Ancient tombs, crypts, frozen bodies, mummies, and graves have long been the stuff of adventure and fiction. Yet archaeological investigation of the causes of death in the past, and how ancient peoples dealt with the dead, can tell us much about life in the past. This course will explore two topics: how archaeological study of human burials can reconstruct past deathways (mortuary practices, including treatment of the corpse and funerary rites); and (2) what the archaeological dead can reveal about health and diet in past populations, social dynamics, worldview, and the role of funerals (and the dead) for the living.

<p>Archaeologists study the material remains of past cultures. These past cultures are fascinating in their own right, but on a more fundamental level, they help us understand how human societies work and how they change over time. In this course, the practice of archaeology - the history of archaeological research, theoretical approaches in archaeology, and archaeological methods - will be interwoven with a basic overview of prehistory. Special emphasis is placed on some of the most compelling questions about our past: How did humans evolve? How did our nomadic hunter-and-gatherer ancestors become sedentary farmers? Can we explain why social inequality first arose, and how it became entrenched? How and why did ancient civilizations emerge, and why did they collapse?</p>

Course content: Forensic anthropology applies biological methods and theory to a medicolegal context. Students will acquire a foundational knowledge of human osteology and analytical methods required to develop an osteobiographical profile. We will examine unique identification markers, dental analysis, trauma patterns and common pathological conditions visible on skeletal remains that aid in an individual's identification. Methods of recovery, excavation and processing will be introduced.

This is an introduction to the various disciplines that have been brought to bear in the study of humans and other primates. The course will have an evolutionary perspective as we review living primates (distribution, features of behavior and morphology) and their fossil histories. Particular attention will be paid to how humans have come to look the way we do.

<p>This course will review the prehistory of South America from its earliest peopling to the Spanish Conquest. Emphasis will be placed on tracing the rise of civilization in the Andes. Although the best known of the prehispanic polities, the Inka empire was merely the last and largest of a long sequence of complex societies. Comparison of the Inka state with these earlier populations will reveal the unique and enduring traditions of Andean political and social organization.</p>

<b>Combined Section ID:</b> 0021(ANTH/1534/2534) - ANTH 2534(#30398)								

An introduction to quantitative data analysis in archeology, this course covers basic principles of statistics, including exploratory analysis of batches, sampling, significance, t-tests, analysis of variance, regression, chi-square, and estimating universe means and proportions from samples. The approach is practical, concentrating on understanding these principles so as to put them to work effectively in analyzing archeological data. Much of the statistical work is done by computer. Statistical principles are dealt with in the weekly class, computer applications in the weekly lab. No previous computer experience is required, and no previous math beyond high school algebra is needed. Familiarity with archeology, however, is assumed.

This course is open only to anthropology majors who are concentrating in archeology and have previously taken other courses in archeology.  
 No recitations - one two-hour class (meets with ANTH 2534) and one two-hour lab each week.

Undergraduate seminar. Human history is a history of mobility. From our earliest hominid ancestors through the present, human groups have moved at scales ranging from patterned local mobility to permanent long-distance migrations. In this course, we will consider the history of human movement at all scales. At the local scale, we will discuss hunter-gatherers, nomads, and pastoralists. We will investigate their mobility patterns, their ethnographic counterparts, and how we detect these groups in the archaeological record. At the global scale, we will address long-distance migrations. What evidence can we find for major movements of people? Can that evidence be distinguished from evidence for trade and exchange? Finally, at all scales, we will investigate the social, cultural, and political implications of mobility. Must mobile groups have a particular sociopolitical structure? Can large-scale migration explain culture change? How does the history of mobility and migration tie into issues surrounding contemporary migrations?

Undergraduate Seminar. From the traditional head-hunting raids of indigenous Southeast Asia to the military campaigns of states, warfare has played a double-edged role: it destroys individuals and families, but it is also central to society, defining gender roles and group identities, justifying political hierarchy, and supplying a potent source of violent images and narratives to be interwoven with culture. This undergraduate writing-intensive seminar examines selected current issues in the archaeology of war. Topics include the causes of war at multiple scales of analysis; the origins of war in human prehistory; cross-cultural variation in the practice of war; relationships between warfare and political power; and the effects of war on the individual and society.

ANTH 1600 1200 24348 HUMAN EVOLUTION AND VARIATION Lecture 3

**Bldg:** Wesley W Posvar Hal**Room:** 01102 **Days:** TuTh **Time:** 13:00 - 14:15 RACE NOT RACISM **Instructor:**  
**Class Enrl Cap:** 16 **Class Enrl Tot:** 0 **Class Wait Cap:** 10 **Class Wait Tot:** 0 **Class Min Enrl:** 0

Undergraduate seminar: This course examines key issues related to human biological variation with a focus on adaptation and adaptability, as well as genetic and phenotypic variation among human populations. Using a biosocial approach and drawing on diverse disciplines, such as evolutionary biology, genetics and epidemiology, we will identify factors that contribute to human biological diversity, adaptation and adaptability in the past, present and future. We will investigate how has this variability influences social inequalities and biomedical research.  
Prerequisites: Intro to Biological Anthropology or Biology

ANTH 1603 1010 30404 HUMAN ORIGINS Lecture 3

**Bldg:** Wesley W Posvar Hal**Room:** 01102 **Days:** TuTh **Time:** 09:30 - 10:45 **Instructor:**  
**Class Enrl Cap:** 16 **Class Enrl Tot:** 0 **Class Wait Cap:** 10 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Attributes:** SCI Polymathic Contexts: Science NonSeq.GE. Req., African Studies

Undergraduate lecture: The evolution of our own group and our closest relatives--fossil and living apes--is a fascinating as well as perplexing subject of study, connected by a diverse range of disciplines, such as archaeology, biology, cultural anthropology, genetics and geology to understand our past. The bulk of the course will consist of a survey of the fossil evidence for the evolution of apes and ourselves. Where were the fossils found? What is the evidence for material culture and modern behavior? How were these finds interpreted in the past and how might we view matters today? How might we--as the ones who also devise evolutionary schemes--look at ourselves from an evolutionary perspective? Lectures will be supplemented with hands-on opportunities to examine casts of fossils and modern-day primates. This course provides students with a basic introduction to the facts, skills and concepts needed to understand human evolution.

ANTH 1619 1010 30405 SPECIAL TOPICS IN PHYSCL ANTH Lecture 3

**Bldg:** Wesley W Posvar Hal**Room:** 01102 **Days:** TuTh **Time:** 14:30 - 15:45 REPRODUCTIVE BIOLOGY & ECOLOGY **Instructor:** Alvarado,Louis Calistro  
**Class Enrl Cap:** 16 **Class Enrl Tot:** 0 **Class Wait Cap:** 10 **Class Wait Tot:** 0 **Class Min Enrl:** 0

Undergraduate Seminar. This course examines important developments in the field of human biology, organized around the theme of reproduction. Emphasis will be placed on identifying and explaining behavioral, physiological, and environmental factors regulating fertility. The basic biology and physiology of reproductive function will be reviewed, with special attention to the cross-cultural and comparative record to contextualize the observed range of human variability. Reproductive characteristics that contribute to variation in fertility will be considered in detail. Course topics will include ovarian cycling, pregnancy and fetal loss, lactation and interbirth interval, attraction and mate choice, parental investment, and evolutionary endocrinology. These topics will be approached from a biosocial perspective with a primary focus on human adaptation and phenotypic plasticity.  
Prerequisites: ANTH 0680 or ANTH 0620  
This course will be offered once per year.

ANTH 1721 1010 30407 CYBER CULTURES Seminar 3

**Bldg:** Wesley W Posvar Hal**Room:** 03300 **Days:** Th **Time:** 14:30 - 17:00 **Instructor:** Lukacs,Gabriella  
**Class Enrl Cap:** 20 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Attributes:** DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.  
**Room Characteristics:** PeopleSoft - Scheduled (PS)(1)

Undergraduate Seminar. This course aims to help students better evaluate the role and place of digital media in contemporary societies and their own lives. Drawing on scholarly essays, journalistic articles, documentaries, and TED lectures, we will discuss the following topics: remix culture, creative commons, copyleft, cyber-surveillance, hacking, the Anonymous movement, data mining, micro-work, crowdsourcing, crowdfleeing, blogging, and social networking. Throughout the course, we will ask how digital media might foster or foreclose possibilities for creative expression, political mobilization, new forms of employment, and projects of self-branding.  
More specifically, we will inquire whether the architecture of the Internet is designed in ways that are conducive to cultivating freedom, creativity, and democracy. We will discuss various forms of hacking as key terrains where battles over the regulation of the Internet and struggles over intellectual

property rights are waged. By reading about entrepreneurial individuals who strive to develop DIY careers in the digital economy and by considering how the Internet operates as an apparatus that captures free labor, we will explore how digital technologies transform the world of work. We will learn about data mining; a corporate practice that extracts value by transforming into data-commodities the traces we leave behind in cyberspace. To understand the ways in

ANTH	1734	1010	27731	GENDER IN EAST ASIA	Lecture	3
------	------	------	-------	---------------------	---------	---

**Bldg:** Wesley W Posvar Hal **Room:** 03301 **Days:** TuTh **Time:** 11:00 - 12:15 **Instructor:** Constable, Nicole

**Class Enrl Cap:** 20 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0

**Attributes:** DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Diversity General Ed. Requirement, DSAS Social Science General Ed. Requirement, Gender, Women's Studies, SCI Diversity General Ed. Requirements, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. Asian Studies

**Room Characteristics:** PeopleSoft - Scheduled (PS)(1)

Undergraduate Seminar. This undergraduate seminar focuses on gender in East Asian society, particularly in China/Taiwan, Japan, and Korea. The course is comparative, but themes covered will vary according to the availability of English language materials, students interests, and key issues in each country or region. Topics likely to be covered (and examined from the perspective of gender and sexuality) include: migration; work; kinship;(folk) religion; class and violence; and the practice and (re)appropriation of cultural schema. Reading materials will be drawn from social sciences and humanities (including literature works and film), with most readings from social/cultural anthropology.

In this writing-intensive seminar, we will explore various approaches to the study of ritual and religion in the archaeological record. We will read classic anthropological works, more recent theoretical perspectives, and archaeological case studies from around the globe.

---

ANTH	1760	1010	30409	ANTHROPOLOGY OF LAW	Lecture	3
------	------	------	-------	---------------------	---------	---

**Bldg:** Wesley W Posvar Hal **Room:** 03301 **Days:** MW **Time:** 15:00 - 16:15 **Instructor:** Cabot, Heath

**Class Enrl Cap:** 20 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0

**Attributes:** SCI Polymathic Contexts: Soc/Behav. GE. Req.

**Room Characteristics:** PeopleSoft - Scheduled (PS)(1)

In this course we will approach law not as a fixed system of rules, but as a living set of relationships between people, practices, ideas, and institutions. We will examine how people use, interpret, and make law in everyday life, and how law is connected to language and expression, personhood and identity, and violence and justice. The course will also engage with urgent contemporary issues that challenge us as both students and citizens. These may include

migration, citizenship, and refugees; retributive justice; legal violence; law, race, and gender; and prisons and incarceration.

ANTH	1761	1050	23744	PATNTS & HEALERS: MEDCL ANTH	Lecture	3
------	------	------	-------	------------------------------	---------	---

**Bldg:** Cathedral of Learning  
**Room:** 00G24  
**Days:** MW  
**Time:** 16:30 - 17:45  
**Instructor:** Alter, Joseph

**Class Enrl Cap:** 150  
**Class Enrl Tot:** 0  
**Class Wait Cap:** 20  
**Class Wait Tot:** 0  
**Class Min Enrl:** 0

**Attributes:** African Studies, Asian Studies, Global Studies, Undergraduate Global Health  
**Room Characteristics:** Data Port(1), Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course provides an introduction to the broad sub-field of medical anthropology, including the study of ethnomedicine, ethnopsychiatry, disease and ecology, epidemiology, demography and population growth, development, and the political economy of health care. Our focus will be on the relationship between health and culture in various social contexts, with primary attention given to questions of power and inequality on the one hand, and personhood and emotion on the other. In exploring one or two case studies of ritual healing, we will look at the ways in which medical systems are integrated with larger systems of cultural meaning. We will also look at various medical systems in a cross-cultural comparative framework. Following on a consideration of so-called traditional medicine in the non-Western world, we will question the 'objectivity' of Western biomedical science and its various discourses. Extending this critique we will analyze the important relationship between poverty, and the political economy of public health in international development.

**Attributes:** DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req., Global Studies  
**Room Characteristics:** PeopleSoft - Scheduled (PS)(1)

Undergraduate Seminar. This course focuses on a number of vital and significant historical and contemporary issues that can be illustrated by incorporating a human ecology focus into a cultural anthropology perspective. Ecology is concerned with the place of human habitats in the wider life-world and how humans create and adapt to the landscapes they live in. Today, as in the past, these landscapes and the biosphere in which they belong, are threatened by environmental disasters, climate change, and ideologies of development that strain the overall capacities of the world to sustain an adaptive coexistence. The globalization of development processes and the emergence of transnational mining and forest logging companies further complicates this situation. The course incorporates the new subfield of disaster anthropology. It also includes a focus on the anthropology of the body and the intersection of cultural and biological factors that constitutes human lifeways. Ethnographic cases from around the world are drawn on with especial reference to Europe and the Asia-Pacific region. A further theme has to do with the effects of conflict and the displacement of people, causing a global problem of migrants, refugees, and asylum

**Room Characteristics:** PeopleSoft - Scheduled (PS)(1)

Asian Medical Systems are cultural constructs heavily influenced by colonialism, nationalism, philosophy and religion. It is common to speak of Traditional Chinese Medicine, Malay Humoral Medicine, Shamanism, Japanese Kanpo, and Tibetan Buddhist Medicine as though these are timeless, authentic, self-contained traditions. Similarly, Ayurveda and Yoga are narrowly defined in terms of very modern conceptualization of ancient Hindu civilization, especially within the rubric of Indian state policy on plural medical practice. Unani medicine, which has classical Greek and West Asian roots, is defined with reference to

contemporary Islam and the geopolitics of Islam in Asia today. Beyond these forms of cultural essentialization, medicine produces a fragmented perspective on the relationship among the body, environment and cosmology with regard to health and fitness in the context of Asian experience. Drawing on a range of contemporary theoretical insights in anthropology and history this course examines the way in which forms of medical knowledge and embodied practice in Asia are shaped by the cultural dynamics of pre-colonial, colonial and post-colonial globalization.

An honors course offered to undergraduate anthropology majors and minors for more extensive study in the student's area of specialization in anthropology. Should be taken only after student has exhausted all courses offered in the Anthropology Department dealing with the extensive study subject. Then a student consults with a faculty member (in the Anthropology Department) who specializes in the study subject. When the student obtains this faculty member's permission to take a "readings" course under his/her direction, the student may register for the course. Interested students should consult the Anthropology Departmental office for specific registration procedures.  
Prerequisites: Determined by instructor.

**Mortuary Archaeology: Approaches to Death & Burial**  
 Mortuary data often play a significant role in the study of past social organization, the diversity of cultural responses to death, and the complex processes associated with ritual practice. Numerous approaches have been used in the investigation and interpretation of funerary remains, as archaeological analyses of death and burial have developed in new directions over the past 50 years. This seminar will critically examine different perspectives in the archaeology of death and burial practices. Students will achieve an understanding of the trajectory of theory in mortuary archaeology, and a global perspective on the significance of funerary studies within the broader field of anthropological archaeology

ANTH	2534	1010	30398	ARCHEOLOGICAL DATA ANALYSIS 1	Lecture	4	
<b>Bldg:</b> Lawrence Hall		<b>Room:</b> 00105		<b>Days:</b> M		<b>Time:</b> 11:00 - 12:55	
<b>Class Enrl Cap:</b> 15		<b>Class Enrl Tot:</b> 0		<b>Class Wait Cap:</b> 0		<b>Class Wait Tot:</b> 0	
<b>Room Characteristics:</b> Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)						<b>Class Min Enrl:</b> 0	
<b>Combined Section ID:</b> 0021(ANTH/1534/2534) - ANTH 1534(#30397)							

An introduction to quantitative data analysis in archeology, this course covers basic principles of statistics, including exploratory analysis of batches, sampling, significance, t-tests, analysis of variance, regression, chi-square, and estimating universe means and proportions from samples. The approach is practical, concentrating on understanding these principles so as to put them to work effectively in analyzing archeological data. Much of the statistical work is done by computer. Statistical principles are dealt with in the weekly class, computer applications in the weekly lab. No previous computer experience is required, and no previous math beyond high school algebra is needed. Familiarity with archeology, however, is assumed. One two-hour class (meets with ANTH 1534) and one two-hour lab each week.

ANTH	2534	1011	30417	ARCHEOLOGICAL DATA ANALYSIS 1	Laboratory	4

<b>Bldg:</b> Wesley W Posvar Hal		<b>Room:</b> 01102		<b>Days:</b> F		<b>Time:</b> 12:00 - 13:55	
<b>Class Enrl Cap:</b> 15		<b>Class Enrl Tot:</b> 0		<b>Class Wait Cap:</b> 0		<b>Class Wait Tot:</b> 0	
<b>Room Characteristics:</b> PeopleSoft - Scheduled (PS)(1)						<b>Class Min Enrl:</b> 0	
<b>Instructor:</b> Arkush,Elizabeth N							

A research seminar in comparative archaeology led by a regular faculty member in Anthropology and the Visiting Scholar in the Center for Comparative Archaeology. The topic changes from year to year depending on the expertise and research interests of the Visiting Scholar. Meets about five times during the Fall Term, and is concluded during the Spring Term in ANTH 2536: Special Topics in Comparative Archaeology II. In order to receive credit students must complete both parts of the seminar (I and II).

ANTH	2587	1010	30423	ARCHAEOLOGY CORE COURSE	Lecture	3	
<b>Bldg:</b> Cathedral of Learni		<b>Room:</b> 00237		<b>Days:</b> TuTh		<b>Time:</b> 16:00 - 17:15	
<b>Class Enrl Cap:</b> 15		<b>Class Enrl Tot:</b> 0		<b>Class Wait Cap:</b> 0		<b>Class Wait Tot:</b> 0	
<b>Room Characteristics:</b> Board - Chalk >= 100 Sq Ft(1), Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)						<b>Class Min Enrl:</b> 0	
<b>Instructor:</b> Bermann,Marc P							

The aim of this course is to introduce students to 1) the nature of archeological information, 2) the full range of the human cultural past, from Paleolithic beginnings to state-level societies, 3) the various theoretical propositions archeologists have found useful in understanding cultural change on this scale, and 4) the ways archeologists evaluate these propositions against the information available in the archeological record. The course compares a broad range of societies using selected, world-wide examples to illustrate aspects of societal evolution. Particular attention will be paid to the major transitions in human history, such as the change from hunting-gathering to sedentary agricultural life ways and the rise of complex societies. The course is open only to graduate students. It may be required of all first year Ph.D. students in anthropology and first year M.A. students in archaeology (unless they opt to fulfill the requirement by petition).

ANTH 2630 1010 10776 PHYSICAL ANTHROPOLOGY RESEARCH Directed Studies 3  
**Bldg:** TO BE ARRANGED **Room:** TBA **Days:** TBA **Time:** 00:00 - 00:00 **Instructor:** Judd, Margaret Ann  
 Alvarado, Louis Calistro

**Class Enrl Cap:** 25 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0

The student conducts independent research developed in consultation with, and carried out under the supervision of, a faculty member in physical anthropology. Special permission of the instructor is required to register for this course.  
 2. Prerequisites: Graduate status.

ANTH 2755 1010 30418 THE ART OF PUBLICATION Seminar 3  
**Bldg:** Cathedral of Learning **Room:** 00335 **Days:** Tu **Time:** 14:00 - 17:00 **Instructor:** Constable, Nicole

ANTH 2788 1010 30419 CULTURAL ANTHROPOLOGY CORE Lecture 3  
**Bldg:** Wesley W Posvar Hall **Room:** 03301 **Days:** W **Time:** 09:00 - 11:00 **Instructor:** Matza, Tomas A  
**Class Enrl Cap:** 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Room Characteristics:** PeopleSoft - Scheduled (PS)(1)

This course is an introduction to varied facets of the discipline of cultural anthropology, stressing the development of the literature as learned discourse. Emphasis will be placed on major theoretical models and concepts that have been central to the development of the discipline, and on the ways that theoretical paradigms have developed and declined. The course is intensely interactive, with participation in discussion expected from all students. Since the core course functions as a departmental qualifying exam, grading is on the basis of a blindly-graded exam at the end of the term. This course is intended for first-year graduate students in the Department of Anthropology.  
 Required of all Ph.D. students in Anthropology and M.A. students specializing in socio-cultural anthropology. Other students will be admitted by permission of the instructor.

ANTH 2902 1010 10146 DIRECTED STUDY FOR MA STUDENTS Directed Studies 1 - 9  
**Bldg:** TO BE ARRANGED **Room:** TBA **Days:** TBA **Time:** 00:00 - 00:00 **Instructor:** Allen, Kathleen M  
**Class Enrl Cap:** 25 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0

This course involves directly supervised research related activities such as fieldwork or artifact analysis. Reading is not a major component of the work for this course.  
 Prerequisite: Determined by instructor.

ANTH 2902 1020 17118 DIRECTED STUDY FOR MA STUDENTS Directed Studies 1 - 9

The innovations and advances of the Greeks provided the intellectual foundation for western civilization. This undergraduate course surveys the major achievements of the ancient Greek world from its earliest beginnings in the Bronze Age (ca. 3000 BCE) to the age of Alexander and his Hellenistic successors (ca. 100 BCE). In particular, emphasis will be placed on Greek literature, politics, historical writing, religion, philosophy, medicine, architecture, and visual arts. The course will conclude with a discussion of the ways in which ancient Greek culture has remained relevant to Western civilization from antiquity until the modern day.

The subject of this course is the traditional stories, the myths, legends, and folktales of the ancient Greeks and Romans. Such stories represent the collective experience, attitudes, and aspirations of the Greeks and Italian people who created them and kept them alive over many centuries without the benefit of literacy. It is this survivability which points to the meaning and ultimate value of the stories. They survived because they possessed some compelling attraction, whether entertainment value, explanatory power, or social function, which encouraged their transmission from generation to generation. Part of the purpose of the course will be to discover what that "compelling attraction" was.

The subject of this course is the traditional stories, the myths, legends, and folktales of the ancient Greeks and Romans. Such stories represent the collective experience, attitudes, and aspirations of the Greek and Roman people who created them and kept them alive over many centuries. It is this survivability which, as we shall see, points to the meaning and ultimate value of the stories. They survived because they possessed some compelling attraction, whether entertainment value, explanatory power, or social function, which encouraged their transmission from generation to generation. Part of the purpose of the course will be to discover what that compelling attraction was. From this base, lectures and readings will explore a number of related subjects, with constant attention to the role of traditional stories in the society and culture of ancient Greece and Rome. The gods and goddesses will lead us to the study of ancient religion in terms of belief, cultic practice, and the distinctively social and public forms characteristic of ancient worship. The realization that the gods and goddesses formed a sort of divine society will encourage us to explore the relation of this society to the human society that created it. Educational films featuring the commentaries of leading classical scholars will play an important role throughout the course. By this means, students will

<p>The death of a loved one is an emotional and powerful occurrence that provokes a variety of human responses. In addition to writings describing their funerary practices, the civilizations of the ancient Mediterranean region have left artistic representations of death and dying, built tombs, and objects associated with funerary rituals. The study of these texts, images, structures, and objects allows us to better understand ancient attitudes and reactions to death.</p> <p>This undergraduate lecture focuses on the visual and material evidence of funerary practices and beliefs in ancient Egyptian, Greek, and Roman societies. The subject will be approached thematically. First, we will explore how archaeologists discover death-related artifacts and how scholars approach the study and reconstruction of ancient death rituals. Ancient practices and beliefs regarding mummification, the funeral, commemorative strategies, visits to the grave, and the afterlife will be explored, and images found on specific media (vases, sculpture, built tombs, paintings) will be discussed in depth. The course will conclude with discussions of the roles that sensational topics, like fear of the undead (zombies, vampires, and ghosts) and spectacles of death</p>

The course surveys the history of ancient Greece from the Bronze Age (the era of the Trojan War) to the Roman conquest of Greece. Within this framework, we shall focus our attention on the "Golden Age" of Athens. How does an historian view, and attempt to explain, such an Age? Did victory over a national enemy in the Persian Wars have an uplifting impact on the Athenian people? Did the empire headed by Athens, which grew out of a formerly free alliance, provide the necessary material conditions for "greatness"? What was the role played by domestic society? We shall examine the nature and impact of radical democracy; the Athenian citizen household; the status of women; childhood and old age; the practice of slavery; occupations (represented by farming, industry, and the military); and the economy in both its domestic and larger aspects. Ancient historians, especially Herodotus and Thucydides, will contribute their estimations of Athens' achievement and more general analyses of human behavior. Throughout, our goal will be to understand the "Golden Age" in terms of the constitutional, political, and societal arrangements of Athens itself. If ancient Athens was "great" in any sense, it is the purpose of this course to explain in historical terms why and how this one city achieved such "greatness."

How did a Galilean itinerant preacher become the leader of a world religion? What do we really know about the historical Jesus? This course is designed to (1) introduce the student to the figure of Jesus of Nazareth in his contemporary religious, social, and cultural setting (Second Temple Judaism in Roman Judea), and (2) to explore the origins and growth of the movement that came to form around his memory and message in the first century. We will examine each gospel in detail, paying particularly attention to changes in the material over time, explore the world of Paul and his innovative concepts that are foundational for the emergence of Christianity in the Roman Empire, and conclude with one Christian's apocalyptic hope at the turn of the first century.

Centrally located within the Mediterranean, Italy was rich in natural resources, under the firm control of civic elites who managed contacts with other cultural groups. Roman art, therefore, was an art of advertisement and consumption; one that served to identify the wealthiest and most influential members of the community and to further their interests. The course will follow the development of Rome from an aggressively expansive, aristocratic city-state to a socially innovative political conglomerate with control over the Mediterranean world. This development fostered 1) unprecedented economic stability and prosperity across a wide region, allowing objects and styles that were once limited to the elite to filter down to a broader range of consumers, and 2) the need for an art that communicated the achievements and goals of the imperial government to different regions and cultures.

Sanskrit is the classical language of India. This course can serve as either a one-term introduction to Sanskrit, or (preferably) as a foundation for further work in the language. We will begin with the devanagari writing system and Sanskrit pronunciation. This will be followed by a survey of the essentials of Sanskrit grammar, including noun, pronoun, and verb paradigms, rules of combining sounds when words are joined to one another (sandhi), word order, and use of particles. There will not be so much focus on developing an extensive vocabulary in the first term of study; however, the course will be directed toward eventually reading material from Sanskrit texts such as the Mahabharata and Hitopadesa in second-year Sanskrit. A comprehensive beginning text such as Egenes, Introduction to Sanskrit, Part 1 will be covered in the Fall term.

Discussions of moral philosophy in both antiquity and modernity typically direct their attention to reasoned conceptions of goodness, such as virtues, values, and moral duties. Whether intentionally or inadvertently, a systematic study of the corresponding, and oftentimes more richly articulated and concretely imagined, conceptions of evil are neglected. And yet it seems that one cannot very well have a clear conception of one without having a clear conception of the other.

What is more, it seems to be a most pressing and important matter to understand how precisely evil can come about. Does evil originate exclusively through human agency, or does one have to suppose physical or perhaps even metaphysical origins of moral evil? And what difference does it make to construe the origin of evil in different ways? Is evil merely the privation of goodness? What did Kant mean by `radical evil¿, and why did Hannah Arendt coin the phrase `banality of evil¿?

<b>Room Characteristics:</b> Board - Chalk >= 100 Sq Ft(1), PeopleSoft - Scheduled (PS)(1)							

This course aims to extend and deepen the students' knowledge of Attic Greek through a close and careful reading of Book 1 of Xenophon's Anabasis. Students will be expected to prepare assigned passages for in-class translation at each meeting, and written translations will be collected and reviewed by the instructor on a regular basis. There are also likely to be occasional homework assignments pertaining to grammar review.  
 THIS COURSE IS OFFERED ONCE A YEAR.

An introduction to the sounds, vocabulary and basic grammatical structures of the Latin language. Students will begin to develop a competence in reading the language through textbook drills as well as Latin stories illustrating the Roman way of life. Please note that this course will be a hybrid of three 50-minute scheduled in-class meetings and a fourth 50-minute session to be completed by students working independently, either online at home, or through taking exams at the University Testing Center. Classroom time will generally center around instructor introduction of new material and some rudimentary work with said new material. In the online session, students will then complete more advanced exercises related to introduced material; take quizzes/exams; or complete group assignments. All online work will take place on Pitt supported applications (notably CourseWeb), or free platforms (e.g., Quizlet; TopHat; Centaur Education Software) or websites.

This course is an introduction to reading Latin prose. It is intended for students who have successfully completed one year of college Latin or its equivalent. The aim of this course is for students to build their Latin vocabulary and increase their knowledge of the structures of the Latin language. Readings will vary from semester to semester, hinging upon the particular interests and expertise of the instructor and, to a degree, students' interests.

<p>This course introduces students to a variety of critical approaches to media analysis. Students will learn how to examine the ways in which meanings are created in the content, structure, and context of mediated communication. The main focus of the class is on media representations of `Others; and the role of media in enabling cultural diversity. Specific sessions will highlight media portrayals of ethnicity, race, gender, class and representations of people across borders. The course places current forms of media content in social and historical perspective and considers how we can respond with constructive criticism.</p>

<p>This course introduces students to media studies as an academic discipline and explains the field's theoretical foundations. We will examine a diverse range of paradigms and theories, focusing on fundamental concepts as much as on influential current approaches. Throughout the semester, we will evaluate the usefulness of various theories and discuss their effectiveness in explaining our media-saturated lives. At the end of this course, students will have a deeper understanding of media and their impact on contemporary society.</p>

<p>This course investigates the role of media in creating a productive public sphere in an increasingly globalizing world. Using key concepts in communication, cultural, and globalization studies, the course covers topics such as the shortcomings of international journalism in covering war and terrorism; the potential of popular culture to change problematic representations of others; and the possibilities of digital communication for international development. The class will enable students to assess the potential of journalism, media and digital technology to foster international understanding and cooperation. The class also fulfills the requirements for the Global Studies Certificate's concentrations ¿Cultural Dynamics¿ and ¿Politics/Economy.¿</p>

Subject	Catalog Nbr	Section	Class Nbr	Course Title	Component	Units	Topics
CHIN	0001	1040	15402	FIRST YEAR CHINESE 1	Lecture	5	

**Bldg:** Lawrence Hall      **Room:** 00107      **Days:** TuTh      **Time:** 12:00 - 12:50      **Instructor:** Xu,Yi

**Class Enrl Cap:** 36      **Class Enrl Tot:** 0      **Class Wait Cap:** 20      **Class Wait Tot:** 0      **Class Min Enrl:** 0

**Attributes:** Asian Studies

**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This introductory Chinese course aims at achieving both linguistic accuracy and discourse (conversational) competence in the Chinese language. You will be trained in all the four-language skills: listening, speaking, reading and writing. We stress vocabulary building, sentence patterns, and skills that will enable you to talk about simple topics of daily life and to read, and write short passages. You will also be introduced to elements of the Chinese culture as it pertains to the language that native-speakers use in communicative settings.

**Room Characteristics:** Media - Data Projector/Monitor(1), Seating - Moveable(1)

This introductory Chinese course aims at achieving both linguistic accuracy and discourse (conversational) competence in the Chinese language. You will be trained in all the four-language skills: listening, speaking, reading and writing. We stress vocabulary building, sentence patterns, and skills that will enable you to talk about simple topics of daily life and to read, and write short passages. You will also be introduced to elements of the Chinese culture as it pertains to the language that native-speakers use in communicative settings.

CHIN 0003 is the continuation of the first-year Chinese. The course continues to develop and advance the students' communicative competence in all four aspects of language skills: listening, speaking, reading, and writing. Students will be able to talk about topics such as school life, restaurant, shopping, relationship and the Internet, etc. using more sophisticated vocabulary and complex sentence patterns. Students will do role-plays and perform tasks which simulate real life situations. Authentic materials may be used to enrich students' cultural knowledge and experience.

**Attributes:** DSAS Second Language General Ed. Requirement  
**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

Prerequisite: Contact department for placement before registration

CHIN0005 is a course specifically designed for heritage learners and those whose oral and aural abilities exceed their reading and writing skills. Students with an upbringing or long-term exposure to oral Chinese language use can take this course to develop their literacy skills and to gain a deeper understanding of the Chinese culture. The course also aims to help students further develop their oral and socio-cultural communication skills so that they can conduct communication in all three modes (interpersonal, interpretive, and presentational) at a higher proficiency level. Students will be immersed in Chinese language and culture through integration of cultural content knowledge and language learning.

Prerequisite(s): CHIN1021 (min grade C-)

This course is designed to help students consolidate their Chinese linguistic competence, and develop their knowledge of vocabulary, grammar structures, idiosyncratic language usage, and composition of Chinese characters. Students will be trained in all four aspects of language skills, listening, speaking, reading and writing. Through various forms of language practices, students are expected to read and listen skillfully, and to develop their oral and written abilities at discourse and rhetorical level. Another objective of this course is to develop students' cultural literacy by readings about contemporary China. Students will gain deeper understanding of modern Chinese society through self research and class discussion. The class is conducted exclusively in Chinese.

<b>Combined Section ID:</b> 0860(CHIN/1084/2084) - CHIN 2084(#26788)							

Modern Chinese literature has been instrumental in fostering revolutionary and enlightenment objectives and reflecting and shaping social reality. Therefore it has always been taken as an essential window through which to understand Chinese political and social history. However, despite the close link between literature and politics, literature always reveals its ever-lasting aesthetic value that transcends the specific historical and political contexts. To appreciate both literature and its relationship with modern Chinese history, this course focuses on the canonical works in 20th century China. We will read influential fiction by modern and contemporary writers such as Lu Xun, Lao She, and Eileen Chang. Nobel laureates Gao Xingjian and Mo Yan's novels will also be dealt with. In addition, Taiwan writer Wang Wenxing's novel Family Catastrophe will shed some light on contemporary society and the literary field in Taiwan.

This course focuses on how film lends itself to capturing visually distinct features of cultural ethos, social customs and personal psychology encompassing the greater China region (mainland, Hong Kong, and Taiwan) in the global era. The aim of this course is to introduce different ways of reading Chinese cinema in relation to issues of modernity, nationalism, gender, cultural identities and beyond. Well-known Chinese directors such as Chen Kaige, Zhang Yimou, Hou Hsiao-hsien, Ang Lee, Edward Yang, and Wong Kar-wai will be studied through the 1980s and 1990s "New Wave Cinemas." We will also study the distinct techniques and styles of the rising "Sixth Generation" directors (such as Jiang Wen, Wang Xiaoshuai) to see how key values of traditional Chinese culture and society have been contested and reinvented under the global conditions. Different genres, including romance, action, and martial arts movies will be explored.

The course will be composed of three segments--one deals with Confucianism, one with Daoism, and the final segment with Buddhism. In the first segment on Confucianism, basic texts, including the Analects and Mencius, will be studied with relevant commentaries. Particular attention to their wide-ranging and profound implications for Chinese culture, especially in the ethical and socio-political dimensions. In the second segment on Daoism, basic texts on Daoism, including the Laozi and Zhuangzi, will be studied with some of the most influential commentaries. Their indelible impact on Chinese aesthetics and mode of thinking will be emphasized. The final segment on Buddhism will concentrate on representative sutras of the tradition (e.g. the Diamond Sutra) as well as important texts from the Chan (Zen) masters, along with the key commentaries. Although a foreign import from India, Buddhism was so thoroughly sinicized that it has become part of Chinese culture. Furthermore, the common threads that link these main three thought systems as well as the interaction among them will also be studied in order to demonstrate how together they have contributed to the evolution of Chinese culture.

Modern Chinese literature has been instrumental in fostering revolutionary and enlightenment objectives and reflecting and shaping social reality. Therefore it has always been taken as an essential window through which to understand Chinese political and social history. However, despite the close link between literature and politics, literature always reveals its ever-lasting aesthetic value that transcends the specific historical and political contexts. To appreciate both literature and its relationship with modern Chinese history, this course focuses on the canonical works in 20th century China. We will read influential fiction by modern and contemporary writers such as Lu Xun, Lao She, and Eileen Chang. Nobel laureates Gao Xingjian and Mo Yan's novels will also be dealt with. In addition, Taiwan writer Wang Wenxing's novel Family Catastrophe will shed some light on contemporary society and the literary field in Taiwan.

<b>Combined Section ID:</b> 1003(CHIN/1088/2088) - CHIN 1088(#26355), FMST 1220(#28500)								

This course focuses on how film lends itself to capturing visually distinct features of cultural ethos, social customs and personal psychology encompassing the greater China region (mainland, Hong Kong, and Taiwan) in the global era. The aim of this course is to introduce different ways of reading Chinese

cinema in relation to issues of modernity, nationalism, gender, cultural identities and beyond. Well-known Chinese directors such as Chen Kaige, Zhang Yimou, Hou Hsiao-hsien, Ang Lee, Edward Yang, and Wong Kar-wai will be studied through the 1980s and 1990s "New Wave Cinemas." We will also study the distinct techniques and styles of the rising "Sixth Generation" directors (such as Jiang Wen, Wang Xiaoshuai) to see how key values of traditional Chinese culture and society have been contested and reinvented under the global conditions. Different genres, including romance, action, and martial arts movies will be explored.

The main purpose of this course is to introduce graduate students to current and emerging topics of interest in the field of Asian Studies and to identify and evaluate strategies for reflecting on Asia in a global context. Students will learn to parse research on Asia, to select and evaluate secondary literature, and to develop skills necessary for critically informed writing about Asia in the 21st century. Students from different programs are welcome to join us in considering how their fields connect to Asian Studies.

Students can expect to gain an understanding of advanced research methods, including the use of online databases and archives, bibliographic management software, and digital tools to conduct research.

Students will participate actively and lead class discussions, demonstrate through short assignments and critical reviews the ability to synthesize and assess the arguments of scholarly articles and monographs, and demonstrate in a longer essay the ability to research, synthesize, and evaluate a topic

This course introduces students to fundamental characteristics of the culture and civilization of Japan from earliest times to the present. As a gateway to more specialized training, it is designed for students having little or no previous knowledge of Japan. Students can expect to leave with a basic grasp of

important historical periods, an appreciation of key figures and places of cultural significance, and an awareness of important social changes from earliest times to the present day. Students will improve their analytical skills as they read from outstanding examples of Japanese literature; they will synthesize relevant information about Japanese art, architecture, religion, literature, society, and history from lectures and background readings in order to present well-reasoned arguments about Japan; and they will develop a nuanced understanding of Japan's place in a global context. This course aims to a) improve cultural literacy about Japan and the Japanese, b) increase familiarity with principal historical periods, c) introduce basic geography ' location of principal Asian countries, Japanese islands, and Japanese cities, and d) identify important political, social, cultural, artistic, and literary themes for each of the principal periods covered.

This course focuses on a critical study of carefully selected films that represent the rich cinematic heritage of Japan. It is designed to show students how Japanese culture and society can be studied through the works of master filmmakers. Films shown and discussed span a wide range of genres, modes of representation, and historical settings. Each film is judged as a work of art in its own right, and within the larger context of developing Japanese cinema and cine-cultural history. Students are also offered experience in cross-cultural analysis, assessing the worth and content of films, which show the West

through Eastern eyes, and vise-versa.

First Year Korean 1 is the beginning course for those who have NO prior knowledge in Korean. The major goal of this course is to develop students' Korean to the extent that they could not only understand but to speak basic Korean including greetings, talking about school and work, time and days of the week, daily life and past and future activities. First Year Korean 1 is divided into two parts: Lecture and Recitation. LECTURE classes will include important information and explanations of those conversational patterns in grammatical and pragmatic terms. The course also provides sociolinguistic and social-cultural information, especially when language is intimately linked with culture through such channels as Korean TV shows, music, and a number of other cultural activities. RECITATION will provide the students an opportunity to practice strictly in Korean with various tasks and activities in most essential daily life situations. Students will often be asked to make a pair or a small group in which they interact with each other in Korean.

Second Year Korean 1 is the first half of an intermediate course on spoken and written Korean. It is catered for learners who are committed to further expand their language skills based on the contents covered in First Year Korean 1-2 which included vocabulary, grammar patterns, task/function and cultural

aspects of Korea. Second Year Korean 1 will strengthen students' foundation in Korean, enabling them to further acquire and develop language skills equally emphasized in listening, speaking, reading and writing. Second Year Korean 1 class is divided into two parts: Lecture classes will include important information and explanations of those conversational patterns in grammatical and pragmatic terms. The course also provides sociolinguistic and socio-cultural information, especially when language is intimately linked with culture through such channels as Korean dramas, music, and a number of other cultural activities. Recitation classes will provide the students opportunity to practice STRICTLY IN KOREAN with various tasks and activities in most essential daily life situation. Students will often be asked to make a pair or a small group in which they can interact with each other verbally. After completion of this course, students are expected to: 1. Participate in simple conversations on generally predictable topics related to daily activities and personal environment, both spoken and written, on the following topics: telephone conversation, transportation, shopping, eating out, and hobbies. 2.

KOREAN 0003 1100 27788 SECOND YEAR KOREAN 1 Recitation 4  
**Bldg:** Wesley W Posvar Hall **Room:** 05010 **Days:** MWF **Time:** 12:00 - 12:50 **Instructor:** Oh,Jiyeon  
**Class Enrl Cap:** 12 **Class Enrl Tot:** 0 **Class Wait Cap:** 10 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Attributes:** Asian Studies  
**Room Characteristics:** PeopleSoft - Scheduled (PS)(1)

Second Year Korean 1 is the first half of an intermediate course on spoken and written Korean. It is catered for learners who are committed to further

expand their language skills based on the contents covered in First Year Korean 1-2 which included vocabulary, grammar patterns, task/function and cultural aspects of Korea. Second Year Korean 1 will strengthen students' foundation in Korean, enabling them to further acquire and develop language skills equally emphasized in listening, speaking, reading and writing. Second Year Korean 1 class is divided into two parts: Lecture classes will include important information and explanations of those conversational patterns in grammatical and pragmatic terms. The course also provides sociolinguistic and socio-cultural information, especially when language is intimately linked with culture through such channels as Korean dramas, music, and a number of other cultural activities. Recitation classes will provide the students opportunity to practice STRICTLY IN KOREAN with various tasks and activities in most essential daily life situation. Students will often be asked to make a pair or a small group in which they can interact with each other verbally. After completion of this course, students are expected to: 1. Participate in simple conversations on generally predictable topics related to daily activities and personal environment, both spoken and written, on the following topics: telephone conversation, transportation, shopping, eating out, and hobbies. 2.

**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course explores political, economic and cultural developments in modern Korea. The issues to discuss include colonial rule, the Korean War, the division system, military dictatorship, the democracy movement, gender politics, diaspora, multiculturalism, globalization, and hallyu (K-pop/K-drama). Designed to be interdisciplinary, this course probes texts selected from a variety of distinct fields such as history, literature, culture, cinema, and music. The students will also be guided to situate the major issues within larger contexts such as East Asia and the Pacific Rim. If you need anything else, please let me know.

KOREAN 0084 1010 25321 INTRO TO MODERN KOREAN LIT Lecture 3

This course concerns the evolution of modern Korean literature through works of acclaimed writers from the early twentieth century to the present. This course is arranged around unique themes and styles Korean writers have developed in response to the nation's turbulent modern history. The topics to explore includes colonial modernity, national consciousness, vernacularism, leftist writing, modernist sensibility, division literature, resistance literature, youth in crisis, women's literature, trauma narratives, postmodern angst, multiculturalism, and new media.

KOREAN 1050 1010 26354 FOURTH YEAR KOREAN Lecture 3

**Bldg:** Cathedral of Learning **Room:** 00G18 **Days:** MWF **Time:** 14:00 - 14:50 **Instructor:** Kim, Mi-Hyun

**Class Enrl Cap:** 12 **Class Enrl Tot:** 0 **Class Wait Cap:** 10 **Class Wait Tot:** 0 **Class Min Enrl:** 0

**Room Characteristics:** Media - Data Projector/Monitor(1), Seating - Moveable(1), PeopleSoft - Scheduled (PS)(1)

Fourth Year Korean 1 is the fall semester course of the Fourth Year Korean and is designed to advance students to greater strengths in reading and writing skills and socio-cultural knowledge of Korean beyond high intermediate level. Students will develop skills in reading and listening to various authentic materials, and enhance speaking and writing skills to discuss issues of contemporary Korean society and culture. The goals of the course also include furthering aural comprehension of contemporary television documentaries, news and drama with decreased reliance on pedagogical aids. This course is student centered class and students will develop their knowledge of Korean lexicon and grammar through integrating all four skills of the language use. Students will write two short papers throughout the semester. Class will be conducted in Korean exclusively, and uses a combination of lectures, exercises and discussions. All classes are based on assigned readings and discussion topics that will be distributed through schedules.

<p>This is a standard introductory course in microeconomics. It focuses on the way the market system works. The decisions of households, firms, and governments are coordinated through markets in which prices adjust to keep buying plans and selling plans consistent. The U.S. economy relies mainly on markets to coordinate these decisions, although sometimes governments intervene. We will explore various social issues using the principles developed throughout the course. Upon completion of the course students will have a better understanding of economic problems, efficiency, laws of demand and supply, consumer choice theory, market organization, production and cost.</p>

An introduction to the principles and problems of economics, with an emphasis on analyzing the systems of the full US economy. The course is divided into three major sections. In the first section we will develop tools for economic analysis and discusses topics relevant to both Micro and Macro such as supply and demand, elasticity, marginal costs, opportunity costs, price controls and taxation. In the second section we will focus on macroeconomic-specific concepts and principles, and define terms including GDP, inflation, growth, unemployment, interest rates, and the money supply. Finally, we apply the tools from the first section to the various concepts of the second, and we will use them to build a model of the entire economy that allows students to make predictions about the economic impact of monetary and fiscal policy.

As most decisions are made under conditions of uncertainty, the increasing availability of data has led to a greater role of statistics and econometrics in decision making. Introduction to Econometrics presents a framework for thinking about problems involving uncertainty, and develops tools for using data in tackling these problems. We will consider applications of these tools and framework to a variety of areas, including economics, finance, marketing, and so on. The goal of this course is to sharpen your quantitative and analytical skills, and to provide a foundation in probability, statistics, and econometrics for subsequent courses and for your career. Although technical expertise and computation are essential in order to understand issues in statistics and to be able to analyze information effectively, most of the focus will be on understanding statistical modeling concepts and being able to interpret econometrics analyses. Our objective will be to use data to help us make choices. In other words, we will focus on what the analysis can do for us and not on learning a few formulas into which one can plug numbers. In short, our emphasis is on applying the concepts rather than on their theoretical development.

Many important phenomena in economics and political science involve strategic interaction among small numbers of agents. Examples include competition between oil producing nations, bargaining over the price of a car, and forming voting coalitions in a legislature. Game theory is the mathematical tool that social scientists use to model these phenomena. This course will provide an introduction to the fundamental concepts of modern game theory and applications to the social sciences. Topics include formats for describing games, solution concepts including Nash equilibria, repeated games, and evolutionary game theory. Some mathematical concepts may be introduced, but no knowledge beyond algebra is assumed.

Much of the current discussion about the pros and cons of globalization seems based in a view of the global economy as fight between winning and losing nations. In this course, we will learn about the economic principles and policy options that shape relationships between countries and thus develop a perspective on the global economy that is more complex and informative than a simple win/loss game. The course is divided into three main sections: International Finance, International Trade, International Economic Issues. The first section provides a macroeconomic perspective on international transactions. The second section explores the microeconomic theory and implications of trade policy. The final section uses the macro and micro analytical

tools from the previous sections to assess several major topics facing the global economy, including trade agreements economic development, refugees, foreign direct investment, and global financial crises.

This course concerns low and middle income economies, with over 80% of the world's population, who live in Latin America, Africa, and Asia. Topics covered include: population growth, employment, agriculture, industry, health, education, income distribution, capital accumulation, migration, and government role in the economy, among others. The focus of the course is on how economic theories and analysis explain why some nations are poor while others are rich, and the role played by governments and institutions in shaping these economies.

This course is intended for economics majors. This course will present an overview of the literature in the field, research methods used in economics, and how the study of economics will prepare students for their post-baccalaureate plans. This course has 3 interrelated goals: a. students understand the range of career and advanced degree options for which their studies will make them eligible. b. students learn how to conduct research in economics. c. students maximize progress within the major by setting broader goals and taking advantage of the many opportunities offered at the University.

This course studies the development of the U.S. economy since Independence until World War II. We will examine professional research articles to learn about methods, data, and analytic skills to assess how historic events can answer important questions in economics. Students will learn how to find, analyze, and interpret historic data to address an economic issue in an independent and original research project. Topics covered include the Colonial economy and Independence, the westward expansion, slavery and the Civil War, the second industrial revolution, the Age of Mass Migration, WWI and the roaring twenties, the Great Depression and the new Deal, and WWII among others.

Microeconomics is the study of how small economic units, such as individual consumers and firms, engage in trade and set prices through their interaction in a world characterized by scarcity. We will examine models of consumer and firm behavior that allow for a rich analysis of the markets and the effects of government policy. This course will help students expand and refine their understanding of the theoretical tools utilized by microeconomists and provide an introduction to game theory and its applications. Students who complete this course will be prepared for more advanced economics courses including Game Theory, Public Finance, Industrial Organization, International Trade, and Labor Economics.

Why are some countries exceedingly rich while others are exceedingly poor? Why are there fluctuations in aggregate economic activity? What are the effects of fiscal policies on interest rates and GDP growth? What are the effects of monetary policy on inflation and unemployment? What are the origins and consequences of nancial crisis? Macroeconomics, as a eld, seeks to provide answers to these and related questions using analytical models and data. It deals with the economic behavior of large collections of consumers and rms, their interactions through labor, goods, and asset markets, and with the role of governments and institutions in such markets. The goal of this course is to provide students with an understanding of the basic macroeconomic concepts and tools. Specically, by the end of the course, students will: Have a good understanding of the main macroeconomic aggregates (GDP, investment, consumption, imports, exports, etc.) and of how they are

interrelated. Be able to think critically about the causes of economies long-run economic performance. Be able to analyze the determinants and implications of short-run fluctuations in the level of economic activity. Be able to visualize and analyze macroeconomic data. Have a good understanding of the challenges and current issues faced by policy-makers in the area of monetary and fiscal policy. Comment critically on global economic events and

This course introduces basic tools in applied econometrics that are commonly employed in government, business, and academic research. It should be useful for those intending to become quantitative business and economic analysts, as well as those interested in knowing how economics is applied to real-world problems: particularly useful for those interested in pursuing graduate work in economics, business and law. Students are expected to become familiar with Stata, a computer program that is often used in quantitative economic research. Topics covered are: a review of basic statistical inference theory, correlation analysis, classical linear regression models (simple and multiple), and associated inferential problems, and generalized linear regression models and associated inferential problems.

Many important phenomena in economics and political science involve strategic interaction among small numbers of agents. Examples include competition between oil producing nations, bargaining over the price of a car, and forming voting coalitions in a legislature. Game theory is the mathematical tool that social scientists use to model these phenomena. This course will provide an introduction to the fundamental concepts of modern game theory and applications to the social sciences. Topics include formats for describing games, solution concepts including Nash equilibria, repeated games, and evolutionary game theory. Knowledge of elementary calculus and statistics is required.

<p>The course is intended as an analysis of the investment valuation and financing of the corporation. Attention will be focused on the application of economic theory to the solution of financial problems. The interrelations between investment and financing policies and their dependence on security valuations will be stressed. The institutional background necessary to analyze these problems will be examined, and practical cases drawn from personal and business situations will be used along with more theoretical materials.</p>

<p>This course has two objectives: First, giving students hands-on experience responding to public policy issues by analyzing micro data (large scale datasets covering demographic, economic and social attributes of a population). Second, providing students a level of intuition regarding appropriate tools for each level of analysis, and be able to criticize results of inappropriately used tools. Students will briefly be introduced to survey design and implementation, and engage in data management (data cleaning, dealing with outliers, duplicates, missing variables, modifying, reshaping, collapsing, combining etc.).</p>

This course is an introduction to the economics of education. The purpose of this course is to introduce current issues in education through the lens of economics. We will review a wide range of educational policy issues, including the demand for and returns to schooling, the impact of school resources on student outcomes, education and growth, school choice, teacher labor markets, and the equity and efficiency of school funding. We will explore the extent to which the intentions, implementation and ultimate effects of the policies align. In addition to providing you with an understanding of recent research on educational policy issues, the course will also help you to critically evaluate educational policy research and learn how to communicate key policy findings in a concise format through weekly readings and reflections.

A majority of the world's population lives in developing countries, on less than \$2 a day. This course will use microeconomic tools to gain a better understanding of the lives of the world's poor and of the challenges faced in the process of economic development. We will explore topics such as education, healthcare and microfinance, as well as investigate the functioning of labor markets, credit markets and government institutions. We will also cover methods to evaluate the effectiveness of policy interventions, using applications from developing countries around the world.

This course will combine a formal treatment of financial market theory with an investigation into the instances where standard theory comes up short: financial manias and crises. The course will investigate the main financial markets (bonds, money and stock) and institutions (commercial banks, investment banks and other intermediaries) from a standard textbook perspective, while supplementing this material with readings on historical and contemporary financial crises. Students will be assessed via examinations as well as an independent research paper on a relevant topic.

The seminar in macroeconomics provides graduate students with the opportunity to learn about current research in macroeconomics from a number of different speakers. The seminar features speakers from outside the department as well as speakers from within the department. Pitt graduate students engaged in research in the field of macroeconomics are especially encouraged to present their research in this seminar.

From kissing to romantic escapades, from Paris to the Riviera, from Tahiti to Marrakesh, France and the Francophone world have a highly recognizable profile in matters of sex and love. Sexual behavior is always culturally inflected, and it evolves through time in its creation of emotions, attachments, families and institutions. In this class, we will adopt a historical lens to retrace the cultural transformations of sex and love in the French cultural and social landscape. We will study contemporary visual and textual materials, and a variety of historical documents from the Middle Ages to the present day. We will address controversial issues such as virginity, adultery, same-sex relationships, women's sexual agency, gender definitions through sexuality, the shifting boundaries of pornography and other related matters. This is a first-year course and is open both to incoming and more advanced students. It will count toward the French major and minor. Taught in English.

This course is an introduction to the history and culture of French-speaking Canada. We examine the founding, establishment, present and future of the French fact in North America. Principal focus will be on Quebec and Acadia, the two principal francophone communities of contemporary Canada. Reserved for students in the International Studies: Quebec Academic Community. Taught in English.

The purpose of this course is to illustrate ways of looking at literary texts. We shall examine poems, prose works and plays from France and the francophone world, trying to answer some of the following questions: What are the characteristics of these different genres? What is specifically literary in the text? How can reading such a text make us more able to understand today's world? Considering these questions should make students more familiar with French-language literary production and also help them understand the literary phenomenon in general.

This course is a study of the history of French colonization of the "New World" of the Americas from the sixteenth to mid-twentieth centuries, just after the second World War. By adopting an "Atlantic" approach, we will examine Europe, Africa and the Americas as interconnected regions. The course explores several themes: Voyages et Rencontres; les Français en Amérique du Nord; la Traite des Noirs; les Lumières et le Nouveau Monde; et Révolution à Saint-Domingue. Although each theme treats a different region and highlights a different time period, our approach will allow us to follow the writings of explorers, philosophers, administrators, generals, merchants, and former slaves around the Atlantic, from the coasts of France and West Africa, to the eastern United States, and south to the Caribbean and South American mainland. The course will be conducted in French.

In this course students will continue to develop oral proficiency in French through engaging in conversation, providing and obtaining information, and exchanging opinions. Students present informally during debates and sketches as well as more formally through oral exposes and digitally recorded oral samples. Understanding of the cultural implications of written and visual texts is enhanced through exposure to current news stories and films. The course will be conducted in French.

FR	0056	1070	10044	WRITING FRENCH	Lecture	3	
----	------	------	-------	----------------	---------	---	--

**Bldg:** Cathedral of Learning **Room:** 00236 **Days:** TuTh **Time:** 14:30 - 15:45 **Instructor:** Hogg,Chloe Alice

**Class Enrl Cap:** 25 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0

The course is designed to promote the development of writing skills through a writing-as-process approach. Class work and written assignments will include journal writing, grammar review, vocabulary development, and analysis of model texts. Based on close work with models, students will then craft substantial compositions, each illustrating a function (narration, description) or a genre (essay, film review). Attention will be given to helping students improve as writers by learning to analyze, edit, and revise their own work.

FR	0058	1030	10045	ADVANCED FRENCH CONVERSATION	Lecture	1	
----	------	------	-------	------------------------------	---------	---	--

This one-unit class at once builds on and complements French 55. It is designed to improve students' oral proficiency and sociolinguistic competence through contextualized simulated immersion. The course is divided into four sections, each demanding different, but complementary social and linguistic skills, to wit 1) getting to know people and places; 2) current events; 3) debate and disagreement; 4) cultural comparisons. Emphasis is on acquiring the authentic oral communication skills, in the widest sense of the term, necessary to navigate expertly French-speaking environments.

This three-hour-per-week course introduces students to the French language, and is designed to develop both linguistic and sociolinguistic competence in both spoken and written French. Because the focus is on task-centered communication, the class is conducted entirely in the target language. Course objectives for Elementary French 0001 are: a) to speak French well enough to describe, narrate and ask simple questions in the present about a variety of everyday topics such as family, work, eating and traveling; b) to understand French well enough to grasp main ideas in short conversations about everyday topics; c) to understand simple written French well enough to grasp main ideas; d) to write sentences and short paragraphs on everyday topics; f) to develop an awareness of French-speaking cultures; f) to understand, at a very basic level, how French functions as a language. This course is for students with little or no previous exposure to the language and its cultures.

As a continuation of French 1 this 3-hour-per-week course introduces students to the French language, building on skills gained in French 1 or French 1 on-line. Culturally-contextualized comprehension and production abilities in both written and spoken form are stressed. Because the focus is on communication, French 2 is taught entirely in the target language. Objectives are similar to those in French 1, but expanded for this more advanced level.

This intermediate, three hour-per-week course builds on the skills acquired during the first year of study in French 1 and 2, while further developing linguistic and sociolinguistic competence in French. Because the focus is on communication, the course is taught entirely in the target language. Course objectives for French 3 are as follows: 1) speak French well enough to ask and answer questions in various situations beyond what is needed to simply "survive" in a francophone culture, i.e., the ability to talk about self and surroundings in some detail; 2) understand enough spoken French to grasp main ideas and some supporting details in short conversations related to topics above; 3) read well enough to understand principal themes and most details in simple literary and non-literary texts; 4) write longer and more cohesive paragraphs; 5) cultivate a deeper understanding of French-speaking cultures; 6) gain a better understanding of how French works as a language.

As a continuation of French 3, this 3-hour course builds on the linguistic and sociolinguistic skills acquired in French 3. The focus is on communication and instruction is entirely in the target language. Course objectives for French 4 are as follows: 1) speak French well enough to ask and answer questions in various situations beyond what is needed to simply "get along" in a francophone culture, i.e., the ability to talk about self and surroundings with a bit of detail; 2) understand enough spoken French to grasp main ideas and some supporting details in short conversations related to topics above; 3) read well enough to understand principal themes and most details in simple literary and non-literary texts; 4) write longer and more cohesive paragraphs; 5) cultivate a deeper understanding of French-speaking cultures; 6) gain a better understanding of how French works as a language.

In this course intended for beginning graduate students in the modern languages, students will survey major movements and concepts in literary and cultural theory of the 20th/21st centuries. These theories have provided us important ways to think about how to read and interpret literature, film, and other cultural artifacts, and, as such, are an important aspect of graduate studies in the humanities. This course is meant to provide students a general background in theory that they can further develop in certain areas as they continue their studies. The course will be taught in English, and all readings will be available in English.

Teaching French, Italian, and German [for beginning TAs] /Advanced Topics in Foreign Language Learning and Teaching [for advanced TAs] This course supports the concept that instructional expertise is developed in and through teaching. Using a modified "lesson study model" of teacher development, new and experienced foreign language instructors will work together to identify problems of practice, discuss the theory and instructional practices that address these pedagogical concerns, and collaboratively develop a lesson to be taught by a member of the class and later analyzed and refined by the class as a whole. Videotapes of these lessons will be used as the primary source of information for analysis, discussion, and reflection. Four major areas will ground our work: 1) designing lessons to promote a language learning community, 2) teaching culture through language, and language through culture, 3) advancing oral language proficiency, and 4) developing literacy in a foreign language. Assignments include participation in collaborative lesson plan development,

reflective reports on videotapes of classroom instruction, written analysis of tutorial work with language learners, and a culminating project developed in stages throughout the course that unifies the four themes in a statement of teaching philosophy. Not language specific, this course is intended for current and future teachers in the modern foreign languages.

<p>This mini-course in Italian represents a supplemental hour of language instruction and practice for students who have successfully completed two semesters (or the equivalent) of Italian. It is particularly recommended for students taking Italian 0103 or a fourth-semester course, but also for students planning to study abroad or returning from study abroad in Italy, as a way to ensure that they continue to practice their Italian. Students will discuss a wide variety of topics and will receive some extra grammar practice, with the aim of further developing their proficiency in the target language. NO TEXTBOOK REQUIRED. The course offers students an introduction to Italian culture, seen through some of its prominent figures. Starting our journey from late medieval writers (Dante, Petrarch, Boccaccio), we will reach the threshold of the Renaissance and get to know some of its main protagonists (Castiglione, Machiavelli,

Leonardo). Our trip finishes in the 17th century, with the scientific revolution and the birth of Baroque (Galileo). Although our focus is on the Middle Ages and the first centuries of the Early Modern Period, we will take every opportunity to explore the extent of the influence such crucial figures had and still have on the contemporary cultural landscape. The course is taught in English. No prerequisites. No knowledge of Italian is required. The course satisfies the School of Arts & Sciences Foreign Culture Requirement.

This course is taught in English. This course is an introduction to Italian history and culture in which students will explore the importance of Italian cuisine through the analysis of literary and historical texts, visual arts, and film related to food production, consumption, importation/exportation, and legislation. Students will examine the history of food culture from antiquity to the present day, and consider the socio-cultural and socioeconomic impacts of food and cuisine in contemporary Italy. No prerequisites. No textbook required. No knowledge of Italian is required. It satisfies the School of Arts & Sciences Historical Analysis and Foreign Cultural Regional general education requirements. updated: 3/6/2019

Learn Italian in a comfortable and interactive classroom environment! This beginners class (max. 19 students) will teach you the basic vocabulary and grammar you need to navigate Italian culture, history, and society. Our innovative class format consists of face-to-face class meetings (3 days per week) in which students practice their Italian in communicative activities. An additional credit hour is online, and students use this time to watch/listen/read lectures, complete exercises to hone their linguistic skills, and interact with apps and websites (Extempore, Quizlet, etc.) to better their Italian. In addition, students will learn about Italian culture, including Italian university life, Italian geography, popular and less-common travel destinations, and Italian cuisine and foodways. No prerequisites! NO TEXTBOOK REQUIRED. Visit [www.frit.pitt.edu](http://www.frit.pitt.edu) for more information. Updated: 3/6/2019

**Class Enrl Cap:** 22 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0

**Attributes:** Hybrid

**Room Characteristics:** Media - Data Projector/Monitor(1), Seating - Moveable(1), PeopleSoft - Scheduled (PS)(1)

Learn Italian in a comfortable and interactive classroom environment! This beginners class (max. 19 students) will teach you the basic vocabulary and grammar you need to navigate Italian culture, history, and society. Our innovative class format consists of face-to-face class meetings (3 days per week) in which students practice their Italian in communicative activities. An additional credit hour is online, and students use this time to watch/listen/read lectures, complete exercises to hone their linguistic skills, and interact with apps and websites (Extempore, Quizlet, etc.) to better their Italian. In addition, students will learn about Italian culture, including Italian university life, Italian geography, popular and less-common travel destinations, and Italian cuisine and foodways. No prerequisites! NO TEXTBOOK REQUIRED. Visit [www.frit.pitt.edu](http://www.frit.pitt.edu) for more information.

ITAL 0113 1040 27117 MODERN AND CONTEMPORARY CULTURE Lecture 3  
**Bldg:** Cathedral of Learning **Room:** 00312 **Days:** MWF **Time:** 11:00 - 11:50 MODERN CONTEMPORARY CULTURE **Instructor:** Denman, Lorraine R  
**Class Enrl Cap:** 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 10 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Attributes:** European and Eurasian Studies, West European Studies  
**Room Characteristics:** (1), Seating - Moveable(1), PeopleSoft - Scheduled (PS)(1)

This course is taught in Italian. This course is one of three courses (0113, 0115, 0117) designed for students who have successfully completed ITAL 0103 (or the equivalent). This course counts toward the Italian minor and is required in the Italian major. In Modern and Contemporary Culture, we examine the socio-historical landscape of Italy of the last 100 years by examining literary and historical texts, visual arts, film, documentaries, viral videos, music, and digital media. Students will develop a better understanding of history, society, politics, and culture while developing their spoken and written Italian. Particular attention will be paid to conversing in Italian in class. No textbook required. Visit [www.frit.pitt.edu](http://www.frit.pitt.edu) for more information.

ITAL 0113 1050 29150 MODERN AND CONTEMPORARY CULTURE Lecture 3

ITAL 1065 1010 27777 SONGS OF THE ITALIAN SELF Lecture 3  
**Bldg:** Cathedral of Learning **Room:** 00341 **Days:** TuTh **Time:** 09:30 - 10:45 **Instructor:** Savoia, Francesca  
**Class Enrl Cap:** 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 10 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Attributes:** DSAS Literature General Ed. Requirement, Writing Intensive Course (WRIT), SCI Polymathic Contexts: Humanistic GE. Req., West European Studies  
**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

Since the dawn of civilization poetry has been one privileged, imaginative mode chosen by humans to express awareness of their surroundings, their experiences and themselves. Adhering to the principle that valuable learning proceeds from direct experience, this course uses an inductive, creative, hands-on approach to the study of Italian poetry, guiding students in a dynamic exploration of the poetic texts. The overarching objective is to provide students with as clear an idea as possible of the properties, functions and characteristics of Italian lyric poetry, its evolution and its crucial role in Italian culture over the centuries, through the study of representative texts from Petrarch to the present. Students will improve their knowledge of the Italian language through the study and practice of poetry; acquire the basic notions of poetic discourse in Italian; become familiar with the features and the main forms of Italian versification; practice textual analysis as a first step towards literary interpretation and criticism; become familiar with some periods, movements and authors of Italian poetry.

Prerequisites: completion of any two Italian-taught 100-level courses

Evaluation: Attendance and participation 15%; Course journal 15%; Writing assignments (poetry writing exercises, short essays, final paper) 50%; Oral

ITAL 1070 1500 24960 LITERATURE AND POLITICS Lecture 3

<b>Room Characteristics:</b> Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)							
<p>The goal of this course is to examine six novels, written between 1936 and 1963, which represent some of the best products of literary neo-realism in Italy. Emerging from the political and literary isolation of the ventennio nero, writers such as Ignazio Silone, Elio Vittorini, Italo Calvino, Carlo Levi, Cesare Pavese and Beppe Fenoglio sought to give voice to their experiences in the clandestine movement of opposition to fascism, and in the Resistance. They did so by resorting to a raw, gritty, and innovative language that would mark the beginning of a new relationship between reality and representation. In our study, we will consider the ideological sources of this search, the roots of neo-realism in nineteenth-century verismo, its ties with American writers such as Hemingway, and the role of neorealist writers and intellectuals in post-war Italian society. Students are expected to complete the reading assignments before each meeting, in preparation for class activities and discussion. They will be asked to write and revise a short 2 or 3-page paper in response to the reading of each novel, and a longer 5 to 8-page final paper (preferably on a neorealist novel other than those discussed in class).</p> <p>Prerequisites: None.</p> <p>Evaluation: class participation 15%, 6 short papers 60%, final paper 20%, class presentation 5%.</p>

In this course intended for beginning graduate students in the modern languages, students will survey major movements and concepts in literary and cultural theory of the 20th/21st centuries. These theories have provided us important ways to think about how to read and interpret literature, film, and other cultural artifacts, and, as such, are an important aspect of graduate studies in the humanities. This course is meant to provide students a general background in theory that they can further develop in certain areas as they continue their studies. The course will be taught in English, and all readings will be available in English.

Teaching French, Italian, and German [for beginning TAs] /Advanced Topics in Foreign Language Learning and Teaching [for advanced TAs] This course supports the concept that instructional expertise is developed in and through teaching. Using a modified "lesson study model" of teacher development, new and experienced foreign language instructors will work together to identify problems of practice, discuss the theory and instructional practices that address these pedagogical concerns, and collaboratively develop a lesson to be taught by a member of the class and later analyzed and refined by the class as a whole. Videotapes of these lessons will be used as the primary source of information for analysis, discussion, and reflection. Four major areas will ground our work: 1) designing lessons to promote a language learning community, 2) teaching culture through language, and language through culture, 3) advancing oral language proficiency, and 4) developing literacy in a foreign language. Assignments include participation in collaborative lesson plan development, reflective reports on videotapes of classroom instruction, written analysis of tutorial work with language learners, and a culminating project developed in stages throughout the course that unifies the four themes in a statement of teaching philosophy. Not language specific, this course is intended for current and future teachers in the modern foreign languages.

<p>This is an elementary language course for students who have not previously studied any German. In this proficiency-oriented course students begin to learn how to communicate in German. This course meets three hours per week, and students are expected to study regularly on their own to keep up with the material. The course emphasizes all four skills; speaking, listening, reading, and writing, and introduces students to the culture of the German-speaking countries. Students will be working towards the A1-Exam of the Goethe Institut, which follows the Common European Framework of Reference and is accepted worldwide. Students should plan to take German 0002 or 0102 during the following semester. Updated 02/27/2018.</p>

<b>Room Characteristics:</b> PeopleSoft - Scheduled (PS)(1)							

This is the second part of our elementary language course sequence. In these proficiency-oriented courses students begin to learn how to communicate in German. The course meets three hours per week, and students are expected to study regularly on their own to keep up with the material. The course emphasizes all four skills - speaking, listening, reading, and writing - and introduces students to the culture of the German-speaking countries. Students will be working towards the A2-Exam of the Goethe Institut, which follows the Common European Framework of Reference and is accepted worldwide. Students should plan to take either German 0103 or German 203 during the following semester. Updated 02/19/2019.

GER 0202 is intended to follow GER 0201. Class periods consist largely of communicative activities designed to strengthen grammatical knowledge and broaden

and deepen students' vocabulary. Students will write compositions of increasing complexity, and continue reading longer and more difficult texts, including a simplified version of a German novel. They will also work with web materials, complete a variety of assignments online, and work on a group project. Together with GER 003, the course begins transitioning from the development of basic communication skills to more in-depth spoken and written discussions of German-speaking culture. Updated 02/27/2018.

---

GER	0203	1010	26857	INTENSIV INTERMEDIATE GERMAN 1 Lecture	5
<b>Bldg:</b> Cathedral of Learning		<b>Room:</b> 00113	<b>Days:</b> MTuWThF	<b>Time:</b> 12:00 - 12:50	<b>Instructor:</b> Brand, Benjamin Martin Wilhelm
<b>Class Enrl Cap:</b> 20		<b>Class Enrl Tot:</b> 0	<b>Class Wait Cap:</b> 20	<b>Class Wait Tot:</b> 0	<b>Class Min Enrl:</b> 0
<b>Attributes:</b> DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.					
<b>Room Characteristics:</b> PeopleSoft - Scheduled (PS)(1)					

This course is for students who have successfully completed German 0102 or who have placed into the course on the basis of the department placement test. German 0203 provides students with opportunities to strengthen their listening and speaking abilities and mastery of German grammar, to read a variety of short authentic texts as well as a longer adapted book, and to write longer and more complex compositions than those assigned in Elementary German courses. This is an intensive course that meets five times a week, and students will be thus be able to move on quickly from the development of basic communication skills to more in-depth spoken and written discussions of German-speaking culture. Class periods consist largely of communicative activities designed to strengthen grammatical knowledge and broaden and deepen students' vocabulary. They will also work with web materials, complete a variety of assignments online, and work on a project. Students should plan to sign up for GER 0204 the following semester, in order to work towards the B1-Exam of the Goethe Institut, which follows the Common European Framework of Reference and is accepted worldwide. Updated 02/19/2018.

---

GER	1000	1050	28558	READING LITERARY TEXTS Lecture	3
<b>Bldg:</b> TBA		<b>Room:</b> TBA	<b>Days:</b> TuTh	<b>Time:</b> 11:00 - 12:15	<b>Instructor:</b> Colin, Amy
<b>Class Enrl Cap:</b> 20		<b>Class Enrl Tot:</b> 0	<b>Class Wait Cap:</b> 20	<b>Class Wait Tot:</b> 0	<b>Class Min Enrl:</b> 0
<b>Attributes:</b> West European Studies					
<b>Room Characteristics:</b> Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)					

This course aims to strengthen your reading skills in German by introducing you to a variety of genres and writing styles, from the eighteenth to the twenty-first century. You will have the opportunity to work on your extensive and intensive reading skills, as you acquire new strategies for identifying generic conventions, differentiating between literal and figurative language, and parsing grammatically complex sentences. Updated 03/22/2019.

---

GER	1003	1160	28556	PROFESSIONAL GERMAN Lecture	3
<b>Bldg:</b> Cathedral of Learning		<b>Room:</b> 00317	<b>Days:</b> TuTh	<b>Time:</b> 16:00 - 17:15	<b>Instructor:</b> Waeltermann, Dieter J
<b>Class Enrl Cap:</b> 22		<b>Class Enrl Tot:</b> 0	<b>Class Wait Cap:</b> 20	<b>Class Wait Tot:</b> 0	<b>Class Min Enrl:</b> 0
<b>Attributes:</b> Writing Intensive Course (WRIT), European and Eurasian Studies, West European Studies					
<b>Room Characteristics:</b> Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)					

This is an advanced language course that aims to familiarize students with specialized vocabulary, practices and the culture of German-speaking countries with respect to professional areas, specifically the business world. This course concentrates on:

- Business & economic geography (old & new states, industrial regions and major sites),
- Germany & the EU: history, geography, function, politics, trade
- Transportation (means, importance, policy, infrastructure) and Tourism (incl. trade fairs)
- Correspondence & Communication (job search, German résumé, application letters, job interviews, composing effective short reports & summaries, e-mail)

While this course focuses on oral and aural proficiency, appropriate written discourse, and reading, it places heavy emphasis on writing since it fulfills the University of Pittsburgh W-course requirement. The course integrates economic geography and the legal and political systems of Germany, Austria, and Switzerland as well as the European Union with language instruction. Updated 02/20/2019.

<b>Room Characteristics:</b>		Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)					

This course is oral proficiency oriented, which means it allows students to practice and improve their speaking skills, but also their listening comprehension by engaging with authentic German media materials in print and on screen, from tv to film, from internet to social media. It provides students with both an overview of the current media landscape in Germany as well as with an outlet for their creative imagination all in German! Take this course and know what's äpp in Germany. Discuss and moderate the latest news; write your own reviews; script your own soap; watch films in cinemscope; and take a stance in a German TED talk. This course fulfills the Dietrich School of Arts & Science General Education Requirement Creative Work.  
Updated 02/21/2019.

GER	1106	1100	28559	GERMAN CULTURAL HISTORY	Lecture	3	
<b>Bldg:</b>		Cathedral of Learning	<b>Room:</b> 00339	<b>Days:</b> MW	<b>Time:</b> 15:00 - 16:15	<b>Instructor:</b> Von Dirke, Sabine	
<b>Class Enrl Cap:</b> 20		<b>Class Enrl Tot:</b> 0		<b>Class Wait Cap:</b> 20		<b>Class Wait Tot:</b> 0	
<b>Attributes:</b>		DSAS Literature General Ed. Requirement, European and Eurasian Studies, West European Studies					
<b>Room Characteristics:</b>		Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)					

German Cultural History introduces students to major developments and figures in German cultural history from medieval magic charms to the Enlightenment Period with its radical questions about the drama of existence and the power of the human mind. The course brings together a variety of media (written texts as well as audio-visual materials) and genres (prose, poetry, drama) in order to analyze how the past informs the present. In addition to helping students develop a deeper understanding of important periods in the cultural history and identity of German-speaking peoples, this course aims to guide students toward a greater appreciation of literature, music, philosophy, architecture, and works of art in light of the historical contexts in which they emerged. The course will be conducted entirely in German, giving students ample opportunity to practice their German in all four areas (i.e. speaking, reading, writing, and listening.) Participation in this course requires, therefore, successful completion of at least one German 1000-level course. All assignments need to be completed in German.

GER	1399	1160	21590	SENIOR CAPSTONE SEMINAR	Seminar	3	
<b>Bldg:</b>		Cathedral of Learning	<b>Room:</b> 00363	<b>Days:</b> TuTh	<b>Time:</b> 09:30 - 10:45	<b>Instructor:</b> Lyon, John B	
<b>Class Enrl Cap:</b> 20		<b>Class Enrl Tot:</b> 0		<b>Class Wait Cap:</b> 20		<b>Class Wait Tot:</b> 0	
<b>Attributes:</b>		Capstone Course, European and Eurasian Studies, West European Studies					
<b>Room Characteristics:</b>		Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)					

This course is required for senior German majors. The specific focus of the seminar this year is "Creativity," and will be offered in conjunction with GER 1324, "Special Topics in German Prose: Creativity." Capstone students will be expected to do the reading assignments for GER 1324, but the written assignments will be modified so that they can focus primarily on their Capstone projects. The capstone projects require students to write an independently-researched senior thesis and make a presentation on it. The topic should be drawn from students' own interests but relate somehow to the topic of creativity.  
Pre-requisite: At least one course at the 1100-level.  
Updated 03/06/2019.

**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course introduces students to both a wide selection of Indo-European folktales as well as numerous perspectives from which to understand them. We will examine the aesthetic, social, historical, and psychological values that these tales reflect. In addition, we will discuss significant theoretical and methodological paradigms in the field of folklore and folktale studies, including structural, socio-historical, psychoanalytic, and feminist perspectives. Finally, we will analyze the continuing influence of this folk tradition on popular and elite culture of our time. Upon completion of this course, the successful student should be familiar with a wide variety of Indo-European folktales, be able to discuss several approaches to studying them, be able to identify the most important motifs of these tales, be familiar with some of the most influential folklorists, writers, and editors of the tales, and be able to assess the significance of folktales for contemporary western culture. This course satisfies the Dietrich School's Foreign Culture and Literature requirements. Updated 02/19/2019.

<p>This course presents Goethe's Faust as a case study that reveals a capacity within literature to re-think the conceptual foundations of the western metaphysical tradition. By exploring the challenges that key philosophical concepts pose for the frustrated professor long after he flees his scholar's study, students learn to navigate the conceptual networks that traverse Goethe's tragedy and together stage the perennial questions asked by philosophy about its own foundations and essence. In addition to Faust in its entirety, we examine texts by Plato, Aristotle, Spinoza, Leibniz, Kant, Whitehead, and Deleuze in order to understand how Goethe appropriated and metaphorically re-invented conceptual assemblages from the metaphysical tradition including God and substance; nature and world; order and chaos; origin and end; movement, change, and process; eternity and endurance; immanence and transcendence; appearance; thought, knowledge, idea, vision, and intuition; affect and feeling; etc. No knowledge of German is required. German 1512 fulfills the Literature, the Philosophical Thinking or Ethics, OR the Geographic Region requirements in the GEN ED Curriculum. There will-be internship opportunities for interested students with the Goethe-Lexicon of Philosophical Concepts, an new online reference work that the instructor edits. Credit for the German Major is possible, but only in special circumstances and with departmental approval. updated 4/5/19</p>

<p>In this course, students will study the current cultural, political, social, and economic situation in Germany within its global context. By concentrating on current conditions and changes of public consciousness, issues important to German speakers are debated: from the rise of fascism, racism, and anti-Semitism to the integration of refugees. For more information see the above mentioned detailed course description. Materials include articles from journals and newspapers, documentaries, slides, and contemporary works of literature. All materials are in English and will cover key political, social, economic, and cultural developments in contemporary Germany such as: Germany's leading role in the EU; its relationship to the United States; its growing multi-ethnicity; the integration of refugees; the rise of an extreme right-wing political party; efforts to learn from German history, in particular the Holocaust; civic movements to stop hate-crimes, racism, and anti-Semitism;</p> <p>2. Modern and postmodern architecture and city planning;</p> <p>3. Innovative artists from Anselm Kiefer to street artists;</p> <p>4. Composers, musicians, political singers, rock bands such as 'Die Toten Hosen';</p>

<p>Course Description for Fall 2201: This introductory course, designed for students with no previous background in art or art history, undertakes a broad investigation of how art objects function in human culture. The course demonstrates some of the basic tools of analysis with which to approach works of art as material and aesthetic objects, while also examining them as productions that operate in diverse historical and social contexts. The course also focuses on cultural difference and the ways in which art has been employed to define communities as radically particular while also answering basic human needs that connect people living in different times and places.</p>

Course Description for Fall 2201: The death of a loved one is an emotional and powerful occurrence that provokes a variety of human responses. In addition to writings describing their funerary practices, the civilizations of the ancient Mediterranean region have left artistic representations of death and dying, built tombs, and objects associated with funerary rituals. The study of these texts, images, structures, and objects allows us to better understand ancient attitudes and reactions to death.

This undergraduate lecture focuses on the visual and material evidence of funerary practices and beliefs in ancient Egyptian, Greek, and Roman societies. The subject will be approached thematically. First, we will explore how archaeologists discover death-related artifacts and how scholars approach the study and reconstruction of ancient death rituals. Ancient practices and beliefs regarding mummification, the funeral, commemorative strategies, visits to the grave, and the afterlife will be explored, and images found on specific media (vases, sculpture, built tombs, paintings) will be discussed in depth. The course will conclude with discussions of the roles that sensational topics, like fear of the undead (zombies, vampires, and ghosts) and spectacles of death

Course Description for Fall 2201: Foundations in Art History offers an introduction to the history of the art historical discipline and its research and interpretive methods. Other courses in the art history department introduce students to the *what* of art history;major works and histories of the arts in specific time periods and geographic locations around the globe. This course, by contrast, is devoted to the *how* of what the art historian does;how he or she interprets the work of art according to its specific characteristics, the place and time in which the artwork is created, and the changing nature of viewers' responses to it. Through readings that treat the history of art in both Europe and Asia, from the ancient world to the present, weekly discussions will invite us to explore a wide array of interpretive perspectives, to understand where and when such perspectives emerged within the discipline, and how they continue to be used today. Our engagement with these perspectives will be geared toward understanding how each plays a role in the art historian's central task, namely, deciphering the significance and operation of works of art.

Course Description for Fall 2201: The Pro-Seminar is a 1-credit professional development workshop that is required for all majors. There are two sections. CN 19220 is for HAA majors, and CN 30059 is for Architectural Studies Majors.

This is a professional skills and career development workshop that will help students practically navigate and engage in the numerous opportunities that are available to them as undergraduates. We will devote attention to developing a resume as an undergraduate student; internships; academic opportunities; what they are, why they're important, and how to secure them; developing and writing the essay (cover letters, statements of purpose, and letters of intent); developing an independent research project; interview skills; giving public or professional presentations; and practicing professional communication skills. A practical, life-skills course! Several weekly meetings will feature speakers from arts, museum, architecture and design professions. This course is only offered in the Fall semester.

Course Description for Fall 2201: This course will investigate the works of some famous and not-so famous artist working in Italy between about 1400 and 1550. We will investigate cities like Rome, Florence, and Venice and examine how different communities employed images for the expression of identity, status, and as a strategic means of producing consensus or exploiting social division. We will consider the role that images occupied in political and religious culture as well as in private life, bearing in mind the competing interests of those who commissioned works of art and those who encountered them as beholders. From this multiplicity of uses and responses emerged highly varied conceptions of the nature of images and the role of the artist. The artists

we will study include: the original Ninja Turtles (Michelangelo, Raphael, Leonardo, and Donatello), Botticelli, Titian and Brunelleschi, among many others.

Course Description for Fall 2201: This course will introduce students to ancient Egyptian religious thought and practice with its massive temples, multitude of gods and goddesses and fascinating funeral rites. We will explore the mythic cycle of Creation and Osirian cycle of betrayal, revenge, death and rebirth,

as well as the place of myriad local and minor deities within Egyptian mythology. We will also consider the dynamics of the "monotheistic" revolution of Akhenaton. In the historical and cultural context of ancient Egypt, students will encounter the interaction of sacred and secular, and the relationship between state cults and private worship by nobles and commoners alike. A special feature of the course includes sessions at the Egyptian Exhibit of the Carnegie Museum of Natural History and designing public educational materials that will help illuminate this ancient culture.

Course Description for Fall 2201: Centrally located within the Mediterranean, Italy was rich in natural resources, under the firm control of civic elites who managed contacts with other cultural groups. Roman art, therefore, was an art of advertisement and consumption; one that served to identify the wealthiest and most influential members of the community and to further their interests. The course will follow the development of Rome from an aggressively expansive, aristocratic city-state to a socially innovative political conglomerate with control over the Mediterranean world. This development fostered 1) unprecedented economic stability and prosperity across a wide region, allowing objects and styles that were once limited to the elite to filter down to a broader range of consumers, and 2) the need for an art that communicated the achievements and goals of the imperial government to different regions and cultures.

Course Description for Fall 2201: Centrally located within the Mediterranean, Italy was rich in natural resources, under the firm control of civic elites who managed contacts with other cultural groups. Roman art, therefore, was an art of advertisement and consumption, one that served to identify the wealthiest and most influential members of the community and to further their interests. The course will follow the development of Rome from an aggressively expansive, aristocratic city-state to a socially innovative political conglomerate with control over the Mediterranean world. This development fostered 1) unprecedented economic stability and prosperity across a wide region, allowing objects and styles that were once limited to the elite to filter down to a broader range of consumers, and 2) the need for an art that communicated the achievements and goals of the imperial government to different regions and cultures.

HAA 2401 1010 30564 SPECIAL TOPICS-CONTEMPORARY Seminar 3  
**Bldg:** Frick Fine Arts Bui**Room:** 00104 **Days:** W **Time:** 14:30 - 17:20 **Instructor:** Staff  
**Class Enrl Cap:** 10 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0

HAA 2441 1010 30556 EXPRESSIONISM Seminar 3  
**Bldg:** Frick Fine Arts Bui**Room:** 00203 **Days:** TuTh **Time:** 09:30 - 10:45 **Instructor:** McCloskey, Barbara  
**Class Enrl Cap:** 2 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Room Characteristics:** PeopleSoft - Scheduled (PS)(1)  
**Combined Section ID:** 0026(HAA/1440/2441) - HAA 1440(#30555)

Portuguese for Spanish Speakers is designed as an accelerated introductory course for native speakers of Spanish or English speakers with fluency in Spanish. It will be the equivalent of Port 0001/1001 and Port 0002/1002. This course concentrates on aspects of the Portuguese language that are most difficult for Spanish speakers, such as pronunciation, vocabulary, idioms and grammatical structures particular to Portuguese.

PORT 1458 1010 28678 CULT PORTUGUESE SPKING WORLD Lecture 3  
**Bldg:** Cathedral of Learning **Room:** 00313 **Days:** MWF **Time:** 10:00 - 10:50 **Instructor:** Rivera, Serena  
**Class Enrl Cap:** 22 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Attributes:** European and Eurasian Studies, Transatlantic Studies, West European Studies  
**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course presents an overview of the contemporary cultures of the Portuguese-speaking world. It is especially designed for students with little to no previous knowledge of these geographical regions. In the course, students will explore contemporary social realities throughout the Portuguese-speaking world (namely Brazil, Angola, Mozambique and Cape Verde) through the close and critical reading of texts, literature, film, short videos, podcast episodes, TV programs, among other mediums. Students will be exposed to issues regarding gender, race, nation, sexuality, class, status, among other issues within a contemporary context. Students are expected to engage in critical discussions with the materials and the varying perspectives of their peers. The purpose of this course is not to merely passively digest content but to also think and express oneself critically in reaction to cultural representations both from the perspective of the respective nation and also from US perspectives. It is also necessary to keep in mind that rather than attempting an exhaustive survey of the Portuguese-speaking world in its entirety, the course provides merely a glimpse into the cultural offerings of these diverse and vast geographical regions; it is also an attempt to promote global and cultural understanding. Hopefully, through this exposure, it is also a starting point for further exploration and research in studies of the Portuguese-speaking world and beyond.

This is a condensed version of the first two courses of the Spanish language program, and it has been designed for students who have taken at least two years of high school Spanish or its equivalent. Spanish 0015/0115 follows a communicative approach: from the first day of class you will interact in Spanish in a meaningful context with your instructor and classmates. By the end of this course you will have a general knowledge of the grammar of the Spanish language and you will be able to communicate effectively in Spanish according to this level. This course satisfies the foreign language requirement. Updated 02/22/2018.

The goal of this fifth-semester course is to enhance fluency and the development of oral proficiency in Spanish. Although the emphasis is on speaking and listening skills, reading and writing assignments are an important part of the syllabus. Certain grammar points are reviewed (ser/estar, preterite/imperfect, etc.), but communicative competence is not measured by grammatical competence alone. This course helps students to improve their fluency, pronunciation, and strategic competence such as paraphrasing skills, and increases their vocabulary through readings, films, digital recordings and other authentic materials. This course is offered every term, and counts toward the Spanish major. Updated 02/08/2019.

What is literature? What does the literary do? This course, conducted in Spanish, is designed to introduce students to the study of Hispanic literature, while the same time dealing with concepts which can be applied to all literature. We will analyze Hispanic literature understood in its broadest sense, touching upon significant works, genres, movements, and authors from Spain and Latin America. In addition, we will read several examples of literary theory, or writing about literature, in order to investigate the role or function of the literary within the Hispanic world. This course fulfills the

**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

The primary goal of this course is to introduce students to the cultural histories of the Hispanic world, with a particular emphasis on Latin America. Through a multidisciplinary approach, we will study the interaction of social, political, ethnic, racial, and gender dynamics, and the resulting transformations in Latin America, past and present. After a study of pre-contact Iberian and Amerindian societies, we will critically examine the ensuing conflicts that characterized the three centuries of contested colonial rule in Latin America. We will then focus on the different national projects and revolutions that shaped the current geopolitical landscape through both cultural manifestations as well as discourses of national identity and calls for patriotic behavior. We will close with an overview of some of the challenges actors across Latin America face at the turn of the millennium. Throughout the semester, the goal will be both to learn about Latin America and about how it has been imagined by its most influential past and present thinkers, tracing differences and continuities. Updated 09/27/2018.

**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

The primary goal of this course is to introduce students to the cultural histories of the Hispanic world, with a particular emphasis on Latin America. Through a multidisciplinary approach, we will study the interaction of social, political, ethnic, racial, and gender dynamics, and the resulting transformations in Latin America, past, present, and future. After studying the original cultures of the American continent and the cultural clash that emerges from Portuguese and Spanish colonization, the notion of Latin America is studied, questioned and problematized. Including a wide array of cultural texts, such as chronicles, documentaries, films, narrative, and theater, students will learn about the cultural processes of colonization, nationalism, the

formation of cultural traditions and the influence of globalization. It focuses on the impact that these sociopolitical collisions have had on the cultural development of the region, while at the same time fostering the development of a critical perspective in which the past becomes a politically-charged variable in the analysis of current cultural production. Updated 02/26/2019.

The primary goal of this course is to introduce students to the cultural histories of the Hispanic world, with a particular emphasis on Latin America. Through a multidisciplinary approach, we will study the interaction of social, political, ethnic, racial, and gender dynamics, and the resulting transformations in Latin America, past, present, and future. After studying the original cultures of the American continent and the cultural clash that emerges from Portuguese and Spanish colonization, the notion of Latin America is studied, questioned and problematized. Including a wide array of cultural texts, such as chronicles, documentaries, films, narrative, and theater, students will learn about the cultural processes of colonization, nationalism, the formation of cultural traditions and the influence of globalization. It focuses on the impact that these sociopolitical collisions have had on the cultural development of the region, while at the same time fostering the development of a critical perspective in which the past becomes a politically-charged variable in the analysis of current cultural production. This course provides a panoramic view of Latin American Literature from the colonial period to the present. It is designed to (1) introduce Spanish majors to Latin American literary traditions in a variety of literary genres, and (2) develop students' reading, analytical and critical writing skills through a series of assignments. Organized as both a chronological and thematic survey, the class emphasizes cultural, social and political aspects of literary production. It will begin with the Cronistas de Indias and will read excerpts from the Baroque, Modernism, Realism, Naturalism, Vanguardism, The Boom and Post Boom authors. Updated 02/26/2019.

This course is for students who have already taken Spanish 0025 or the equivalent and wish to deepen their understanding of Spanish grammar. While the emphasis is on practical usage, theoretical aspects of the finer points of syntax will also be considered, including preterite/imperfect, ser/estar, indicative/subjunctive, etc. It is the intention of the instructor to run the class in a workshop type format rather than in a formal lecture style. In other words, students should complete their assignments before coming to class so that class time can be spent not only reviewing homework but also analyzing the concepts and applying them to translations, short writing tasks and other assignments. Because the text is written in Spanish, it may take a short period of adjustment to get used to understanding and using linguistic terms in Spanish. Students are expected to be able to conjugate verbs accurately in all tenses. The course will be taught entirely in Spanish.

This course is a survey of the short story in Spanish America in the twentieth and early twentieth century. Authors to be studied in a given year will include some of the following; Leopoldo Lugones, Horacio Quiroga, Maria Luisa Bombal, Jorge Luis Borges, Silvina Ocampo, Felisberto Hernandez, Juan Carlos Onetti, Juan Rulfo, Elena Garro, Augusto Roa Bastos, Gabriel Barcia Marquez, , Julio Cortazar, Juan Jose Saer, Marvel Moreno, Ricardo Piglia, and Mariana Enriquez. Particular attention will be paid to writers who are also theorists of the short story (Quiroga, Borges, Cortazar, Piglia among others) and to scholars of the short story genre in Spanish America. There will also be consideration of the genre of the novella (including distinctions in short story theory between the long and the short), with examples from Bombal, Jose Bianco, Slivina Ocampo, Felisberto Hernandez, Ricardo Piglia and others. From a queer theoretical perspective, as an extension of gender and sexuality studies, this course offers a panoramic view of cultural production in Mexico

from 1901 to the present. As a point of departure, several milestones are presented in the sociocultural constructions of masculinity, femininity and sexuality and their respective transformations throughout the 20th century. Similarly, this course examines the themes, dynamics, trends and common sites of sexual diversity in contemporary Mexico. Incorporating a diversity of cultural texts (i.e. novels, essays, newspaper articles, videos, films, art, music, and performance.), this course centers thematically on the gender models that circulated before, during and after the 1910 Revolution, the debates about homosexuality during the decade of the 40s, 50s and 60s, the emergence of activist movement in favor of sexual diversity in the 70s, the cultural production of homosexual themes, the urban space in the development of sexually dissident practices, the HIV/AIDS pandemic, nightlife culture, sexual manifestations in the borderlands and in the indigenous communities of Oaxaca, lesbianism, transsexualism, the debate on queerness, the cultural symbols and practices of the LGBT community in Mexico. This course aims to develop critical thinking skills through the rigorous examination of the assumptions that fix, homogenize and perpetuate the traditional narratives that lead to a dichotomy of sexuality in contemporary Mexico. Updated 02/26/2019.

This course is designed to introduce students to the concepts of resistance and social activism in Latin American: how social movements and activism are organized, exercised, enacted, and contested. From everyday forms of resistance to organized movements, we will examine some concrete historical and cultural situations in relation to major topics: the legacy of past revolutions, human rights and memory, Neoliberalism and globalization, environmental issues, women and gay activism, and Hispanic immigration to the US. Through critical and fictional texts, films and documentaries, music and visual arts, students will gain a multidimensional understanding of contemporary Hispanic issues and different ways and instances of social resistance.

The primary goal of this course is to examine the complex relationships between the indigenous peoples of the Andean region (mainly Peru and Bolivia, but also Ecuador, the south of Colombia and the north of Chile and Argentina) and the different practices and institutions of Spanish colonialism. The course begins with an overview of Andean politics and societies under Inca rule, to then focus on the colonial period. The two main historical processes/periods studied are the long and protracted negotiations that went from the moment of contact between Incas and conquistadors to the establishment of the colonial regime in the 16th century, and the massive rebellions that took place all over the Andes toward the end of Spanish colonial rule, in the latter half of the 18th century. In both cases, we will study the interaction of political, artistic, religious, and racial dynamics, and the resulting historical transformations, using a multidisciplinary approach that will include anything from current scholarly debates to colonial paintings and primary sources. The course satisfies the following GERS: Historical Analysis, Cross-Cultural Awareness, and Course in a Specific Geographic Region

<b>Room Characteristics:</b> Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)						

This upper level undergraduate course is a Senior Capstone Seminar for Spanish majors and represents the culmination of their undergraduate learning in the field of Latin American literatures and cultures. The seminar is also intended to serve as a bridge between undergraduate and postgraduate study, and to provide professional training. Students will have the opportunity to demonstrate the depth of their knowledge of the field by producing a long research paper that illustrates proficiency in discourse/textual analysis as well as evidence of critical thinking when dealing with complex sociocultural and theoretical issues. Approved drafts will be discussed in class, and final works may be presented in a public format at the Undergraduate Research Symposium.

Prerequisite(s): PREQ: (SPAN 1260 or 1280 or 1400 or 1600 or 0050 or 1250 (MIN GRADE C for listed courses); PLAN: Spanish (BA, BPH, MN); LVL: Senior

This course is offered at least once a year.

SPAN 2422 1010 28499 COLONIAL TOPICS Lecture 3

**Bldg:** Cathedral of Learni**Room:** 02732 **Days:** W **Time:** 16:00 - 18:50 INDIGENOUS THINKERS COL. ANDE**Instructor:** Lamana,Gonzalo

**Class Enrl Cap:** 10 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0

**Attributes:** Global Studies, Latin American Studies

The goal of this seminar is to do an in-depth reading of indigenous critical thinking in the colonial Andes, focusing on the work of Guaman Poma de Ayala and Garcilaso de la Vega. It will be about creatively examining problems their texts pose still today, making sense of things that are ineludible but have been largely ignored. Some of the broader ideas this seminar invites you to ponder are: the ways in religion, race and knowledge intertwined in the 16th and early 17th centuries; the relations between Andeanism (¿lo andino?) and the colonial past; the impact of the Western dualist thinking both in the 16th century and today; the problem of the interplay of difference and similitude between Europeans and Indians, and their impact on colonial and contemporary agendas. In addition to Guaman Poma's and Garcilaso's works and critical studies of them, course material includes 16th- and 17th- century colonialist texts, and studies of cultural, social, and political dynamics in the colonial Andes. Class discussion and assignments can be in either Spanish or English, but you must understand well both languages. Final papers can be about anything related to what is discussed during the semester; they do not have to be necessarily about colonialism or the Andes.

The Caribbean summarizes the successive colonizations it has endured. This palimpsest has been studied by several scholars such as Sarduy, Glissant, Sylvia Winter, and many others. This course will emphasize on the women producers of the Caribbean text. The rhizomatic texture of their production will help us

focus on three main topics and their global repercussions: literature, painting and music from the XX-XXI. Some of the authors to be read are Gerty Dambury, Marta Aponte, Maryse Condé, Jamaica Kincaid, Ana Lydia Vega, Marlene Nourbese Philip, Mayra Montero, Myrna Báez, Rita Indiana Hernandez, Edwidge Danticat, Julia Alvarez, Marie Vieux- Chauvet, and some male authors. History and politics play an important part in the conceptual and global dimensions of this dialogue. Updated 03/01/2019.

<b>Room Characteristics:</b> Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)					

This course will combine two approaches: A) It will be based on the hypothesis that the relational continuum that engages fiction and nonfiction also enacts the relational continuum of the normal and the pathological inasmuch as both sets of relationships may be conceived as open fields of experimentation with antinomies such as nature and culture, fantasy and reality, lack and excess, presence and absence, life and death, and so on; B) It will assume Gilles Deleuze's thesis that most poignant literary works are addressed to a people that will never read them. This entails that many literary works may be read as ethnography and vice versa, which endows ethno-literature with an impressively broad spectrum. Obviously, the fact that the colonial and postcolonial history of Latin America conditions the particular convergence of these two approaches will be a point of departure. Reading list will include recent fiction by Mónica Ojeda, Larraquy, Quirós, Cabiya and others; fiction from the French speaking Caribbean, by Chamoiseaux, from the English speaking Caribbean, by Harris; ethnographies by Clastres and Wilbert, ethno-literary fiction by Döblin, and proper mythographies by indigenous authors. updated 4/24/19

<b>Attributes:</b> European and Eurasian Studies, West European Studies						

This course provides students with a foundation in second language (L2) acquisition research. It examines theories and research in L2 acquisition and teaching practices as well as the individual factors that affect the relative success in L2 learning. This course will look at how different methodologies have approached the teaching-learning practice. As a practical component, students will have the opportunity to practice different teaching methodologies.

This course will introduce students to trends and issues in modern Western European history from the Scientific Revolution to the Nazi Revolution, and from the English Civil War to the Cold War. It will utilize an exciting array of primary sources to interrogate a set of questions with which we still wrestle. Where does democracy come from? When does it succeed? When does it fail? How do we explain totalitarianism? How did ideas of human rights arise? How did these ideas change across time? How do new systems of economic organization, like capitalism and communism, emerge and evolve? How do various forms of political and economic organization interact and challenge each other in the world? As we pursue answers to these questions, our course will problematize and interrogate traditional conceptions of western civilization.

In this course, we will survey the causes, conduct and conclusion of World War II in Europe. We will emphasize such topics as nationalism, racism, and propaganda and their roots in the nineteenth century. We will talk about the development of the modern armaments industry and arms races as they played out in the era before the Second World War. We will explore models of conflict and peace that have defined debates about international relations for the past two hundred years, and we will see how these ideas influenced international competition, alliance systems, the establishment of the League of Nations, interwar appeasement, and the foundation of the United Nations. We will think about wartime dynamics, spending time examining the changing ideals of war and relating these trends to technological development and growing industrial capacity on the one hand, and changing social and political attitudes on the other hand. We will seriously engage the topic of the relationship between culture and war by reading many types of sources, by examining images and films and even architecture, and by listening to radio addresses and viewing newsreel footage. In addition to discussing battles in the European theater and exploring the experiences of the soldiers in battle, we will think about the impact of war on civilians and the role of civilians during war, in resistance and in collaboration. We will talk about the origins and experience of the Holocaust, and about guilt, responsibility and memory. Throughout the

---

In this course, we will survey the causes, conduct and conclusion of World War II in Europe. We will emphasize such topics as nationalism, racism, and propoganda and their roots in the nineteenth century. We will talk about the development of the modern armaments industry and arms races as they played out in the era before the Second World War. We will explore models of conflict and peace that have defined debates about international relations for the past two hundred years, and we will see how these ideas influenced international competition, alliance systems, the establishment of the League of Nations, interwar appeasement, and the foundation of the United Nations. We will think about wartime dynamics, spending time examining the changing ideals of war and relating these trends to technological development and growing industrial capacity on the one hand, and changing social and political attitudes on the other hand. We will seriously engage the topic of the relationship between culture and war by reading many types of sources, by examining images and films and even architecture, and by listening to radio addresses and viewing newsreel footage. In addition to discussing battles in the European theater and exploring the experiences of the soldiers in battle, we will think about the impact of war on civilians and the role of civilians during war, in resistance and in collaboration. We will talk about the origins and experience of the Holocaust, and about guilt, responsibility and memory. Throughout the

In October 1917 a radical party of Russian Marxists launched one of the greatest experiments of the twentieth century: building the first socialist state in human history on the vast territory that was once the Russian Empire. They hoped to build a society where everyone would give (according to his ability) and get (according to his need.) For over seventy years people all over the world watched the Soviet experiment, some with fear, and some with admiration. This unprecedented challenge to capitalism and liberalism defined the twentieth century in many ways, and even though the Soviet experiment failed, its repercussions are still felt today.

Over the course of the semester, we will reconstruct the Soviet experiment. We will see its finest moments, from the creation of the world's largest industry to the victory over Nazi Germany to the launching the first man in space. But we will also witness the most tragic episodes: the Civil War, the labor camps and the show trials. A variety of reading, video and audio material will guide you from the revolutionary days of 1917 to the collapse of the Soviet system in 1991 and help you develop understanding of historical processes. You will learn to analyze historical debates and formulate your own

This is an introductory survey course in the political and cultural history of modern Southeast Asia from 1815 through 1978 or roughly from the growth of European colonialism within the region through the end of the Khmer Rouge regime in Cambodia. It will emphasize the expansion of European influence in the political and economic spheres, the growth of nationalism, and the process of decolonization in Southeast Asia. It will also focus on the new political and cultural forces that transformed the region over the course of the 19th and 20th centuries.

Latin America is a region of great cultural, ethnic, geographic, and economic diversity sharing a common history of colonialism that continues to matter today. This course explores the unfolding and collapse of a new social order under Spanish rule, from the sixteenth-century Conquest through the independence wars of the early nineteenth century. Topics include the impact of Spanish conquest and colonialism on native societies; religion and the Catholic Church; race relations and mestizaje (race mixture); gender and power; resistance and rebellion; the crisis and collapse of the Spanish colonial

order; and the legacies of colonialism. Documents from the period will form the core of our discussions and provide the basis for critical thinking and imaginative exploration.

<b>Room Characteristics:</b> Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)								

This course examines the historical origins of important changes taking place in Latin America today. Those changes include: current environmental challenges and responses; the rise of racially defined black (Afro-descendent) and indigenous (Amerindian) political movements; migratory flows both within region and to the United States. Through readings, films, discussion and writing exercises, we will try to set those current events in their historical context and to think seriously about their implications for the future.

This course covers most of the essential political, social, and economic changes in the United States from Reconstruction to the present. Taking prominent public questions as the point of departure, the course is divided into three sections. The first covers the years from the 1870s through 1900 and focuses on the issues of money and class. The second section, 1900-1945, uses the issues of corporations and race to guide us through America's rise to economic preeminence, two world wars, and the Great Depression. The last sections follows the issues of anti- communism and civil rights from 1945 to the 1980s. By spending most of our time on large public issues, the course ought to provide background for more advanced history courses as well as an understanding of how and why American public life has changed.

At a moment when the United States is in danger of losing its predominant position in the world, this course asks what propelled it there in the first place. What can possibly explain its most unlikely rise? How was it, after all, that within a mere two centuries a small group of unpromising colonies, divided between witch-hunting Puritans and slave-trading tobacco growers, catapulted themselves to the brink of global capitalist hegemony? Was there perhaps something unique in the country's early history that can help us understand why America for so long was so very good at capitalism? Was it perhaps the famous Protestant work ethic? Or perhaps the colonists' love of liberty? Maybe instead their ruthlessness in dispossessing the native population of their land, and putting Africans to work on it? Perhaps it was the genius of their revolution, or the boundless drive of the immigrants who poured into the country in its aftermath? Or perhaps all of the above, and maybe something else entirely?

In recent years more and more attention has been focused on the Nazi regime and its policy of mass murder. Along with that interest, there has come a spate of questions regarding the perception and response of the Allies to Hitler. This course is an attempt to look at the situation on this side of the Atlantic before, during and after WWII. We shall explore the Holocaust in Europe, but pay attention to American policy and American policy makers such as Franklin Roosevelt in the 1930's and 40's and look at those factors which influenced America's reaction. There will be an opportunity to explore some of the issues and questions that the Holocaust raises for Americans today. In addition to selected films, there will be an opportunity to meet a survivor or child of a survivor of the camps. No prerequisite is required.

This course is an introductory survey of world history, by which is meant an overview of major processes and interactions in the development of human society since the development of agriculture some 10,000 years ago. It is a selective overview, emphasizing large-scale patterns and connections in political, social, cultural, technological, and environmental history, yet it also provides balance among regions of the world. It encourages students to apply historical techniques to issues of their own interest.

This course is an introductory survey of world history starting from the human global migration out of Africa and up to the current global age. The course presents developments that impacted on humanity as a whole, such as climate changes, environmental issues, and plagues; patterns of development recurrent in different places of the world, including the emergence of agriculture, cities, and states; processes that brought different societies in contact, for example trade, migration, conquest, and cultural diffusion; and emphasizes the processes through which the entire world became interconnected resulting in a globalized world as we know it today.

In the 21st century, many challenges to public health including the HIV/AIDS pandemic, outbreaks of the zika or ebola viruses, or disparities in maternal mortality rates transcend national boundaries and trigger international responses. Matters of health and illness play a key role in how we understand our place in an increasingly interconnected world. Public policy initiatives, non-profit organizations, government agencies, and grassroots movements may all take aim at the problem of health disparities globally, but they do so, often, based on widely diverging strategies and goals. Why? How did global health take shape as the field we know in the present day? What do the historical roots of global health tell us about its potential for the future and the challenges that practitioners may face in the years to come?

This introductory course takes an interdisciplinary approach to the history of global public health, exploring wide-ranging episodes that shaped the field between the late 19th century and the present. We will discuss the changing goals of public health, particularly ideas about eradication, vaccination, and preventive health as they lead us to think about how people, environments, and causes of illness are understood and defined. We will explore the

<p>This course will acquaint students with the remarkably long, diverse and widespread use of strategies of terror to advance political, economic, religious and social agendas. Our analysis will focus upon terror from below, that is terror by nonstate actors; will range from ancient Greece to the present; and will touch upon every inhabited continent. Using examples from many societies, we will discover that the human motivations for terrorist acts have changed little, but that their expression has changed a great deal, from the days of the Spartacus slave revolt, to the calculated terror of the Algerian revolution, to the media-centered "madmen strategy" of al-Gaeda and ISIS. Our organization will be roughly chronological, and will be combined with a typology of different kinds of terrorism. This inherently comparative approach will enable us to make this a true world history course, moving with ease from place to place, movement to movement, while still having a solid temporal and analytical framework to keep the material coherent.</p>

This is a writing course for history majors focused on the Holocaust in Eastern Europe. Students will read a series of essays and books analyzing various aspects of the Holocaust in Eastern Europe, such as Jewish society on the eve of the war, Nazi occupation, local fascism, resistance to Nazism, and communist and post-communist historiography about the Holocaust. Visual materials and primary sources will also be shown and/or assigned. Students will prepare to discuss these materials and write two short analytical essays. They will also identify a research topic and methodology and write a 10-12 page paper on some aspect of the Holocaust in Eastern Europe for which they can use primary sources. The term paper will require several steps and a re-write. Prerequisite(s): Some knowledge of 20th century Europe.

HIST 1000 1200 16737 CAPSTONE SEMINAR Seminar 3

**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

#### Black Women's Intellectual History

Black women's ideas are often underrepresented, and sometimes excluded, from mainstream historical narratives. This course provides an important corrective by centering the historical contributions of Black women intellectuals in the United States, Africa, Latin America and the Caribbean. Beginning in the eighteenth century and moving through the 1970s, the course explores the individual and group contributions of Black women intellectuals to national and global politics, racial ideologies, social justice movements and popular culture. Drawing on primary and secondary sources, including newspaper articles, essays, pamphlets, poetry, songs, and works of fiction, the course uncovers the work of Black women intellectuals from all walks of life. While we will examine the significant historical contributions of key figures such as Ida B. Wells, Anna Julia Cooper, and Coretta Scott King, the course will also uncover many lesser-known Black women intellectuals, both formally educated and self-taught. Key course themes include race, gender, class, sexuality, religion and internationalism. Assignments include a primary source analysis, a presentation, and an argument-driven research paper of approximately 15 pages.

---

HIST 1001 1030 18090 INTRODUCTORY SEMINAR Seminar 3

**Bldg:** Wesley W Posvar Hal**Room:** 03701 **Days:** M **Time:** 10:00 - 12:25 **Instructor:** Roege,Pernille

**Class Enrl Cap:** 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 10 **Class Wait Tot:** 0 **Class Min Enrl:** 0

**Attributes:** Capstone Course, Writing Intensive Course (WRIT), African Studies, European and Eurasian Studies, Russian & East European Studies

**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course introduces History majors to the historian's craft. Students will learn how to analyse primary and secondary sources (identify key arguments, evaluate use of evidence), assess historiographical debates, and develop their writing skills. To that end, the course will focus on the European Enlightenment as an intellectual and cultural movement, in and above national contexts. Assignments include the writing of several shorter essays on enlightenment topics (such as natural law, government reform, religious tolerance, political economy, race and gender, colonialism) and on historical interpretations (high Enlightenment, low Enlightenment, Enlightenment/s, the counter-Enlightenment). A longer research paper is due at the end of term. In-class revision and discussion of students' written work form an important part of the course.

---

HIST 1001 1031 30469 INTRODUCTORY SEMINAR Seminar 3

**Bldg:** Wesley W Posvar Hal**Room:** 03501 **Days:** Tu **Time:** 10:00 - 12:25 **Instructor:** Finley,Alexandra J

**Class Enrl Cap:** 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 10 **Class Wait Tot:** 0 **Class Min Enrl:** 0

**Attributes:** Capstone Course, Writing Intensive Course (WRIT), African Studies

**Room Characteristics:** PeopleSoft - Scheduled (PS)(1)

This course introduces History majors to the art and science of history. Students will learn how to locate, evaluate, and analyse primary sources, identify and assess historiographical debates, and develop their skills as a writer. With these goals in mind, the course considers the history of "Vast Early America" by looking at the colonial histories of the Americas through a global lens. Considering the "vast" history of Early America asks students to look beyond national and imperial boundaries to consider the diverse and intertwined cultures and economies of the Americas from the sixteenth through eighteenth century. Topics of discussion range from the witchcraft crises of the seventeenth century to the Creole culture of French and Spanish Louisiana to the global history of the plantation complex. Throughout, the class asks students to think critically about the construction of racial and gender ideologies and the legacies of such discourse for today.

Students will consider the ways historians have researched and written about the history of early America, including use of sources, methodology, and scope. Students will then conduct a short research paper of their own using the framework they think is best suited for writing about this topic of history. Class sessions will be oriented towards this goal, comprising workshops in writing, editing, peer review, and research skills.

Medieval is often used as a byword for brutality and backwardness; in fiction and film, the European Middle Ages are frequently a locus of chivalry, sorcery, and grime. This course will interrogate the reputation of the Middle Ages in modern culture by examining a variety of primary sources from medieval western Europe as well as scholarly literature on several historiographical problems of the Middle Ages, including Crusade ideology; chivalry and gender roles; and race, ethnicity, and toleration. We will also consider these issues as portrayed in modern fiction, film, and television, and students will contribute to the debate about medievalism and the uses of the Middle Ages through several short papers.

This course examines the history of nationalism, the making of ethnicity, and the nation-state. The course provides an overview of theoretical approaches, applicable both to historical and to more recent nationalist challenges in Europe. We will place particular emphasis on changing national and regional identities in Europe, comparing the development of nationalism in Western European countries such as France or Germany with Eastern European developments in the Russian and Habsburg Empires and its successor states. The course examines the wave of ethnic nationalism in Eastern Europe after the dissolution of Yugoslavia and the Soviet Union. Finally, we will explore new trends of populist nationalism and the rise of right-wing nationalist extremism in the wake of the refugee crisis and Brexit.

Pre-knowledge in European history is advantageous but not required. This class can be taken by students of all levels, including First-Year students.

<p>Is Serena Williams the greatest tennis player of all time? Is the US Soccer Team the best in the world? Do your answers require gender qualifiers? Often, within the world of sport, women athletes are considered inherently inferior, and thus incomparable to their male counterparts. In this course, we will examine the roots of this perceived inequality and focus on women's efforts to change public attitudes towards their athletic achievements through primary and secondary sources, documentaries, film, and oral history. We will also pay close attention to the ways that inequality functions among women athletes; why Venus and Serena are treated differently than Maria Sharapova. Though at the professional level, women are far from total equality in sport, and this course will document the progress made, struggles along the way, and the obstacles that remain. Finally, we analyze the relationship among gender, sexuality, and sport, and consider the ways that sport has the potential to reinforce or undermine heteronormality, as well as conventional concepts of masculinity and femininity.</p>

<p>This course surveys the history of sport, focusing primarily on the twentieth and twenty-first centuries. Its emphasis is on the changing nature and meaning of sport. It tackles several questions, including why and how sport evolved from a community pastime to today's corporate money ball, what sport has meant to people in different societies and epochs, and what roles race, gender, and the media have played in sport. We will look at sport in settings that range from baseball in the Caribbean to football in American Samoa, and rugby in South Africa, as well as focus on the role of sport in Pittsburgh.</p>

Food in History will examine food culture and the intersections between gender, race, class, and food. In this course, we will take a close look at different foodways, and examine the emergence of global food markets in the 19th and 20th centuries. Lectures, discussions, and media will focus on diverse interpretations of the role that food plays in the global economy as well as in a variety of global cultures, and the connections between food and identity in the modern world. Opportunities for tasting will be announced in class.

Migration has shaped the European landscape for centuries. In this course we will deal with migration in Europe's past and present, from the early modern period until today, with a special focus on Germany and its neighbors. In the seventeenth century, German sovereigns invited persecuted Huguenots from France to settle in their territories. In the nineteenth century, hundreds of thousands of Europeans left for the Americas for either economic or political reasons. The twentieth and twenty-first centuries saw a veritable mass migration into Western Europe. In the 1940s, millions of ethnic Germans had to leave their homelands in Eastern Europe, resettling in the West. In the 1960s and 1970s, so-called guest workers migrated into Western European countries, thoroughly changing the cultural landscape. The recent arrival of hundreds of thousands of refugees is thus only the latest example of a long tradition in the continent's history. In class, we will not only focus on people's motivations to resettle. We will also look for similarities and differences while comparing historical events with the situation in Europe today. Pre-knowledge in European history is advantageous but not required. This class can be taken by students of all levels, including First-Year students.

"The course will examine the French Revolution in its various geographical locations: from Paris and Versailles, to the provinces in France, to Europe and the wider world. It will explore how the reception and the impact of the French Revolution depended on the particular traditions, social constitutions, and economic developments of the places through which it travelled. Based on a cross-regional and cross-national approach, the course will also assess the values and problems of existing interpretations of the French Revolution (Marxist, social, political, cultural, and global interpretations). The reading list combines both primary and secondary sources (in English translation)."

**Combined Section ID:** 0847(PS 1326/HIST 1446) - PS 1326(#28074)

This upper-level course compares the political, economic, and social development of East Asian societies from the 1950s to today, with a focus on Japan, South Korea, and China. We focus on the political circumstances that have taken each country down the path it has taken, and how these paths now shape the future prospects of each country as well as that of East Asia as a region. While we will take international factors and global forces into account, the focus of this course is largely domestic.

The first half of the course will focus on country-specific historical studies, tracing the development path each country has taken in the post-war period. Some common themes repeat themselves in each of the country case studies: the role of the state, the interaction between domestic and international factors, the relationship between bureaucrats and politicians, and the development of various institutions. Other topics and readings highlight national specificities such as political regime type, revealing unique circumstances that differentiate the experiences of one country from another.

HIST 1471 1010 31283 WATER IN CENTRAL EURASIA Lecture 3

**Bldg:** Cathedral of Learni **Room:** 00337 **Days:** MW **Time:** 15:00 - 16:15 **Instructor:** Staff

**Class Enrl Cap:** 35 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0

**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course will introduce undergraduate students to debates around the very constitution of "Central Eurasia," as a set of topographical markers (the Aral Sea Basin); as a set of five post-Soviet nation-states; as a larger geographic expanse that stretches from southern Russia to northern China); as a distinct site of recurrent environmental challenges (desertification, cotton production, irrigation); and as a cultural field of nomad and settler cultures. Relying on an interdisciplinary selection of key texts, the course lays the groundwork for a later, more in-depth examination of two core assertions for the region: 1) water is power; and 2) water management determines, for better or worse, human mobility, epidemics, geopolitical rivalries and peaceful exchange, whether commercial, cultural, or technological.

<b>Room Characteristics:</b> Media - DVD/Blue-ray(1), (1), Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)							

This course examines the historical and contemporary relations between the United States and Latin American countries. After a brief historical overview of U.S. foreign policy toward Latin America, we will explore various themes central to U.S.-Latin American relations. Topics include the impact of U.S. imperial rule; revolutionary challenges to U.S. hegemony; defending national security, democracy, and human rights; the "war on drugs"; economic and cultural exchanges; and Latin American migration to the United States.

HIST	1611	1070	17267	AMERICAN REVOLUTION 1763-1791	Lecture	3	
<b>Bldg:</b> Benedum Hall		<b>Room:</b> 00G37	<b>Days:</b> TuTh	<b>Time:</b> 11:00 - 12:15	<b>Instructor:</b> Frykman, Niklas E

<b>Room Characteristics:</b> Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)							

This course offers an in-depth examination of the American Revolution, from the first rumblings of colonial discontent in the early 1760s through to the creation of an independent nation-state under a new federal government in the 1790s. In its approach, the course follows Carl Becker's famous observation that the Revolution was both a question of home rule, as well as one of who should rule at home. In other words, it will treat the Revolution both as a war for independence whose causes and consequences unfolded within a broad geopolitical context, and as a violent social upheaval whose outcome determined the relative division of power between various social groups within the new nation.

HIST	1625	1035	26873	HISTORY OF THE AMERCN FRONTIER	Lecture	3	
<b>Bldg:</b> Cathedral of Learning		<b>Room:</b> 00142	<b>Days:</b> MW	<b>Time:</b> 13:00 - 14:15	<b>Instructor:</b> Smith, Randy Scott

<b>Room Characteristics:</b> Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)							

This course explores the development of the frontier as both a physical space and an ideological construct. Therefore we will follow the concept and reality of the frontier from the 17th century to the 21st century, with a focus on its rapid development during the 19th century. Not only did diverse and distinctive frontier societies emerge from the processes associated with settling the frontier, but concepts related to race, religion, property rights, war, ethnicity, governance, finance and speculation emerged and were contested on the frontier. Since different and conflicting interpretations of the frontier experience have emerged over time and raise important questions and perspectives about the character of American society, we will read and analyze a wide range of historical approaches to this critical concept and period in American history.

HIST	1628	1010	31282	THE BLACK WEST	Lecture	3	
<b>Bldg:</b> Cathedral of Learning		<b>Room:</b> 00139	<b>Days:</b> TuTh	<b>Time:</b> 09:30 - 10:45	<b>Instructor:</b> Roberts,Alaina Elizabeth		
<b>Class Enrl Cap:</b> 35		<b>Class Enrl Tot:</b> 0	<b>Class Wait Cap:</b> 20	<b>Class Wait Tot:</b> 0	<b>Class Min Enrl:</b> 0		
<b>Room Characteristics:</b> PeopleSoft - Scheduled (PS)(1)							

This is not your traditional American West: The cowboys are Black, the Native Americans are educated strategists, the white settlers marry into Native families, and people of Chinese and Mexican descent navigate varied economies and cultures. This course charts the nineteenth century U.S. governmental policies that created the West, and shows how the broad region was shaped and settled by a diverse group of people. Though we will examine a multicultural group of colonists and Indigenous peoples, our focus is on people of African descent. Looking at the West as a space of the African Diaspora provides an opportunity to center African Americans, as well as other non-white groups as architects of our modern-day culture and society.

HIST	1653	1085	30478	COLD WAR AMERICA IN THE WORLD	Lecture	3	
<b>Bldg:</b> Cathedral of Learning		<b>Room:</b> 00337	<b>Days:</b> MW	<b>Time:</b> 16:30 - 17:45	<b>Instructor:</b> Smith,Randy Scott

This course explores the impact of the Cold War on American society. (1945- 1990] It will explore how the division of the world into two hostile and well-armed ideological camps shaped American post-war politics and culture. Post-war America was a world full of paradox. America's economic and military dominance allowed it to be a land of expanding home ownership, a booming consumer culture, shopping malls, housing tracts, the land of the automobile: an upwardly mobile society, where want and hardship seemed to have been finally vanquished. These same optimistic people, however, lived under the threat of nuclear annihilation and communist infiltration. Fear, not only tore at the social fabric, but also created an alphabet soup of surveillance, control and suspicion of fellow Americans: the N.S.A, C.I.A. the F.B.I. and municipal police Red Squads. African Americans fought a long struggle for civil rights that embraced movements from the peaceful civil disobedience of Martin Luther King Jr. to the Black Nationalist Marxism of the Black Panthers. The pivotal event that slowly drained American confidence and optimism was the long, brutal war in Southeast Asia. The Vietnam War and how Americans

**Attributes:** SCI Polymathic Contexts: Soc/Behav. GE. Req.

**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This class considers the early history of gender and sexuality in what became the United States. We will examine how factors such as race, class, and ethnicity influenced men's and women's identities and day-to-day lives from the seventeenth century to 1865. We will also consider how definitions of masculinity and femininity have changed over time, looking at the ways in which science, the law, religion, and culture have influenced personal and popular conceptions of gender and sexuality. Throughout the semester, we will hone our critical thinking skills and develop analytical tools to better understand the history of gender and sexuality in early America by using a variety of primary sources to identify and contextualize how ideas about gender and sexuality have changed over time. We will prioritize individual stories and personal experiences of men and women from a variety of backgrounds. We will also consider the various ways that historians tell histories of gender and sexuality to other historians, students, and the public.

This course is designed to look at the development of the Jewish community in America up to the present time. While that history is more than 350 years old, we will focus primarily on the 20th and 21st centuries. We will explore not just historical themes and developments, but also contemporary issues and perspectives. There will be a variety of classroom activities including meetings with community leaders, archival research, oral reports, films and guest speakers. In addition, as part of the American Jewish experience, we will plan a field trip to sample and/or prepare some traditional Jewish food! The aim of this course is to make each class provocative, lively, informative and relevant by raising issues and questions regarding the past, present and future of the American Jewish community. No prior experience in studying Jewish history is necessary; first-year students are welcome.

The word plastic derives from the Greek word plassein, which means {to mold or to shape.} This course looks at the history of how, within almost a single generation, new modes of consumption, production, bodily manipulation and credit become such a universal part of everyday life that they frame interactions throughout the entire planet. How can we understand the rise of mass consumption in the postwar era? What kinds of changes need to take place to reconstruct how Americans think of themselves, their wages, their material possessions, and the environment in the time period from the end of the 19th Century to the end of the 20th century? What are the long-term effects of this new mode of operating in the world? How does this consumption reshape our planet and what insight we can learn from the past about how we might make changes that might help us to save it?

Drugs, and ideas of what a drug is, have shaped global history since early modernity. This course will chart the emergence of modern bodies and of pharmaceutical modernity as we explore a pharmacopoeia full of global objects acquired both over-, behind-, and under-the-counter, from chocolate and Spanish Fly to Prozac and e-cigarettes. By tracing drug history through interweaving histories of music, media, fiction, poetry, and more, we will also be tracing a history of ways in which drugs have helped create ideas of what is "normal."

This course will study the history of the Mediterranean Sea, of its islands of the countries facing it, of the sea itself and commerce upon it, from 1500 to the present day. We will look at the cultures of the Middle East, Europe and the Balkans which were formed and sustained by the sea, at the politics and wars of the nations and empires bordering it, at the Mediterranean as a world unto itself, and as a link and connector to a wider world. We will examine the economic world of the Mediterranean, from agriculture to oil. We will look at trade and seafaring. We will try to understand the natural world of the Mediterranean, the sea itself, its currents and the animals that dwell in its depths, the mountains and the flora and the climate along its shores. We will look at the present-day Mediterranean, including its status as a playground for tourists, and a pathway for migration from East to West.

In the end, we will be answering one particular question: Is there such a thing as a Mediterranean culture, one which transcends Christianity and Islam, transcends national rivalries, transcends race and ethnicity? Has the Mediterranean, and have the peoples bordering it, created a discrete, enduring and in any sense especially admirable or worthwhile kind of human experience? That will be for you to decide.

Open to all students, this course is the new introductory core course for the forthcoming Mediterranean Studies Certificate program. Information about the

This course serves as the annual capstone course for Global Studies certificate students and others writing BPhil or honors theses on global topics, past or present. Taught by the UCIS Visiting Professor in Contemporary Global Issues (GSC post-doc), the course is a workshop for student writing complemented by readings selected to initiate productive conversations that link the students' various research projects and that locate those projects in the appropriate historical, social, and cultural context(s). It is designed, generally speaking, to provide students with dedicate hours in their work weeks to devote to thesis writing, to help students frame and contextualize their research through renewed engagement with literature on relevant topics, and to ensure that thesis projects are well connected to broader global processes.

HIST 1906 1010 27506 ATLAS INTERNSHIP Internship 3

**Bldg:** TO BE ARRANGED **Room:** TBA **Days:** Th **Time:** 15:00 - 17:00 **Instructor:** Mostern,Ruth Ann

Grunewald,Susan C

**Class Enrl Cap:** 8 **Class Enrl Tot:** 0 **Class Wait Cap:** 8 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Attributes:** Undergraduate Internship

The Digital Atlas Design Internship supports student research by teaching interns how to use digital tools and methods to explore the global past. Students manage a semester-long independent research project using an interactive, public-facing platform that utilizes GIS and web design skills gained during the internship. Students engage with both world history and digital humanities while developing a spatial database about a topic of their choosing. Experience with digital methods or GIS is not necessary, and students can receive publication credit for their work. To learn more about the Digital Atlas Design Internship, please visit <https://www.worldhistory.pitt.edu/digital-atlas-design-internship>. You can also view past internship projects by visiting our project gallery at <https://www.worldhistory.pitt.edu/projects>.

HIST 2000 1010 25291 PROFESSIONALIZATION SEMINAR Seminar 1

**Bldg:** Wesley W Posvar Hal**Room:** 03701 **Days:** Tu **Time:** 17:00 - 17:50 **Instructor:** Gobat,Michel Charles

**Class Enrl Cap:** 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course is designed to look at the development of the Jewish community in America up to the present time. While that history is more than 350 years old, we will focus primarily on the 20th and 21st centuries. We will explore not just historical themes and developments, but also contemporary issues and perspectives. There will be a variety of classroom activities including meetings with community leaders, archival research, oral reports, films and guest speakers. In addition, as part of the American Jewish experience, we will plan a field trip to sample and/or prepare some traditional Jewish food! The aim of this course is to make each class provocative, lively, informative and relevant by raising issues and questions regarding the past, present and future of the American Jewish community. No prior experience in studying Jewish history is necessary; first-year students are welcome.

---

HIST 2012 1200 18779 GRADUATE WRITING SEMINAR Seminar 3

**Bldg:** Wesley W Posvar Hal**Room:** 03701 **Days:** M **Time:** 13:00 - 15:25 **Instructor:** Warsh,Molly Annis

**Class Enrl Cap:** 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This seminar provides graduate students, particularly MA students, with the opportunity to design, research and write a research paper based on primary sources that will form the basis for the research paper that is required for one's Master's Degree. Students will work with the instructor and another faculty member who is a specialist in their area of interest to design the topic and to discuss issues relating to researching the paper. Students are expected to write a proposal explaining the topic and justifying its importance; and to submit periodic drafts.

---

HIST 2400 1070 30485 APPROACHES TO ASIAN HISTORY Seminar 3

**Bldg:** Thackeray Hall **Room:** 00325 **Days:** W **Time:** 14:00 - 16:25 **Instructor:** Adal,Raja

**Class Enrl Cap:** 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course approaches Asia not as a geographic place but as a malleable object of study. In exploring ¿Asia,¿ each week will adopt a different guide. What happens to our conception of Asia, for example, if we adopt Confucianism as our guide? Or early modern empires? How about trade networks, religions, Pan-Asian ideologies, or Asian diasporas? What happens if we think of Asia in terms of its physical environment and how have the ways in which we understand environmental history changed our understanding of what Asia might, or might not, consist of? In this way, this course will explore a multiplicity of Asias, each of which is created as much by Asia as an object of study as by the position from which it has been approached. While the first hour of each class will discuss these multiple Asias through a critical reading of recent scholarship, the second hour will turn to a study

of the primary sources used for writing about Asia. Students will discuss how textual sources, visual sources, and datasets provide different understandings of Asia, what each source reveals, and what each obscures. Special attention will be paid to how large datasets can provide cross-national and global perspectives for understanding Asia. Students will learn to analyze such datasets using digital tools and will practice publicizing their results using data visualizations and blogs. What datasets could help us map languages in Asia? How have scholars used big data to trace Confucian networks?

---

HIST	2530	1100	30486	TRANSNATIONAL LABOR AMERICAS	Seminar	3
<b>Bldg:</b> Wesley W Posvar Hal		<b>Room:</b> 03701	<b>Days:</b> M	<b>Time:</b> 18:00 - 20:25	<b>Instructor:</b> Putnam,Lara Elizabeth	
<b>Class Enrl Cap:</b> 15	<b>Class Enrl Tot:</b> 0	<b>Class Wait Cap:</b> 0	<b>Class Wait Tot:</b> 0	<b>Class Min Enrl:</b> 0		
<b>Room Characteristics:</b> PeopleSoft - Scheduled (PS)(1)						

This seminar explores the transnational history of labor in North America, Latin America, and the Caribbean across the 19th and 20th centuries. We will be thinking critically about work of many kinds and international connections of many kinds, and asking how they have shaped each other, and what the societal consequences have been.

How have geopolitical shifts and international capital flows remade laboring lives, working communities, and regional economies across the Americas? How have the actions of workers and potential workers shaped distant investors; options and profits? What role have ideologies of race and gender played in labor control;and labor struggle? To what extent have different nation-states been able to impact outcomes within this supranational system? How different is the ;globalized; present from this past?

In addition to a series of important recent case studies in the transnational history of labor, we will explore key scholarly debates regarding scope, scale, and method in border-crossing historical research. This seminar should be of use to any student interest in paradigms for transnational research, in the historical discipline or beyond.

---

HIST	2805	1060	30487	HISTORY OF SEXUALITY	Seminar	3
<b>Bldg:</b> Wesley W Posvar Hal		<b>Room:</b> 03501	<b>Days:</b> Tu	<b>Time:</b> 13:00 - 15:25	<b>Instructor:</b> Klots,Alisa Rostislavovna	
<b>Class Enrl Cap:</b> 15	<b>Class Enrl Tot:</b> 0	<b>Class Wait Cap:</b> 0	<b>Class Wait Tot:</b> 0	<b>Class Min Enrl:</b> 0		
<b>Room Characteristics:</b> PeopleSoft - Scheduled (PS)(1)						

This course is intended as a general introduction to the historiography on the history of sexuality. Students will familiarize themselves with the most influential works from the previous decades as well as recent significant publications in the field so that students get a sense of the evolution of history of sexuality as a field. The readings are organized thematically. There will be no particular geographical focus so students will have the opportunity to read about history of sexuality in different contexts. Students will also propose themes/readings for the last two sessions so that the course also reflects their own research interests.

---

HIST	2902	1010	10508	DIRECTED STUDY	Directed Studies	1 - 12
<b>Bldg:</b> TO BE ARRANGED		<b>Room:</b> TBA	<b>Days:</b> TBA	<b>Time:</b> 00:00 - 00:00	<b>Instructor:</b> Andrews,George Reid

The University Honors College History of Sports course focuses on the emergence and evolution of sport during the twentieth and twenty-first centuries. It looks at the changing nature and meaning of sport, tackling why and how sport evolved from a community pastime to today's corporate money ball, what sport has meant to people in different societies and epochs, and what roles race, gender, and the media have played in sport. It will also look at the global

consequences of sport's current model that of global capitalism on youth, play, and the meaning of sport. It will do so by looking at baseball academies in the Caribbean, football academies in Africa and Europe, junior hockey in Canada, and high school basketball and football in the United States and the South Pacific. The seminar format permits greater student involvement, research opportunities, and participation/discussion. The course asks you to address these questions and topics in seminar sessions as well as in writing about them. No prerequisites but come ready to explore.

**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

In this course, we will consider the diverse experiences of children and youth in the United States from the mid-nineteenth century to the present day. We will examine how race, class, gender, sexuality, and citizenship informed children's agency and experience, and were in turn influenced by the imposition of ideals of childhood through government policies, medical standards, and educational norms. Special consideration will be given to youth movements, and the role of children and youth in the civil rights movement and other forms of political and social activism. With a few exceptions, the course will offer a consideration of a topic in each decade since the 1860s.

**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course explores the history and present of health and healing in sub-Saharan Africa from the era of the trans-Atlantic slave trade to the present day. We will consider disease, illness, and treatment from diverse perspectives, including the international organizations and state institutions promoting improvements in global public health, the African states and communities coping with illness and health interventions, and the individuals whose personal histories and experiences shed light on the day-to-day impact of the interest of so many different stakeholders. Taking a continent-wide approach to broad trends that have impacted health, we will also examine specific cases in their regional and national contexts. Ranging from pre-colonial healing traditions to livestock epidemics in the late 19th century to the battles against polio and Ebola in the early 21st century, we will pursue the social, political, and economic meanings of health and healing in Africa and examine how they have changed over time.

In seeking to understand both change and continuity in Africans' experiences of illness and misfortune, we will pursue several lines of inquiry, including: within what different social, political, economic, and cultural contexts can health interventions be understood? How have historical processes shaped

<p>The Italian physicist and astronomer Galileo Galilei (1564-1642) was the decisive figure in the rise of modern science. First, he ushered in a new era in astronomy when he aimed a 30-powered telescope at the sky in 1610. Second, he revolutionized the concept of science when he argued that the book of nature is written in the language of mathematics. Finally, he astounded the theologians, who eventually condemned him to life imprisonment, when he claimed that the scientist's search for the truth cannot be constrained by religious authority. This course will study Galileo in the broader intellectual, social, and religious context of early modern Europe.</p>

The aim of this course is to provide a broad survey of some the most fundamental and general questions in philosophy of science, and to cultivate your ability to think through these difficult questions in a clear and critical way. The course is divided in three main parts. In the first part, we explore the questions: "What is science? Is there a valid scientific method?" We tackle these questions by looking at the problem of induction, some classic answers to it, and following developments in confirmation theory. In part two, we investigate the questions: "Is science aiming at true theories, or does it only aim at theories that are consistent with observable phenomena?" We critically assess three main philosophical views surrounding this issue. Finally, in part three, we concentrate on more specific questions such as: "What is a scientific explanation?" and "What is a law of nature?" We look, once again, at traditional answers and more recent attempts to answer those challenging questions. Throughout the course we will be concerned with applications of these general concerns to particular issues in the physical sciences, the life sciences, and the cognitive sciences.

This course will focus on central topics in philosophy of science including explanation, confirmation, theory change, the meaning of theoretical terms, and scientific realism. We shall combine a reading of some classic texts with more recent work.  
Prerequisite(s): PLAN: Philosophy (PHD) or History and Philosophy of Science (PHD)

This course will focus on counterpoint, or the layering of simultaneous melodies. The goal is to develop a sense of music in both "vertical" (harmonic) and "horizontal" (melodic) dimensions. The first unit covers on species counterpoint, following a regimen developed by Johann Fux in the early eighteenth century and practiced by composers like Beethoven, Mozart, and Haydn. The second unit focuses on 4-part chorale-style writing, which may be familiar to you from high school music theory classes. This unit will help us put the contrapuntal considerations of species counterpoint into a tonal context, and allow us to work with the richness of triadic harmony.

Course Description for Fall 2201:  
 The Music Since 1945 seminar this semester will focus on Experimental Music. Each student will be expected to perform and analyze seminal works of the experimental tradition as well as the works of composers in the class. Students must be prepared to play an instrument (though not necessarily at a professional level) in addition to composing exercises for in-class exploration. Course readings will be drawn from primary sources by composers and performers including John Cage, Morton Feldman, Earle Brown, Alvin Lucier, Christian Wolff, Pauline Oliveros, Lamonte Young, Anthony Braxton, and Yoko Ono. There will be weekly reading, listening and creative assignments, as well as numerous guests with relevant research and artistic experiences. This course is open to music majors.

Undergraduate students wishing to enroll in this course will need permission from the instructor, Amy Williams (amywill@pitt.edu) before being issued a permission number.

Course Description for Fall 2201:  
THE SOUNDS OF ROMANTIC COMEDY

Sometime between Ernst Lubitsch's The Shop Around the Corner (1940) and Nora Ephron's You've Got Mail (1998), romance changed in the United States. Where class and wealth used to be deciding factors for romantic love, there now emerged the concept of the soulmate, who could be anyone. In this course, we will watch American romantic comedies of the last 100 years, paying particular attention to how the development of the soundtrack has changed what love sounds and feels like.

Students will develop skills in closely analyzing sound and image in film, critically interpreting popular culture in relation to broader events in society, and thinking about the relation between music, identity, and politics. In particular, we will together develop answers to the following questions: how did capitalism, social justice movements, the changing nature of work, and other cultural transformations affect what people expected from intimate union? What

Course Description for Fall 2201:

This course will examine scholarly works that focus on gender issues in relation to a wide variety of musical genres in the world. What aspects of gender have music scholars problematized in their works? Are there any changes in their scope and focus on the subject over the years? How are gender issues manifested in music of different cultures in the world? How have other related disciplines such as anthropology, cultural studies, and literary criticism influenced on music scholars' works on gender? We will explore these issues through readings, recordings, and videos. By the end of the course, students will have a greater awareness of the ways in which various music genres helps shape each society's views on gender.

Course Description for Fall 2201:

This course provides an introduction to composing electronic music. It includes instruction in MIDI and audio sequencing, synthesis, sampling, effects, and other digital audio concepts. Course-work will primarily involve a series of creative projects utilizing a variety of techniques. This section of Electronic and Computer Music 1 will focus on composing music in the University of Pittsburgh's electroacoustic music studio.

This class has an additional fee. For more information go to [www.registrar.pitt.edu](http://www.registrar.pitt.edu), and click on Service Areas, then Special Course Related Fees.

Course Description for Fall 2201:

This course provides an introduction to composing electronic music. It includes instruction in MIDI and audio sequencing, synthesis, sampling, effects, and other digital audio concepts. Course-work will primarily involve a series of creative projects utilizing a variety of techniques. This section of Electronic and Computer Music 1 will focus on composing music in the University of Pittsburgh's electroacoustic music studio.

This class has an additional fee. For more information go to [www.registrar.pitt.edu](http://www.registrar.pitt.edu), and click on Service Areas, then Special Course Related Fees.

Course Description for Beat-Making, Fall 2201:

This course provides an introduction to composing electronic music. It includes instruction in MIDI and audio sequencing, synthesis, sampling, effects, and other digital audio concepts. Course-work will primarily involve a series of creative projects utilizing a variety of techniques.

This section of Electronic and Computer Music 1 will focus on using laptop software to create songs in various contemporary beat-oriented styles. Note: students will be required to bring their own laptops to each class.

This section of Electronic and Computer Music 1 will meet in the Cathedral of Learning and will NOT meet in the electronic music studio.

A laptop (mac or PC) must be brought to every class. Required digital-audio-software will be announced at a later time.

Creative Arts Ensemble is a 3 credit, high-level performing and research ensemble that unifies musicians, poets/spoken word artists, dancers/movement artists and/or visual artists/vjs. In this course, musicians and other expressive artists will form a community and be encouraged to develop authentic languages of expression through multi-arts performance and collaboration. Skilled musicians are welcome from a variety of backgrounds, including but not limited to: orchestra, jazz, rock, blues, creative improvisation, electronic music, popular music and world music. Undergraduate and graduate students will explore a wide range of improvisation-based compositional forms in an ensemble setting with the goal of integrating authentic concepts for performance.

Course Description for Fall 2201: THE SOUNDS OF ROMANTIC COMEDY  Sometime between Ernst Lubitsch's The Shop Around the Corner (1940) and Nora Ephron's You've Got Mail (1998), romance changed in the United States. Where class and wealth used to be deciding factors for romantic love, there now emerged the concept of the soulmate, who could be anyone. In this course, we will watch American romantic comedies of the last 100 years, paying particular attention to how the development of the soundtrack has changed what love sounds and feels like. Students will develop skills in closely analyzing sound and image in film, critically interpreting popular culture in relation to broader events in society, and thinking about the relation between music, identity, and politics. In particular, we will together develop answers to the following questions: how did capitalism, social justice movements, the changing nature of work, and other cultural transformations affect what people expected from intimate union? What

Course Description for Fall 2201:

This course will examine scholarly works that focus on gender issues in relation to a wide variety of musical genres in the world. What aspects of gender have music scholars problematized in their works? Are there any changes in their scope and focus on the subject over the years? How are gender issues manifested in music of different cultures in the world? How have other related disciplines such as anthropology, cultural studies, and literary criticism influenced on music scholars' works on gender? We will explore these issues through readings, recordings, and videos. By the end of the course, students will have a greater awareness of the ways in which various music genres helps shape each society's views on gender.

This section of Electronic and Computer Music 1 will meet in the Cathedral of Learning and will NOT meet in the electronic music studio.

A laptop (mac or PC) must be brought to every class. Required digital-audio-software will be announced at a later time.

Course Description for Beat-Making, Fall 2201:

This course provides an introduction to composing electronic music. It includes instruction in MIDI and audio sequencing, synthesis, sampling, effects, and other digital audio concepts. Course-work will primarily involve a series of creative projects utilizing a variety of techniques. This section of Electronic and Computer Music 1 will focus on using laptop software to create songs in various contemporary beat-oriented styles. Note: students will be required to bring their own laptops to each class.

Course Description for Fall 2201: The Music Since 1945 seminar this semester will focus on Experimental Music. Each student will be expected to perform and analyze seminal works of the experimental tradition as well as the works of composers in the class. Students must be prepared to play an instrument (though not necessarily at a professional level) in addition to composing exercises for in-class exploration. Course readings will be drawn from primary sources by composers and performers including John Cage, Morton Feldman, Earle Brown, Alvin Lucier, Christian Wolff, Pauline Oliveros, Lamonte Young, Anthony Braxton, and Yoko Ono. There will be weekly reading, listening and creative assignments, as well as numerous guests with relevant research and artistic experiences. Open to graduate students from all sub-disciplines who have had some prior compositional experience.

Course Description for Fall 2201: Phenomenology is a branch of philosophy devoted to human existence as embedded in the lifeworld, and it commonly deals with experience, embodiment,							

temporality, and intersubjectivity. Its insights and methods have long appealed to music scholars in many areas, and phenomenological approaches are having a renaissance of sorts in music, as elsewhere in the humanities and social sciences.

For musicologists, phenomenology has offered alternatives to a transcendent concept of the artwork, inviting us to explore performance, listening, the body, musical space, etc. as valid bases for knowledge. At the same time, phenomenological methods in musicology differ from empirical or materialist ones, including the new materialism of much sound studies. It's fair to say that each of these deals in musical or sonic reality, but...what that last word means makes all the difference.

Creative Arts Ensemble is a 3 credit, high-level performing and research ensemble that unifies musicians, poets/spoken word artists, dancers/movement artists and/or visual artists/vjs. In this course, musicians and other expressive artists will form a community and be encouraged to develop authentic languages of expression through multi-arts performance and collaboration. Skilled musicians are welcome from a variety of backgrounds, including but not limited to: orchestra, jazz, rock, blues, creative improvisation, electronic music, popular music and world music. Undergraduate and graduate students will explore a wide range of improvisation-based compositional forms in an ensemble setting with the goal of integrating authentic concepts for performance.

Human nature has long been a focus of philosophical thought. In this class we will consider several fundamental perspectives on the character and relevance of human nature, as it pertains to several important philosophical questions. For philosophers like Thomas Hobbes and Jean-Jacques Rousseau, thinking about human nature supports certain ways of structuring society and government. For thinkers like Hilary Putnam and Sigmund Freud, human nature has important implications for the ways we conceive of and study psychology and the human mind. As we will find throughout the course, human nature has been conceived in startlingly many different ways, and the very concept of a human nature can be subjected to interesting philosophical inquiry. The main object of the class will be to gain familiarity with a range of important philosophers, and a sense of the various ways the question of human nature has been approached.

<p>Western philosophy owes a great debt to ancient Greek thinkers. They were some of the first to develop principled theories about nature, reality, knowledge, ethics/morality, reason/the soul, and the human being, among other topics. Many of these ideas and arguments are still relevant today and serve as fuel for contemporary philosophy. This class will introduce you to the epistemological, metaphysical, psychological, and ethical thought of some of the most important ancient Greek thinkers, especially (but not limited to) Socrates, Plato, and Aristotle. From the beginning of term the focus will not simply be to understand the views and arguments of these thinkers, but also to critically evaluate them. In other words, we will not just be reading about philosophy; we will be doing it.</p>

In this course, we will examine a selection of ethical issues that are the subject of contemporary public debate. The course is split into four parts: social issues, like world hunger and immigration, biomedical issues, like euthanasia and abortion, environmental issues, like the treatment of animals and endangered species, and issues in business like corporate social responsibility and affirmative action. This course teaches how to rationally discuss controversial issues, critically and fairly assess differing views and logically argue for your own answers to ethical questions.

What did philosophers of the past, women and men, have to say about women's nature, moral character, education, and the roles they should play in society? How did these philosophers argue for their views? In this course we will consider women as both subject matter for, and participants in, a number of debates in the history of western philosophy from ancient Greece through the 19th century. Our reading will be selected from works by Xenophon, Plato, Aristotle, Musonius Rufus, Anna Maria van Schurman, Sor Juana de la Cruz, Marie de Gournay, Rene Descartes, Thomas Hobbes, John Locke, Mary Astell, Francois Poullain de la Barre, John Jacques Rousseau, Immanuel Kant, Mary Wollstonecraft, John Stuart Mill, and Harriet Taylor.

This course gives a broad introduction to classic and contemporary work on central questions in metaphysics and epistemology. Topics to be discussed may include: the nature of knowledge, theories of justification, skepticism, the nature of the self, time, causation, the relationship between mind and body, the existence of god, and debates between materialists and idealists.

In a variety of contexts, we attempt to persuade each other by making arguments; i.e., by providing reasons to think that some claim is true. Figuring out what to believe about a wide variety of subjects therefore requires you to be able to evaluate these arguments; to discern which are good and which are bad, and in what ways they are good or bad. Logic is the study of which arguments are good, which are bad, and why. In this course, we will learn two important logical theories, with a focus on techniques for reasoning about which arguments are good, according to those theories.

<p>The primary aim of this course is to reach a general understanding of Kant's Critique of Pure Reason. To this end, we shall examine the Critique's central logical and metaphysical doctrines, with attention to their historical context. Following Kant as he seeks to determine whether a science of metaphysics is possible, we shall consider the fundamental question he poses (¿How are synthetic a priori judgments possible?), the way of thinking he follows in answering it (the so-called ¿Copernican Revolution¿), and the crucial doctrine of Transcendental Idealism on which his answer to this question depends. A second aim of the course is to gain some familiarity with Kant's contribution to moral philosophy. The final weeks will accordingly be devoted to his Grounding for the Metaphysics of Morals, in which he undertakes an analysis of common moral knowledge with a view to reaching a formulation of its supreme principle.</p>

The aim of this course is to provide a broad survey of some the most fundamental and general questions in philosophy of science, and to cultivate your ability to think through these difficult questions in a clear and critical way. The course is divided in three main parts. In the first part, we explore the questions: "What is science? Is there a valid scientific method?" We tackle these questions by looking at the problem of induction, some classic answers to it, and following developments in confirmation theory. In part two, we investigate the questions: "Is science aiming at true theories, or does it only aim at theories that are consistent with observable phenomena?" We critically assess three main philosophical views surrounding this issue. Finally, in part three, we concentrate on more specific questions such as: "What is a scientific explanation?" and "What is a law of nature?" We look, once again, at traditional answers and more recent attempts to answer those challenging questions. Throughout the course we will be concerned with applications of these general concerns to particular issues in the physical sciences, the life sciences, and the cognitive sciences.

PHIL 2071 1010 27799 STUDIES IN ANCIENT PHILOSOPHY Seminar 3  
**Bldg:** Cathedral of Learning **Room:** 1008B **Days:** Tu **Time:** 10:00 - 12:30 **Instructor:** Whiting, Jennifer E  
**Class Enrl Cap:** 15 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0

Greek philosophers from Plato through the Stoics treated psychic structure as an important issue both in connection with the explanation of animal behavior in general and in connection with the explanation and evaluation of distinctively human forms of behavior (especially ethical ones). Some (especially later figures like Posidonius and Galen) distinguished  $\zeta$ parts $\zeta$  [merê, moria] from  $\zeta$ capacities $\zeta$  or  $\zeta$ powers $\zeta$  [dunamis] of soul and accused others of conflating the two. Talk of parts was more common in ethical contexts, such as Plato's Republic, talk of capacities or powers more common in more scientific contexts, such as Aristotle's De Anima; but concerns about unity were omnipresent, especially in connection with questions about what is required for responsible agency.

PHIL 2075 1010 28452 TOPICS IN ANCIENT PHILOSOPHY Lecture 3  
**Bldg:** Cathedral of Learning **Room:** 1008B **Days:** Th **Time:** 15:30 - 18:00 **HISTORY OF EVIL** **Instructor:** Wildberg, Christian  
**Class Enrl Cap:** 10 **Class Enrl Tot:** 0 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Attributes:** West European Studies

Discussions of moral philosophy in both antiquity and modernity typically direct their attention to reasoned conceptions of goodness, such as virtues, values, and moral duties. Whether intentionally or inadvertently, a systematic study of the corresponding, and oftentimes more richly articulated and concretely imagined, conceptions of evil are neglected. And yet it seems that one cannot very well have a clear conception of one without having a clear conception of the other.

What is more, it seems to be a most pressing and important matter to understand how precisely evil can come about. Does evil originate exclusively through human agency, or does one have to suppose physical or perhaps even metaphysical origins of moral evil? And what difference does it make to construe the origin of evil in different ways? Is evil merely the privation of goodness? What did Kant mean by 'radical evil', and why did Hannah Arendt coin the phrase 'banality of evil'?

The seminar will largely be conceived as a survey of relevant texts of all periods, such as Plato, Aristotle, the Stoics, Plotinus, Thomas Aquinas, Kant, Hegel, Nietzsche, and Hannah Arendt, to name just a few. We shall work very intensively on the interpretation of these texts and what they have to say about

The purposes of this seminar (which has very successful counterparts at other top graduate programs in philosophy) are multifold. It gives students working on dissertation projects a community of others in the same boat, it provides them with feedback on work in progress, and practice presenting their work to an audience wider than their committee. (This is important for the impression they make on the job market.) Supposing that each student admitted to candidacy makes a seminar presentation each semester, it hastens time to completion by imposing interim deadlines on the road to a completed dissertation. The seminar gives students who have been comprehensively evaluated, but not yet defended a prospectus, examples of other students who have successfully negotiated the transition. This course is offered every fall and spring.

<b>Attributes:</b> Global Studies, Undergraduate Global Health														
This course engages the interdisciplinary nature of global health by approaching the issue through the lens of the Sustainable Development Goals (SDG) developed by the United Nations. With an applied focus, the course will assist students in engaging and advocating for a community on a global health issue through a policy memo. For more information see the Global Studies web site or contact global@pitt.edu.														
PS	1556	1010	30059	GLOBAL STUDIES POP-UP COURSE	Workshop	1

"In conjunction with its semester-long series on the global legacies of 1989, the University Center for International Studies is pleased to offer students the opportunity to enroll in this 1-credit pop-up course that tracks the series. 1989 changed everything. It opened the door to German re-unification, the European Union, the enlargement of NATO, globalization, two decades of U.S. superpower status, political realignments in Latin America and Africa, and the rise of Asia. This series will explore the impact and global legacies of the Cold War thirty years after the Iron Curtain fell. Students who enroll will attend at least 10 events, one of which must be the concluding roundtable on December 5. In addition, they will write three short reflection essays."

<p>Religion and Race in America: In this course we will emphasize on how the concepts of religion and race are not stable categories and that they are mainly the object of social construction. In order to understand their complex interaction we will privilege a sociological and anthropological approach. We will see how religion, race and power are intermingled in complex loops of influence through a comparative perspective. Comparison will allow students to broaden their comprehension of the particular relationship between religion and race throughout human history and the contemporary world. In this way, in order to grasp America's particularity on this subject, we will consider various examples such as the linkage between religion and race among the West African diaspora religions in Latin America and the Caribbean.</p>

<b>Room Characteristics:</b> Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)							
<p>This course introduces students to Russian fairy tales, a fascinating and productive genre of folklore that reveals a great deal about Russian traditions and modes of thought. Taking a psychological approach to the materials, the course examines not only the tales, but also the beliefs informing the magic world of these narratives. Since the humans, spirits, and beasts populating this world are richly portrayed in Russian art, a significant component of the course will consist of visual and audio representations of figures and scenes from fairy tales. We shall examine slides of posters, paintings, book illustrations, postcards, etc., and shall listen to music based on characters, situations, and narratives drawn from the tales (e.g., extracts from Glinka, Rimsky-Korsakov, Chaikovsky, and Mussorgsky).</p>

This course is a continuation of Elementary Russian and continues the development of oral proficiency as well as the mastery of Russian grammar. At the same time, increasing attention will be devoted to the development of reading proficiency and to the writing of various types of simple texts (description, narration, summation, etc.)

This section of the Short Story will be devoted to the readings from 19th and 20th Century Russian literature. We will spend a good portion of our class sessions discussing the readings. The authors we will read range from 19th century favorites--Pushkin, Gogol, Dostoevsky, Tolstoy, and Chekhov--to 20th

century masters--Babel, Zamiatin, and Zoshchenko--right up to the most popular writers in Russia today--from Solzhenitsyn to Petrushevskaya and Tolstaya. Russians have always valued the short story as a source of wisdom and knowledge as well as entertainment and aesthetic pleasure, as a resource for understanding themselves as individuals in a complex society, as a means for analyzing social behavior and psychological relationships, and as a place for airing cultural issues and matters of political and social concern. As we read and discuss these stories, we will be asking why these authors selected the short story rather than poetry, the novel, or drama for their inventions and fantasies, philosophies, and teachings, and why and how they expressed their views and values as they did using particular forms of language, imagery, and narrative structures. We will compare Russian and American ideas and values, considering both our cultural similarities and differences. We will both discuss the shared themes expressed in these stories and try to identify their particular national stereotypes and peculiar "Russian" characteristics. We will examine common and uncommon emotions and passions, customs, and mores,

RUSS	0400	1030	10456	ADVANCED RUSSIAN 1	Lecture	3
------	------	------	-------	--------------------	---------	---

**Bldg:** Cathedral of Learning **Room:** 00239 **Days:** MWF **Time:** 12:00 - 12:50 **Instructor:** Wilson, Trevor Thomas

**Class Enrl Cap:** 20 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0

**Attributes:** European and Eurasian Studies, Russian & East European Studies

**Room Characteristics:** Media - Data Projector/Monitor(1), Seating - Moveable(1), PeopleSoft - Scheduled (PS)(1)

This course is for students who wish to improve their conversational fluency in Russian and to be trained in the written language. Sections are small and provide ample opportunity for each student to participate actively in conversation and receive individual attention. This is a third-year course.

---

RUSS	0800	1060	10928	MASTERPIECES 19THC RUSSIAN LIT	Lecture	3
------	------	------	-------	--------------------------------	---------	---

**Bldg:** Cathedral of Learning **Room:** 00129 **Days:** TuTh **Time:** 13:00 - 14:15 **Instructor:** Manukyan, Kathleen

**Class Enrl Cap:** 22 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0

**Attributes:** DSAS Geographic Region General Ed. Requirement, DSAS Literature General Ed. Requirement, Writing Intensive Course (WRIT), SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req., European and Eurasian Studies, Russian & East European Studies

**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course will focus on selected masterpieces of 19th century Russian literature. The chosen works will be studied and discussed for their intrinsic literary value and as examples of literary trends. Readings might include short stories by Pushkin, Gogol, Turgenev, and Chekhov, novels such as Dostoevsky's <em>Crime and Punishment</em>, and Tolstoy's <em>Anna Karenina</em> or <em>War and Peace</em>, and dramatic works of Chekhov.

---

RUSS	0811	1060	11244	MADNESS & MADMEN IN RUSS CULT	Lecture	3
------	------	------	-------	-------------------------------	---------	---

**Bldg:** Cathedral of Learning **Room:** 00342 **Days:** TuTh **Time:** 11:00 - 12:15 **Instructor:** Sattarova, Ellina

**Class Enrl Cap:** 40 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0

**Attributes:** DSAS Geographic Region General Ed. Requirement, DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Contexts: Humanistic GE. Req., European and Eurasian Studies, Russian & East European Studies

**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course will explore the theme of madness in Russian literature and the arts from the medieval period to our days. The discussion will include formative masterpieces by Russian writers (Pushkin, Dostoevsky, Tolstoy, Chekhov, and Bulgakov), and film directors (Protazanov, Vrubel', Filonov), as well as non-fictional documents, such as Russian medical, judicial, political, and philosophical treatises and essays on madness. Grades will be based on classroom attendance, participation, occasional quizzes, and two examination works.

---

RUSS	0850	1030	10585	EARLY RUSSIAN CULTURE	Lecture	3
------	------	------	-------	-----------------------	---------	---

**Bldg:** Cathedral of Learning **Room:** 00304 **Days:** TuTh **Time:** 14:30 - 15:45 **Instructor:** Kim, Olga

**Class Enrl Cap:** 30 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0

**Attributes:** SCI Polymathic Contexts: Global&Cross Cul GE. Req., European and Eurasian Studies, Russian & East European Studies

**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course introduces the student to the development of Russian culture from 988 through 1825, including Russia's religious, artistic, and ideological

artifacts. Readings will include the chronicles, saints' lives, secular tales, and early prose fiction. Visual art and architecture of the Kievan, Novgorod, and Romanov periods of Russian history provide a larger artistic context for the literary works.

---

RUSS	1420	1030	11112	FOURTH-YEAR RUSSIAN 1	Lecture	3
------	------	------	-------	-----------------------	---------	---

**Bldg:** Cathedral of Learning **Room:** 0208B **Days:** MWF **Time:** 12:00 - 12:50 **Instructor:** Kim, Olga

<p>This course is a survey of major movements in literary theory and cultural criticism. It will introduce students to key texts of the 20th and 21st centuries that shaped and revolutionized strategies for reading and interpreting texts, films, and other cultural objects. The course will expand student familiarity with movements beginning with New Criticism and Russian Formalism, move through Structuralism and Post-Structuralism, explore Feminist, Queer, and Critical Race Theory, and take on post-colonial, orientalist, and transnational approaches--among others. Students in this course will read a variety of literature and theory with an eye toward understanding what criticism's roles are, why and how the study of literature and culture (still) matters, and how they can develop their own critical skills based on their personal interests and concerns. This course will also offer an introduction to bibliography and research methods. It will further offer grad students an opportunity to hone their presentation and writing skills. The course and readings will be in English.</p>

SLAV	0660	1030	11156	SCI-FI: EAST AND WEST	Lecture	3	
<b>Bldg:</b> Lawrence Hall		<b>Room:</b> 00104	<b>Days:</b> MW	<b>Time:</b> 15:00 - 16:15	<b>Instructor:</b> Mukhortova,Olga Vladimirovna		
<b>Class Enrl Cap:</b> 80		<b>Class Enrl Tot:</b> 0	<b>Class Wait Cap:</b> 20	<b>Class Wait Tot:</b> 0	<b>Class Min Enrl:</b> 0		
<b>Attributes:</b> DSAS Cross-Cult. Awareness General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., European and Eurasian Studies, Russian & East European Studies, West European Studies							
<b>Room Characteristics:</b> Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)							

This course examines Slavic and anglophone science fiction comparatively. It assesses how a given culture's dominant values are articulated in a popular genre that enjoys different status in the East (i.e., Eastern Europe) and the West (i.e., England and America). Those values emerge in works that imaginatively posit "fantastic" situations rooted in biological, spatial, and temporal explorations beyond those currently verified by science. On the basis of films (e.g., "The Terminator", "The Fly"), film clips, TV shows, novels (e.g., "Solaris", "The Futurological Congress"), novellas, and stories, we shall discuss such topics as progress, utopia, human perfectibility, the limits of science, and the nature of knowledge.

SLAV	0880	1180	22271	VAMPIRE: BLOOD AND EMPIRE	Lecture	3	
<b>Bldg:</b> Wesley W Posvar Hal		<b>Room:</b> 01500	<b>Days:</b> TuTh	<b>Time:</b> 16:00 - 17:15	<b>Instructor:</b> Wright, Jarrell D		
<b>Class Enrl Cap:</b> 110		<b>Class Enrl Tot:</b> 0	<b>Class Wait Cap:</b> 20	<b>Class Wait Tot:</b> 0	<b>Class Min Enrl:</b> 0		
<b>Attributes:</b> DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., European and Eurasian Studies, Global Studies, East European Studies, West European Studies							
<b>Room Characteristics:</b> Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)							

This course examines the phenomenon of vampirism in verbal and visual texts from different time periods in various cultures (Russia, Poland, France, England, America). Why do vampires capture the imagination especially of Anglophone readers? What qualities does the vampire incarnate? Which historical events and customs have triggered particular enthusiasm for depicting the undead? How have the depictions of the vampire evolved over centuries? Our discussions will address these issues as we analyze stories, novels, and films focusing on vampires from a variety of critical perspectives, contextualizing the works in the cultures that produced them.

SLAV	1225	1030	18084	CROS CLTL REPRSTN PRISON 20TH	Lecture	3

<b>Attributes:</b> DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Literature General Ed. Requirement, Capstone Course, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req., European and Eurasian Studies, Global Studies, Russian & East European Studies, Transatlantic Studies, West European Studies							
<b>Room Characteristics:</b> Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)							

This course examines artistic works produced in prison and artistic works about prison, addressing both the allure of the criminal world as a form of entertainment and the function of art within prison as escapism and survival technique. In structure the course is broken into three parts: the first part concentrates on prison writings and criminal culture in America; the second part focuses on the forced-labor camp system known as the Gulag in the Soviet Union; and the third part examines Europe (Germany and Eastern Europe) during the Holocaust.

This course offers an introduction to society and culture in international perspective. We will explore how people organize their social life in different societies, by comparing social behavior and institutions, cultural and political economy in different parts of the world. We will broaden our understanding

of people who live in different national, social -cultural environments.

This course examines complex social, economic, political, and cultural issues across societies around the world. In this course we discuss the American (US) Criminal Justice System, Drinking on US College Campuses, Media and Hip Hop music. We introduce fundamental, core sociological concepts in examining these three micro- areas of study. Beyond that we bridge the three thematic areas in subtle ways that weave our sociological analysis with depth and by introducing cross-cultural links. This globalization component is a powerful example of how connected our world is. The format utilizes lectures, recitations, and assignments.

By next semester the campaign will be done, a new president chosen, and, on January 20th, sworn into office. The campaigning will be done, but the issues will remain, and the new administration will have to actually do something about them. The War in Iraq, the weak economy, health care, global warming, and more await them and us. In this class we will focus on the social ills and problems that dominated the campaign and will fill the new President's first months in office. We will develop the background knowledge you need to evaluate proposals and follow the debates over them. We will also work on having the skills we need to evaluate evidence and spot when politicians (or corporations or advertising or media) are trying to pull a fast one on us.

This course is an introduction to the subject matter, theoretical perspectives, and research methods of sociology. The nature of sociological inquiry will be illustrated through lectures and readings, and the course will attempt to accomplish the following goals: 1) Survey a large range of the subject matter studied by sociologists; 2) Demonstrate how the theoretical and methodological approaches of contemporary sociology are used in the analysis of various substantive problems; 3) Indicate how sociological research is relevant to issues of social policy; 4) Prepare the student for the further study of sociology in more advanced courses.

<p>This course is an examination of a broad range of social theorists, whose ideas have influenced sociology. We will read selections of some of the major works of both classical (principally Marx, Weber and Durkheim) and contemporary theorists with the goal of understanding and critically assessing their leading ideas. Part of this effort will be the task of understanding how the ideas of these thinkers arose in specific social and cultural contexts (i.e., what social problems they thought they were addressing) and in specific intellectual traditions (i.e., what preceding ideas they were borrowing from and bending to their purposes). The course readings and lecture discussions will also emphasize the continuing relevance of these ideas by examining how they are used (in various modified forms) in some current examples of sociological research.</p>

In this course we will consider the various debates over globalization and development from post-WWII to the present, how the global economy and relationships between nations have changed during this period, the players shaping the nature of this change, and the social, economic and environmental outcomes of the prevailing way of conceiving of and structuring development and globalization. We will consider various theories of development, approaches to development and their outcomes, as well as explore how this has impacted labor and the environment and the movements they have spawned. Over the course of the semester we will compare and contrast the development experiences of countries in different regions of the world. We will conclude the course by considering competing views of geopolitics and how the political economy and political ecology dynamics shape the world we live in. This will take us into the wealth and power issues, including war and peace, demographic changes and the mass movement of peoples due to these battles and conflicts.

<b>Room Characteristics:</b>		PeopleSoft - Scheduled (PS)(1)					

We are always and everywhere performing. We produce plays and inhabit other places and times. We participate in religious rituals. We occupy public and virtual spaces to protest political injustice. We invest significant time, labor, and energy in managing our social identities. And when we work ¿ if we work ¿ we receive performance reviews. This course engages performance as lens for exploring embodiment, representation, identity, and history. Drawing upon the breadth and depth of performance studies as an interdisciplinary field of inquiry over the past half-century, this course will introduce students to performance as both a subject and method of humanistic inquiry. Through lectures, discussions, and performance analysis exercises we will explore what a performance studies perspective enables us to understand anew.

THEA	0810	1040	10516	INTRODUCTION TO DRAMATIC ART	Lecture	3	
<b>Bldg:</b>		Cathedral of Learni	<b>Room:</b> 00235	<b>Days:</b> MWF	<b>Time:</b> 14:00 - 14:50	<b>Instructor:</b> Mirsajadi,Ali-Reza	
<b>Class Enrl Cap:</b> 30		<b>Class Enrl Tot:</b> 0		<b>Class Wait Cap:</b> 20		<b>Class Wait Tot:</b> 0	
<b>Attributes:</b>		DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., European and Eurasian Studies, West European Studies					
<b>Room Characteristics:</b>		(1), Seating - Moveable(1), PeopleSoft - Scheduled (PS)(1)					

This class has an additional fee. For more information go to [www.registrar.pitt.edu](http://www.registrar.pitt.edu), and click on Service Areas, then Special Course Related Fees.

This course focuses on script analysis (the examination of how a dramatic text is put together). Exploring a diverse range of dramatic forms spanning histories and geographies, we will study how a play and its structural characteristics offer possible meaning on the page and on the stage. What different analytical tools help us interpret a play text or production? How does a play's dramatic structure and historical circumstances inform its visualization and staging in a specific time and space for an intended audience? The course will evaluate written texts as well as live performances.

<p>This Special Topics course focuses on Acting for the Camera. Components include the art and technique of acting on camera, defining your type vs. your brand, scene rehearsal and production, theatrical and commercial audition techniques and preparation, and the creation of a mobile new media broadcast presence which defines and promotes your "brand." This course will also explore the related business aspects of pursuing an on-camera acting career.</p>

Performance Studies Goes to Work: Histories and Theories of Performance Labor

This course engages the proliferation of scholarship concerned with theatre and performance labor over the past decade. We will contextualize this conversation within two trajectories: 1) the history of theatre and performance studies; 2) the ubiquity of performance as a critical term in recent theorizations of work from across the humanities and social sciences. What does performance both as an object of analysis and as a theoretical lens have to tell us about transformations in the organization and practice of work over the past fifty years? How can performance theories and histories of work

This course serves as the required introduction into the Urban Studies major or as a general course in the social sciences for the non-major. The course, like the major, explores the problems and potential of cities by combining the various disciplinary perspectives: economics, geography, Africana studies, political science, history, sociology, and anthropology. In so doing, the course takes full advantage of the resources of the Pittsburgh metropolitan area. Films and field trips attempt to bring the readings alive. As course materials are providing the students with the necessary concepts and information to understand the urban environment, the students will be developing their own investigative skills through group trips.

This course will focus on the concept of punishment as a response to a criminal act. While in religiously-grounded societies punishment is seen as a retribution for an evil act, tendencies in modernity (and post-modernity) privilege the use of punishment as a tool for social reintegration. With the rise of human rights-based doctrines, the characterization of punishment as retribution has proven to be more and more difficult to justify. Even if sayings such as "paying my debt to society" are still in use, it is becoming more and more evident especially in a time of mass incarceration how incarceration as punishment cannot be the only solution. This course exposes students to ideas of justice as a process aimed at reintegrating wrong-doers in society through a path of reconciliation and re-socialization, so that the end of the process will produce fellow citizens rather than ex-felons.

This course is all about data visualization, the art and science of turning data into readable graphics. This course explores how to design and create data visualizations, including graphs, Story Maps and maps. Students will also learn to evaluate the effectiveness of visualization designs, and think critically about each design decision, such as choice of color and choice of visual encoding. Students will create their own data visualizations and learn to use Open Source data visualization tools and software like Excel and Tableau. Students will also read papers from the current and past visualization literature and complete a short individual project.

This course introduces the fundamental principles of geo-spatial analysis using ArcGIS Desktop and Microsoft Excel. It will focus on teaching students the principles of GIS through computer-based exercises and projects. Exercises will train students in acquiring, analyzing, mapping, and managing geospatial data in order to address predominately urban problems. An emphasis will be placed on bridging the gap between performing geo-spatial analyzes using GIS and designing readable and understandable outputs. Exercises and projects will be centered on topics and applications relevant to urban studies, political science, sociology and economics. These include, but are not limited to: Urban planning, housing, education, and public administration.

<b>Room Characteristics:</b> Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)							

In this course, we will focus on ethnography as an epistemological practice. Students will be exposed to the multidisciplinary evolution of ethnography from its origins to its application in an urban context. What is ethnography? Specifically, what is urban ethnography? These are the two critical questions that will be answered in this course. We will focus on topics of neighborhood/city membership, gentrification, community, belonging and the importance of place and space. Specifically, we will try to answer the following questions: Who owns the city? Who has a right to the city? Who controls the city? Despite a vast body of literature that illustrates issues of gentrification; we will critically examine controversial debates surrounding ¿Who has a right to the city?¿ that is situated in the process of gentrification. We will interrogate both the assumption that ¿gentrification¿ is good or bad for neighborhoods and their residents. In doing so, we will investigate the processes of redevelopment, housing, displacement, resettlement, employment and transportation. In this course we will engage in a semester-long ethnographic project focusing on the idea of belonging, of neighborhood, of urban sentiment, of feeling rooted (or disconnected) to a specific area (street, neighborhood, area, city, etc.). Students will learn how to do urban ethnography by conducting a research project on the notion of belonging. What does it mean to belong to a place or space? Who defines who belongs and who doesn't? Is it a self-defined status?

Starting from Quantitative Research, moving to Qualitative Research, and finally to Mixed Methods Research this course will give students with a background in Urban Studies a methodological base on which to build their own research. The course will explore different research methods and will approach them both in practical and theoretical perspectives. Students will be asked to engage in observation, mock-interviews, and collection of quantitative data in order to gain a sensibility for both the methods of data collection and how to design the most appropriate methodology for specific research projects. Providing a series of tools, this course will be fundamental for all who want to engage in social research or get prepared for acquiring more comprehensive and deeper knowledge of how to measure social events.

Social justice and economic justice are popular buzz-words that are closely tied to urban environments: but what do they really mean, and how can we understand them? In this course we will engage critically to interrogate both historical and contemporary social justice movements that claim to protect human rights, fair housing, or to expand definitions of public space and citizenship. Taken together these agendas form a powerful prescription for social action, one often emerging in urban settings. Using a combination of lectures, material from a variety of sources (movies, TV series, podcasts, along with readings), hands-on exercises, and case studies, we will examine the historical and theoretical context for social justice in the city and then evaluate different theoretical and practical proposals for social change. By the end of the course students will be able to use a critical perspective to understand how the rhetoric of social justice is changing the urban fabric of specific cities, both domestically and worldwide.

On May 23, 2007, for the first time in human history, more of the world's population became urban than rural. This course explores two related aspects of global urbanization: changing patterns of urban growth and urbanization, and similarities and differences in the nature of urban processes at the regional level. This course begins by exploring the causes of urbanization, factors driving urban growth, impacts of globalization, and regional variations in urbanization levels at a variety of scales including the global north and global south. In contrast, the second part of the course focuses on the economic, social, demographic, and cultural processes that shape urban processes, urban places and urban life in Canada, Europe, the United Kingdom, and select countries of the Global South.

This course gives the Urban Studies major the opportunity to get off of the campus and in the community. It allows the student to relate his/her academic training to a real world situation by working in an urban related organization or agency. Prior to the term in which the field placement is taken the student and the Urban Studies adviser plan a placement that is best suited to the student's talents and interests. During the placement the student works an established number of hours per week (9 hrs. for 3 credits and 15 hrs. for 6 credits) under the combined supervision of the agency or organization personnel and the Urban Studies adviser. For permission to register, go to 3500 WWPB.

Dietrich Sch Arts and Sciences - Anthropology - Subject: Anthropology

Subject	Catalog Nbr	Section	Class Nbr	Course Title	Component	Units	Topics
ANTH	1447	1010	30422	LANGUAGE, CULTURE, AND SOCIETY	Lecture	3	

**Bldg:** Wesley W Posvar Hal **Room:** 03301 **Days:** Th **Time:** 18:00 - 20:30 **Instructor:**  
**Class Enrl Cap:** 20 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Attributes:** Writing Intensive Course (WRIT)  
**Room Characteristics:** PeopleSoft - Scheduled (PS)(1)

Undergraduate Seminar. The purpose of this course is to develop a framework for examining language as part of social, cultural, and political systems. It will enable you to better understand how language works, to interpret speech and writing in new ways, to collect and analyze ethnographic material, and to write a research paper based on your findings. Specific topics include: relations between language, cognition, and perception; debates about intention and responsibility; storytelling and verbal art; approaches to language in media and design; and the role of language in social and political change. No prior experience with anthropology or linguistics is required.

ANTH	1524	1010	30395	CHINESE ARCHAEOLOGY	Lecture	3	
------	------	------	-------	---------------------	---------	---	--

**Bldg:** Wesley W Posvar Hal **Room:** 03301 **Days:** W **Time:** 18:00 - 20:30 **Instructor:**  
**Class Enrl Cap:** 16 **Class Enrl Tot:** 0 **Class Wait Cap:** 10 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Attributes:** Asian Studies  
**Room Characteristics:** PeopleSoft - Scheduled (PS)(1)

This course introduces students to the archaeology of China from the Upper Paleolithic to the Han Dynasty (c. 33,000-220 BCE). It is focused around several major topics. One is the development of key technologies in East Asia; such as the domestication of plants and animals and the emergence agriculture and animal husbandry or the innovation of metallurgy. Another is the long trajectory of social change from small foraging bands through initial sedentary villages and more complex social organization to very large and powerful states and empires. Yet another is how the study of Chinese prehistory has contributed to modern notions of a uniquely Chinese culture.

ANTH	1541	1030	27718	CULTURAL RESOURCE MANAGEMENT	Seminar	3	
------	------	------	-------	------------------------------	---------	---	--

**Bldg:** Wesley W Posvar Hal **Room:** 03300 **Days:** M **Time:** 18:00 - 20:30 **Instructor:** Zinn, Timothy G  
**Class Enrl Cap:** 20 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Attributes:** Urban Studies  
**Room Characteristics:** Data Port(1), Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course will cover in an introductory way all aspects of Cultural Resource Management and Historic Preservation. Major topics include federal historic preservation legislation, cultural resources (historic and prehistoric archaeology, historic structures), the National Register of Historic Places, Section 106 and 110 of the NHPA, The National Environmental Policy Act, historic preservation planning, and state historic preservation plans. The course will utilize historic architectural examples as well as prehistoric and historic archaeological sites.

**Prerequisites:** It is expected that students will have some specific interest in historic preservation and/or cultural resource management, although the interest may be based in history, anthropology, architecture, law, or administration. No specific prerequisites are required.

<p>Undergraduate Seminar. The human skeleton provides the most direct and unchallenged evidence for an individual's past behavior as the skeleton is plastic in its response to stress, much the same as a society responds to social and environmental stress. While the artifacts, architecture and features recovered from an excavation leave a cultural imprint on the landscape, so too does culture and behavior leave an impression on the deceased. The individual is not just a biological shell to be cleaved from its cultural context, but rather forms a social package contingent upon culture during life and in death. We will examine social change and behavior from the perspective of the deceased to evaluate how the individual experienced life. Lectures will be supplemented with a practical component.</p> <p>Prerequisites: Previous osteological background is required (e.g., Anth 0630 Introduction to Forensic Anthropology, Anth 1602 Human Skeletal Analysis or Anth 2687 Graduate Physical Core)</p>							
ANTH	1723	1010	30408	BLACK MASCULINITY	Seminar	3

Requirement, DSAS Social Science General Ed. Requirement, SCI Diversity General Ed. Requirements, SCI Polymathic Contexts/Behav. GE. Req.</p>							
<p>This course explores the role and significance of Black Males and Black Masculinity in the Black Diaspora. The main focus will examine Black Masculinity in a North American context with supporting examples and comparisons from other parts of the Diaspora. Examining the varied social roles Black males have occupied in both literal and symbolic systems students will gain an understanding of the interrelatedness of race, gender and masculinity and its impact on social, political and legal institutions. As a course in Anthropology the centrality of symbols and the meanings people attribute to symbols will help shape and direct both course readings and class discussion. However, the impact symbols have on everyday life and the relationships of power, kinship and desire will serve to demonstrate the important ways in which an understanding of Blackness and Masculinity gives understandings to other knowledge. This course will be heavily grounded in Black Diaspora Theory, Black Feminist and Black Queer Theory, and the Anthropology of Gender and Sexuality. This course is part of the Pitt Prison Education Program (PPEP). This course will be taught at the Fayette Correctional Facility in Fayette County. Pitt students will be taking the class alongside Fayette Correctional Facility Incarcerated students in a seminar format. This course will follow the Inside-Out pedagogy model (<a href="http://insideoutcenter.org/about-inside-out.html">http://insideoutcenter.org/about-inside-out.html</a>). Inside-Out has been in existence for twenty years, and over 100 universities across the</p>

<p>This course will examine the social ecology of human nutrition using an evolutionary perspective. It will apply the concepts and principles of anthropology to the study of human nutrition and diet. It asks the questions: Where do cuisines come from? Discussions will focus on the origins of the human diet; human dietary adaptation to diverse ecological and technological situations; Social, cultural, behavioral and ecological factors that influence diet in technologically simple, modernizing and contemporary societies; the globalization of food supply and food security; and methodological issues in studying food habits and assessing nutritional status.</p>

This course will survey the major achievements of ancient Greek civilization. Arranged on a roughly chronological basis, the readings and lectures will move from the epic poetry of Greece's heroic Bronze Age, through the great intellectual innovations of the Archaic Age, to the Classical era dominated by the contrasting contributions of Sparta and Athens. Although the social and economic background will not be neglected, the chief emphasis will be placed on those aspects of Greek civilization that have retained a perennial significance for Western societies; its literature, its politics, its historical writing, its philosophy, its art and architecture.

How can we understand our world? In western culture, science dominates all our answers to this question. But there are other ways. They can be found in the mythologies of ancient and modern peoples. This course will compare the scientific and mythological ways of seeing the world and their more subtle connections. In particular, we will turn to the remarkable events in Ancient Greece of 800-400 B.C. and discover how the scientific approach actually grew slowly out of mythological thought itself.

<b>Room Characteristics:</b>		PeopleSoft - Scheduled (PS)(1)									
<b>Combined Section ID:</b>		0300(CLASS 0400/HAA 0160) - HAA 0160(#25393)									

Successful empires are seldom planned; they evolve. They typically have charismatic founders, able successors, and well-organized systems of administration. They satisfy core constituencies by ensuring supplies of staples or, for elites, luxuries and status symbols. They ward off potential unrest by various means, from moving populations to the cooptation of local elites, who control capital and production. The course looks at the phenomenon of the (ancient) empire from various points of view; the biographies of selected founder figures and the problems of reconstructing them from later accounts, the mechanisms created to ensure the survival of selected regimes, with less emphasis placed on bureaucratic structures and detail and more on the creation and maintenance of an ideology appropriate to the regime. A sense of tradition, for example, is essential to empire but only if combined with a sense of modernity; the

projection of an ability to mobilize the latest in science and technology to preserve the benefits of empire for those who profit from it. Empires are, in this sense, history-conscious; they compare themselves with earlier empires and seek to surpass them. Since the textual evidence for early empires is small and either bureaucratic or late, the primary evidence for the nuances of imperial ideology are usually looked for in the images placed before their constituencies-- the kinds of structures built with the proceeds of empire and the images (pictorial and written) created to justify its costs.

**Combined Section ID:** 0222(CLASS/1220/HIST/1781) - HIST 1781(#28901)

This course is a survey of Roman history from the founding of the city of Rome in the 8th Century BCE to her zenith when her reign stretched from Britain in the West to the Tigris and Euphrates in the East and, finally, to her gradual overexpansion, mismanagement, and decline. This class will investigate Rome's transition from monarchy to republic and how Julius Caesar and a bloody civil war pushed control of the state into the hands of an emperor. As we read a modern narrative history of Rome along with the works of ancient historians, we will examine how she acquired and governed her empire; under what forms of government and under whose leadership the affairs of the Roman People were administered; and what causes led to the breakup of the Roman Empire. Simultaneously, we shall discuss how the idea of Rome still exists today and how Roman influences continue to pervade and influence our modern culture. Class time will be devoted to lecture, visual presentations (slides, videos, Power Points...), as well as possibly student reports.

ECON 0280 is a course on the economics of money, banking and financial markets. The course aims to provide the student with an introduction to the role of money, financial markets, financial institutions and monetary policy in the economy, thus providing a solid foundation for further study or employment in the financial services industry. There are three main components of the course. First, the role of financial markets in the economy will be considered with a particular emphasis on bond markets and interest rate determination. The course will then cover the main aspects of banks and other financial institutions before turning to an investigation of the role of money, central banking and monetary policy.

Dietrich Sch Arts and Sciences - French and Italian Language and Literature - Subject: French

Subject	Catalog Nbr	Section	Class Nbr	Course Title	Component	Units	Topics
FR	0006	1360	22808	SPECIAL TOPICS IN CONVR & CUL	Directed Studies	1 - 6	

**Bldg:** Cathedral of Learning **Room:** 00G16 **Days:** W **Time:** 18:00 - 18:50 **CONVERSATION HOUR** **Instructor:** Rotival,Aurele

**Class Enrl Cap:** 22 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Room Characteristics:** Seating - Moveable(1), PeopleSoft - Scheduled (PS)(1)

This intermediate-level conversation course is designed for students in FR 0003 or above to practice spoken French in a relaxed environment. Topics vary and are chosen according to enrolled student interest.

FR	0016	1010	28829	HISTORY OF FRENCH CINEMA	Lecture	3	
----	------	------	-------	--------------------------	---------	---	--

**Bldg:** Cathedral of Learning **Room:** 00249 **Days:** W **Time:** 18:00 - 22:00 **CINEMA** **Instructor:** Pettersen,David A

**Class Enrl Cap:** 25 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Attributes:** DSAS The Arts General Ed. Requirement, DSAS Geographic Region General Ed. Requirement, Film Studies, African Studies, West European Studies  
**Room Characteristics:** PeopleSoft - Scheduled (PS)(1)

This course will introduce students to the history of cinema in France from the beginnings of cinema to the present day. We will examine films from all periods and consider a diversity of forms and genres, including mainstream narrative films, art films, avant-garde experiments, blockbusters, and documentaries. No previous course experience with cinema is presumed as we will learn the basics of how to watch, discuss, and write about films and the film industry. The course will be taught in English; readings will be available in English; and all films will have English subtitles.

FR	0103	1080	27025	INTERMEDIATE FRENCH 1	Lecture	3	
----	------	------	-------	-----------------------	---------	---	--

**Bldg:** Cathedral of Learning **Room:** 00219 **Days:** TuTh **Time:** 18:00 - 19:15 **Instructor:** Cotez,Nawel Amina

**Class Enrl Cap:** 22 **Class Enrl Tot:** 0 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0  
**Attributes:** DSAS Second Language General Ed. Requirement, African Studies  
**Room Characteristics:** (1), Media - Data Projector/Monitor(1), Seating - Moveable(1), PeopleSoft - Scheduled (PS)(1)

This intermediate, three hour-per-week course builds on the skills acquired during the first year of study in French 1 and 2, while further developing linguistic and sociolinguistic competence in French. Because the focus is on communication, the course is taught entirely in the target language. Course objectives for French 3 are as follows: 1) speak French well enough to ask and answer questions in various situations beyond what is needed to simply "survive" in a francophone culture, i.e., the ability to talk about self and surroundings in some detail; 2) understand enough spoken French to grasp main ideas and some supporting details in short conversations related to topics above; 3) read well enough to understand principal themes and most details in simple literary and non-literary texts; 4) write longer and more cohesive paragraphs; 5) cultivate a deeper understanding of French-speaking cultures; 6) gain a better understanding of how French works as a language.

Course Description for Fall 2201: Successful empires are seldom planned; they evolve. They typically have charismatic founders, able successors, and well-organized systems of administration. They satisfy core constituencies by ensuring supplies of staples or, for elites, luxuries and status symbols. They ward off potential unrest by various means, from moving populations to the cooptation of local elites, who control capital and production. The course looks at the phenomenon of the (ancient) empire from various points of view; the biographies of selected founder figures; and the problems of reconstructing them from later accounts, the mechanisms created to ensure the survival of selected regimes, with less emphasis placed on bureaucratic structures and detail and more on the creation and maintenance of an ideology appropriate to the regime. A sense of tradition, for example, is essential to empire but only if combined with a sense of modernity; the projection of an ability to mobilize the latest in science and technology to preserve the benefits of empire for those who profit from it. Empires are, in this sense, history-conscious; they compare themselves with earlier empires and seek to surpass them. Since the textual evidence for early empires is small and either bureaucratic or late, the primary evidence for the nuances of imperial ideology are usually looked for in the images placed before their constituencies-- the kinds of structures built with the proceeds of empire and the images (pictorial and written)

This is a condensed version of the first two courses of the Spanish language program, and it has been designed for students who have taken at least two years of high school Spanish or its equivalent. Spanish 0015/0115 follows a communicative approach: from the first day of class you will interact in Spanish in a meaningful context with your instructor and classmates. By the end of this course you will have a general knowledge of the grammar of the Spanish language and you will be able to communicate effectively in Spanish according to this level. This course satisfies the foreign language requirement. Updated 02/22/2018.

SPAN	1323	1030	18296	MEDICAL SPANISH	Lecture	3

<b>Attributes:</b>		European and Eurasian Studies, Global Studies, Undergraduate Global Health, West European Studies					
<b>Room Characteristics:</b>		PeopleSoft - Scheduled (PS)(1)					

This course is designed for students planning to work in the health care field to communicate more effectively in linguistic and cultural terms with Spanish-speaking patients. Students will explore advanced and specific medical vocabulary, communication strategies, and related cultural aspects. The class will cover grammar and vocabulary in context and discussions about different perspectives on health, disease and health care for Hispanics in the U. S and in the Spanish speaking countries. Updated 02/13/2019.

This seminar will be an exercise in comparative history--in particular, an examination of the "special relationship" between Britain and the United States. We will look at political, diplomatic and cultural ties between the two nations in the 20' century, ranging from the American "occupation" of Britain during World War Two to the Beatles and the British Invasion of the 1960s to popular and journalistic impressions held of each country in the other. We will read some primary sources, especially newspapers, speeches and memoirs, but mostly will read several of the very good books published on the subject.

In 2012 when a former member of the Irish Republican Army and a former Ulster Volunteer Force prisoner met with University of Pittsburgh students, who took this class, in Belfast the opening of the conversation went something like this: Ex-prisoners: ¿You¿ve been in Belfast for 2 weeks now and met with many people on both sides of the divide. Do you understand the conflict any better now?¿ Pitt students: ¿No. We are more confused now than when we got here.¿ Ex-prisoners: ¿Good! You¿ve learned something.¿ Contradictory? Confusing? Counter-intuitive? Nonsensical? Intriguing? All of the above? If you say, ¿all of

the above; then you will find this class {intriguing; because what you will do is move beyond the easy and simple {inherited histories; that many people have of the modern conflict in Ireland. How will you do this? In this class, you will 1. Launch an investigation into the roots of the {modern; conflict (1969-1994) 2. Determine who the antagonists were and why they fought. (We will do one whole class on why individuals made the decision to fight and to kill. 3. Analyze why this conflict became so vicious and {dirty.; 4. Then analyze how this `war;, `conflict;, and/or `sectarian conflict; ended in a compromise peace. By the end of this class, you will come to realize that history is rarely black and white and that there are many shades of grey. There are no formal prerequisites, but you must be prepared to read a great deal and then analyze and synthesize complex and often contradictory arguments.

HIST	1220	1100	30475	A HISTORY OF POLAND	Lecture	3
------	------	------	-------	---------------------	---------	---

**Bldg:** Lawrence Hall      **Room:** 00232      **Days:** Tu      **Time:** 18:00 - 20:25      **Instructor:** Thum,Gregor

**Class Enrl Cap:** 35      **Class Enrl Tot:** 0      **Class Wait Cap:** 20      **Class Wait Tot:** 0      **Class Min Enrl:** 0

**Room Characteristics:** Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)

This course introduces modern Polish history from the advent of the Polish national movement in the 19th century until the end of the 20th century, when Poland was reestablished as an independent nation-state after the collapse of the Soviet bloc. Special emphasis will be laid on the contextualization of Poland's national history in the European framework. The course will look on modern Poland as a case study for the complicated establishment of a nation-state in a geographical area, which was for centuries dominated by the multinational empires of Austria, Russia, and Prussia, and their successor states.

**Combined Section ID:** 0197(AFRCNA/1538/HIST/1669) - AFRCNA 1538(#24442)

This course will provide a general overview of the history of black Pittsburgh--economic, political and cultural. We will cover the colonial era to the present, with an emphasis on the twentieth century, particularly the civil rights era. Students will conduct some original research based on the files of the Pittsburgh Courier newspaper and photographs of Teenie Harris. There will be two field trips, one to the Heinz History Center and the other to the Hill District. The class relies on active, committed student participation, and so students are expected to do the readings before class and come prepared to discuss them.

Some of the oldest written texts reveal that humans have always told stories to explain the world around them. When those stories are ancient, we call them myths; when they are recent, we call them science. This course will examine primary source texts from ancient Assyrian and Babylonian civilizations through the Greeks to about the 4th century BC. Authors studied will include the Pre-Socratics, Plato, Aristotle, as well as several authors in astronomy, mathematics, and medicine, including Euclid, Archimedes, and the Hippocratic texts. Key questions addressed: How have concepts of the cosmos changed through the period studied? What is the difference between myth and science? What is the place of divinity in past and present thinking? What roles do history and culture play in conceptions of the natural world?

Course Description for Fall 2201:							
"Introduction to Opera" is a course for those who want to learn more about the Western tradition of opera but simply do not know where to begin, or do not have access to live or recorded opera performances. Each week, we will watch and listen to excerpts of opera by composers such as Monteverdi, Mozart, Rossini, Wagner, Verdi, Puccini, Schoenberg, and Saariaho, and read critical writing on opera from the 17th century to the present. The course also includes attendance at a performance at the Pittsburgh Opera.							
Students will learn how to identify different genres and national styles of opera; study operas adapted from novels and plays, and compare the different versions; pay attention to musical setting, story, action, costume, staging; and understand the connections between opera and more recent forms of audiovisual media, such as films. In addition, we will think about how opera has shaped notions such as love, drama, selfhood, nation, feeling, and fate in Western culture.							
Note: students must attend at least one class in the first two weeks in order to enroll in this course.

<b>Room Characteristics:</b> PeopleSoft - Scheduled (PS)(1)							
<b>Combined Section ID:</b> 0319(PHIL/1020/CLASS/1312) - CLASS 1312(#22542)							
<p>Alfred North Whitehead famously wrote that "The safest general characterization of the European tradition is that it consists of a series of footnotes to Plato". Overstatement though this may be, there is no doubt that Plato had a deep and lasting influence upon the history of Western thought. This course is an advanced survey of this great ancient Greek philosophers' thought. The majority of the class will be spend examining his so-called "early" Socratic and "middle" Platonic dialogues. But, time permitting, we will also sneak in a late dialogue or two. A good deal of emphasis will be placed upon the evolution of his famous theory of Forms, but we will also take care to articulate and critically discuss the epistemological, ethical, political, and psychological issues that these dialogues raise. Grades will be determined by performance on a combination of exams and papers.</p>							
PHIL	1400	1010	26802	RIGHTS & HUMAN RIGHTS	Lecture	3

<b>Room Characteristics:</b> PeopleSoft - Scheduled (PS)(1)							
<p>The points of departure for this course will be the Universal Declaration of Human Rights and the Convention on the Prevention and Punishment of the Crime of Genocide, both adopted by the United Nations General Assembly in 1948. We will examine how these commitments relate to John Locke's foundational defense of the rights to life, liberty, and property. Extensive consideration will be given to the right to life and its coordination with liberty rights and private property rights. The course will finish with an examination of limitations of rights theory with regard to climate change.</p>

PSY 1205 is only available to students who have taken it in the past and wish to improve their grade. Anyone who has not previously taken 1205 will not be allowed to enroll and should instead enroll in PSY 0205: Psychopathology (this is the same course as 1205; only the number and name have changed). If you have previously enrolled in PSY 1205 and wish to repeat it for grade improvement, you will need the permission of the Psychology Advising Office. To obtain a permission number, contact Jennifer Stapel, jstapel@pitt.edu, 3113 Sennott Square.

This course will be devoted to reading some of the major texts (short stories and novels) of 19th century Russian literature. Authors will include Pushkin, Gogol, Dostoevsky, Tolstoy, Turgenev, and Chekhov, as well as authors much less known in the West. All texts will be examined both in terms of their structure and content, and in terms of their literary and social impact.

This course will present students with a history of Russian and Soviet films, filmmaking, and the film industry from the coronation of Tsar Nicholas II (1896) to the death of Stalin (1953). In addition to examining the "revolutionary years" of Soviet cinema (associated with Einstein, Pudovkin, and Vertov), the course will also examine pre-Revolutionary Russian films (Drankov, Bauer, Protazanov), socialist realism in Soviet films (the Vasil'ev brothers, Ekk), and the films produced during the period of maximum state control over the film industry (Chiaureli, Zarkhi).

This course examines Slavic and anglophone science fiction comparatively. It assesses how a given culture's dominant values are articulated in a popular genre that enjoys different status in the East (i.e., Eastern Europe) and the West (i.e., England and America). Those values emerge in works that imaginatively posit "fantastic" situations rooted in biological, spatial, and temporal explorations beyond those currently verified by science. On the basis of films (e.g., "The Terminator", "The Fly"), film clips, TV shows, novels (e.g., "Solaris", "The Futurological Congress"), novellas, and stories, we shall discuss such topics as progress, utopia, human perfectibility, the limits of science, and the nature of knowledge.

<b>Room Characteristics:</b> Media - Data Projector/Monitor(1), PeopleSoft - Scheduled (PS)(1)							

This course examines the phenomenon of vampirism in verbal and visual texts from different time periods in various cultures (Russia, Poland, France, England, America). Why do vampires capture the imagination especially of Anglophone readers? What qualities does the vampire incarnate? Which historical events and customs have triggered particular enthusiasm for depicting the undead? How have the depictions of the vampire evolved over centuries? Our discussions will address these issues as we analyze stories, novels, and films focusing on vampires from a variety of critical perspectives, contextualizing the works in the cultures that produced them.

<p>This course is an examination of a broad range of social theorists, whose ideas have influenced sociology. We will read selections of some of the major works of both classical (principally Marx, Weber and Durkheim) and contemporary theorists with the goal of understanding and critically assessing their leading ideas. Part of this effort will be the task of understanding how the ideas of these thinkers arose in specific social and cultural contexts (i.e., what social problems they thought they were addressing) and in specific intellectual traditions (i.e., what preceding ideas they were borrowing from and bending to their purposes). The course readings and lecture discussions will also emphasize the continuing relevance of these ideas by examining how they are used (in various modified forms) in some current examples of sociological research.</p>
