How would it provide an engaging, equitable and quality education to all adolescents? In "Current Issues in Secondary Education: Reimagining the American High School" we will explore current challenges in U.S. high schools, such as systemic racism and unequal funding, and learn about innovative schools that are revolutionizing education. We will critically reflect on our own schooling experiences and collaborate to design a model high school, from its architecture and technology to its curriculum and teachers. You don't need to see yourself as a future educator to engage in this course. Whether you loved your high school experience or hated every minute, this course delves into the ways that high schools reflect, reproduce, and sometimes change both the best and the worst of U.S. society.</p>
