosophical analysis of science can be combined. They are intended to be exemplars, for the only way to learn to create HPS is by doing it. As the seminar proceeds, you will carry out a series of assignments in history and in philosophy of science that will build and combine into a final, term paper project in which you will synthesize history and philosophy of science. The historical part will arise through your researching of some episode in history of science that both interests you and promises to interact in an interesting way with a philosophical topic of interest to you. You will also present your results in a poster. Learning how to present material is an essential skill for scholars in HPS. The use of posters was once uncommon in HPS, but their use is becoming frequent.

HPS 1703 1010 10921 WRITING WORKSHOP FOR HPS MAJS Practicum 1

Bldg: TO BE ARRANGED **Room:** TBA **Days:** TBA **Time:** 00:00 - 00:00 **Instructor:** Allen,Colin Frederick

Class Enrl Cap: 20 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: Capstone Course, Writing Intensive Course (WRIT)

This writing workshop is designed to introduce HPS majors to the methods and standards of good scholarly writing in History and Philosophy of Science. It will be offered to HPS majors only in conjunction with HPS 1702, JR/SR Seminar. Evaluation will be based on two short papers that will be rewritten on the basis of the instructor's comments.
This Writing Workshop is for HPS Undergrad Majors in Junior or Senior Year.

HPS 2502 is intended to be an introduction to history and historiography of the life sciences and medicine from their origins in Ancient Greece to the beginning of this century. Needless to say, to cover anything like the full range of texts, thinkers and movements in their historical and cultural settings is impossible, and the History Core Seminars don¿t aim to do that. Rather, we aim to look at a selection of texts from different periods, try to understand those texts in their historical and cultural contexts, and try to trace out historical connections between them, whenever and wherever that is possible. The goal, then, is as much historiographicand methodological as it is historical. The choice of topics and texts will be somewhat dependent on the interests and specialties represented by the department faculty. This Core seminar an episodic introduction to the history of the scientific study of life, health and disease.

HPS 2522 1210 28955 SPEC TOPICS-HISTORY OF SCIENCE Seminar 3

This seminar explores the liminality that has continually demarcated the frontier between human and animal in the history of Western civilization. We will engage diverse historical-philosophical approaches to the question of what constitutes human as opposed to animal, beginning with ancient Greek philosophy, and tracing contemporary ideas back to their origins in the Graeco-Christian worldview. We will investigate the shifting human/animal frontier during the Renaissance and the scientific revolution of the seventeenth-century, in the Enlightenment and Romanticism, and in contemporary thought. By reconstructing the genesis of human/animal debates, we will transgress the bounds of sectarian divisions between styles of thinking and become more self-conscious about history and philosophy of science as an intellectually multi-faceted form of inquiry open to pluralism and diversity.

This seminar will cover historical and foundational issues in thermodynamics and statistical mechanics. We will read important papers in the history, including some by Carnot, Clausius and Thomson. We will also examine foundational issues, following class interest but provisionally including Boltzmannian vs Gibbsian approaches, the notion of a reversible process in thermodynamics, the relation of thermodynamics to statistical mechanics, the origins of dynamical irreversibility, the statistical mechanics and thermodynamics of black holes, and Maxwell¿s infernal demon.

HPS	2643	1010	29995	PHILOSOPHY OF CLIMATE SCIENCE	Seminar	3

Class Enrl Cap: 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0

This course will explore philosophical questions about climate science. We¿ll begin with central epistemological questions that arise in distinctive ways for climate science: e.g. questions concerning evidence in the historical sciences, the use of simplifying models of complex systems, and the interpretation of computer simulations and ensemble models. We¿ll then broaden the picture in several directions. We¿ll consider climate science from the perspective of social epistemology, focusing especially on the epistemic strengths, weaknesses, and biases of the social and institutional structures that shape how climate knowledge is generated, assessed, and communicated. We¿ll explore the interplay between perspectives on climate change emerging from different scientific disciplines, e.g. physics, ecology, and earth system science, and between the expertise of scientists and that of non-accredited practical experts. We¿ll examine the roles of values in climate science, and the problems and prospects that value-entanglement creates in thinking about geoengineering, climate adaptation, and existential risk. We¿ll close by considering how the arts may complement or contribute to scientific approaches in helping us to understand climate change and to muster effective and ethical responses. No special knowledge of climate science is required for the course: we will develop the conceptual and theoretical tools we need as the course progresses.

Observation and experimentation have long been taken as central to the legitimacy of scientific claims. Richard Feynman wrote ¿The test of all knowledge is experiment. Experiment is the sole judge of scientific `truth¿¿ (1963). But how do experiments reveal the way nature is organized? In this course we will explore a range of topics in the philosophy of experiment, including underdetermination and theory-ladenness, replicability, techniques and norms of experimental practice, convergence and divergence of experimental results, the production and use of data, the relationships between experimentation, theorizing and model-building and the new challenges of digitization and big data. This seminar will be organized as a

research group where each participant will develop their own research project throughout the semester which jointly engages both the philosophical issues and particular scientific practices and results. Ongoing research reports, a final presentation of results, and an annotated bibliography will be required.

HPS 2740 1210 28956 PHILOSOPHY OF PSYCHIATRY Seminar 3

Bldg: TBA **Room:** TBA **Days:** Th **Time:** 14:00 - 16:30 **Instructor:** Fuller,Jonathan Patrick James

Class Enrl Cap: 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Room Characteristics: PeopleSoft - Scheduled (PS)(1)

In this seminar, we will survey and discuss major topics in the philosophy of psychiatry from historical and contemporary perspectives. The philosophy of psychiatry is a growing field of research that intersects with philosophy of mind, philosophy of psychology and philosophy of neuroscience. Topics to be explored include: the antipsychiatry movement and critiques of psychiatry, the history and philosophy of the DSM, the concept of mental disorder, psychiatric kinds, biological psychiatry, and explanation and reduction in psychiatry. We will also discuss philosophical problems in the context of particular mental disorders. Students will come away with an understanding of how psychiatry illuminates broader issues in the philosophical study of mind and brain and of science.

HPS 2812 1210 29254 NEWTON Seminar 3

Bldg: Cathedral of Learni **Room:** 1008C **Days:** Tu **Time:** 14:00 - 16:30 **Instructor:** Gilton,Marian J

This course will consider the role of Newton in the development of modern science, with a focus on his scientific methodology and legacy. We will therefore look at both some of those who came before him and some of those who came after in order to address the following questions. What was the intellectual landscape in which Newton found himself? How should we characterize the experimental and theoretical methodologies used in the Principia and the Opticks? And finally, how were variants of Newtonianism developed and received?

This course introduces students to the history of selected musical practices and traditions around the world, from antiquity through the nineteenth century. It emphasizes music involved in major historical processes and changes, and examines these from the perspective of the music cultures involved. Students will gain experience working with various types of original sources and materials for music history. In addition, the course will expose students to current concepts in global/world history and consider how they potentially change our understanding of past peoples and their musics. No prerequisites.

Rhythm forms a vital part of our musical experience, but it is often neglected in music theory classes. This course seeks to address that lacuna by reviewing some of the most important scholarly work on musical rhythm and meter from the last 40 years or so. We will approach the topic in a variety of musical contexts, including classical music, popular music, and select world traditions. Although there exists a great body of speculative research on musical time, we will focus on more "pragmatic" texts that give us tools for musical analysis and creation.

By the end of this course, you will have developed a vocabulary for many different kinds of metrical practices (as well as their transgressions!). You will be able to analyze metrical strategies both visually and aurally in a wide variety of repertories. You will have a sense of how these metrical strategies might affect your work as a performer and/or composer.

Course Description for Spring 2020 - Music and Social Movements:
What is the nature of the relationship between music and politics? This open-ended question provides the starting point for a survey of historical and present-day social movements from around the world, and the music that is associated with them. Drawing on thinkers such as Plato, Amiri Baraka, and Mark Fisher, we will examine musical movements including nueva canción in Latin America, the struggle against apartheid, and the aesthetic politics of 20th-century fascism. By the end of the semester we will have developed a sophisticated set of tools with which to think about how music makes possible a collective politics. This course does not require proficiency in reading or performing music, but we will listen and discuss extensively.

Course Description for Spring 2020 - Gender and Sexuality in Black Popular Music:
This course will consider how gender and sexuality as analytical categories can illuminate complex issues in various genres of black popular music. Black popular music genres (blues, jazz, soul, funk, R&B, hip hop, reggae, contemporary gospel, and more) have become a major force in the American and international music scene. These various genres of African American origins have been performed by people with a wide variety of ethnic backgrounds all over the world. Music videos, especially in hip hop, often display women's bodies as mere sexual objects, which legitimizes violence against women. In addition, the music industry has been largely dominated by cis-gendered, heterosexual men. What does "black" mean in the context of popular music? Why are disturbing, sexualized images of women so common and popular? How have minority groups such as women, non-heterosexual, and transgender artists carved out their places in black popular music in recent years? We will examine these issues through critical analysis of academic/journalistic writings, music, music videos, and

films. Topics to be discussed will include: disability and black popular music, homosexuality in contemporary gospel music, violence against women and misogyny in rap music, hypersexuality and feminism in black female artists, black masculinity in hop hop culture, musical borrowing and cultural

Course Description for Spring 2020 - Sounds of Brazil:
This course explores a range of musical styles of Brazil through social and cultural topics including race, gender, ethnicity, migration, religion, protest, and nationalism. Class members will explore the sounds and meanings of musics across a broad scope of Brazilian life. The musics covered span from eighteenth-century calundu to twenty first-century hip-hop, from tropicália to the manguebeat movement, and the choro of Chiquinha Gonzaga to the forró of Luiz Gonzaga. Class members will analyze articles, texts, and films, and participate in critical listening and discussion to gain insight into the sounds of Brazil and the various meanings of being Brazilian.

Course Description for Spring 2020 - The History and Theory of Music and Emotions:
This course will explore how people have thought about the relationship between emotions and music, with a focus on writing and art from Europe and the United States. We will examine how the understanding of emotions has changed over the years, alongside ideas of what effects music can have in personal, social, and political contexts. Can music "heal"? Can it bring people together? What does music do, exactly? Along with these questions, we will also read the work of theorists, social scientists, and philosophers who have speculated on a range of feelings, including jealousy, love, queer shame, and feminist anger. As a final project, students will describe and name an emotion that currently has no name. The level of reading difficulty in this class is high; students without prior experience reading academic articles should budget additional work time per week.

Course Description for Spring 2020 - Improvisation in Cross-Cultural Perspectives:
This course explores the world of musical improvisation from critical perspectives. Students will not only learn about how improvisation works in a variety of musical traditions, but also examine how the concept of improvisation is applied, negotiated, and contested among practitioners. This course approaches improvisation and its critical discourses from a perspective of social and musical interaction to consider what it means to improvise and how improvisation creates meaning.

Course Description for Spring 2020:
What does it mean to be queer? How is queerness embodied? What creates a queer space? How is queerness reflected in music? This course explores critical perspectives on topics such as non-normative music history, queer modes of expression, subcultural musicmaking, and the implications of mainstream visibility. It will also survey some notable lesbian/gay/bisexual/ transgender/queer composers and musicians in both art music and popular music. It is not necessary to read music notation for this course. Listening comprehension, however, is a crucial component.

Course Description for Spring 2020:
This course is designed for students who have little or no background in music related program environments such as Max/MSP, visual programming language for music and multimedia. During its history, it has been used by composers, performers, software designers, researchers, and artists to create recordings, performances, and installations. This will be a great atmosphere for students with a musical background who have no experience in computer programming, or for students with a computer background who have little experience with music.

This course presents an overview on manipulating and synthesizing sound, video, and control signals. By transforming and manipulating these types of signals, we able to create powerful new tools for digital art, multimedia applications, music, responsive environments, video, and sound installation, smart products, and beyond.

Course Description for Spring 2020 - Sounds of Brazil:
This course explores a range of musical styles of Brazil through social and cultural topics including race, gender, ethnicity, migration, religion, protest, and nationalism. Class members will explore the sounds and meanings of musics across a broad scope of Brazilian life. The musics covered span from eighteenth-century calundu to twenty first-century hip-hop, from tropicália to the manguebeat movement, and the choro of Chiquinha Gonzaga to the forró of Luiz Gonzaga. Class members will analyze articles, texts, and films, and participate in critical listening and discussion to gain insight into the sounds of Brazil and the various meanings of being Brazilian.

Course Description for Spring 2020:
What does it mean to be queer? How is queerness embodied? What creates a queer space? How is queerness reflected in music? This course explores critical perspectives on topics such as non-normative music history, queer modes of expression, subcultural musicmaking, and the implications of mainstream visibility. It will also survey some notable lesbian/gay/bisexual/ transgender/queer composers and musicians in both art music and popular music. It is not necessary to read music notation for this course. Listening comprehension, however, is a crucial component.

Course Description for Spring 2020:
This seminar introduces key texts that continue to be relevant for research in the humanities (and to a lesser extent, the social sciences), and prepares participants for musicological thinking and research in the discipline's future landscape. Students will be expected to read texts from a range of intellectual traditions and to come to class ready to discuss, ask questions, and brainstorm with their colleagues. The seminar will also focus on developing skills such as: writing academic abstracts; presenting a conference-length paper; close reading of musical objects; producing new theoretical knowledge.

MUSIC	2321	1010	29606	MUSIC, GENDER AND SEXUALITY	Lecture	3

Room Characteristics: PeopleSoft - Scheduled (PS)(1)
Combined Section ID: 0734(MUSIC/2321/1321) - MUSIC 1321(#29580)

Course Description for Spring 2020 - Gender and Sexuality in Black Popular Music:
This course will consider how gender and sexuality as analytical categories can illuminate complex issues in various genres of black popular music. Black popular music genres (blues, jazz, soul, funk, R&B, hip hop, reggae, contemporary gospel, and more) have become a major force in the American and international music scene. These various genres of African American origins have been performed by people with a wide variety of ethnic backgrounds all over the world. Music videos, especially in hip hop, often display women's bodies as mere sexual objects, which legitimizes violence against women. In addition, the music industry has been largely dominated by cis-gendered, heterosexual men. What does "black" mean in the context of popular music? Why are disturbing, sexualized images of women so common and popular? How have minority groups such as women, non-heterosexual, and transgender artists carved out their places in black popular music in recent years? We will examine these issues through critical analysis of academic/journalistic writings, music, music videos, and films. Topics to be discussed will include: disability and black popular music, homosexuality in contemporary gospel music, violence against women and misogyny in rap music, hypersexuality and feminism in black female artists, black masculinity in hop hop culture, musical borrowing and cultural

Course Description for Spring 2020 - The History and Theory of Music and Emotions:
This course will explore how people have thought about the relationship between emotions and music, with a focus on writing and art from Europe and the United States. We will examine how the understanding of emotions has changed over the years, alongside ideas of what effects music can have in personal, social, and political contexts. Can music "heal"? Can it bring people together? What does music do, exactly? Along with these questions, we will also read the work of theorists, social scientists, and philosophers who have speculated on a range of feelings, including jealousy, love, queer shame, and feminist anger. As a final project, students will describe and name an emotion that currently has no name. The level of reading difficulty in this class is high; students without prior experience reading academic articles should budget additional work time per week.

MUSIC	2396	1020	29608	MUSIC IN SOCIETY	Lecture	3	

Bldg: Music Building **Room:** 00132 **Days:** MW **Time:** 09:00 - 10:15 IMPRVISATN IN CROSS-CULT PERSP **Instructor:** Arms,Jay Michael

Combined Section ID: 0732(MUSIC/2396/1396) - MUSIC 1396(#29586)

Course Description for Spring 2020 - Improvisation in Cross-Cultural Perspectives:
This course explores the world of musical improvisation from critical perspectives. Students will not only learn about how improvisation works in a variety of musical traditions, but also examine how the concept of improvisation is applied, negotiated, and contested among practitioners. This course approaches improvisation and its critical discourses from a perspective of social and musical interaction to consider what it means to improvise and how improvisation creates meaning.

MUSIC	2494	1010	29609	MUSIC AND COMMUNICATION	Seminar	3	

Bldg: Music Building **Room:** 00302 **Days:** Th **Time:** 09:00 - 11:20 **Instructor:** Heller,Michael C

Class Enrl Cap: 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Room Characteristics: PeopleSoft - Scheduled (PS)(1)

Course Description for Spring 2020 - Writing about Music:
Music scholars often spend a great deal of time thinking about music, but comparatively little thinking about the craft of writing about music. What makes a good writer of music scholarship? Who is your audience? What/who are good models? What makes a good "story" in musicological writing? How do non-academic forms of writing help the writing process? What does it mean to have a "voice" in your writing?

In this course, we will explore processes and practices of writing through a combination of discussion and workshop-based approaches. The class will closely engage with three types of texts: (1) Pedagogical works discussing strategies and techniques for scholarly writing; (2) Examples of good (and bad) writing from various subdisciplines of music, provided by both students and the instructor; and (3) Student writing contributions, which will undergo extensive peer workshopping throughout the semester.

MUSIC 2611 1200 22859 MUSICOLOGY SEMINAR Seminar 3

Bldg: Music Building **Room:** 00302 **Days:** M **Time:** 10:00 - 12:20 PUBLIC MUSICOLOGY **Instructor:** Root,Deane L

Class Enrl Cap: 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Room Characteristics: PeopleSoft - Scheduled (PS)(1)

Course Description for Spring 2020 - Public Musicology:
Music scholars are increasingly challenged to communicate with the public in addition to the presentation of their research to other scholars. Careers partially or wholly within the "public-facing humanities" are now seen as desirable paths, to be sought in addition to or instead of teaching and research within higher education.
This seminar will review the history and practice of public musicology, the factors that have shaped music scholars' careers in the United States during the late 20th and early 21st centuries, and the career choices that music scholars make, while producing research and products that are significant for public humanities.

MUSIC 2621 1010 27685 ETHNOMUSICOLOGY SEMINAR Seminar 3

Bldg: Music Building **Room:** 00302 **Days:** W **Time:** 10:00 - 12:20 MUSIC AND FUTURISM **Instructor:** Ayyagari,Shalini R

Class Enrl Cap: 12 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: African Studies, Asian Studies, Global Studies
Room Characteristics: PeopleSoft - Scheduled (PS)(1)

Course Description for Spring 2020 - Music and Futurism:
Focusing on the future in this seminar, we will explore ways of imagining futures through music and sound. In this exploration, we will examine how imaginings and speculation of the future 1) affect individuals, subjectivities, and social relations; 2) interact with, influence, and reinforce culture and art; and 3) inform musical composition, performance, and culture. What futures do we imagine for ourselves and our communities? In what ways can imagining the future change the contemporary or even the past? How do we make choices about the future and how can we imagine our orientation to the time space of the future differently than we currently do? We will analyze music and sound practices in relation to the future, combining methodologies and perspectives from diverse fields such as ethnomusicology, anthropology, fictional literature, film studies, and science and technology. Students will gain a deeper understanding of the nature of future studies and of the challenges and opportunities of imagining a future.

Class Enrl Cap: 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Room Characteristics: PeopleSoft - Scheduled (PS)(1)

Course Description for Spring 2020 - Sun Ra:
It is a tremendous understatement to say that Sun Ra is one of the most unique figures in the history of African American music. A pivotal figure in Afrofuturism, Ra was steeped in the jazz traditions spanning from the swing era into the furthest galaxies of the avant garde. He was a prolific composer, writer, poet, and philosopher. His approach to building a collective organization (the Arkestra) was a unique forerunner of other jazz collectives, while borrowing from and contributing to other countercultural movements. And his unique combinations of Egyptian imagery, science fiction technology, and jazz timbres was unlike anything to emerge in the tradition before or since.

This course will take an in depth look at Ra's legacy, surveying the extensive literature devoted to him in jazz studies. We will consider a large portion of his musical catalogue, examining how his style emerged and changed over time. This close reading will then be augmented with two other sets of literature: (1) scholarship on Afrofuturism, not only in music, but in literature, poetry, film, and related arts, and (2) contemporary work in jazz theory

This course is a general introduction to philosophical thinking about human nature. This course aims, in particular, to examine different answers to the following questions: What is distinctive about human beings? What is it to lead a good human life? How do society and government come to exist and what is their proper role in human life? The course will address these questions through the texts of some of the central figures in the western philosophical tradition, such as Plato, Aristotle, Hobbes and Rousseau. By the end of the course, students will be able to interpret the works of authors from very different times and cultures and explain how their ideas relate to the human condition. Students will also critically evaluate the views and arguments of these authors and construct their own views and arguments on human nature. (This course fulfills the General Education Requirement in Philosophy)

¿Modern Philosophy¿ designates the period in the history of philosophy that roughly coincides with the Scientific Revolution and the Enlightenment. It spans the seventeenth and eighteenth centuries, beginning with Descartes and ending with Kant. This course is an introduction to several major philosophers of this period. The Scientific Revolution gave rise to a variety of philosophical problems, particularly relating to human knowledge. Many of the questions addressed in this course will accordingly concern human knowledge and the human mind. Is any of our knowledge innate? Or is it all acquired through experience? Can we attain certainty? How far can our knowledge be extended? What principles govern the mind¿s operation? Special attention will be given to questions concerning our knowledge of causes and effects. The course will focus primarily on Descartes and Hume, but the doctrines of Locke and of Kant will also be examined.

The class will serve as a high-level introduction to ethics. Some background in philosophy is helpful but not required. We examine three classic theories in ethics (Kantianism, consequentialism, and eudaimonism), and challenges to them. Topics include the nature of the highest good, the idea of pure practical reason, whether some pleasures are better than others, the well lived life for human beings, and the nature of virtue.

Humans have consciousness: we have ideas, sensations, emotions, and experiences of which we are consciously aware. But what is human consciousness? This question will be at the heart of our course. What types of conscious states should we distinguish? For example, what is the difference between our thoughts and our feelings? How should we understand our conscious experiences, including for example, vision?
Most centrally, we will consider what philosophers and cognitive neuroscientists have called the ¿hard problem of consciousness.¿ The ¿hard problem¿ concerns one aspect of consciousness that¿even given impressive advances in our scientific understanding of the brain¿has continued to escape explanation: the relation between consciousness and the physical world. Are conscious states identical to brain states, or are they caused by brain states? And are brains uniquely capable of generating consciousness, or could, for example, a sophisticated computer be conscious as well?
In approaching this ¿hard problem¿, we will be attempting to unify two explanatory pictures of our place as human beings in the world. On the one hand, we consider ourselves as beings with minds, and as subjects of our own thoughts and actions. In this sense, we share something important in common with other living creatures, including tigers, birds and perhaps even insects. On the other hand, as physical beings we are also like objects: like everything else in

This course is divided into two parts: foundational issues in the philosophy of science and bias and error in contemporary science. Part I asks questions about the nature of science and scientific theorising: what is the connection between science and reality? What is a theory and why and when might we discard or modify one? What is evidence and what methods do we have for collecting and analysing it? Part II asks how bias and error might creep into and thrive in the sciences. In our statistical methods, in the assumptions and cognitive frameworks that we bring to our science and in the questions our theories set out to answer. This course has a practical focus and aims to give students a firm grasp on summarising and evaluating the significance of scientific results given a range of theoretical considerations; examination will be divided between paper writing and short reports on articles from a range of special sciences.

This is a course on metaethics, the subfield of philosophy that takes a step back from considering what is right or wrong, good or bad, and asks what makes anything right or wrong, good or bad, and how we can know that anything has these features. We will consider such questions as: What do we mean when we call something ¿good¿? Is moral language used to state objective facts or does it express the subjective attitudes of the speaker? Is morality real or a useful fiction? If moral facts are real, are they the sort of thing that science can tell us about, or are they beyond the realm of science? Can morality be based on rationality? We will be tracing the philosophical debate over these questions as it has evolved through the 20th century to the present day. By the end of the course, students will be able to follow the moves in an extended philosophical debate, critically assess arguments on these topics and construct arguments that contribute to the ongoing discussion.

This course will study three of the most significant and influential philosophical approaches to ethics in the western philosophical tradition, those of Plato, Hume, and Kant. The doctrines of these three philosophers provide important historical roots for four prominent approaches within recent ethical philosophy¿emotivism, utilitarianism, Kantianism, and virtue theory. Starting with the chief inspiration for virtue theory, we will examine ethics as it was understood by the ancient Greeks, and by Socrates and Plato in particular. As we read Plato, we shall explore questions such as these: What is virtue? Can it be taught? What is justice? Will it profit us to be just? We will then take up two of the most important modern systems, beginning with Hume¿s moral sense theory, an inspiration for both emotivism and utilitarianism, and concluding with a study of Kant. Both Hume and Kant seek to discover the true origin of morality. Hume reaches the conclusion that the source of our moral judgments and moral conduct lies primarily in our sentiments, while Kant argues that morality originates in a principle of reason.

Prerequisite: A previous course in philosophy.

PHIL 1360 1100 22740 BIOMEDICAL ETHICS Lecture 3

This course will be an in-depth exploration of a number of contested issues related to the practice of medicine, medical research and public health which are of philosophical, professional, and public policy concern. Some topics will include: the moral obligations of physicians and other healthcare professionals, patient autonomy, the definition and determination of death, organ donation, euthanasia and physician aided death, vaccination, and the moral imperatives and constraints distinctive to domestic and international medical and public health research. This course should be of particular interest to philosophy majors as well as to students who are contemplating a career in medicine, biomedical research, public health, or health law. Final papers will be on topics related to students¿ individual interests within the framework of the course. This course is an Approved Elective for the Undergraduate Certificate in Conceptual Foundations of Medicine. Prerequisite: at least one course in philosophy or history and philosophy of science or permission of the instructor.

PHIL 1410 1260 28877 PHILOSOPHY OF ACTION Lecture 3

Room Characteristics: PeopleSoft - Scheduled (PS)(1)

Bad Language:
Swearing. Dog whistles. Nonsense. Category Mistakes. Slurs. Oppressive language. Manipulative speech. Hate speech.
People use a lot of bad language; language that is defective either because it poses serious challenges to interpretation or because it encodes content or serves ends that are unethical. Can our usual semantic and pragmatic frameworks account for this kind of language too? This course combines work in linguistics, philosophy of language and cognitive science to investigate the ways we use and interpret varieties of bad language. We will engage a range of data from tweets, to reddit threads, to political exchanges, to test popular semantic and pragmatic models of defective linguistic content and coercive language use.

PHIL 1640 1010 29798 PHILOSOPHY OF PSYCHOLOGY Lecture 3

Bldg: TBA **Room:** TBA **Days:** W **Time:** 18:00 - 20:30 **Instructor:** Buccella,Alessandra

Berry,Thomas J

Class Enrl Cap: 20 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Room Characteristics: PeopleSoft - Scheduled (PS)(1)

How does the mind work? So-called `computationalists¿ think that the mind (and the brain) works as a computer, which first forms and manipulates symbols (usually called `mental representations¿) according to rules, and then issues `commands¿ to guide behavior. On the other hand, the `5E¿ (Ecological, Embodied, Embedded, Enactive, Extended) approach rejects the computer analogy. 5E theorists insist that minds, and minded organisms more generally, cannot be understood in isolation from their environment. Cognition doesn¿t happen `in a vacuum¿, and it isn¿t separable from action. As a consequence, the mind can extend beyond the boundaries of our skull and even of our whole body. This course is devoted to comparing and contrasting the computationalist and the

5E approaches to cognition. We will examine similarities and differences, assumptions and commitments with respect to core debates at the interface of philosophy, psychology, and cognitive science such as, for instance, the nature of visual perception.

Bldg: Cathedral of Learni **Room:** 1008B **Days:** Tu **Time:** 14:00 - 16:30 **Instructor:** Theunissen,Lisa Nandi

Class Enrl Cap: 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0

As Sidgwick rightly observed, for the ancient Greeks, the good is a unified notion and controversy turns on how to relate various species of the good,

including ethical virtue, to the rest of the genus. In contemporary discussions, by contrast, it is customary to conceive of non-moral and moral value as different in kind¿to distinguish between mere use value and goodness proper. In this seminar we think about the consequences of this bifurcation of the good. Does it impose limits on our understanding of crucial dimensions of the good for human beings and other beings? Our menu of questions includes instrumental value, use value, causation as it pertains to value, economic value, good as good for, virtue, the idea of perfection.

The seminar naturally builds on topics explored in my 2018 seminar on value theory, but I am not assuming familiarity with the material discussed there.

PHIL 2330 1250 28881 POLITICAL PHILOSOPHY Seminar 3

Bldg: Cathedral of Learni **Room:** 1008B **Days:** Th **Time:** 15:00 - 17:30 **Instructor:** Lewinsohn,Joseph

Class Enrl Cap: 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0

Quid pro quo exchange (doing one thing in exchange for something else) is perhaps the least understood of the most basic modes of human interaction. To be sure, nobody doubts that exchange involves the mutual provision of goods or services among discrete individuals or groups. Yet the bilateral performance of ostensibly desired services no more establishes that an exchange has occurred (rather than a pair of good turns, say) than does the utterance of a sentence in the indicative mood establish that an assertion has been made (rather than a guess or a joke, say). And while one who wishes to understand what endows an utterance with assertoric force has recourse to a vast philosophical literature, the determinants of exchange, over and above the bilateral provision of goods or services, remain shrouded in darkness. As with the speech act, we may expect individual motives, shared understandings, and normative relations to figure centrally in an account of exchange. Yet, the contents of these motives, understandings, and relations, as well as their configuration in an explanation of the transactional form, remain obscure.

This seminar will tackle theoretical and applied questions pertaining to exchange. In the theoretical component, we will focus on: 1. the relation between

PHIL 2400 1210 28882 METAPHYSICS-EPISTEMLGY (CORE) Seminar 3

Bldg: Cathedral of Learni **Room:** 1008B **Days:** Tu **Time:** 09:30 - 12:00 **Instructor:** Rescher,Nicholas

Class Enrl Cap: 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0

The course has two interrelated objectives: the one methodological, the other substantive. On the one side we will consider the nature of metaphysics/epistemology as a branch of inquiry: its aims, its methods, and its validity as a cognitive enterprise. On the substantive side we will consider a variety of classical issues such as: existence/inexistence; reality/appearance; realism/contra realism; lawful/accidental; substance/process; particulars/universals; mind/body; reasons/causes; freedom/determinism; persons/things. Also considered will be key principles (such as the principle of sufficient reason and ¿Occam¿s razor¿) and issues of methodology.

PHIL 2440 1210 29255 PHILOSOPHY OF MIND Seminar 3

Bldg: Cathedral of Learni **Room:** 1008B **Days:** W **Time:** 14:00 - 16:30 **Instructor:** Mcdowell,John H

Class Enrl Cap: 14 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0

My topic will be the first person. I plan to use Sebastian Rödl¿s paper ¿The First Person and Self-Knowledge in Analytic Philosophy¿ to frame the seminar. Rödl discusses work by Hector-Neri Castañeda, Gareth Evans, and G. E. M. Anscombe, and that will determine much of our agenda. Among other things, I hope to compare Rödl¿s treatment of Evans and Anscombe in this paper with his earlier discussion of them in Self-Consciousness. Warning: I will not work with a set syllabus.

PHIL 2500 1300 22741 ADVANCED LOGIC (CORE) Seminar 3

Bldg: Cathedral of Learni **Room:** 1008B **Days:** MW **Time:** 11:00 - 12:15 **Instructor:** Shaw,James Robert

Class Enrl Cap: 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0

This core course will review the basic tenets of modern logic relevant to a philosophical career: syntax and semantics of first order logic, basic modal logic, completeness and incompleteness, basic results in model theory and other topics as time permits.

PHIL 2505 1220 28884 TOPICS IN PHILOSOPHICAL LOGIC Seminar 3

This course centers around two key questions: What is an inference? And, what is logic? Working through a draft manuscript on these topics, we¿ll explore a view which claims that answers to these questions are intimately related. In particular, it argues that logical puzzles provide invaluable illumination of the character of deductive inference, and that logic is fundamentally a certain constrained study of good deductive inference. Subtopics will (hopefully) include: the normativity of logic, the nature of good reasoning and the role of logic in regulating it, the constraints that logical impossibility may impose on the bounds of cognition, the role of a `taking' or awareness condition in inference, the threat of Carrollian regress, and the grounds for and against taking Tarskian model theoretic machinery to model logical truth and consequence. Some core readings (aside from the manuscript) will be drawn from MacFarlane, Conant, Boghossian, and Etchemendy.

This course is designed to provide information and training to new Teaching Assistants in the Department; it will meet on a bi-weekly basis throughout the Fall and Spring terms. The course has two aims. First, the course will offer instructional guidance through presentations by professors, older teaching assistants, and representatives from the University Center for Teaching and Learning (UTCL), and provide new TAs with a forum in which to discuss their own concerns and lessons from the classroom. Second, the course will assist the new TAs in developing a teaching philosophy and preparing a teaching portfolio.

The purposes of this seminar (which has very successful counterparts at other top graduate programs in philosophy) are multifold. It gives students working

on dissertation projects a community of others in the same boat, it provides them with feedback on work in progress, and practice presenting their work to an audience wider than their committee. (This is important for the impression they make on the job market.) Supposing that each student admitted to candidacy makes a seminar presentation each semester, it hastens time to completion by imposing interim deadlines on the road to a completed dissertation. The seminar gives students who have been comprehensively evaluated, but not yet defended a prospectus, examples of other students who have successfully negotiated the transition. This course is offered every fall and spring.

Comparative Politics is the field within political science charged with the study of domestic politics. Its main goal is to systematically compare political units--mainly countries--in order to make statements about the factors that explain how politics works. The comparative method allows us to address questions such as why some countries establish democratic institutions while others are ruled by autocrats or how the choice of electoral system modulates the capacity of citizens to discipline incumbent politicians. This course will cover the following topics: political regimes, transitions to democracy, institutional choices within democratic regimes, social cleavages and ethnic identities, corruption, electoral accountability, and the economic consequences of institutional designs. The discussion of each of these topics will be structured around specific questions that comparative politics can illuminate.

How do democracies grow and die? How can we explain the differences in economic development around the world? In this course, students will learn about how different institutions emerge, change and interact with historical political processes. We will examine cases and compare the development of institutions around the world in both developed and developing countries. The goal of the course is to demystify the broad differences in political development among countries and regions across the globe. Students will also learn some simple methods to visualize data and compare cases.

This course has three learning objectives. The first objective is to provide a theoretical understanding of the politics that undergird the international economy and explain change. The second is to expose students to the history and evolution of global political-economic relations since the mid-19th century. And the final objective is to teach students techniques for visualization, using open-source software, as a means for both analysis and communicating information contained in data.

Cities in Transformation: This course views cities as hubs where patterns, connections, discussions, and the processes shape such issues as social

justice, economic development, technology, migration, the environment among others. By examining cities as a lens, this course encourages students to examine cities as a system for discussing social processes being built and rebuilt. For more information see the Global Studies web site or contact global@pitt.edu.

"Origins and Consequences of Nuclear Proliferation Capstone"
For more than 70 years, nuclear weapons have had a central role in international relations, beginning with Cold War diplomacy between the United States and Soviet Union to ongoing negotiations with Iran and North Korea today. This class investigates why states develop nuclear weapons and how nuclear weapons affect international politics following proliferation. We will use a seminar method, with students presenting existing research papers and others commenting and criticizing the work. The class culminates in students developing their own papers.

We still live in the shadow of the 2008 Global Financial Crisis. Combining insights from political science and economics, we will examine why our governments and our institutions often fail to implement good economic policies, and why these failures can lead to economic crashes. We will also investigate what the implications of these policies and events are for our societies by looking at themes such as inequality, poverty, or the rise of extremism.

This seminar will deal with three fundamental questions about contemporary institutional theory, and institutions. The first segment will discuss the 5 or 6 major versions of institutional theory, asking a set of common questions about them such as "what is an institution", and "how do institutions change". The second portion will examine institutional explanations for a variety of political phenomena that may often be discussed at an individual level. The final section will discuss the importance of informal institutions, and their interactions with more formal institutions in governance.

This course focuses on models for the analysis of categorical and other kinds of non-continuous dependent variables, typically estimated via maximum likelihood methods. Topics include: logic and probit models for binary, ordinal, and multinomial outcomes; count models; censored and sample-selection models; and event history analysis. Longitudinal extensions of many of these models will also be discussed.

An in-depth assessment of fundamental areas of psychology including learning, the biological bases of behavior, developmental patterns, psychopathology, emotion, personality, social factors and issues in the measurement of behavior. Information and concepts from the Introductory lectures are applied to problems in understanding human behavior and psychology more broadly with an emphasis on learning about psychological research and how it relates to the real world.

Why do we do the things we do? The field of psychology has a long-standing concern with how conscious and non-conscious processes shape our feelings, attitudes, and behaviors. This course involves an in-depth exploration of how these processes inform how we come to know ourselves and others in our lives. Using a lecture and discussion format, we will cover both classic and contemporary approaches to the self and social identities. The course will consider topics such as the need to belong, our pursuit of happiness, rationalization, social conflict, and more, all with an eye toward using and applying these insights in our daily lives. Grading is based on attendance, participation, two exams, and a capstone essay.

PSY	1053	1010	27834	TOPICS IN DEVELOPMENTAL PSYCH	Lecture	3

Sadly, millions of children in the United States and throughout the world are exposed to chronic and uncontrollable adversities (e.g., extreme poverty; maltreatment). These adverse childhood experiences are related to compromised physical and mental functioning throughout development. However, individuals and communities exposed to these types of intense challenges often exhibit an amazing level of resiliency. Across the course, we will anchor ourselves in bio-psycho-social models of development, review these different sets of findings, and think about developmental interactions between the individual, family, community, and culture.

The course examines whether and how sociocultural factors and parenting practices shape children¿s language and literacy development. The course is divided into three sections. First, we discuss studies on socioeconomic differences in children¿s language and literacy. Second, we focus on three contexts that support language and literacy development at home: book-sharing, conversations, and joint-writing. Third, we discuss evidence-based interventions that aim to improve children¿s language and literacy in low-income and ethnically diverse communities. Class sessions involve a combination of lectures and group discussion based on journal articles, book chapters, press articles, and videos. Students will complete individual and group assignments.

This is a laboratory course that will focus on research methods in the area of social psychology. As a student in this course, you will complete in-class activities as well as individual and small group assignments designed to prepare you for conducting research in social psychology. Course requirements include oral presentations and written assignments. Students will critique empirical journal articles, complete small group assignments that explore a variety of research designs, develop an independent research proposal based on a prominent social psychological theory, and collect and analyze data to test a hypothesis that extends upon a published empirical paper relevant to social psychology.

In this course, students will learn to conduct experimental and quasi-experimental research in health psychology, to critically evaluate research claims from health psychology, and to communicate research in an effective way. Course components include lectures, reading assignments, in-class activities, and an exam. However, the bulk of the course is dedicated to designing, conducting, analyzing, and then presenting findings from a novel research study in small groups.

Observing and quantifying the complexities of human behavior presents a number of significant challenges. Yet observational methods are one of the best ways (and sometimes the only way) to study the behavior of children who cannot perform complex tasks or provide verbal responses. This course focuses on the principles of quantitative, systematic observation of behavior and the rationale for selecting among the many options at all stages of observational measurement. Topics to be covered include: (a) principles for selecting elements in observational measurement systems (including selecting procedures or contexts, behavior sampling methods, designing coding systems), (b) training observers, (c) estimating agreement and reliability, and (d) validation of observational variables.

In this course, students will learn to conduct experimental and quasi-experimental research in health psychology, to critically evaluate research claims from health psychology, and to communicate research in an effective way. Course components include lectures, reading assignments, in-class activities, and an exam. However, the bulk of the course is dedicated to designing, conducting, analyzing, and then presenting findings from a novel research study in small groups.

This advanced research laboratory course will give students authentic and hands-on experience with the collection and analysis of behavioral and brain imaging data from individuals with brain injury due to stroke. Students will be assigned to a 3-person project team throughout the course. During class sessions, students will receive instruction and opportunities for hands-on practice of the component skills covered in a given week. Students will be expected to draw upon this instruction to complete a series of out-of-class requirements. The first quarter of the course will prepare students to administer a set of tasks assessing math and language abilities to individuals with localized brain injury due to stroke, and prepare project teams to assist with the collection of brain imaging data. In the second quarter of the course, each project team will collect behavioral and brain imaging data from three research participants. In the third quarter of the course, students will learn how to code the behavioral and brain imaging data, and will use this knowledge to enter their results into a project database. In the final quarter of the course, students will learn methods for examining the relationship between the location of brain injury and its effects on cognitive abilities, and each team will use this knowledge in combination with available data to construct a final course presentation. The course is synergistic with a research project funded by the National Science Foundation on the brain basis of

This is a laboratory course that will focus on research methods in the area of clinical psychology. Students will apply the principles of study design to critical assessment of empirical journal articles and the design of an independent research proposal related to a contemporary theory within the domain of cognition as it relates to anxiety disorders. The course will include in-class activities as well as individual and group assignments that will provide a hands-on introduction to research in clinical psychological science. Students will also have the opportunity to analyze data to test an a priori hypothesis and to prepare an empirical paper to demonstrate mastery of the course concepts.

This course will introduce students to major religious traditions practiced throughout Asia. Students will gain a basic understanding of the religious traditions of South, Southeast, Central, and East Asia, including Hindu, Buddhist, Sikh, Jain, Taoist, Confucian, and Shinto traditions, as well as Asian forms of Islam and Christianity. In this course, students will receive an introduction to the academic study of religion with a focus on lived religion. Pairing historic primary sources with contemporary studies, we will examine how diverse cultural contexts and local histories affect the practice of religious traditions in Asia today.

How do Asian Religious Traditions view human life and our place in the world? This course is an invitation to discover or deepen our knowledge and understanding of religious traditions that inform the lives of millions of people. The purpose of our encounter with the Hindu, Jain, Sikh, Buddhist, Confucian, Daoist and Shint¿ traditions is to enrich our worldview, to better understand ourselves and our neighbors and develop our capacity for critical empathy.

Is religious faith compatible with philosophical reasoning? Could sacred texts be true even if they are not historically or scientifically accurate? Do religions simply reflect the cultural contexts from which they originated, or do they promote universal and timeless values? This course critically examines how both religious and nonreligious thinkers have navigated the question of the relation between faith and reason throughout the history of Western thought. Special attention will be paid to evaluating how the relationship between faith and reason in Christianity, Judaism, and Islam. We will then examine how the dialogue between faith and reason plays out in practical topics such as hermeneutics (e.g, how we read texts), race and racism, gender and sexual orientation, and science.

Is religious faith compatible with philosophical reasoning? Could sacred texts be true even if they are not historically or scientifically accurate? Do religions simply reflect the cultural contexts from which they originated, or do they promote universal and timeless values? This course critically examines how both religious and nonreligious thinkers have navigated the question of the relation between faith and reason throughout the history of Western thought. Special attention will be paid to evaluating how the relationship between faith and reason in Christianity, Judaism, and Islam. We will then examine how the dialogue between faith and reason plays out in practical topics such as hermeneutics (e.g, how we read texts), race and racism, gender and sexual orientation, and science.

The media caricature regarding the debate between science and religion is predictable: the two sides are polar opposites angrily vying for alternative worldviews, the scientist representing secularism and rationality with the religionist representing superstition and ignorance. Such stereotypes are unhelpful and misleading, both historically and practically. This course examines both historical and contemporary articulations regarding the potential complementarity of religion and science, particularly within the Western monotheist faiths. Special attention will be given to a comparative analysis of ancient creation narratives, contributions to science by people of faith, religious responses to evolutionary biology, and the potential problems scientific discovery raises for religious devotion and interpreting religious texts. We will also consider practical, contemporary debates including what neuroscience can tell us about religious practices, how religion might respond to climate change, and how racism and misogyny have historically shaped scientific research.

This course is designed as an overview of the history, teachings and rituals of Eastern Orthodox Christianity in its multinational context. Geographically, this context refers primarily to southeastern Europe, Russia and the coastal areas of the eastern Mediterranean, but there is also a significant Orthodox diaspora in the western hemisphere and in other parts of the world. We shall examine specific historical experience of Orthodox Christians in its Byzantine context, under Ottoman rule, in the Russian Empire, under communism, and beyond. Through lectures, readings, discussions, films, and a field trip to a local Orthodox church, students will gain an insight into multifaceted world of Orthodox Christianity: its spiritual practices, rich artistic, musical and ritual expressions.

This course introduces students to Russian fairy tales, a fascinating and productive genre of folklore that reveals a great deal about Russian traditions and modes of thought. Taking a psychological approach to the materials, the course examines not only the tales, but also the beliefs informing the magic world of these narratives. Since the humans, spirits, and beasts populating this world are richly portrayed in Russian art, a significant component of the course will consist of visual and audio representations of figures and scenes from fairy tales. We shall examine slides of posters, paintings, book illustrations, postcards, etc., and shall listen to music based on characters, situations, and narratives drawn from the tales (e.g., extracts from Glinka, Rimsky-Korsakov, Chaikovsky, and Mussorgsky).

This proficiency-based and project-based hybrid language course (3 face-to-face + 1 online hours) is designed to further broaden the students¿ knowledge of Russian language and culture. It is for lower intermediate level students who want to improve their ability to create with language on familiar topics

related to their daily activities and to communicate in Russian in a variety of typical uncomplicated situations. This course will help to improve students' cultural competence, to expend their vocabulary, and improve their language fluency and accuracy. The aim of the course is to present students with opportunities to perform in a range of authentic contexts in all three modes of communication (Interpretive, Presentational, and Interpersonal) by integrating all four skills (listening, speaking, reading, and writing) on different topics, such as a city life, around the world, health, eating out and cooking, celebrating holidays, etc.

RUSS 0325 1030 11041 THE SHORT STORY Lecture 3

Bldg: TBA **Room:** TBA **Days:** MW **Time:** 15:00 - 16:15 **Instructor:** Staff

Class Enrl Cap: 11 **Class Enrl Tot:** 0 **Class Wait Cap:** 10 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: DSAS Literature General Ed. Requirement, Writing Intensive Course (WRIT), SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Con
Humanistic GE. Req., Russian & East European Studies
Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)
Combined Section ID: 0679(ENGLIT/RUSS/0325) - ENGLIT 0325(#26618)

This section of Short Story will be devoted to readings from Russian literature, beginning in the 1790s and running through contemporary works. We will discuss a range of authors' work from Karamzin through Pushkin, Gogol, Dostoevsky, Turgenev, Tolstoy, and Chekhov, to Babel, Nabokov, Shalamov, Pelevin, Tolstaya, and Petrushevskaya. The course will provide two main opportunities: one, to examine the authors' writing techniques in detail, in compositional terms of form, voice, narrative structure, tone, perspective, and style, within the context of their stated or known beliefs, philosophies, and ideologies. Two, to gain a greater understanding of literary history in Russia, examining such topics as the evolution of romanticism into realism, the concept of the "superfluous man," authors' engagement with political questions like the divide between Slavophilia and Westernization, the particular demands and constraints of Soviet-era writing, the peculiarities of Soviet and post-Soviet subjectivity, postmodernism in a non-western context, and women's experiences in modern Russia. We will take special effort to track particularly Russian themes and concerns over time and throughout the course work, and to help students to talk about and understand the "how" of the writing as much as the "what" -- to help them understand the writing techniques used in each story to advance its ideological or philosophical content.

RUSS 0410 1030 10170 ADVANCED RUSSIAN 2 Lecture 3

Bldg: TBA **Room:** TBA **Days:** MWF **Time:** 12:00 - 12:50 **Instructor:** Kim,Olga

The twentieth century was the most tumultuous period in modern Russian history with three revolutions, the last of which led to the collapse of the Tsarist order and the beginning of the communist experiment. This course is a sequel to Russian 0800, focusing on writers such as Chekhov, Akhmatova, Mayakovsky, Zamiatin, Nabokov, Bulgakov, Solzhenitsyn, Erofeev, Sinyavsky, Brodsky, and Alexievich. We will study major cultural and literary movements (such as modernism, the avant-garde, socialist realism) in relation to major political and historical events (such as Stalinist terror, World War II, the Thaw). As this is a W-course, students will be expected to write and revise their papers.

RUSS 0811 1040 10958 MADNESS & MADMEN IN RUSS CULT Lecture 3

Bldg: TBA **Room:** TBA **Days:** TuTh **Time:** 11:00 - 12:15 **Instructor:** Robinson,Sabrina Spiher

Class Enrl Cap: 30 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., Russian & East European Studies
Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course is an examination of Russian culture from the beginning of the reign of Nicholas I (1825-55) to the present. Literature, cinema, music, art, and philosophy will be examined in their historical, economic, and socio-political contexts and in their relationship to broader trends in world cultural development. Our general focus will be the various strategies used by writers, artists, filmmakers, architects, and other cultural producers to negotiate the changing relationship between socio-historical reality and aesthetic expression.

RUSS 1430 1030 10887 FOURTH-YEAR RUSSIAN 2 Lecture 3

TOPIC: "Time to Discuss Local and Global Issues." This proficiency-based and culture-based course provides extensive practice in oral and written communication at the advanced level for the students at the mid and high intermediate levels and higher. It is organized around a topic on the personal, community, national, or international interest that students will explore via readings, listening, and viewing activities. Students will improve their fluency and accuracy in conversational activities designed to strengthen their command of informal and formal Russian incorporating the presentational, interpersonal, and interpretive modes of communication. Students will also analyze and respond to culturally-relevant texts (both written and spoken) through the essay format, presentations, and/or digital projects.

19th-century Russian Studies: Texts, Contexts, Methods

This course serves as a fast-paced graduate-level introduction to 19th-century Russian studies. In surveying key literary texts from the period in a richly articulated critical context, the course foregrounds such topics as canon formation, scholarly methodology, cultural theory, and the history as well as the future of the discipline.

In addition to analyzing Russian films released between 2016 and 2019, the course will have a heavy concentration on the professional training of graduate students. This will include selecting a week-long schedule of films to be screened, handling arrangements for visa applications and airline tickets, hotel reservations, the writing of program notes, and much more. By the end of the course, students will be able to handle the logistics of inviting individual speakers to campus, as well as organizing a week-long conference that includes dozens of participants.

This course examines Slavic and anglophone science fiction comparatively. It assesses how a given culture's dominant values are articulated in a popular genre that enjoys different status in the East (i.e., Eastern Europe) and the West (i.e., England and America). Those values emerge in works that imaginatively posit "fantastic" situations rooted in biological, spatial, and temporal explorations beyond those currently verified by science. On the basis of films (e.g., "The Terminator", "The Fly"), film clips, TV shows, novels (e.g., "Solaris", "The Futurological Congress"), novellas, and stories, we shall discuss such topics as progress, utopia, human perfectibility, the limits of science, and the nature of knowledge.

Using the subject of vampires as an entry-point into an investigation of cultures and cultural difference, this course will begin in the Slavic world in order to investigate how the cultures of those people fashioned a compelling myth that gripped the western imagination centuries later in Bram Stoker¿s classic, Dracula. Looking at later cinematic and literary adaptations of the vampire myth, we will investigate how our cultures have evolved over time through the ways in which they have conceived the undead revenants known as vampires.

This course is a tour through a rich multi-media landscape that traces the histories of prisons and prison-related experiences in three different 20th -century cultural contexts: the Soviet gulag, the European Holocaust, and the American experience. Our goal will be to access the carceral imagination as a privileged vantage-point for examining cultures and values. Through an exploration of grim and often harrowing material, we will fulfill our human duty to remember the lost and will learn about cultural difference at the extremes of human experience.

This is the second semester of first-year Ukrainian language. Ukrainian language is the language of the largest country in Europe. The course starts with a review and subsequent reinforcement of grammar fundamentals and core vocabulary pertaining to the most common aspects of daily life. Principal emphasis is placed on the development of students' communicative skills (oral and written) on such topics as the self, family, studies and leisure, travel, meals, and others. Students will be able to write about things he/she likes to do by using familiar sentence patterns. Students who successfully complete the course (two semesters) will be able to narrate and describe in all major time frames (past, present, and future) answer all communicative types of questions, engage in a sustained exchange on a variety of general and some special subjects, including the self, one's studies, spheres of interests, travel, hotel, meals and food, shopping and others; acquire basic familiarity with the Ukrainian language internet resources.

This course aims to introduce students in how to look at the fundamentals of sociology and societies. In particular, we will explore how people organize their social life, how cultures and subcultures vary, how social institutions vary, and what problems are central and fundamental in the daily lives of ordinary people. By doing this, we will be better able to do a critical and reflexive analysis on whether or not we, as a society, are concerned about the things that are most critical to our collective and individual well-being.

The United States has been undergoing major social and economic transformations during the past several decades. These changes have had uneven impacts on individuals, groups, and communities.
The major topics that will be covered in this course include the structure of the U.S. economy, linkages between the economic social and political systems, social and economic inequality, distribution of poverty its causes and impacts.
These issues will be analyzed with respect to their origins and persistence.
Alternative strategies for their amelioration will be explored. The role of government and other institutions will be examined in the solution of various social problems at the national and local levels.

Students will be encouraged to participate in discussions and to express their views about the origins of social problems and their solutions.

This course is an introduction to the subject matter, theoretical perspectives, and research methods of sociology. The nature of sociological inquiry will be illustrated through lectures and readings, and the course will attempt to accomplish the following goals: 1) Survey a large range of the subject matter studied by sociologists; 2) Demonstrate how the theoretical and methodological approaches of contemporary sociology are used in the analysis of various substantive problems; 3) Indicate how sociological research is relevant to issues of social policy; 4) Prepare the student for the further study of sociology in more advanced courses, if desired.

Class Enrl Cap: 45 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req., European and Eurasian Studies, West European Studies
Room Characteristics: PeopleSoft - Scheduled (PS)(1)

The aim of this course is to provide a survey of the classical foundations of sociological theory. Traditionally, the three main figures in classical sociological theory are Karl Marx, Emile Durkheim, and Max Weber. In this course, we will study important selections from their work, but also cover some related pre-classical literature from the Enlightenment tradition as well as 20th century developments in theory that were substantially grounded in the classical tradition. We will explore the conventions, expectations, and skills of reading social theory as a way of learning what it takes to encounter big

Ideas with intellectual appreciation and critical confidence.

¿In this course on social theory, we will read, reflect upon, and discuss the ideas of a range of social theorists and their ideas. Within sociology, theory is typically divided into the categories of ¿classical¿ and ¿contemporary.¿ Classical theory is most often associated with three thinkers whose ideas have been particularly influential within (and beyond) sociology and thus form the classical cannon: Karl Marx, Max Weber, and Emile Durkheim. Given the predominance of these theorists, we will start the semester by engaging with their texts and ideas, before reflecting upon whose ideas are considered canonical and why. When we think critically about whose ideas are considered canonical, whether Marx, Weber, Durkheim, or others not covered in this course (Cooley, Mead, Schutz, Spencer, Comte, and Simmel to name but a few), certain commonalities arise. These thinkers are all white, European men. If we took this cannon as our guide to social theory, it would appear as though only white men have ideas about social dynamics worth reading and discussing. To challenge this innately violent notion, this course will emphasize social theorists whose perspectives are often marginalized precisely because they pose a threat to hegemonic, Eurocentric understandings of the social world. These thinkers will emphasize the role that raciality, colonialism/imperialism, and gender/patriarchy play in social dynamics.¿

Much of what we know about the social world is based on folk experiences and common wisdom. In the social sciences, using the sociological perspective requires the application of rigorous scientific methods to research questions. All methods have the potential to teach us something important, and this course will survey a variety of commonly-used approaches. In this course, students will be introduced to the components of designing and implementing sociological research by understanding: 1) how to ask useful and interesting research questions; 2) the principles of research design; 2) the ethics and politics of different methodological approaches; 3) how to use and compare qualitative and quantitative methods; 4) how to analyze data and draw conclusions; and 5) how to evaluate the research of others. The overall aim of this course is to make students more knowledgeable practitioners and consumers of knowledge.

This course will cover major classical and modern sociological theories of religion, including discussion of the renewed focus on religion globally. The course will begin by a focus on the global resurgence of religion in modern times. It will then explore the classical sociological tradition in the sociology of religion, including relevant psychological and philosophical literature.

SOC	0352	1000	27465	SOCIAL MOVEMENTS	Lecture	3

Room Characteristics: PeopleSoft - Scheduled (PS)(1)

In this course, we will use concepts, theoretical frameworks, and empirical research from the social sciences (primarily but not exclusively sociology) to interrogate the social aspects of sexuality in three main ways. We will investigate:
(1) The social production, organization, and contestation of diverse sexual identities, behaviors, interactions, ideologies, institutions, inequalities, and ethics.
(2) Key theories and findings of research on the social aspects of sexual diversity, and some classic and contemporary debates in the field.
(3) Several specific organizational fields of sexuality, heterosexuality, sexuality as work, and sexual violence, as they play out in, organize, and reproduce or undermine sexual ethics, sexual politics, and sexual decision-making.
Course Notes
The course will be organized primarily in discussion format, with readings, participatory discussions and presentations of material, and brief written assignments all directed toward students, critically appreciating the social aspects of sexuality. The two exams will comprehensively cover this material.

SOC	0438	1000	28536	SOCIOLOGY OF THE FAMILY	Lecture	3

Room Characteristics: PeopleSoft - Scheduled (PS)(1)

This course will examine the family as a social system. Through the use of lectures, discussion and film, special attention will be given to a number of themes, including the history and evolution of the family; marriage; parenthood; childhood; love; sexuality; and the future of the family. In general, this course will attempt to examine the causes and consequences of the family¿s adaptation to a wide variety of social forces.

SOC	0471	1030	10686	DEVIANCE AND SOCIAL CONTROL	Lecture	3

One of the major objectives of this course will be the establishment of a solid theoretical foundation for the study of social deviance. We will therefore discuss the strengths, limitations and relevant applications of the positivist and social constructionist perspectives of deviance. In the process, students will develop an analytical "tool kit" which will be used to explore a wide variety of deviant behavior.
Throughout the course, we will also explore relevant issues involving "causality." Ongoing attention will be given to "biological" versus "social" explanations of deviant behavior, as well as the implications of psychological versus sociological perspectives of deviance. We will also consider the paradoxical influence of social control, and the manner in which our social environment is capable of both inhibiting and encouraging deviant behavior.

Course description
This course is designed to help students understand how economic and political globalization impacts health outcomes in the United States and around the world. In this course we will explore how a variety of global factors affect people's health and their access to health care. For instance, expanded international travel and migration contributes to the spread of infectious diseases and shapes a growing international labor market in health care. International economic policies such as patent law and trade agreements affect access to and delivery of health services and treatments and contribute to national, racial, and gendered inequities in health care. Climate change increases the prevalence of certain diseases and impacts availability of food and water. In addition, global economic forces shape the possibilities for national and local governments to provide for their citizens; basic human needs such as safe drinking water, nutrition, and a healthy environment. Students will gain enough familiarity with global processes to appreciate the multiple influences on human health that are relevant to careers in a variety of fields related to the physical and social sciences and the humanities. This course fulfills social sciences and foreign culture/international, global general education requirements.

SOC	1227	1000	27467	REBELLION AGAINST AUTHORITY	Lecture	3

The objective of this course is to explore how and why individuals and social groups rebel against authority. This course will investigate the conditions that stoke rebellion against immoral and oppressive power structures, shared conditions, and social norms; explain how we know when authorities are acting immorally or unjustly; analyze why injustice and illegitimacy only fuel rebellion in some cases and induce conformity in others; explore the various forms that resistance and rebellion can take, and theorize the factors that shape rebellion's varied forms, such as exit, sabotage, protest, withholding,

reclamation, violent struggle, and revolution. The empirical topics covered will address a range of rebellion under tyranny, including rebellion during slavery in the United States, rebellion against Nazi power and the Holocaust during World War II, and resistance to colonialism and imperialism, among other notable topics.

Today democracy is in trouble in many countries. A generation ago, many people thought democracy was triumphing all over the world. Now things look a lot less certain. How can we understand the problems of the current moment, not just in the US but on every continent? Over the past several centuries people refashioned their political institutions, often in bitter conflict with champions of older systems and sometimes in equally bitter conflict against champions of other kinds of change. Social movements played major roles in these big developments. This happened in several big waves involving many places at the same time. The latest such wave began in western Europe in the mid-1970's, picked up steam in South America in the 1980's, included the overthrow of Communist regimes in Eastern Europe at the end of that decade, and embraced Asian and African countries as well. After past democratic waves, powerful antidemocratic forces emerged and pushed back, only to be pushed back in turn by renewed democratic advances. We will look closely at these large struggles of democratic and antidemocratic forces to give us new perspectives on the processes, prospects and perils of the current moment.

The course will examine the French Revolution in its various geographical locations: from Paris and Versailles, to the provinces in France, to Europe and the wider world. It will explore how the reception and the impact of the French Revolution depended on the particular traditions, social constitutions, and economic developments of the places through which it travelled. Based on a cross-regional and cross-national approach, the course will also assess the values and problems of existing interpretations of the French Revolution (Marxist, social, political and cultural interpretations). The reading list combines both primary and secondary sources (in English translation).

Sociological interest in nature emerged alongside growing attention and concerns about environmental issues, from toxic waste to deforestation to global climate change. Today, environmental sociology has become a diverse and thriving sub-discipline of sociology with many divergent specializations and thematics, from the study of household demographics and land use change to a concentration on social movement mobilization around issues of environmental health and injustice. It is also a field characterized by the utilization of numerous methodological tools, from ethnographic fieldwork to large-scale demographic techniques.

You work out. You go for a run. You go to the gym. You practice yoga. You try the latest Keto diet. Or maybe you go Paleo. Even better, Intermittent Fastening. On weekends, it's meditation and spinning class. Or Cross-Fit. Or Barré. At the supermarket, you buy organic. Or locally sourced food. Lots of kale. Nuts and fish, because fatty acids, you've heard, are good for brain health. Maybe you do some or none of these things, but you are urged to do so in the seemingly endless stream of health and lifestyle reports that cycle through your news feed. At your annual physical, you are asked about regular exercise, whether you smoke, take recreational drugs, your sexual history, and how many alcoholic beverages you drink per week. To value health is also to we aware of what poses risks to health. We know that fat, sugar, sitting, alcohol, stress, tobacco, and cholesterol are threats to health. My Google search a second ago listed school

Room Characteristics: PeopleSoft - Scheduled (PS)(1)

This class is intended to provide a graduate-level introduction to qualitative research methods. We will focus on interviewing and participant observation, the two main "fieldwork" methods. In designing the course, I have attempted to strike a balance between the goal of becoming acquainted with theoretical and methodological literature on qualitative methods and the goal of gaining practical experience in fieldwork methods. We will read some methodological

writings, and you will conduct your own field studies. Much class time will be spent discussing your own field experiences as well as some of the literature on qualitative methods.

SOC 2301 1000 28542 ENVIRONMENTAL SOCIOLOGY Seminar 3

Bldg: Wesley W Posvar Hall **Room:** 02800 **Days:** Th **Time:** 16:30 - 19:00 **Instructor:** Murphy,Michael Warren II

Class Enrl Cap: 25 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Room Characteristics: PeopleSoft - Scheduled (PS)(1)

¿Sociological interest in the ¿natural¿ environment emerged alongside growing concerns about ecological issues, from toxic waste to deforestation to global climate change. Today, environmental sociology has become a diverse and thriving sub-discipline of sociology with many divergent specializations and themes, from the study of household demographics and land use change to the examination of social movement mobilization around issues of environmental health and injustice. It is also a field characterized by the utilization of numerous methodological tools, from ethnographic fieldwork to large-scale demographic techniques. This graduate seminar is designed to provide students with a broad, though selective, overview of key theoretical and methodological approaches, debates, and substantive areas of inquiry within the field of environmental sociology. Each week students will read, reflect upon, and discuss materials relevant to an assigned topic pertinent to environmental sociology. Though the course centers on environmental sociology, it is undoubtedly an interdisciplinary field, and thus we will on occasion engage relevant work from beyond the discipline.¿

SOC 2341 1010 29256 SOCIAL MOVEMENTS Seminar 3

Bldg: Wesley W Posvar Hall **Room:** 03701 **Days:** M **Time:** 12:00 - 14:25 SOCIAL MOVEMENTS INTERNATIONA **Instructor:** Gobat,Michel Charles

Class Enrl Cap: 5 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: Global Studies, Russian & East European Studies
Room Characteristics: PeopleSoft - Scheduled (PS)(1)
Combined Section ID: 0855(SOC/2341/HIST/2043) - HIST 2043(#29257)

This course provides a graduate-level overview of the field of social movements. Theoretical issues to be covered include the role of political and cultural opportunities, collective identity, and mobilizing structures in the emergence, development and outcomes of social movements. We will read some important theoretical work as well as some empirical studies, which advance social movement theory. The course will serve as a guide for further independent study of the field.

SOC 2432 1000 28543 GENDER EQUALITY AND THE UN Seminar 1.5

Bldg: Wesley W Posvar Hall **Room:** 03800 **Days:** W **Time:** 15:00 - 16:15 **Instructor:** Finkel,Mihriban Muge

Hughes,Melanie M

Class Enrl Cap: 5 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Room Characteristics: PeopleSoft - Scheduled (PS)(1)
Combined Section ID: 0903(SOC/2432/PIA/2530) - PIA 2530(#29073)

This seminar explores main themes in cultural sociology, including theories of patterns of life, values, symbols, identities, and solidarities, as well as the social vehicles in terms of which culture is produced, sustained and interpreted. The seminar explores both the place of culture in sociological analysis, and the place of sociology in the analysis of culture. The seminar includes both theoretical and empirical components. In addition to the common seminar materials, the students will have a chance to pursue pertinent parts of their own research on various contemporary or historical cultural phenomena of their own choosing.

The aim of this seminar is to survey the various ways in which the idea of "tradition" has been invoked in modernity. We will pursue this aim from the point of view of different disciplines as well as in different world regions. Overall, by developing a better grip on how traditions have been imagined, constructed, invented, or maintained, we acquire a better understanding of the nature of modernizing dynamics in social, political, cultural and economic life, as well as a better understanding of what is meant by "tradition" in each case. Students should expect an interdisciplinary conversation, and will have an opportunity to pursue their own research and reading lists, as appropriate.

Middle Eastern Theatre and Politics

Historically, the Middle East has been left out of global histories of the theatre. Given the pervasive Western view of Islam as an oppositional force to modernity and a source for Muslim rage, the region's cultural particularities have been presumed ill-suited for the emotional complexity and humanistic qualities of drama. Over the course of the semester, this class will rewrite narratives on both Middle Eastern identity and the history and utility of theatre and performance in the Greater Middle East, with an emphasis on exploring the ways Muslim theatre artists over the past one hundred years have used the stage to speak to power. We will read plays that illustrate a diversity of perspectives, spanning the countries of Egypt, Syria, Iran, Iraq, Palestine-Israel, Tunisia, Lebanon, Jordan, and Yemen, as well as diasporic productions staged in the United States, France, England, and Germany. We will interrogate critical theory by Middle Eastern scholars and artists, integrating these writings within understandings of Western performance theory, seeking to navigate the cultural poetics and semiotics of Middle Eastern performance. Ultimately, we will attempt to answer this question paraphrased from Audre

This course serves as the required introduction into the Urban Studies major or as a general course in the social sciences for the non-major. The course, like the major, explores the problems and potential of cities by combining the various disciplinary perspectives: economics, geography, Africana studies, political science, history, sociology, and anthropology. In so doing, the course takes full advantage of the resources of the Pittsburgh metropolitan area. Films and field trips attempt to bring the readings alive. As course materials are providing the students with the necessary concepts and information to understand the urban environment, the students will be developing their own investigative skills through group trips.

This course introduces the fundamental principles of geo-spatial analysis using ArcGIS Desktop and Microsoft Excel. It will focus on teaching students the principles of GIS through computer-based exercises and an individual project. Exercises will train students in acquiring and downloading data and imagery, analyzing, mapping and managing geospatial data in order to address predominately urban problems. An emphasis will be placed on bridging the gap between performing geo-spatial analyzes using GIS and designing cartographically correct and understandable outputs. Exercises and projects will be centered on topics and applications relevant to urban studies, political science, sociology and economics.

Starting from Quantitative Research, moving to Qualitative Research, and finally to Mixed Methods Research this course will give students with a background in Urban Studies a methodological base on which to build their own research. The course will explore different research methods and will approach them both in practical and theoretical perspectives. Students will be asked to engage in observation, mock-interviews, and collection of quantitative data in order to gain a sensibility for both the methods of data collection and how to design the most appropriate methodology for specific research projects. Providing a series of tools, this course will be fundamental for all who want to engage in social research or get prepared for acquiring more comprehensive and deeper knowledge of how to measure social events.

This course provides a critical introduction to the concept of sustainability in relation to cities in the United States and internationally. We will investigate how the fuzzy concept of sustainability has developed, and look at how principles of urban sustainability are put into practice. In particular, we will look at the Pittsburgh city-region, and draw on examples from Singapore, Auckland (New Zealand), and Tianjin (China). In particular, the class will concentrate on how sustainability is embedded in planning urban structures, organizing for sustainable communities, and mitigating environmental risks and vulnerability. Students will hear from a variety of professionals engaged in sustainable urbanism, and learn about specific tools used to assess sustainability at different geographic scales.

This course provides students with an opportunity to expand their knowledge of the core methods used for analyzing geo-spatial data using ArcGIS Desktop and gives students an introduction to how GIS is used in the community by planners, public administrators, researchers and data managers. Classroom projects will extend students' skills in acquiring and managing geo-spatial data, map design and solving spatially explicit problems. Students will complete a number of exercises and work on a semester long project of their choice. The content of the course is geared toward equipping students with a set of quantitative and geo-spatial tools that are relevant to careers in urban planning, non-profit organizations, public administration and economic and community development. Students who have not had an Introductory GIS course should contact the professor before enrolling.

URBNST 0200 1010 10184 URBAN FIELD PLACEMENT Internship 3 - 6

This course gives the Urban Studies major the opportunity to get off of the campus and in the community. It allows the student to relate his/her academic training to a real world situation by working in an urban related organization or agency. Prior to the term in which the field placement is taken the

student and the Urban Studies adviser plan a placement that is best suited to the student's talents and interests. During the placement the student works an established number of hours per week (9 hrs. for 3 credits and 15 hrs. for 6 credits) under the combined supervision of the agency or organization personnel and the Urban Studies adviser. For permission to register, go to 3500 WWPH.
Prerequisite(s): Near completion of the Urban Studies major.

URBNST 0320 1000 29041 HOUSING AND PROPERTY US CITIES Seminar 3

Housing is the basic building block of the city. Whether you rent or own, shelter is a basic necessity for urban life . . . but how does housing work? This survey course explores the changing forms of urban housing in the United States, and introduces you to the people and organizations responsible for housing-from developers, bankers and landlords to local, federal, and non-profit agencies.

The Economist recently stated "The world is becoming ever more suburban, and the better for it" - but is that the case? Urban studies usually examines core cities, but recent scholarship shows that suburbanization is now a "planetary" condition. This means that we need to expand our ideas to include suburban and exurban areas of the city-region. We will focus on suburbanism as a way of life and as a process, using this lens to examine the new frontiers of twenty-first century urbanism. Each student will be responsible for selecting one city of the world to study in depth throughout the semester, culminating in a class presentation and a final paper.

Invisibility and the Cities. This course will explore the city and its inhabitants with the lens of visibility and invisibility. We will dwell into the invisible of those we do not want to see (homeless, for instance); those who try to be invisible (sans papier, sex offenders, etc.); those who wish to be more visible (non-unionized workers, for example); those who are indifferent about being visible or not; those who want to see everything (tourists, police officers, etc.). Who is visible and who is invisible? Is visibility necessarily an outcome residents try to achieve? Is visibility really a trap - as Foucault famously stated?
But we also explore the invisible cities - the cities of our minds, desires, memories, dreams, and nightmares. How is a city shaped by what the inhabitants and visitors think of it? What does make a city different from another - so that we can say this is Paris, this is New York, this is Adelaide, this is Pittsburgh?
In this course we will explore the theoretical arguments for in/visibility approaching the topics in exam from the point of view of the city: what does it mean to install a CCTV system on traffic lights? What does it means to decrease public housing spending in favor of private enterprises? What does it mean

The Urban Research Seminar focuses the knowledge and skills, which the student has gained through the program, on a particular topic. The specific topic varies from term to term and faculty member to faculty member, but it always concerns an issue of relevance to the immediate Pittsburgh environment. Examples include urban sustainability, abandonment and vacancy, riverfront development, the impact of Reagan's cutbacks, the redevelopment of East Liberty, etc. To investigate the topic students will read secondary sources as well as collect and analyze primary data collected through interviews, field trips, surveys, etc.

In this course, we will focus on ethnography as an epistemological practice. Students will be exposed to the multidisciplinary evolution of ethnography from its origins to its application in an urban context. What is ethnography? Specifically, what is urban ethnography? These are the two critical questions that will be answered in this course. We will focus on topics of neighborhood/city membership, gentrification, community, belonging and the importance of place

and space. Specifically, we will try to answer the following questions: Who owns the city? Who has a right to the city? Who controls the city? Despite a vast body of literature that illustrates issues of gentrification; we will critically examine controversial debates surrounding "Who has a right to the city?" that is situated in the process of gentrification. We will interrogate both the assumption that "gentrification" is good or bad for neighborhoods and their residents. In doing so, we will investigate the processes of redevelopment, housing, displacement, resettlement, employment and transportation. In this course we will engage in a semester-long ethnographic project focusing on the idea of belonging, of neighborhood, of urban sentiment, of feeling rooted (or disconnected) to a specific area (street, neighborhood, area, city, etc.). Students will learn how to do urban ethnography by conducting a research project on the notion of belonging. What does it mean to belong to a place or space? Who defines who belongs and who doesn't? Is it a self-defined status?

URBNST 1903 1010 20797 HONORS THESIS Independent Study 3

This course will help students develop an understanding of current social and political conversations around sex work. We will discuss academic and journalistic research into the sex trades as well as first-person accounts of sex workers¿ own experiences. In the process, students will engage with analysis from a range of fields, including feminist theory, sexuality studies, queer theory, labor studies, moral philosophy, legal history, situated knowledge epistemology, media representation theory. Students will compare these approaches, analyze how research into sex work has changed over time, and consider sex workers¿ own critiques of how they are represented in these discussions.

This seminar addresses queer and feminist approaches to the interdisciplinary field of disability studies. Through seminar discussions, presentations, and independent research projects, students will immerse themselves in major currents, historical and contemporary, regarding the enmeshment of disability, sexuality, gender, and health.

After reading foundational texts in ¿crip theory,¿ we will explore genealogies of disability within queer and feminist thought over the past half-century ¿ including feminist critiques of psychiatric power and HIV/AIDS theory ¿ with particular attention to queer of color critique. We will subsequently engage the rich literature within queer and feminist disability studies that has proliferated over the past decade, including work by Puar, Elman, Kafer, Kim, McRuer, Pickens, Schalk, Chen, Minich, Samuels, and others. The conclusion of the course will feature opportunities for students to explore and share work grappling with the entanglement of disability and queer and feminist studies in the context of their own research.

Run Date: 06/15/2021
Run Time: 17:00:14

Dietrich Sch Arts and Sciences - Classics - Subject: Classics

Subject	Catalog Nbr	Section	Class Nbr	Course Title	Component	Units	Topics
CLASS	0010	1010	25847	GREEK CIVILIZATION	Lecture	3	

Bldg: TBA **Room:** TBA **Days:** W **Time:** 18:00 - 20:30 **Instructor:** Scott,Wesley B

Class Enrl Cap: 35 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: DSAS Geographic Region General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West Europea
Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

Covering a thousand years of ancient Greek culture, this course will survey in roughly chronological order the major achievements of the ancient Greeks. The readings and lectures will start with epic poetry¿s presentation of Bronze Age heroes, and then move on to the literary innovations of the Archaic Age. Next, the cultural disparities of Athens and Sparta will highlight our survey of the Classical Age, the high point of ancient Greek civilization. Although social and economic aspects will not be neglected, the course will focus on those aspects of ancient Greek civilization that have retained a perennial significance: its literature, politics, historical writings, philosophy, art, and architecture.

CLASS	0020	1030	24614	ROMAN CIVILIZATION	Lecture	3	

Bldg: TBA **Room:** TBA **Days:** Tu **Time:** 18:00 - 20:30 **Instructor:** Newell,John F

Attributes: DSAS Geographic Region General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West Europea
Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course will survey the major achievements of ancient Roman civilization. Arranged on a topical basis, the readings and lectures will cover Rome's claims to ties to the heroic Bronze Age, its ideals, the realities of life, the characteristics and events that led to its emergence as a world power, and a survey of its intellectual and artistic achievements. Although the social, political, and military background will not be neglected, the chief emphasis will be placed on those aspects of Roman civilization that have retained a perennial significance for Western societies, and which serve as examples of what it means to be a civilized society.

CLASS	1510	1000	29375	GREEK ART	Lecture	3

Polymathic Contexts: Humanistic GE. Req.
Room Characteristics: (1), PeopleSoft - Scheduled (PS)(1)

Rhetorical Process is an introduction to the study of rhetoric as persuasive communication and to its function in society. The objective of this course is to give students a sense of the significant role that rhetoric plays socially, politically, and culturally, and to introduce students to a variety of traditional and contemporary approaches to the analysis of rhetorical action. Rhetoric as persuasive communication is used in political speeches, public arguments, news reporting, public relations, editorials, advertising, music, resistance movements and other forms of oral, visual, and textual appeals to the public. In this course, we will learn the origins of the study of rhetoric, how to recognize it in action, how to apply it to create persuasive arguments, and how to use it in interpreting the messages we receive in everyday life. Evaluation by objective midterm and final exams, recitation performance, and reading response paper.

COMMRC	0320	1120	10328	MASS COMMUNICATION PROCESS	Lecture	3	

Bldg: TBA **Room:** TBA **Days:** Th **Time:** 18:00 - 20:30 **Instructor:** Danuser,Deborah Jane

Organizational Communication focuses on successful communication strategies and techniques within organizations. In the first part of the course, students assess their current skill levels through a 360 assessment and learn how to set achievable goals, communicate more effectively as leaders, market themselves better, deliver an elevator presentation and increase their productivity through time management techniques. In the second part of the course, students work with a real organization as consultants to help that organization improve its organizational communication effectiveness.

The purpose of this course is to refine the skills first developed in basic Public Speaking. Students will prepare and deliver speeches at an advanced level and will practice professional speaking strategies, tactics and performance skills, with primary focus on delivery (including nonverbal aspects), style, innovation, creativity, critical thinking, and progressive improvement. We will combine the very interactive methods of workshop learning with the constructive criticism of both the instructor and classmates. Students will write and deliver five formal, graded speeches chosen from the following categories: Speech of Introduction, Persuasive Policy Speech, Commemorative Values Speech, Speech of Explanation (Apologia), Public Relations Crisis Position Speech, Point-Counterpoint Pairs Speech, Graduation Commencement Speech, and a Self-Designed Category. Only students who have demonstrated superior speaking skills (B or better) in the basic Public Speaking course should register.

COMMRC	2218	1000	28840	CONTEMPORARY RHETORICAL THEORY	Seminar	3

How do authorities conserve social and political power? How does personhood function as a legal and social fiction? How does discourse write the contours of the libidinal economies of political order? Do speech and writing map different models of political authority? What follows if one posits that civilization as the reorganization of violence rather than its cancelation? Are `the people¿ a process or a thing? How is race as a hidden transcript in the common narration of Western politics as a progression from divine right to biopolitics? To what extent can the liberal individual be disarticulated from a desire for white, masculine dominance? We will pursue these and other questions, building familiarity with key concepts in social theory related to concepts of authority, political legitimacy, social difference, violence, and personhood. Students are encouraged to develop expertise with at least one key concept, culminating in a full-length seminar paper at the end of the semester. Along with primary texts in political theory, a preliminary list of authors we will engage with includes Claude Lefort, Saidiya Hartman, Michelle Wright, Nadia Urbinati, Dean Spade, Anjali Vats, Annie Hill, C. L. R. James, Cedric Robinson, Karma Chavez, Bonnie Honig, Michel Foucault, Giorgio Agamben, Michael McGee, Nathan Stormer, Claire Sisco King, Manu Karuka, Yarimar Bonilla, Sylvia Wynter, Frantz Fanon, Philip Mirowski, Jason Frank, Charles Mills, Carol Pateman, Walter Benjamin, Robin James, Elizabeth Anker, Chantal Mouffe, and Hortense

This course introduces undergraduate students to the theory of Financial Economics and its application to the analysis of corporate finance. Upon completion of this course students will have a deep understanding of:
¿ balance sheet and income statement
¿ ratio analysis of the financial statements
¿ financing of the corporation
¿ valuation theories, incl. valuations of future cash flows, stocks and bonds
¿ capital budgeting, impact of risk on return on corporate project decisions
¿ interrelation between investment and financial policies

At the end of the course, students should be able to critically evaluate financial problems and know how to apply economic theory in order to solve them.

This course will focus on the roles that film and media festivals play in film production, circulation, and exhibition. Students will learn about the history of film festivals (from Venice to Slamdance), the relationship between "independent" and commercial film, as well as how current film industry practices have changed the art and business of cinema. The course will also consider how film festivals are created and produced, including funding, film acquisition, and marketing.

In this introductory production course, we'll explore the craft of narrative audio and podcasting across genres, including live storytelling, profiles, and

flash fiction. Through a series of short creative projects, you'll learn the foundations of interviewing, field recording, scripting, structure, and sound design, while gaining basic technical competency in professional audio editing software. Class sessions will include a blend of discussions, workshops, and hands-on production, preparing you for more advanced work in the medium. This course welcomes students from all backgrounds and genres. No previous experience with audio production is expected or required.

Room Characteristics: PeopleSoft - Scheduled (PS)(1)

The Book as Art: Text and Image is a class taught occasionally as an elective for Writing majors and minors, although other students who have an interest in writing/studio arts may also take it. Through guided group and individual exercises, students will create content for and design a number of pieces that combine words and images. Along the way, students will develop a greater appreciation for the language of the visual as well as learn to deploy text as a meaningful design element.

**If you do not meet the enrollment requirements, please contact the instructor for permission to enroll in this class.

In this capstone course, students will write three 2,500-3,500 word researched pieces that explore the same subject from three different angles, using such forms as personal narrative, on-site reporting, research paper, or critical review of a work of art. All the work must incorporate some original research--in a library, an archive, or in the form of an interview with a stranger. Your goal should be not only to write to professional standards of quality but to come out of this course knowing something--maybe even many things--you didn't know before.

This course will focus on the roles that film and media festivals play in film production, circulation, and exhibition. Students will learn about the history of film festivals (from Venice to Slamdance), the relationship between ¿independent¿ and commercial film, as well as how current film industry practices have changed the art and business of cinema. The course will also consider how film festivals are created and produced, including funding, film acquisition, and marketing.

As a continuation of French 0101 this 3-hour-per-week course introduces students to the French language, building on skills gained in French 0101. Culturally-contextualized comprehension and production abilities in both written and spoken form are stressed. Because the focus is on communication, French 0102 is taught in the target language. Objectives are similar to those in French 1, but expanded for this more advanced level.

This one-unit class at once builds on and complements French 55. It is designed to improve students¿ oral proficiency and sociolinguistic competence through contextualized simulated immersion. The course is divided into four sections, each demanding different, but complementary social and linguistic skills, to wit 1) getting to know people and places; 2) current events; 3) debate and disagreement; 4) cultural comparisons. Emphasis is on acquiring the authentic oral communication skills, in the widest sense of the term, necessary to navigate expertly French-speaking environments.

Course Description for Spring 2020:
In the eighteenth and nineteenth centuries, Greek Art acquired a `western baggage¿: it was and is often still characterized as the art `of naturalism¿, the art `of democracy¿, the art `of the individual¿ and as an art that stood in conscious opposition to the more regimented royal arts of Near Eastern kingdoms and empires. Over the last half century, archaeology has shown how much Greek art has in common with its eastern neighbors and how much it owes to their earlier experiments in painting, drawing, individual forms, and proportion. More importantly, however, the study of Greek material culture now understands it to be as socially conscious and political as that of its neighbors. In this course students will study changes in the history of Greek society and the material culture that it produced, from the Bronze Age palaces to the Age of Alexander, in both the area known now as Greece and to a lesser extent in the broader Greek world.

This seminar will be an exercise in comparative history--in particular, an examination of the "special relationship" between Britain and the United States. We will look at political, diplomatic and cultural ties between the two nations in the 20' century, ranging from the American "occupation" of Britain during World War Two to the Beatles and the British Invasion of the 1960s to popular and journalistic impressions held of each country in the other. We will read some primary sources, especially newspapers, speeches and memoirs, but mostly will read several of the very good books published on the subject.

Human Rights in World History, will provide a historical overview of the human rights movement, focusing on the 18th-20th centuries. The course will lay out the parameters of the struggle to define and implement human rights in the Western and non-Western world, and engage with the different resulting viewpoints. The course will explore controversial aspects of the implementation of human rights internationally, including calls for the respect of cultural differences. Finally, the course will examine case studies of the racial/ethnic/caste dimension of the human rights struggle, looking at the US, Brazil, Israel, and India as countries with quite different cultural traditions, political makeups, and demographic compositions. The course will enroll 35 students, and will meet twice per week.

The course will survey the history of sports in the United States, focusing primarily on the 20th century. Topics considered will include sports and race, gender, and politics, the commercialization of sport and collegiate sports. We will pay particular attention to the way in which Sports have served as an arena for dissent and Pittsburgh's relation to national sports trends. By the end of the semester students will gain an understanding of the changing role of sports in the United States. The course will enable students to explore a topic of their choice related to overall course content, enabling them to hone their analytical writing and research skills.

In 2012 when a former member of the Irish Republican Army and a former Ulster Volunteer Force prisoner met with University of Pittsburgh students in Belfast the opening of the conversation went like this: Ex-prisoners: "You've been in Belfast for 2 weeks now and met with many people on both sides of the divide. Do you understand the conflict any better now?" Pitt students: "No. We are more confused now than when we got here." Ex-prisoners: "Good! You've learned something." Contradictory? Confusing? Counter-intuitive? Nonsensical? Intriguing? All of the above? If you say, "all of the above" then you will find this class ¿intriguing¿ because what you will do is move beyond the easy and simple "inherited histories" that many people have of the modern conflict in Ireland. How will you do this? In this class, you will 1. Launch an investigation into the roots of the "modern" conflict (1969-1994) 2. Determine who the antagonists were and why they fought. (We will do one whole class on why individuals made the decision to fight and to kill. 3. Analyze why this conflict became so vicious and "dirty." 4. Then analyze how those who fought the "war" in Northern Ireland, both loyalist and republican, ended the shooting war. By the end, you will come to realize that history is rarely black and white and that there are many shades of grey. There are no formal prerequisites, but you must be prepared to read, analyze and synthesize complex and often contradictory arguments.

HIST	1134	1010	29152	IRELAND'S LOYAL REBELS	Lecture	3

Ulster Protestants are all clairvoyant, and it's never good news. - David Ervine
When you finish reading this description, you are probably going to ask yourself, `What the heck is he talking about?" `How can one by both be loyal to Britain and be prepared to rebel against Britain?" and why are all `Ulster Protestants clairvoyant and it is never good news?" How, can 1798, a Republican uprising, be a `Protestant led rebellion?" Based on the title, Ervine's quote and the description, is this study of the Protestants of Ireland as a whole

and Ulster in particular, another case of the `truism" about Northern Ireland where `Anyone who isn't confused here, doesn't really understand what's going on?"
Now, do you want answers to these questions? Then look elsewhere! In all seriousness, you may not find any definitive answers in this class, but you will take a very interesting journey as you focus on the contested and contrary role of Protestants in Ireland and then Northern Ireland in their relationship to the Crown.
That doesn't mean you won't try to answer these questions. You will examine and analyze the roots of Protestant `contrariness' in Ireland and Northern

This course explores the development of Pittsburgh's life and landscape from its frontier origins in the 18th century to its Renaissance of the mid-20th century. The city and its region are addressed as a case study in American social history and urbanization. Pittsburgh offers the opportunity to examine the transformation from a commercial city to an industrial metropolis with the attendant social, political, labor, and environmental issues which characterize American urban life.

HIST 1706 1010 29199 DRUGS IN GLOBAL HISTORY Lecture 3

Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

Drugs, and ideas of what a drug is, have shaped global history since early modernity. This course will chart the emergence of modern bodies and of pharmaceutical modernity as we explore a pharmacopoeia full of global objects acquired both over-, behind-, and under-the-counter, from chocolate and Spanish Fly to Prozac and e-cigarettes. By tracing drug history through interweaving histories of music, media, fiction, poetry, and more, we will also be tracing a history of ways in which drugs have helped create ideas of what is "normal."

HIST 1772 1010 29202 RACE, CASTE ETHNY GLBL PERSP Lecture 3

Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course will examine historical patterns of race relations in the U.S., Latin America (Brazil, Cuba), Africa (South Africa), and Asia (India). For India, the focus will be more on caste relations, particularly untouchability, as a counterpoint to caste-like race relations in the U. S. and South Africa. The course will include pictures, videos and other materials acquired on trips to those locations in 1993, 1997 and 2002. The overall goal of the course

will be comparative: to examine the operation of these processes in a variety of economic, political and cultural settings.

Science is the result of a long process of formation starting in Antiquity and culminating in the late seventeenth century with the so-called Scientific Revolution. Before the Scientific Revolution science, magic, and medicine were strongly related. This course examines the historical processes by which science became an independent sphere of human endeavor in the Western world.

HPS	0612	1200	23649	MIND AND MEDICINE	Lecture	3	

Bldg: TBA **Room:** TBA **Days:** Th **Time:** 18:00 - 20:30 **Instructor:** Pence,David Evan

Class Enrl Cap: 30 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Room Characteristics: PeopleSoft - Scheduled (PS)(1)

This course is designed as an introduction to the philosophy of medicine and psychiatry. Some of the questions examined include: What is disease? Can one define disease and disorder purely objectively? Are psychiatric disorders real? How should scientists explain psychiatric disorders and other medical conditions? How do researchers study diseases? What is the relation between the causes of disease and their symptoms? The goal of this class is to provide students with a critical understanding of these philosophical issues. Previous knowledge of biology, neuroscience, or medicine is not needed for this class. Key notions and theories in these fields will be introduced progressively.

HPS	0613	1100	23961	MORALITY AND MEDICINE	Lecture	3

Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., Undergraduate Global Health
Room Characteristics: PeopleSoft - Scheduled (PS)(1)

Ethical dilemmas in the practice of health care continue to proliferate and receive increasing attention from members of the health care profession, ethicists, policy makers, and the general public as health care consumers. In this course we will examine a number of ethical issues that arise in the context of contemporary medical practice and research by analyzing articles and decision scenarios. Topics to be covered typically include the physician-patient relationship; informed consent; medical experimentation; termination of treatment; genetics; reproductive technologies; euthanasia; resource allocation; and health care reform. Students who successfully complete this course will be able to identify and analyze different philosophical approaches to selected issues in medical ethics; have gained insight into how to read and critically interpret philosophical arguments; and have developed skills that will enable them to think clearly about ethical questions as future or current health care providers, policy makers, and consumers. This course is part of a core sequence leading to certification in the Conceptual Foundations of Medicine Certificate Program, and is a companion course to HPS 0612 (Mind and Medicine) but may be taken independently. The course is of particular interest to pre-medical and pre-health care students.

HPS	0613	1200	24112	MORALITY AND MEDICINE	Lecture	3	

Bldg: TBA **Room:** TBA **Days:** M **Time:** 18:00 - 20:30 **Instructor:** De Baerdemaeker,Siska Anna Margareta

Class Enrl Cap: 30 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., Undergraduate Global Health
Room Characteristics: PeopleSoft - Scheduled (PS)(1)

Ethical dilemmas in the practice of health care continue to proliferate and receive increasing attention from members of the health care profession, ethicists, policy makers, and the general public as health care consumers. In this course we will examine a number of ethical issues that arise in the context of contemporary medical practice and research by analyzing articles and decision scenarios. Topics to be covered include the physician-patient relationship; informed consent; medical experimentation; beginning of life-care and reproductive technologies; end of life-care; and public health policy. Students who successfully complete this course will be able to identify and analyze different philosophical approaches to selected issues in medical ethics; have gained insight into how to read and critically interpret philosophical arguments; and have developed skills that will enable them to think clearly about ethical questions as future or current health care providers, policy makers, and consumers.

This course is part of a core sequence leading to certification in the Conceptual Foundations of Medicine Certificate Program, and is a companion course to HPS 0612 (Mind and Medicine) but may be taken independently. The course is of particular interest to pre-medical and pre-health care students.

Room Characteristics: PeopleSoft - Scheduled (PS)(1)

The central concept in Classical Chinese philosophy is that of the Dao or way. For philosophers of the Classical Chinese period, the Dao can be the way that one should live one's life, the way to do something, the way to come to know things, the way followed by a particular school of philosophy, or even the fundamental way of the universe. In debates and discussions about the nature of the Dao, Classical Chinese philosophers have tackled a number of central philosophical problems, raising questions such as the following: What is the best way to live my life? What is the significance of my relationship to others? Can we resolve disputes, and if so, how? What is the connection between language and the world? What is the fundamental nature of reality? How should a ruler run the state? Are humans good or bad by nature? In this class we will approach these questions by tracing their development through the history of Chinese philosophy from approximately the 6th to the 3rd century BCE.

PHIL	0500	1300	10081	INTRODUCTION TO LOGIC	Lecture	3	

Bldg: TBA **Room:** TBA **Days:** M **Time:** 18:00 - 20:30 **Instructor:** Berry,Thomas J

Class Enrl Cap: 25 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Attributes: DSAS Quant.-Formal Reason General Ed. Requirement
Room Characteristics: (1), PeopleSoft - Scheduled (PS)(1)

PHIL 0500 provides an introduction to the concepts and methods of modern deductive logic. A full treatment of sentential logic and the basics of monadic predicate logic will be covered. Students will learn basic logical concepts, such as argument, counterexample, validity, soundness, sentential operator, and quantifier. Students will acquire the ability to translate English language sentences into logical language and vice versa. Students will master techniques for establishing the validity and invalidity of arguments, including truth tables, proofs, and natural interpretations.

PHIL	1320	1010	30060	TOPICS IN SOCIAL PHILOSOPHY	Lecture	3

Class Enrl Cap: 30 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0
Room Characteristics: PeopleSoft - Scheduled (PS)(1)

This course examines ethical and social issues that arise in connection with sport. The course will be divided into two parts: the first concerns issues that arise within sport, such as using performance-enhancing drugs and seeking to injure opponents; the second concerns issues related to the integration of sport into society, such as whether there ought to be gender equity in sport (and what gender equity is) and whether sport has a legitimate place at institutions of higher education.

Course Description for Spring 2020:
"Interdisciplinary Research Practices"
This studio course explores creative research practices with a focus on the modes and methods of working across disciplines. Students will be encouraged to draw from their knowledges and experiences in other disciplines as they develop and pursue creative practice. Students will develop their own line of inquiry while exploring a number of contemporary creative research practices, and will connect with resources within the department, school, city and beyond. Studio projects will be supported with field trips, visiting practitioners, lectures, readings, and discussion.

This course has an additional fee. For more information go to www.registrar.pitt.edu, and click on Faculty and Staff, then Course/Class, then Special Course Related Fees.

Room Characteristics: PeopleSoft - Scheduled (PS)(1)

This course surveys Soviet and Russian cinema from the 1950s to present and concentrates on the works of popular genre directors, such as Leonid Gaidai, Georgii Daneliia, and El'dar Riazanov as well as directors who are considered auteurs, such as Kira Muratova and Pavel Lungin. It therefore traces the development of popular, commercial, mass cinema, and festival/independent cinema, taking into consideration the changing ways of film production and distribution during the past 60 years. The overarching theme of the course is comedy in all its variations: romantic, eccentric, musical, satiric, etc. Using this genre as an example, the course will provide a chronological overview of Russian and Soviet films in their social, political, historical, and cultural context from the death of Stalin to present, focusing on such cultural periods as the Thaw, the Brezhnev period, Stagnation, Perestroika, the post-Soviet period, and the 2000s-2010s. The class is conducted in English and all films will be shown with English subtitles

Imagine this course as a portal opening onto an alien place that is surprisingly like home. You are living in a futuristic world, and this course is a history of how that version of the future has unfolded. Through careful attention to the rich literary and cinematic imaginations of Englishspeaking artists and of those who have lived in the realm dominated by Russia and the former Soviet Union, we will have an opportunity to examine and learn about Russian and Soviet culture as well as to engage in a rewarding cross-cultural comparison.

SLAV	0880	1020	24906	VAMPIRE: BLOOD AND EMPIRE	Lecture	3

Room Characteristics: Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course examines the phenomenon of vampirism starting in Southern and East Central Europe (Greece, Serbia, and Romania) during the 18th and 19th Centuries through ethnographic accounts, scholarly discussion of the time, and the vampire¿s introduction into popular media of the day. Next, we consider Western Literature, including the novel Dracula. As we move into the 20th Century, we will analyze stories, novels, and films focusing on vampires from a variety of critical perspectives, contextualizing the works in the cultures that produced them.
